BNY MELLON GLOBAL FUNDS, PLC

BACKGROUND TO THE COMPANY

The following information is derived from and should be read in conjunction with the full text and definitions section in the prospectus.

STRUCTURE

BNY Mellon Global Funds, plc (the “Company”) was incorporated in the Republic of Ireland as a public limited company on 27 November 2000 with registration number 335837 under the Companies Act 2014, as amended. The Company changed its name from Mellon Global Funds, plc to BNY Mellon Global Funds, plc, effective 3 June 2008.

The Company is an open-ended umbrella type investment

company with variable capital organised under the laws of Ireland, with segregated liability between sub-funds, individually referred to as the “Fund” and collectively the “Funds”. The Company qualifies and is authorised in Ireland by the Central Bank of Ireland (the “Central Bank”) as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”). The Company currently comprises of 48 active Funds as at 31 December 2024 (31 December 2023: 50).

The history of the Funds within the Company as at the date of approval of this report and accounts is as follows:

* Please refer to Note 19 of the financial statements.

A separate pool of assets (a "Portfolio") is maintained for each Fund, each being invested in accordance with the investment objective applicable to the Fund to which the Portfolio relates.

INVESTMENT OBJECTIVE

The assets of each Fund are invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus.

OTHER RELEVANT INFORMATION

Audited annual reports and financial statements and unaudited semi-annual reports are available to the public at the registered office of the Company or on www.bny.com/investments. They can also be sent to shareholders at their registered address.

BNY MELLON GLOBAL FUNDS, PLC

DIRECTORS' REPORT

The Board of Directors of the Company (the "Board" or the "Directors") submit their annual report together with the audited financial statements for the financial year ended 31 December 2024.

PRINCIPAL ACTIVITIES

The investment objective of each of the Funds is outlined in the prospectus and discussed in the Investment Managers' Reports.

DIRECTORS' RESPONSIBILITIES

The Directors are responsible for preparing the Directors' Report and financial statements in accordance with the Companies Act 2014 define as (the "Act"), as amended.

Irish company law requires the Directors to prepare financial statements for each financial year. Under that law, the Directors have elected to prepare the financial statements in accordance with Financial Reporting Standard ("FRS") 102: "The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland" ("FRS 102"). Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company at the financial year end date and of the profit or loss of the Company for the financial year and otherwise comply with the Act, as amended. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and accounting estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards, identify same and note the effect and the reasons for any material departure from same; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The Directors confirm that they have complied with the above requirements when preparing the financial statements.

DIRECTORS' COMPLIANCE STATEMENT

The Directors, in accordance with Section 225 (2) of the Act, acknowledge that they are responsible for securing the Company's compliance with its "Relevant Obligations" as defined in that section and which constitute: (i) certain provisions under the Act, a breach of which is a category 1 or 2 offence; (ii) serious market abuse offences as referred to in Section 1368 of the Act; and (iii) the Irish tax laws referred to in Section 225 of the Act.

It is the policy of the Company to secure compliance with its Relevant Obligations and to foster an environment in the Company which raises awareness of, and promotes a culture of compliance with, those obligations (the "Compliance Policy").

In order to give effect to the Compliance Policy, the Board, with the assistance of the relevant advisers, have identified the Relevant Obligations that they consider apply to the Company.

The Directors confirm that:

- appropriate arrangements and structures (the "Compliance Arrangements") that, in their opinion, are designed to secure material compliance with the Company's Relevant Obligations, have been put in place; and
- a review has been conducted, during the financial year, of the Compliance Arrangements that have been put in place to secure the Company's compliance with its Relevant Obligations.

This Compliance Policy Statement will be subject to periodic review and may be supplemented from time to time. The Compliance Arrangements will be subject to annual review with the aim of establishing that they continue to provide a reasonable assurance of compliance, in all material respects, with the Company's Relevant Obligations.

ACCOUNTING RECORDS

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with FRS 102 and comply with the Act, as amended, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations").

The measures taken by the Directors to secure compliance with the Company's obligations to keep adequate accounting records are the use of appropriate systems and procedures and the employment of competent persons. To this end, BNY Mellon Fund Services (Ireland) Designated Activity Company (the "Administrator") has been appointed for the purpose of maintaining adequate accounting records. Accordingly, the accounting records are kept at One Dockland Central, Guild Street, IFSC, Dublin 1, D01 E4X0, Ireland.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Under the Central Bank UCITS Regulations, the Directors are required to entrust the assets of the Company to a depositary for safekeeping. In carrying out this duty, the Company has appointed The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary"), which provides trustee, depositary and custody services.

The financial statements of the Company are published on the website of BNY Mellon Investment Management EMEA

Limited (www.bny.com/investments). The BNY Mellon Fund Management (Luxembourg) S.A. (the "Manager") is responsible for the maintenance and integrity of the corporate and financial information relating to the Company published on this website. Legislation in the Republic of Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

DISTRIBUTIONS

Distributions to redeemable participating shareholders are recognised in the Statement of Comprehensive Income as finance costs.

Distributions are declared to the extent necessary to enable the Company to pursue a full distribution policy in accordance with the current UK tax legislation.

REVIEW OF BUSINESS AND FUTURE DEVELOPMENT

The Company is an open-ended investment company with variable capital which has been authorised by the Central Bank under the UCITS Regulations. There was no change in the nature of the Company's business during the financial year.

There is a detailed review in the Investment Managers' Reports of factors contributing to the Funds' performance. The Directors do not anticipate any change in the structure or investment objectives of the Company.

RISK MANAGEMENT OBJECTIVES AND POLICIES

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests.

Details of the risks inherent in investing in the Company are disclosed in Note 16 to the financial statements.

RESULTS

The results for the financial year are set out in the Statement of Comprehensive Income.

EVENTS SINCE THE FINANCIAL YEAR END

There have been no significant events affecting the Company since the financial year end other than as disclosed in Note 20 to the financial statements.

RELATED PARTY TRANSACTIONS AND BALANCES

Other than as disclosed in Note 11 to the financial statements, the Directors are not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any beneficial interest as defined in the Act, as amended, at any time during the financial years ended 31 December 2024 and 31 December 2023.

CONNECTED PERSON TRANSACTIONS

In accordance with the requirements of Section 43(1) of the Central Bank UCITS Regulations, any transaction carried out with the Company by its management company or depositary, and the delegates or sub-delegates of such a management company or depositary (excluding any non-

group company sub-custodian appointed by a depositary), and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length.

Such transactions must be in the best interests of the shareholders. In addition to those transactions, there are also transactions carried out by connected persons on behalf of the Company to which the Directors have no direct access and in respect of which the Directors must rely upon assurances from its delegates that the connected persons carrying out those transactions do carry them out on a similar basis.

Shareholders should have regard to the governance structure of the Company as more particularly described in the Corporate Governance Statement section below and the roles and responsibilities of the Company's respective delegates subject to the overall supervision of the Board. Further, shareholders should refer to the prospectus which identifies many of the connected person transactions and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all connected person transactions. Shareholders should also refer to the provisions of the prospectus dealing with conflicts of interest.

Therefore, having regard to confirmations from the Manager and its relevant delegates, the Board is satisfied that:

- (i) there are arrangements (as evidenced by written procedures documented by the Manager) in place to ensure that the obligations described above are applied to all transactions with connected persons; and
- (ii) transactions with connected persons entered into during the financial year complied with these obligations, as attested by the Manager through regular updates to the Directors.

Note 11 details related party transactions during the financial year as required by Section 33 "Related Party Disclosures" of FRS 102. However, shareholders should understand that not all "connected persons" are related parties as defined by Section 33.

CORPORATE GOVERNANCE STATEMENT

The Company is subject to corporate governance practices imposed by:

- (i) The Memorandum and Articles of Association of the Company;
- (ii) The Companies Act 2014, as amended; and
- (iii) The Central Bank UCITS Regulations.

Copies of all of the above documents are available for inspection at the Company's registered office at One Dockland Central, Guild Street, IFSC, Dublin 1, D01 E4X0, Ireland.

On 14 December 2011, the Irish Funds Industry Association ("IF") published a corporate governance code ("IF Code") which may be inspected on/obtained from the IF website (www.irishfunds.ie). It should be noted that the IF Code reflects the existing corporate governance policies imposed on Irish authorised collective investment schemes.

The Directors have reviewed the IF Code and adopted this code on 20 December 2012 following assessment of the measures included in the IF Code as being consistent with its existing corporate governance principles and procedures for the financial year. Consistent with the regulatory framework applicable to investment fund companies such as the Company (and in contrast to normal operating companies with a full time executive management and employees), the Company, consequently, operates under the delegated model whereby it has delegated management (including investment management), administration and distribution functions to third parties without abrogating the Board's overall responsibility. The Board has in place mechanisms for monitoring the exercise of such delegated functions, which are always subject to the supervision and direction of the Board. These delegations of functions and the appointment of regulated third party entities are detailed in the Company's prospectus. In summary, they are:

- (1) The Company has appointed the Manager pursuant to the Management Agreement. Under the terms of the Management Agreement, the Manager has responsibility for the management and administration of the Company's affairs and the distribution of the shares of the Sub-Funds. The Manager is authorised and regulated by the Commission de Surveillance du Secteur Financier ("CSSF").
- (2) The Manager has delegated the performance of the investment management functions in respect of the Company and of its Sub-Funds to the respective Investment Managers as detailed in the prospectus and listed in the directory to these financial statements.

The respective Investment Managers have direct responsibility for the decisions relating to the day-to-day running of the Sub-Funds which they manage and they are accountable to the Board for the investment performance of the Sub-Funds which they manage. The respective Investment Managers have internal controls and risk management processes in place to ensure that all applicable risks pertaining to their management of the Sub-Funds are identified, monitored and managed at all times and appropriate reporting is made to the Board on a regular basis. The Investment Managers are regulated by and under the supervision of the regulator of their operating jurisdiction;

- (3) The Manager has delegated its responsibility as Administrator, Registrar and Transfer Agent to the Administrator, which has responsibility for the day-to-day administration of the Company and the Sub-Funds including the calculation of the net asset values. The Administrator is regulated by and under the supervision of the Central Bank; and

- (4) BNY Mellon Investment Management EMEA Limited and the Manager act as distributors for the Sub-Funds of the Company.

In accordance with the Central Bank UCITS Regulations, the Board is required to entrust the assets of the Company to the Depositary for safekeeping. In carrying out this duty, the Company has appointed the Depositary, which is authorised by the European Central Bank under the supervision of the Central Bank.

The Board receives reports on a regular (and at least quarterly) basis from each of its delegate service providers and the Depositary which enable it to assess the performance of the delegate service providers and the Depositary (as the case may be).

FINANCIAL REPORTING PROCESS – DESCRIPTION OF MAIN FEATURES

The Board is ultimately responsible for overseeing the establishment and maintenance of adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss. The Board has entrusted the administration of the accounting records to the Administrator.

The Board, through delegation to the Administrator, have procedures in place to ensure all relevant accounting records are properly maintained and are readily available, including production of annual and semi-annual financial statements. The annual and semi-annual financial statements of the Company are required to be approved by the Board and filed with the Central Bank. The annual financial statements are also required to be filed with the Companies Registration Office and be audited by independent auditors who report annually to the Board on their findings.

The Company has not established an audit committee. Given the size, nature and complexity of the Company, and the existing processes and procedures adopted by the Company, the Board does not consider that an audit committee is required.

The Board have hired an independent external audit firm to audit the financial statements in accordance with the Act. The Board evaluate and discuss significant accounting and reporting issues as the need arises.

The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Board. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

SHAREHOLDER MEETINGS

The convening and conduct of shareholders' meetings are governed by the Memorandum and Articles of Association

of the Company and the Act, as amended. Although the Board may convene an extraordinary general meeting of the Company at any time, the Board is required to convene an annual general meeting of the Company within eighteen months of incorporation and fifteen months of the date of the previous annual general meeting thereafter provided that an annual general meeting is held within nine months of the end of each accounting period for the Company.

In accordance with the Act, as amended, shareholders representing not less than one-tenth of the paid up share capital of the Company may also request the Board to convene a shareholders' meeting. Not less than twenty one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to shareholders.

Two shareholders present either in person or by proxy constitutes a quorum at a general meeting. Votes may be cast in person or by proxy. On a show of hands, every shareholder who is present in person or by proxy shall have one vote and every management shareholder shall have one vote in respect of all non-participating shares. On a poll, every shareholder is entitled to one vote in respect of each participating share held by him and every management shareholder is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company or at least five shareholders present or a shareholder or shareholders representing at least one tenth of the shares in issue having the right to vote at such meeting may demand a poll.

Shareholders may resolve to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Company or of the shareholders of a particular fund or class requires an absolute majority of the votes cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company or of the shareholders of a particular fund or share class requires a majority of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Memorandum and Articles of Association.

COMPOSITION AND OPERATION OF BOARD OF DIRECTORS AND COMMITTEES

The number of directors may not be less than two nor more than twelve, however the Board may seek approval via an ordinary resolution of the Company to operate with one Director or more than twelve Directors. Currently, the Board of Directors of the Company is composed of six Directors, being those listed in the directory in these financial statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company in accordance with the Companies Act 2014, as amended, or by the Articles of Association of the Company. A Director may, and the company secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the chairman has a second or casting vote.

The quorum necessary for the transaction of business at a meeting of the Directors may be fixed by the Directors and unless so fixed is two. The key management functions of the Manager are delegated to the designated Directors in accordance with its business plan.

The Sub-Fund Application Approval Committee (the "Committee") has been established by the Boards of Directors of the Company and the Manager. It exists primarily to assist the respective Boards in fulfilling their oversight responsibilities with regards to the submission of new Sub-Fund applications or where specifically delegated modifications to existing Sub-Funds or fund documentation (e.g., required as a result of regulatory updates or material changes) to the Central Bank.

DIVERSITY STATEMENT

In recognition of the importance and value of diversity, the Board adopted a Diversity Policy in September 2019, which was ratified at the board meeting in January 2020. The Diversity Policy recognises the benefits of having individuals with diverse background, experience and viewpoints including individuals who contribute to the heterogeneity of the Board. The objective of the Diversity Policy is to promote diversity on the Board. The Diversity Policy will be implemented going forward through ensuring that new appointments to the Board should be made on merit, taking account of the specific skills and experience, independence, and knowledge needed to ensure a rounded board and the diversity benefits each candidate would bring to the overall board composition. There has been six appointments and four resignations to the Board since the Diversity Policy was adopted.

DIRECTORS

The names of the persons who were Directors at any time during the financial year ended 31 December 2024 are set out below:

David Dillon (Irish) (Resigned 12 September 2024)^{^*}
 Greg Brisk (British) (Resigned 26 August 2024)^{^*}
 Claire Cawley (Irish)^{<^*}
 Caylie Stallard (New Zealand)
 Mark Flaherty (Irish) (Resigned 31 March 2025)^{**}
 Sarah Cox (British)
 Sandeep Sumal (British)
 Deirdre Gormley (Irish) (Appointed 11 September 2024)^{*}

All Directors are non-executive Directors.

< Chairman of the Board of Directors

[^] Independent Director

^{*} Please refer to Note 19 of the financial statements.

^{**} Please refer to Note 20 of the financial statements.

DIRECTORS AND SECRETARY'S INTERESTS

The Directors (including their families) and the Secretary, Tudor Trust Limited, had no interests in the shares of the Company at any time during the financial years ended 31 December 2024 and 31 December 2023.

POLITICAL DONATIONS

There were no political donations made by the Company during the financial years ended 31 December 2024 and 31 December 2023.

DISCLOSURE OF INFORMATION TO THE AUDITORS

So far as each person who was a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditors in connection with preparing their report, which they have not disclosed to the auditors. Each Director has taken all the steps that they are obliged to take as a Director in order to make themselves aware of any relevant audit information and to ensure that it is disclosed to the auditors.

INDEPENDENT AUDITORS

The Directors appointed Ernst & Young as auditors for the Company, with effect from 2 September 2014.

Ernst & Young have indicated their willingness to remain in office in accordance with Section 383 (2) of the Act.

On behalf of the Board

Director – **Deirdre Gormley**

Director – **Sarah Cox**

Date: 24 April 2025

BNY MELLON GLOBAL FUNDS, PLC

DEPOSITARY'S REPORT

For the period from 1 January 2024 to 31 December 2024
(the "Period")

The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary", "us" "we", or "our"), has enquired into the conduct of BNY Mellon Global Funds plc (the "Company") for the Period, in its capacity as depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company, in accordance with our role as depositary to the Company and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

RESPONSIBILITIES OF THE DEPOSITARY

Our duties and responsibilities are outlined in Regulation 34 of the of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), as amended (the "Regulations").

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's constitutional documentation and the Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not been so managed, we as depositary must state in what respects it has not been so managed and the steps which we have taken in respect thereof.

BASIS OF DEPOSITARY OPINION

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties and to ensure that, in all material respects, the Company has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the appropriate regulations and (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

OPINION

In our opinion, the Company has been managed during the period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documentation and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional documentation and the Regulations.

BNY MELLON GLOBAL FUNDS, PLC

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF BNY MELLON GLOBAL FUNDS, PLC

OPINION

We have audited the financial statements of BNY Mellon Global Funds, plc ('the Company') for the year ended 31 December 2024, which comprise the Statement of Financial Position, Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders and notes to the financial statements, including the summary of significant accounting policies set out in note 1. The financial reporting framework that has been applied in their preparation is Irish Law and Accounting Standards including FRS 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland issued in the United Kingdom by the Financial Reporting Council.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2024 and of its profit for the year then ended;
- have been properly prepared in accordance with FRS 102 The Financial Reporting Standard applicable in the UK and Republic of Ireland; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019.

BASIS FOR OPINION

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report.

We are independent of the Company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard as applied to public interest entities issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

CONCLUSIONS RELATING TO GOING CONCERN

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's ability to continue as a going concern for a period of at least twelve months from the date when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

OTHER INFORMATION

The Directors are responsible for the other information. The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

OPINIONS ON OTHER MATTERS PRESCRIBED BY THE COMPANIES ACT 2014

In our opinion, based solely on the work undertaken in the course of the audit, we report that:

- the information given in the Directors' report for the financial year ended for which the financial statements are prepared is consistent with the financial statements; and
- the Directors' report has been prepared in accordance with the applicable legal requirements.

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited and the Company statement of financial position is in agreement with the accounting records.

MATTERS ON WHICH WE ARE REQUIRED TO REPORT BY EXCEPTION

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the Directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures required by sections 305 to 312 of the Act, which relate to disclosures of Directors' remuneration and transactions are not complied with by the Company. We have nothing to report in this regard.

RESPECTIVE RESPONSIBILITIES

Responsibilities of directors for the financial statements

As explained more fully in the Directors' responsibilities statement set on page 3, the Directors are responsible for the preparation of the financial statements in accordance with the regulatory framework that give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the parent Company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description_of_auditors_responsibilities_for_audit.pdf

This description forms part of our auditors' report.

THE PURPOSE OF OUR AUDIT WORK AND TO WHOM WE OWE OUR RESPONSIBILITIES

Our report is made solely to the Company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

INVESTMENT MANAGERS' REPORTS

ECONOMIC & MARKET OVERVIEW

Introduction

Global equities rose strongly in the year under review. Stock markets were bolstered by a series of interest rate cuts from the world's major central banks. This occurred against a backdrop of slowing inflation and relatively weak economic growth outside of the US. Corporate earnings growth was also better than expected, which drove share prices higher. Many stock markets, including those in the US, Europe, the UK, India, Brazil and Japan, hit all-time highs. Fixed interest – bonds issued by governments and companies – did not fare as well. Bond yields generally rose, pushing bond prices lower. However, elevated yields generated positive returns across most of fixed income.

This said, it was not all smooth sailing for company shares. Markets experienced pullbacks on occasion, first in April, when expected interest rate cuts were delayed, and again in August, on worries about a slowdown in the US economy. Geopolitical concerns, notably about the escalation of violence in both Gaza and Ukraine, also dimmed investors' enthusiasm at times.

Inflation continued to slow in most economies. This paved the way for policy interest rate cuts from most major central banks. Having been the last to raise interest rates, in September 2023, the European Central Bank (ECB) was the first to cut them in June 2024. The ECB subsequently lowered rates three more times. The US Federal Reserve (Fed) delayed its first rate reduction until September but then cut by a bigger-than-expected 0.5%. US rates were cut again in November and December. The Bank of England (BoE) also cut its benchmark interest rate twice before pausing in December. The Bank of Japan (BoJ) was a major exception to this trend. Policymakers raised the key rate for the first time in 17 years in March and again in July from a very low base in an effort to normalise policy. The Central Bank of Brazil also increased rates three times as inflation in the country picked up.

The global economy remained sluggish, with GDP growth remaining low in many countries. The US economy was impressively resilient, and India enjoyed slow but steady growth, but economic outlooks elsewhere were somewhat weak. China undershot its target for GDP growth in several quarters. The eurozone and the UK faced tough economic conditions thanks to weak industrial activity and consumer spending. Economic momentum in Japan was also relatively weak.

North America

The US market surged over the year, frequently hitting new highs, and outperformed other global equity markets. Investors were optimistic that the Fed would cut interest rates as inflation eased. Strong company earnings also boosted US equities, with technology companies the clear standouts. Stocks involved in artificial intelligence did particularly well.

Headline inflation fell to a three-year low of 2.4% in September, though had inched up a bit by year's end. Falling gasoline prices were a key factor behind the lower inflation rate.

The Fed cut interest rates three times by the end of the year. Chairman Jerome Powell noted inflation pressures had largely abated. However, the central bank warned in December that the pace of interest rate cuts would be slower in 2025.

The US economy grew by 3.0% and 3.1%, respectively, in the second and third quarters of the year. This was a big improvement from early 2024. Unemployment rose, but never enough to threaten economic growth.

Europe (including UK)

European stock markets rose, but underperformed global equities. They were driven by hopes of interest rate cuts as inflation fell and economic growth floundered. The UK did better than Continental European markets. Stock markets in the UK, Germany and France all hit all-time highs during the year.

Inflation fell across the region. Eurozone and UK inflation both hit 1.7% in September, the lowest reading each region had seen early 2021. Falling energy and food prices helped drive inflation lower. However, it began to pick up again as the year came to a close.

These easing price pressures allowed the ECB and BoE to cut interest rates. The ECB was the first to cut rates in June, ultimately reducing its deposit rate from 4.0% to 3.0% by December. The BoE cut rates twice, taking borrowing costs to 4.75%.

The eurozone enjoyed a pick-up in growth in the third quarter, with the economy expanding. Growth was admittedly muted, however. The UK's slowdown was more pronounced. Having achieved quarterly growth of 0.7% in the first three months of 2024, it failed to grow at all in the third quarter.

Asia

Asian markets rose but underperformed developed world markets. Interest rate cuts, falling inflation and strong earnings growth boosted the regional indices. Still, concerns about China's economic outlook and geopolitical tensions limited gains.

Taiwan was the best-performing market in Asia thanks to strong growth in its technology sector. Indian shares did well for much of the year but faded as economic growth slowed. Chinese markets picked up in the second half of the year on hopes that the government would announce an economic stimulus package. Japan's fortunes were reversed: its local Nikkei 225 Index hitting a 34-year high in February before becoming more subdued later in the year.

Inflation declined across much of Asia. In China, annual inflation fell to a multi-decade low of -0.8% in January. It rose from there, but failed to exceed 0.6%. India was an exception; rising food prices drove inflation higher in the autumn months.

China's central bank lowered key interest rates as economic growth stalled. The Bank of Korea also cut rates as its economy contracted. The BoJ raised rates for the first time in 17 years in March and again in July.

India's economy was stronger than most, but nevertheless slowed. China's economy remained challenged by its real estate sector. It failed to hit the government's 5.0% target in either the second or third quarter.

Fixed Income

Government bond prices fell in sterling terms. Falling interest rates and inflation helped bond prices rise early in the year, but fears about inflation reaccelerating sent bond yields higher into year-end.

Corporate bonds (debt issued by companies) fared better as investors took advantage of the higher yields on offer.

Currency and Commodities

The US dollar strengthened against other currencies despite a dip in early autumn. The strength of the US economy and the Fed's initial caution about cutting rates supported the dollar. Donald Trump's election victory sent it higher in November.

Sterling weakened against the US dollar but rose against the euro as the ECB cut interest rates.

The Japanese yen weakened substantially against the US dollar, and hit a 38-year low in early July.

Commodity prices rose in aggregate, spurred by falling interest rates and a better outlook for economic recovery.

Industrial metals, such as copper, aluminium and zinc, all traded higher on tighter supplies. Gold set a series of all-time highs during the period. The precious metal was supported by falling interest rates and its 'safe-haven' status.

Oil prices ended the year roughly flat. Concerns about lacklustre demand were offset somewhat by OPEC reining in production.

All performance data is from 1 January 2024 to 31 December 2024: Total return, based on net asset value, including charges, but excluding initial charge, income reinvested gross of tax, expressed in local currency terms unless otherwise stated, sourced from Lipper IM.

ALTERNATIVES

BNY MELLON ABSOLUTE RETURN BOND FUND

Over the twelve months under review, the Fund's Euro S share class returned 8.02%, net of fees, compared with 3.63% for the 3 Month EURIBOR benchmark, in euro terms.

The manager helped to produce this positive return by keeping a close eye on the Fund's investments in both government bonds and corporate bonds and adjusting them in response to movements in the markets.

In the first half of the year, a better outlook for global growth boosted corporate bonds. The manager positioned the Fund to benefit from this. European corporate bonds with high investment grade ratings helped returns too.

In government bonds, the manager's country selection worked well. The Fund benefited from favouring Italy over Germany and Australia over Canada.

The manager anticipated a rally in US government bonds. This worked well as inflation fell in the early summer months and central banks then began to cut interest rates.

Holdings in inflation-linked bonds issued by governments added to returns. Here, the manager favoured bonds denominated in US dollars over those denominated in euros.

The manager's choice of corporate bonds also helped the Fund's returns.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON ABSOLUTE RETURN CREDIT FUND

In the twelve months under review, the Euro W share class of the Fund returned 6.06%, net of fees, compared with 3.63% for the 3 Month EURIBOR benchmark.

Keeping a close eye on investments in corporate bonds (those issued by a company as opposed to by a government) and adjusting them in response to movements in the markets helped achieve this return.

In the opening quarter of 2024, a better outlook for global GDP growth boosted corporate bonds. The manager positioned the Fund to benefit from these market conditions. Investments in high-quality corporate bonds valued in euros helped returns.

Holdings in corporate bonds did well until June, when bond prices fell after a surprise announcement that elections would be held in France.

In the autumn months, investments in corporate bonds performed well as major central banks cut interest rates.

In the last three months of the year, corporate bonds weakened as the US Federal Reserve warned the pace of interest rate cuts would slow in 2025. The manager's investment in asset-backed securities and loans helped offset the impact of weaker bond markets.

ALTERNATIVES cont'd

BNY MELLON ABSOLUTE RETURN CREDIT FUND cont'd

Currency allocation helped returns. The manager favoured the US dollar, which rose on expectations US interest rates would stay high.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON ABSOLUTE RETURN GLOBAL CONVERTIBLE FUND

Over the twelve months under review, the Fund's USD U (Acc.) share class returned 7.67%, net of fees, compared with 5.34% for the SOFR 30-Day Compounded, both in dollar terms.

The manager helped to produce this positive return by keeping a close eye on the Fund's investments in convertible bonds (corporate bonds that can be converted into company shares) and adjusting them in response to market movements.

In the first quarter of 2024, a better outlook for US growth boosted corporate bonds. The manager positioned the Fund's holdings to gain from this.

In the second quarter, corporate bonds were dragged down by weakness in government bonds. Some of the Fund's holdings that had performed well earlier in the year lost ground at this time.

Subsequently, both corporate bonds and share prices were boosted by the first US interest rate cut in four years in September. The Fund's holdings in a French software and automation company and a leading Chinese technology did well.

As interest rates in the US and Europe fell further during the last quarter of 2024, holdings in a US construction company, a leading German engine manufacturer and a US multinational entertainment group performed well.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON DYNAMIC FACTOR PREMIA V10 FUND

In the twelve months under review, the Fund's USD W (Accumulation) share class rose by 9.33%, net of fees, against 5.45% for the ICE BofA US 3-Month Treasury Bill Index.#

The Fund's strong return came largely from its trend positions. These aim to help the Fund by tracking price movements in the markets. Among the best performers here was a long position in the US dollar.

The US dollar made gains as investors looked to Donald Trump's return to the White House and his America-first policies. This, paired with delayed interest rate cuts, pushed the dollar up to highs not seen since the autumn of 2022. The Fund's short positions in the Swiss franc, the Korean won and the Japanese yen added most to returns. All three currencies lost ground against the dollar.

Among the emerging market currencies that offer high yields, the Mexican peso, the Hungarian forint and the Brazilian real all hurt the Fund's returns.

In government bond markets, a short position in the five-year Euro Area bond worked well for the Fund.

Effective 17 July 2024, the benchmark changed from the FTSE 3 Month US T Bill Index to the ICE BofA US 3-Month Treasury Bill Index. Benchmark past performance prior to this date was for the FTSE 3 Month US T Bill Index.

Newton Investment Management North America LLC
January 2025

EQUITY

BNY MELLON ASIAN INCOME FUND

During the twelve months under review, the USD W (Inc.) share class of the Fund rose by 5.77%, net of fees, against a return of 10.18% for the FTSE Asia Pacific ex Japan TR Index.

Compared with those of the benchmark index, the Fund's holdings performed less favourably.

By sector, they were weakest in communication services and financials. The decision to own less stocks from China and more from Indonesia than the benchmark also weighed on returns.

On the positive side, exposure to some technology companies worked well. Among these were Taiwan Semiconductor and MediaTek. Shares in financials stocks DBS Group and Singapore Exchange were strong, too.

The weakest stock position was in Samsung Electronics. This was due to disappointing earnings. Some telecommunication stocks also detracted from returns. Among these shares were Spark New Zealand and PT Telkom Indonesia. Not owning shares in large Chinese internet firm Tencent also hurt returns. The Fund's yield criteria mean it cannot hold Tencent.

The manager added shares in the financials sector, including in Hong Kong Exchanges & Clearing and HSBC, as well as some utility and consumer discretionary stocks. Profits were taken in several technology shares that had performed well, including Taiwan Semiconductor, Infosys and Advantech.

Newton Investment Management Limited
January 2025

BNY MELLON ASIAN OPPORTUNITIES FUND

Over the twelve-month period under review, the Fund's USD A share class generated a return of 9.28%, net of fees, against a return of 10.63% for the MSCI AC Asia Pacific ex Japan TR Index.

The manager's sector preferences worked well over the year. The Fund added value by being more invested in information technology and less invested in materials than the benchmark. A low weighting in Korea aided returns too.

The manager's choice of stocks was less successful. The weakest stock performances came from the financials sector. Here, PT Bank Rakyat Indonesia and AIA Group were weak. By region, the Fund's Chinese stocks detracted significantly. Among these were Shenzhen Inovance Technology and Kanzhun.

The Fund's best stock performances came from consumer discretionary companies. India's Zomato and China's Trip.com were the two top performers over the year.

The manager added shares in the technology sector. These included SK Hynix, which makes memory chips, MediaTek, which makes chips for smart phones, and Sinbon Electronics, which makes cables and connectors. Late on in the year, the manager bought a stake in Chinese sportswear firm Anta Sports.

Fast food stock Yum China was sold in light of weaker consumer demand in China, and Prudential was sold after strong performance. Earlier in the year, the manager had reduced exposure to Asian insurers.

Newton Investment Management Limited
January 2025

BNY MELLON BLOCKCHAIN INNOVATION FUND

In the twelve months under review, the USD W (Accumulation) share class of the Fund returned 18.84%, net of fees, against 17.49% for the MSCI All Country World Net Return Index.

Stock markets made strong gains in 2024, driven by artificial intelligence and cuts to interest rates.

The Fund's holdings in semiconductors and semiconductor equipment did well, thanks to surging demand for chips. Stock choices in software worked well too.

Stock choices in entertainment detracted from returns. This came as growth in streaming revenue fell. The Fund's choice of stocks in IT services also hurt its performance.

The manager increased the Fund's weightings in semiconductors and semiconductor equipment and interactive media and services. The weightings in health care providers and services and air freight and logistics were reduced.

In 2024, two events had a major impact on the cryptocurrency landscape. The first, in January, was the launch of US spot bitcoin exchange-traded funds. The second was Donald Trump's US election win. The shift to an administration that supports cryptocurrency raised hopes for a more favourable environment for digital assets in the US. The Fund manager believes this could allow greater access to capital, spur innovation and allow firms to interact with blockchain technology on a larger scale.

Newton Investment Management North America LLC
January 2025

BNY MELLON BRAZIL EQUITY FUND

In the twelve months under review, the USD A share class of the Fund returned -25.53%, net of fees, compared with a return of -30.71% for the MSCI Brazil 10/40 NR Index.

The manager's choice of company shares in the consumer basic and education sectors led to the negative return.

Being less invested in oil & gas than the benchmark also hurt returns.

More positively, choices about which shares to invest in in the food processors industry helped the Fund do better than the benchmark. Being more invested than the index in this area helped, too. Certain investments in global capital goods, such as shares of Embraer, added to returns. The manager's stock selection in logistics also boosted the Fund's performance when compared with the benchmark.

EQUITY cont'd

BNY MELLON BRAZIL EQUITY FUND cont'd

During the year, the manager sold the Fund's shares of certain supermarkets and utilities companies, as well as a healthcare stock. A position in a logistics firm was sold after the company agreed to be taken private.

The manager bought shares in retail and financials firms.

ARX Investimentos Ltda

January 2025

BNY MELLON DYNAMIC U.S. EQUITY FUND

During the twelve-month period under review, the Fund's USD A (Inc.) share class produced a return of 21.64%, net of fees, against 24.50% for the S&P 500 NR Index.

Though the Fund made an overall positive return, being underweight in company shares, which did very well in 2024, meant it underperformed the index. As the stock market rallied, the Fund was hurt by both its defensive positioning and its use of options. These options helped the Fund over the year by increasing its participation in the stock-market rally. But as the market did not sell off in 2024, the insurance that options can provide came at a small overall cost.

A long position in US Treasury bonds also detracted from the Fund's returns. The Fund bought more Treasuries in July. But in the last three months of the year, concerns about inflation and the US deficit pushed bond yields higher (and bond prices down), which hurt the Fund's returns.

The Fund still has a defensive position in equities. This stance is paired with options that allow the Fund to move to an underweight position in equities when the stock market sells off. The Fund also has a small part of its assets in long-dated US Treasury bonds, where yields now look more attractive.

Newton Investment Management North America LLC

January 2025

BNY MELLON GLOBAL EMERGING MARKETS OPPORTUNITIES FUND*

In the almost twelve months from 1 January 2024 to the Fund's closure on 10 December 2024, the USD A share class of the Fund produced a return of 6.04%, net of fees, against a return of 10.97% for the MSCI Emerging Markets NR Index.

Choices about which sectors to invest in worked well. Being less invested in the materials sector than the benchmark proved positive. Having a larger stake in the information technology (IT) sector also helped returns. Shares of the Fund's Indian stocks surged, including Zomato and Info Edge. Industrials holdings, such as Sungrow Power Supply and CATL, also did well.

The manager's choice of company shares in the financials sector detracted. Within the sector, shares of XP, AIA Group and Banco del Bajio all dented returns. The Fund's consumer staples stocks were also weak. This included Wal-Mart de Mexico and Dino Polska.

The manager bought shares in chipmaker SK Hynix. The firm is a top supplier of memory devices to Nvidia. Within the IT sector, the manager also bought shares of Sinbon, ASE Technology, and MediaTek. Leading Chinese sportswear maker Anta Sports was added, too.

Fast-food firm Yum China was sold due to increasing competition. Shares in Samsung Electronics, B3, XP and Chailease were exited to fund better opportunities elsewhere. Pidilite was sold following strong share-price performance.

Newton Investment Management Limited

January 2025

BNY MELLON GLOBAL EQUITY INCOME FUND

During the twelve-month review period, the Fund's USD A share class generated a return of 6.19%, net of fees, against a return of 17.96% for the FTSE World TR Index.

The manager's choice of company shares to invest in weighed on returns. By sector, the Fund's stocks were weakest in consumer discretionary (non-essential items) and financials. By region, they detracted the most in North America. Another negative factor was being less invested in technology than the benchmark.

At the stock level, the Fund was helped by its industrial shares, such as Johnson Controls International. Shares in Chroma ATE and Anglo American also did well.

Not owning shares in AI stocks Nvidia and Broadcom weighed on returns. The Fund's strict yield requirement prevents the manager from buying many technology stocks. Shares in Samsung Electronics were weak on disappointing earnings.

The manager bought shares in car firm Stellantis, which is launching new models in the US. Two new Swedish early-cycle industrial companies, SKF and Sandvik, were added on a good outlook for earnings. The manager chose to sell Nestle given weaker demand and higher costs. Other sales included Tyson Foods, Roche, Zurich Insurance and Unilever.

Newton Investment Management Limited

January 2025

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND

In the twelve months under review, the USD W (Acc.) share class of the Fund rose by 12.30%, net of fees, versus a return of 14.05% for the S&P Global Infrastructure NR Index.

Being less invested in the industrials sector (namely transportation infrastructure) than the benchmark helped the Fund produce a positive return. A lone holding in the real estate sector, which the benchmark was not invested in, also helped boost returns.

A poor choice of energy shares detracted from the Fund's performance. Certain stocks from the communication services sector weighed on returns too, especially since the index was not invested in this area of the market.

EQUITY cont'd

BNY MELLON GLOBAL INFRASTRUCTURE INCOME FUND cont'd

The manager bought more stock in the industrials and real estate sectors during the year. Some shares in the communication services and energy sectors were sold.

Newton Investment Management North America LLC

January 2025

BNY MELLON GLOBAL LEADERS FUND

In the twelve-month period under review, the Fund's USD A (Acc.) share class returned 4.78%, net of fees, versus 18.67% for its benchmark, the MSCI World NR Index.

Company shares from information technology companies detracted. The Fund's holdings in this sector rose by 14% during the year but did not do as well as those held by the sector benchmark. The index was led up by the strength of the 'Magnificent Seven' group of companies. The Fund owns just three of the Magnificent Seven: Alphabet, Amazon and Microsoft.

Holdings based in emerging markets made a positive contribution to the Fund's returns over the year.

The financials sector dented the Fund's returns. The Fund was less invested in the sector than the benchmark, which proved a detriment, as financial firms did very well over the year. By contrast, the Fund's underweight position in the materials sector was helpful.

During the year, the Fund bought shares of Amazon.com, Deere, Ferguson, Mettler Toledo International and O'Reilly Automotive.

Walter Scott & Partners Limited

January 2025

BNY MELLON GLOBAL OPPORTUNITIES FUND

Over the twelve-month review period, the USD A share class of the Fund generated a return of 18.43%, net of fees, against 17.49% for the MSCI AC World NR Index.

The manager's selection of shares added value. By sector, the best returns came in industrials. By region, they came from North America. Shares in GE Vernova, a US provider of energy solutions, were strong on positive earnings momentum. Trane Technologies, another US industrials firm, also did well. The share prices of financials Goldman Sachs and Barclays were strong too.

The manager's sector preferences worked well. The Fund gained from being more invested in information technology (IT), and less invested in materials, than the benchmark.

On the negative side, the IT stocks held in the Fund weighed on returns. While SAP and Taiwan Semiconductor did well, Samsung Electronics was notably weak. Higher weightings in Europe and the UK detracted as well.

The manager bought stakes in financial group London Stock Exchange, animal medicine firm Zoetis, Chinese fast-food chain Yum China and GE Vernova, among others. Earlier in the year, stakes were bought in Siemens and Samsung Electronics.

The holdings in Ecolab, Dassault Systemes, Diageo and Novonesis were sold.

Newton Investment Management Limited

January 2025

BNY MELLON JAPAN SMALL CAP EQUITY FOCUS FUND

In the twelve months under review, the Fund's JPY W share class returned 19.05%, net of fees, compared with 16.36% for the Russell/Nomura Small Cap TR Index, in Japanese yen terms.

The manager's choice of company shares to invest in helped the Fund achieve this strong return.

Being more invested in the pharmaceutical and glass & ceramic products industries than the benchmark was helpful. Being less invested in banks also boosted returns.

A lack of investment in nonferrous metals did little to help returns, as did a comparatively smaller stake in other products and chemicals.

As for company shares, the main contributors to performance included Rakuten Bank, PeptiDream, and M-up Holdings. Shares of Enplas, Vector, and Minkabu The Infonoid detracted.

The manager bought shares in Daihen, Aica Kogyo, Kosaido Holdings, PeptiDream, Japan Material, Carlit, And Saizeriya. Shares of Yonex, Enplas, Zenkoku Hosho, Direct Marketing Mix, Minkabu The Infonoid, Kosaido Holdings, and Ulvac were sold.

By the end of the year, the Fund was invested in 30 companies.

Newton Investment Management Japan Ltd

January 2025

BNY MELLON LONG-TERM EUROPEAN EQUITY FUND

During the twelve months under review, the Euro W (Acc.) share class of the Fund returned 2.87%, net of fees, versus 8.59% for its benchmark, the MSCI Europe NR Index.

The main positive contribution came from the consumer discretionary sector. Here, the Fund's holdings outperformed their sector benchmark. The Fund's choice of stocks and large position in information technology also worked well.

On the other side, the main negative contribution came from the financials sector. This was largely because the Fund held less than the benchmark here. Weakness in the Fund's industrials and healthcare stocks also hurt its returns for the year.

EQUITY cont'd

BNY MELLON LONG-TERM EUROPEAN EQUITY FUND cont'd

By country, the Fund's holdings in the UK, Switzerland, France and Germany were weak over the year. Holdings in the Netherlands and Denmark performed well, though they made fairly small contributions.

During the year, the manager bought two new stocks: Schott Pharma and The Sage Group. There were four complete sales: Carl Zeiss Meditec, Nestle, Prudential and Victrex.

Walter Scott & Partners Limited
January 2025

BNY MELLON LONG-TERM GLOBAL EQUITY FUND

Over the twelve months under review, the Euro A share class of the Fund returned 13.29%, net of fees, versus 26.60% for the MSCI World NR Index, both in euro terms.

At the sector level, information technology hurt returns the most. The Fund's holdings in the sector rose strongly but less so than those held by the benchmark, which was led up by the 'Magnificent Seven' group of companies. The Fund held just two of these stocks: Alphabet and Microsoft.

Financials and industrials also acted as a drag on returns. This was because the Fund's holdings in these sectors underperformed the stocks the index held. This was mainly driven by concerns about China and a slowdown in global manufacturing.

The Fund's lack of holdings in the energy, utilities and real estate sectors was positive for returns.

By region, the US was the main negative. The Fund's holdings here did not do as well as those held by the benchmark. On the positive side, the Fund's exposure to emerging market positions the index did not hold made a strong contribution to returns.

During the year, the manager bought shares of Copart, Ferguson, ResMed and Visa. There were five complete sales: the manager sold the Fund's shares in Cognex, Dassault Systemes, Nestle, Prudential and The Walt Disney Company.

Walter Scott & Partners Limited
January 2025

BNY MELLON MOBILITY INNOVATION FUND

In the twelve months under review, the USD A (Acc.) share class of the Fund returned 2.43%, net of fees, against 17.49% for the MSCI AC World NR Index.

Unfavorable stock selection and overweight positioning in automobile components detracted from relative performance. Challenging stock selection in software also weighed on relative returns.

The Fund's large position in electrical equipment helped its performance. The manager's choice of stocks in hotels, restaurants and leisure also worked well.

The manager increased the Fund's weightings in electrical equipment and electronic equipment, instruments and components. Investments in software and automobile components were reduced.

Sales of electric vehicles have been weak in Europe and the US, but the manager believes that they could start to grow once cheaper models and lower interest rates are on offer.

Newton Investment Management North America LLC
January 2025

BNY MELLON SMALL CAP EUROLAND FUND

In the twelve months under review, the Euro A share class of the Fund returned -2.38%, net of fees, versus a return of 2.49% for the S&P EuroZoneSmallCap TR Index.

Positions in certain company shares from Spain proved unhelpful. This contributed to the disappointing return.

On the other hand, the manager's choice of shares from Italy helped to temper losses. Shares in financial firms did well.

By sector, communications services stocks did well. The manager's choice of stocks from Italy and France added to the Fund's returns. This was offset, however, by the Fund's consumer discretionary shares, namely those from Germany.

The manager bought more shares in the utilities and financials sectors during the twelve months under review. Some industrials and technology stocks were sold.

Newton Investment Management North America LLC
January 2025

BNY MELLON SUSTAINABLE GLOBAL EMERGING MARKETS FUND

Over the twelve-month review period, the Fund's USD W (Acc.) share class produced a return of -2.92%, net of fees, against a return of 7.50% for the MSCI Emerging Markets NR Index.

Weak stock selection was the key factor behind the Fund's lower return. Company shares from the financials sector detracted. Shares of Chailease Holding, PT Bank Rakyat Indonesia and HDFC Bank all dented returns. Selected information technology stocks, such as Flat Glass and Samsung SDI, also did poorly. The manager's choice of stocks from China was similarly unhelpful. A lack of investment in internet stock Tencent was a detriment.

On the positive side, shares of industrials firms did well. These included CATL and Sungrow Power Supply. Not owning Samsung Electronics also aided returns, as the firm's earnings growth was not as strong as was expected. Being less invested in materials than the benchmark also helped.

The manager bought shares of MediaTek. The manager also added to the Sub-fund's positions in CATL, NARI Technology and Supreme Industries.

The manager sold shares of Samsung SDI owing to a loss of faith in its prospects. Reductions were made to Bank Rakyat

January 2025

BNY MELLON SUSTAINABLE GLOBAL EQUITY FUND

In the twelve-month period under review, the USD A share class of the Fund produced a return of 18.10%, net of fees, compared with 17.49% for the MSCI AC World NR USD Index.

The Fund's positive return for the year was helped by its stock-picking in the US. This worked particularly well in the information technology and industrials sectors. Stock selection was also strong in emerging markets.

Some of the main detractors came from healthcare and financials. These were both sectors in which the Fund held larger positions than the benchmark.

The best stock contributors were Nvidia, which makes microchips, and GE Vernova, which makes energy equipment. In emerging markets, the standout was Taiwan Semiconductor; like Nvidia, it gained on excitement about artificial intelligence.

Stock detractors included Icon and Edwards Lifesciences in the healthcare sector. In financials, weak performance from Bank Rakyat Indonesia and AIA Group weighed on returns.

During the year, the Fund bought new holdings in eyecare firm Alcon, consulting group Tetra Tech and drug maker UCB. The Fund sold out of healthcare companies Edwards Lifesciences and Novonesis.

Newton Investment Management Limited
January 2025

BNY MELLON U.S. EQUITY INCOME FUND

In the twelve months under review, the USD C (Inc.) share class of the Fund returned 13.73%, net of fees, against 24.50% for the S&P 500 NR Index.

The manager's choice of company shares from the utilities sector added the most to its return for the year. The Fund's lack of holdings in the real estate sector also added to returns, as this sector did poorly.

On the other hand, the Fund's returns were hurt by its low weighting and choice of stocks in the information technology (IT) sector. The Fund did not own some of the stocks that did the best over the year. Returns were also hurt by being less invested in the consumer discretionary sector than the benchmark. The manager's choice of stocks within that sector hampered returns, too.

During the year, the manager bought more shares in the IT and industrials sectors. The holdings in the healthcare and energy sectors were decreased.

FIXED INCOME

BNY MELLON EFFICIENT EURO HIGH YIELD BETA FUND*

In the six months from the Fund's launch on 24 June 2024 to 31 December 2024, its EUR W (Acc.) share class returned 4.75%, net of fees, versus 5.12% for the ICE BofA Euro Developed Markets High Yield Constrained Index.

The manager's focus on higher-quality bonds, as well as value bonds, helped the Fund make a good return.

Being exposed to the European iTraxx Index also proved useful. The avoidance of bonds from firms with poor environmental, social and corporate governance scores led to a gain as well.

Bonds from Standard Profil Automotive and Altice France, which are both facing restructuring, hurt returns.

Being less invested in Selecta Group and Intrum AB partially offset some other losses.

Transaction costs, management fees, and Fund expenses also detracted a bit.

Insight North America LLC
January 2025

BNY MELLON EFFICIENT GLOBAL HIGH YIELD BETA FUND

Over the twelve months under review, the USD A (Inc.) share class of the Fund returned 8.47% net of fees, compared with 9.03% for the Bloomberg Global High Yield Corporate TR Index USD Hedged.

High yield corporate bonds (bonds issued by companies that are riskier than investment grade bonds) performed well early in the year. They weakened in the spring, however, as government bond yields rose (and bond prices fell).

In the first half of 2024, the Fund's 'model-driven' components helped achieve a positive return, offsetting weaker performance by fallen angel bonds (those that have recently lost their investment grade status).

The manager's choice of bonds detracted from returns, notably in the communications and other financials sectors.

In the autumn, interest rate cuts from the major central banks boosted corporate bond markets. This helped the Fund's return.

The choice of bonds in sectors that are more dependent on discretionary consumer spending was a positive factor, though investments in technology and other financials lost ground.

In the last three months of the year, high yield corporate bonds withstood weakness in government bond markets. In this period, the Fund was helped by its focus on bonds that provide a high level of income.

Insight North America LLC
January 2025

BNY MELLON EFFICIENT GLOBAL IG CORPORATE BETA FUND*

In the almost twelve-month period from 1 January 2024 to the Fund's closure on 10 December 2024, the USD W (Acc.) share class of the Fund produced a return of 15.08%, net of fees, versus a return of 14.85% for the Bloomberg Global Aggregate Corporate Bond USD Hedged TR Index.

The manager's focus on value bonds, which cost less to invest in, helped the Fund make this positive return.

The Efficient Allocation factor, in which the Fund invests more heavily in short-dated lower-quality bonds rated BBB, detracted a bit. However, market completion factors helped offset this small loss.

The manager's choice of bonds to invest in also added to returns.

Insight North America LLC
January 2025

BNY MELLON EFFICIENT U.S. FALLEN ANGELS BETA FUND

Over the twelve months under review, the Fund's USD A (Acc.) share class returned 4.48%, net of fees, compared with 6.79% for the Bloomberg US HY Fallen Angel 3% Cap TR index.

The Fund's investments in corporate bonds (bonds issued by companies as opposed to governments) led to a positive return but lagged the benchmark over the year.

In the first three months of 2024, the weakness of the Fund's holdings in 'fallen angel' bonds (those that have lost their investment grade status) offset rising corporate bond prices as the US economic outlook improved.

In the first half of the year, bonds from the telecommunications sector struggled most.

Meanwhile, some bonds from sectors that tend to perform well when economic conditions are good unexpectedly lost ground. These included bonds issued by a US retailer that reported disappointing earnings results.

In the autumn, corporate bonds were boosted by the first US interest rate cut in four years. While this helped bonds in the telecommunications sector, the Fund did not hold bonds with the lowest credit rating, which did the best.

In the last three months of the year, however, this benefited the Fund, as low-quality bonds were weak.

Insight North America LLC
January 2025

BNY MELLON EFFICIENT U.S. HIGH YIELD BETA FUND

In the twelve months under review, the Fund's USD A (Inc.) share class rose by 7.73%, net of fees, versus 8.19% for the Bloomberg US Corporate High Yield TR Index.

FIXED INCOME cont'd

BNY MELLON EFFICIENT U.S. HIGH YIELD BETA FUND cont'd

Management of the Fund's investments in high yield corporate bonds (those issued by companies considered riskier than those with investment grade rated bonds) in response to market movements helped to achieve this return.

In the first three months of the year, Fund's investments in some of the highest-quality issuers in the high yield asset class helped returns. Bonds in the telecommunications sector weakened and so hurt returns.

In the second half of 2024, as inflation fell and US interest rates were cut, bonds with lower credit ratings did better than higher-quality bonds. This was unhelpful for the Fund.

Limited exposure to riskier bonds in the telecommunications sector dented returns. These bonds did very well, helped by optimism about the potential for artificial intelligence.

In the final three months of the year, the Fund was helped by a focus on bonds offering higher interest payments.

Insight North America LLC
January 2025

BNY MELLON EMERGING MARKETS CORPORATE DEBT FUND

Over the twelve months under review, the USD A share class of the Fund returned 7.20%, net of fees, compared with 7.63% for the JP Morgan Corporate Emerging Market Bond Index Broad Diversified (CEMBI - BD) TR Index.

The Fund's positive return was achieved through close management of its investments in corporate bonds (those issued by companies rather than governments).

In the early months of the year, a better outlook for global growth boosted corporate bonds. The manager positioned the Fund to benefit from this. Bonds from the financial sectors worked well in this period.

In the autumn, emerging market bonds made strong gains, helped by an interest rate cut from the US Federal Reserve (Fed).

Holdings in the financials and telecommunications sectors helped returns in this part of the year.

In the last three months of the year, corporate bonds fell as the US Fed warned that the pace of rate cuts would slow in 2025.

At this time, the manager adopted a more cautious approach, favouring Eastern Europe and Africa over Asia and the Middle East.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON EMERGING MARKETS DEBT FUND

In the twelve months under review, the USD A (Acc.) share class of the Fund rose by 7.81%, net of fees, compared with a return of 5.73% for the JP Morgan Emerging Markets (EMBI) Global TR Bond Index benchmark.

The Fund's investments in Argentina added to returns in the year. Policies aiming to tackle inflation, reduce public spending and deregulate the domestic economy boosted the Argentinian bond market.

Bonds from Ecuador also helped returns. Investments in bonds from Ukraine and Ghana were also positive contributors for the Fund as debt restructuring in both countries went on.

Elsewhere, investments in Turkey made a healthy return. The country's central bank reduced interest rates for the first time in almost two years as inflation began to decline.

The Fund was less invested in China than the benchmark was. This helped performance. In December, the Chinese renminbi fell to its lowest level against the US dollar for a year thanks to growing concerns about the impact of potential US trade tariffs.

Bonds from Bahrain and Pakistan and investments in Romania, Sri Lanka and Venezuela were less helpful.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND

Over the twelve months under review, the Fund's USD A (Acc.) share class returned -4.92%, net of fees, compared with a return of -2.38% for the JP Morgan GBI-EM Global Diversified TR Index benchmark.

In the first half of the year, the Fund's investments in Mexico, Brazil and Russia hurt its returns. So did some of the Fund's currency positions, among them the Thai baht and the Korean won.

Later in the year, local currency bonds made gains. These came as encouraging US economic indicators, an interest rate cut from the US Federal Reserve and a package of measures in China meant to support the domestic economy combined to boost emerging markets.

The Fund's investments in Colombia performed well. Holdings in Thailand, South Africa and Turkey helped returns, too.

In the last three months of 2024, emerging market local currency bonds fell back sharply, particularly in Latin America. They were dragged down by weakness in US government bonds and the strength of the US dollar. Investor confidence was hurt further by the prospect of trade tariffs under the Trump administration. Conflict in the Middle East also weighed on bond prices.

FIXED INCOME cont'd

BNY MELLON EMERGING MARKETS DEBT LOCAL CURRENCY FUND cont'd

During this period, the Fund's investments in Colombia, Brazil, Peru and Turkey were unhelpful for returns.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON EMERGING MARKETS DEBT OPPORTUNISTIC FUND*

In the 10 months from 1 January 2024 to the Fund's closure on 30 October 2024, the USD C (Acc.) share class of the Fund returned 4.09%, net of fees, compared with a return of 3.46% for the benchmark, a composite comprising 50% JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 25% JP Morgan Emerging Markets Bond Index Global TR Index, 25% JP Morgan Corporate Emerging Markets Bond Index Diversified TR Index, both in US dollar terms.

In the first six months of the year, the Fund's investments in bonds from China, Singapore, India, Nigeria, Mexico, Brazil and Colombia lagged a bit. Investments in the Korean won and the Chilean peso were unhelpful too.

Things turned around in the second half of the year. The Fund was aided by positions in bonds denominated in developed market currencies. These came from places like Ecuador, Argentina, Brazil, Venezuela, Ghana, Saudi Arabia and Ukraine. At the same time, the Fund's local-currency bonds from Turkey and Indonesia helped.

Later on, bonds from Colombia and Peru did well when interest rates were cut. The manager's choice of Mexican bonds helped, as the energy sector was boosted by government reforms and the potential for regulatory changes.

Israeli and Saudi Arabian bonds were weak thanks to tensions in the Middle East.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON EMERGING MARKETS DEBT TOTAL RETURN FUND

In the twelve months under review, the USD W (Acc.) share class of the Fund returned 4.52%, net of fees, compared with a return of 3.86% for the comparative benchmark comprising 1/3 JP Morgan Government Bond Index – Emerging Markets Global Diversified TR Index, 1/3 JP Morgan Emerging Markets Bond Index Global Diversified TR Index, 1/3 JP Morgan Corporate Emerging Markets Bond Index Broad Diversified TR Index.

In the first few months of 2024, a better outlook for global growth pushed emerging market bonds higher. The manager positioned the Fund to benefit from these market conditions.

However, as inflation stayed high in the US, investors became less confident that the Federal Reserve (Fed) would cut rates quickly. As a result, the Fund's investments in Mexico and Colombia lost ground.

In September, emerging market bonds posted gains. This was thanks to positive US economic data and a 0.5% interest rate cut from the Fed.

In the latter half of the year, the Fund's investments in bonds from Argentina and Brazil that were denominated in developed market currencies did well.

The last three months of the year saw emerging market bonds fall back sharply, dragged down by weakness in US government bonds and the strength of the US dollar. Talk of higher trade tariffs from the incoming Trump administration hurt emerging market debt, too.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON EUROLAND BOND FUND

In the twelve months under review, the Fund's Euro A share class returned 3.63%, net of fees, versus 2.63% for the Bloomberg Euro Aggregate Bond TR Index.

A better outlook for global GDP growth boosted corporate bonds in the first few months of the year. The manager positioned the Fund's holdings to benefit from this sentiment.

The manager's focus on which countries to invest in also added to returns in the early part of the year. Buying bonds from Slovakia and Sweden instead of Germany proved a good choice.

Inflation in the eurozone fell during the year, and the European Central Bank cut interest rates three times. This boosted bonds whose returns were directly linked to inflation rates, which was additive for the Fund.

Country selection continued to have a positive effect on the Fund's returns. Investing in bonds from Italy and Hungary, as opposed to Germany, helped performance in the third quarter. In the last months of 2024, holding bonds from Spain instead of France helped.

The Fund's holdings in German government bonds fell considerably in October, but recouped their losses in November.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON EUROPEAN CREDIT FUND

In the year under review, the Fund's Euro A share class returned 4.91%, net of fees, versus 4.56% for the iBoxx Euro Corporates TR Index.

Keeping a close watch on the Fund's investments in corporate bonds (bonds issued by a company) and adjusting them in response to market moves helped the Fund make a positive return.

In the first six months of the year, the manager chose to invest in bonds likely to benefit from a better outlook for global GDP growth, which helped the Fund do well. The

FIXED INCOME cont'd

BNY MELLON EUROPEAN CREDIT FUND cont'd

manager's choice of corporate bonds aided returns. In the utilities sector, owning bonds in a French water and waste management company helped. The Fund's investment in the bonds of a leading global medical technology company added to returns, too.

In the second half of the year, the Fund's holdings in the financial sector performed well as inflation fell and the European Central Bank cut interest rates. Bonds issued by banks were notably strong. A position in a Greek financial services firm was a key contributor.

The Fund's holdings in the autos sector, both in vehicle manufacturers and component suppliers, added to returns. These industries are expected to do well under the Trump administration in the US.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON FLOATING RATE CREDIT FUND

Over the twelve-month period, the Fund's Euro W (Acc.) share class returned 7.86%, net of fees, compared with 3.63% for the 3-Month EURIBOR benchmark.

The manager helped to produce this positive return by keeping a close eye on the Fund's investments in floating rate notes (bonds issued by governments and companies that pay a variable interest rate to reflect changes in official interest rates).

Management of the Fund's exposure to movements in bond markets also helped.

In the first quarter of 2024, a better outlook for US GDP growth helped high yield corporate bonds rise. The manager positioned the Fund's holdings to benefit from this.

As inflation eased in the second quarter, investors began to hope for interest rate cuts in the second half of the year. The manager focused on bonds with maturity dates further in the future, which helped returns.

High yield corporate bonds rose after the US Federal Reserve (Fed) cut interest rates in September. The Fund's holdings in telecommunications, utilities and construction companies performed well.

Corporate bonds weakened in the final quarter after the Fed warned that the pace of interest rate cuts was likely to slow in 2025. However, the manager focused on holdings that pay a higher income, helping returns.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON GLOBAL AGGREGATE BOND FUND*

Over the period from the Fund's launch on 16 July 2024 to 31 December 2024, the USD W (Acc.) share class of the Fund returned 1.85%, net of fees, compared with 1.99% for the Bloomberg Global Aggregate Index (hedged to U.S.Dollars).

Since launch, the manager has chosen a wide range of investments in both government bonds and corporate bonds (those issued by a company as opposed to a government).

The Fund's investments are diversified across different regions. They also cover a broad range of sectors and industries.

In corporate bond markets, the manager favoured issues from companies with high credit ratings. These are known as investment grade bonds.

Bond markets performed well in the autumn. This came as the US Federal Reserve cut interest rates for the first time in over four years. However, bond markets lost ground over the final quarter.

The selection of bonds the manager chose to invest in helped returns over the period. So did the Fund's country allocation within the eurozone, as well as its investments in bonds that have returns directly linked to inflation indices.

The Fund's exposure to changes in interest rates acted as a drag on returns.

Insight Investment Management (Global) Limited
January 2025

Over the twelve-month review period, the Fund's USD A share class generated a return of -4.08%, net of fees, compared with a return of -3.65% for the JP Morgan Global GBI Unhedged TR index.

The manager's overall selection of bonds weighed on performance. Long-dated government bonds (debt issued by governments with maturities several decades in the future) did not work well. Those issued by governments in Japan and the US weighed heavily on returns. Derivative instruments (contracts on underlying assets) also had a negative effect.

The best returns came from short-dated government bonds (debt issued by governments with maturity dates in the next few years) in Indonesia and the US. Returns were helped by favourable currency hedging (which aims to reduce risk from currency movements).

Over the period, the manager decreased the Fund's sensitivity to interest rates, although it was increased again at the end of the year. Profits were taken on short-dated US Treasuries. The long position in the yen was reduced after it worked well in the third quarter of the year. The manager gradually increased the Fund's US dollar exposure late in the year. The Fund had a smaller position in the euro.

Newton Investment Management Limited
January 2025

BNY MELLON GLOBAL CREDIT FUND

Over the twelve-month period, the USD W (Acc.) share class of the Fund returned 4.51%, net of fees, versus a gain of 3.52% for the Bloomberg Global Aggregate Credit TR Index USD Hedged.

FIXED INCOME cont'd

BNY MELLON GLOBAL CREDIT FUND cont'd

The Fund took an overweight position on credit risk in the first half of the year. In the second half of the year, the manager adopted a more tactical, opportunist position as regards risk.

For most of the year, the Fund was more invested in European corporate bonds (bonds issued by companies as opposed to governments) than US corporate bonds. This helped performance.

The manager also favoured bonds issued by banks. At the same time, the manager limited investments in bonds issued by energy companies. Both of these factors helped returns.

In the third quarter of the year, the Fund's holdings in UK water companies rebounded. By contrast, bonds issued by a French luxury goods group hurt returns. This was due to a poor outlook for China, one of the group's biggest markets.

Ahead of the US elections in November, the manager positioned the portfolio for a decisive Republican victory. This helped returns, as the Republican party won the presidency and both chambers of Congress.

The Fund's investment in bonds issued by a European wind turbine operator weakened on fears about its US business. These arose from the Trump administration's opposition to renewable energy.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON GLOBAL DYNAMIC BOND FUND

Over the twelve-month period under review, the USD A share class of the Fund produced a return of 4.99%, net of fees, against a return of 5.34% for SOFR (30-Day Compounded) +2%.

The Fund's largest segment, government bonds (debt issued by governments), produced negative returns. The weakest of these were Japanese government bonds set to reach their maturity dates 30 or more years from now. Emerging market sovereign bonds were also weak, especially those from Brazil and Mexico.

On the other hand, the Fund had strong returns from high yield credit (lower-quality bonds issued by companies) and investment grade bonds (high-quality bonds issued by companies). Some holdings in government bonds did well, too, among them those from Spain, the US, South Africa and Peru. Currency hedging back into the Fund's base currency of US dollars also added to returns.

The manager increased the Fund's duration (which measures its sensitivity to interest rates). Over the year, the Fund took part in several new issues of corporate bonds (debt issued by companies). In the final three months of the year, new issues from Prysmian, Verallia and Castello were added. A long US dollar position was established at the end of the year.

Newton Investment Management Limited
January 2025

BNY MELLON GLOBAL HIGH YIELD BOND FUND

Over the twelve months under review, the Fund's USD W (Accumulation) share class rose by 8.59%, net of fees, against 8.67% for the ICE BofA Developed Market High Yield Constrained TR Index.

The manager's choice of high yield bonds worked well in the telecommunications, chemicals and packaging sectors. This was partly offset by the poor performance of bonds in the cable and financials sectors. The Fund stayed underweight in sectors exposed to consumers, including consumer products, retail and autos.

The Fund's largest exposure was to bonds with a BB investment grade rating, though the Fund had a lower weighting in those bonds than the benchmark. The Fund was overweight bonds rated B and CCC bonds. As B and CCC bonds outperformed, this worked well. Late in the year, the Fund reduced its CCC holdings a little and added to its holdings of bonds rated BB and B.

The Fund was overweight in US and UK high yield bonds and a little underweight in European high yield. This had mixed results; UK high yield bonds outperformed, while US high yield bonds lagged behind.

The cash position proved a modest drag on the Fund's returns. The Fund was helped by its exposure to floating-rate bank loans, however.

Alcentra NY, LLC
January 2025

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND

Over the twelve-month period under review, the Fund's USD A (Acc.) share class returned 8.30%, compared with a return of 5.42% for the SOFR (90-Day Compounded).

This return was achieved by careful management of the Fund's investments in high yield corporate bonds.

Throughout the year, the manager favoured bonds from companies with free cash flows. To reduce the risk of defaults, the Fund avoided unprofitable companies.

The manager kept a clear focus on bonds that pay a higher income. This helped returns over the year.

Healthy demand for high yield bonds helped the Fund's returns too, particularly as central banks began cutting interest rates with the first US rate cut for well over four years in September.

With continuing inflows from investors supporting new issuance of corporate bonds, the manager focused on adding bonds from high-quality companies with sound business models.

Despite weakness in government bonds, high yield corporate bonds made further gains in the last three months of the year. This was driven by strong demand from investors, who were expecting pro-business policies from the incoming

FIXED INCOME cont'd

BNY MELLON GLOBAL SHORT-DATED HIGH YIELD BOND FUND cont'd

Trump administration in the US.

Insight Investment Management (Global) Limited
January 2025

BNY MELLON SUSTAINABLE GLOBAL DYNAMIC BOND FUND

Over the twelve-month period under review, the Euro W (Acc.) share class of the Fund generated a return of 3.89%, net of fees, against a return of 5.62% for the 1 Month EURIBOR + 2% benchmark.

Each segment of the bond market in which the manager chose to invest produced positive returns. Investment grade credit (high-quality bonds issued by companies) contributed the most to returns. High yield bonds, which are often thought to be riskier, also delivered positive returns. Here, bonds issued by communications firm Windstream did well.

Short-dated government bonds (debt issued by governments with maturity dates in the next few years) issued by Mexico and South Africa were the top-performing positions in the Fund over the year. The Fund also got positive returns through its use of derivatives (instruments used to protect returns from moves in underlying assets).

Currency hedging (which is used to protect the Fund from sharp currency moves) detracted from returns. Long-dated Japanese bonds (with maturities a long way in the future) were especially weak. Certain US Treasury and UK Gilt issues also detracted.

The manager bought more investment grade and high yield bonds in the first half of the year. Emerging market government bonds from Poland, Indonesia and Brazil were bought later in the year. Several attractive new issues were added as well. Late in the year, the manager moved to a long position in the US dollar.

Newton Investment Management Limited
January 2025

BNY MELLON TARGETED RETURN BOND FUND

Over the twelve months under review, the USD A (Acc.) share class of the Fund returned 7.88%, net of fees, compared with 2.02% for the Lipper Bond Global USD average.

In the first half of the year, the manager positioned the Fund to benefit from movements in bond markets. Corporate bonds performed well during the first three months, which helped returns, as the manager had anticipated this.

Corporate bonds did less well as the spring went on. Yields on government bonds rose, which meant that their prices fell. This had a knock-on effect on corporate bonds. At this time, the Fund was helped by instruments that protected against weakness in the bond markets.

In the third quarter of 2024, bond markets performed well as central banks cut interest rates. The US Federal Reserve (Fed) cut rates for the first time in more than four years.

The manager positioned the Fund to benefit from lower interest rates, keeping a close eye on the differences in yield among bonds with different maturity dates. This helped the Fund's returns.

Bond markets lost ground in the last three months of the year. This came as the Fed warned that the pace of interest rate cuts would slow in 2025. The Fund's investments in corporate bonds performed well at this time.

Insight North America LLC
January 2025

BNY MELLON U.S. MUNICIPAL INFRASTRUCTURE DEBT FUND

Over the twelve-month period under review, the Fund's USD C (Acc.) share class returned 2.15%, compared with a return of 1.34% for its custom benchmark comprising 50% Bloomberg U.S. Municipal Bond TR Index, 50% Bloomberg Taxable U. S. Municipal Bond TR Index.

The Fund's positive return was helped by the careful management of its holdings in US municipal bonds. These are bonds that are issued by local county and state governments to fund infrastructure projects.

Municipal bonds had a tough start to the year as investors feared that US interest rates would stay high. But these bonds rallied in the early summer as inflation fell back. The manager focused on sectors that benefit from the strength of the US economy, such as airports and transport. This worked well.

In the autumn, municipal bonds made strong gains as the Federal Reserve (Fed) cut US interest rates for the first time in over four years. Later in the year, the Fed warned that the pace of interest rate cuts was likely to slow in 2025. Municipal bonds weakened as a result.

The manager favoured municipal bonds within the most economically important and populous states, such as California, New York and Texas.

Insight North America LLC
January 2025

RESPONSIBLE HORIZONS EM DEBT IMPACT FUND

In the twelve months under review, the Fund's USD W (Accumulation) share class rose by 5.86%, net of fees, versus 5.41% for the JP Morgan EM Credit Green, Social and Sustainability Bond Diversified Index (USD Hedged).

The Fund's investments in emerging market government bonds contributed to this positive result. Corporate bonds (those issued by a company) helped boost returns, too. Bonds issued by banks were especially helpful.

In the first six months of the year, the manager's choices about which sectors and countries to invest in helped the Fund do well. Both investment grade and lower-quality high yield emerging market corporate bonds did better than their developed market counterparts. Emerging markets were boosted by GDP growth that was stronger than that of

FIXED INCOME cont'd

RESPONSIBLE HORIZONS EM DEBT IMPACT FUND cont'd

developed markets. Interest rate cuts and good performance from emerging market corporate bonds helped too.

During the autumn months, the Fund's investments in Central and Eastern European markets lost ground. Holding fewer Middle Eastern bonds than the index was unhelpful, too. In the last three months of the year, the Fund's holdings in Romania weakened. Bonds from Cote D'Ivoire and Poland were also a drag on performance.

The Fund's holdings are aligned with all 17 UN Sustainable Development Goals. Taking a long-term view, the manager will keep a clear focus on investments in renewable energy and telecommunications infrastructure. The manager believes both these sectors could offer attractive investment opportunities in the next three to five years.

Insight Investment Management (Global) Limited
January 2025

RESPONSIBLE HORIZONS EURO CORPORATE BOND FUND

In the twelve months under review, the Fund's Euro W (Acc.) share class returned 5.32%, net of fees, versus 4.73% for the Bloomberg Euro Aggregate Corporate TR Index.

The Fund benefited from the close eye the manager kept on investments in corporate bonds (bonds issued by companies as opposed to governments). These holdings were adjusted as the market moved, and this helped the Fund to make a positive return.

The outlook for economic growth improved in the first few months of the year, which boosted corporate bond markets. The manager positioned the Fund's holdings to benefit from these conditions, and this worked well.

Corporate bond markets made further gains as inflation fell and the European Central Bank cut interest rates in the second half of the year.

The manager's choice of individual bonds to invest in worked less well during the third quarter. In the fourth quarter, a preference for bonds issued by banks, instead of energy companies, boosted returns. The manager increased the Fund's holdings in certain banks.

Insight Investment Management (Global) Limited
January 2025

RESPONSIBLE HORIZONS EURO IMPACT BOND FUND

Over the twelve months under review, the Fund's Euro W (Acc.) share class returned 4.91%, net of fees, compared with 5.00% for the Bloomberg MSCI Euro Corporate Green Bond Index.

The Fund's returns were helped by the manager's choice of green corporate bonds. These are bonds that are issued to provide a key source of funding for projects related to the climate and other aspects of the environment.

Throughout the year, the manager identified opportunities in new bond issues, adding holdings in utilities, construction firms and banks that lend to green projects.

The Fund's investments in other sectors and industries were less helpful over the year.

Close management of the Fund's investments proved helpful. The manager adjusted the Fund's positions as the outlook changed for both interest rates and inflation.

After inflation fell back in the spring, the manager positioned the Fund to benefit from lower interest rates. This came to pass as the European Central Bank cut its key deposit rate four times.

The manager kept up the Fund's commitment to making a positive impact on the environment. This meant that the Fund stayed focused on green bonds issued by providers of renewable energy, less carbon-intensive transport firms and businesses providing products and services that save energy.

MULTI ASSET

BNY MELLON GLOBAL REAL RETURN FUND (EUR)

In the twelve-month period under review, the Fund's Euro A share class returned 6.55%, net of fees, compared with a return of 3.63% for the 1 Month EURIBOR + 4% benchmark, both in euro terms.

The Fund's positive return for the year was driven by its return-seeking core. This consists of shares, bonds issued by companies and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and TSMC. Detractors included Nestlé, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy and commodities were weak over the year.

The Fund's stabilising layer, which aims to reduce volatility, detracted from returns. The Fund had derivatives in place to protect against falls in share prices, but these instruments hurt performance as stocks did well in 2024. On the other hand, cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010.

Over the year, the manager reduced the size of the Fund's return-seeking core. In government bonds, the manager increased the Fund's sensitivity to interest rates slightly. This came as the US Federal Reserve indicated that US interest rates would stay higher for longer.

Newton Investment Management Limited
January 2025

BNY MELLON GLOBAL REAL RETURN FUND (GBP)

Over the twelve-month period under review, the Fund's Sterling C (Inc.) share class returned 6.35%, compared with a return of 4.36% for SONIA (30-day compounded) + 4% benchmark, both in sterling terms.

The Fund's positive return for the year was driven by its return-seeking core. This consists of shares, bonds issued by companies and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and TSMC. Detractors included Nestlé, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy and commodities were weak over the year.

The Fund's stabilising layer, which aims to reduce volatility, had a positive effect on returns, though less so than the core. Here, the holdings in cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010. On the other side, the Fund had derivatives in place to protect

against falls in share prices. These instruments hurt performance as stocks did well in 2024.

Over the year, the manager reduced the size of the Fund's return-seeking core. In government bonds, the manager increased the Fund's sensitivity to interest rates slightly. This came as the US Federal Reserve indicated that US interest rates would stay higher for longer.

Newton Investment Management Limited
January 2025

BNY MELLON GLOBAL REAL RETURN FUND (USD)

In the twelve-month period under review, the Fund's USD A share class returned 6.02%, compared with a return of 5.34% for SOFR (30-day compounded) + 4% benchmark, both in US dollar terms.

The Fund's positive return for the year was driven by its return-seeking core. This consists of shares, bonds issued by companies and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and TSMC. Detractors included Nestlé, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy and commodities were weak over the year.

The Fund's stabilising layer, which aims to reduce volatility, had a positive effect on returns, though less so than the core. Here, the holdings in cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010. On the other side, the Fund had derivatives in place to protect against falls in share prices. These instruments hurt performance as stocks did well in 2024.

Over the year, the manager reduced the size of the Fund's return-seeking core. In government bonds, the manager increased the Fund's sensitivity to interest rates slightly. This came as the US Federal Reserve indicated that US interest rates would stay higher for longer.

Newton Investment Management Limited
January 2025

BNY MELLON SUSTAINABLE GLOBAL MULTI-ASSET FUND*

In the twelve months under review, the Fund's USD W (Acc.) share class returned 8.72%, net of fees, versus 8.74% for the benchmark a composite comprising 60% MSCI AC World NR Index and 40% JP Morgan Global Government Bond Index TR Index.

The manager's decision to invest more in shares than in bonds (debt issued by governments and companies) had a positive effect on returns. This is because stocks did better than bonds over the year. The small holding in commodities was also helpful.

MULTI ASSET cont'd

BNY MELLON SUSTAINABLE GLOBAL MULTI-ASSET FUND* cont'd

Although the manager's choice of stocks detracted from returns, this was offset by good positioning by sector. Being more invested than the benchmark in information technology, financials and consumer services helped the Fund's performance. The Fund also benefited from being less invested in consumer staples than the benchmark, and from avoiding energy stocks.

* Please refer to Note 19 of the financial statements.

For a definition of finance terms applied in the narrative of the Investment Managers' Reports, please refer to the online Glossary on <https://www.bny.com/investments/master-copy/en/glossary.html>

The Fund's best-performing shares were from SAP, a German software company. Its results were consistently strong. Hipgnosis Song Fund and Trane Technologies also did well.

Among the main detractors were technology stocks Nvidia and Broadcom, which performed well but were not held by the Fund. Battery maker Samsung SDI was the main negative among the Fund's stocks.

The Fund's overseas bonds made a strong contribution to returns. The manager's choice of UK bonds hurt returns slightly.

Newton Investment Management Limited
January 2025

BNY MELLON SUSTAINABLE GLOBAL REAL RETURN FUND (EUR)*

Over the period from 1 January 2024 until the Fund's closure on 10 December 2024, the Fund's Euro W (Acc.) share class produced a return of 7.19%, net of fees, versus a return of 7.04% for the EURIBOR 1 Month + 4% benchmark.

The Fund's positive return was driven by its 'return-seeking' core. This consists of shares, bonds issued by companies, and alternative investments. Of these, shares did the best, with good performance from holdings in companies that were benefiting from optimism about artificial intelligence. Among these were Nvidia and Taiwan Semiconductor. Detractors included Neste Corporation, on disappointing results, and Samsung Electronics, on sluggishness in its core market and competition from China.

Alternatives detracted from the Fund's returns. Although some of the Fund's alternative assets worked well, renewable energy, energy storage and commodities were weak over the period.

The Fund's stabilising layer, which aims to reduce volatility, detracted from returns. The Fund had derivatives in place to protect against falls in share prices, but these instruments hurt performance as stocks did well in 2024. On the other hand, cash and gold helped the Fund's returns. As central banks cut interest rates and geopolitical concerns persisted, gold had its best year since 2010.

The accompanying notes form an integral part of these financial statements.

BNY MELLON GLOBAL FUNDS, PLC

NOTES TO THE FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and estimation techniques applied in the preparation of these financial statements are set out below:

STATEMENT OF COMPLIANCE

The financial statements for the financial year ended 31 December 2024 have been prepared in accordance with the Financial Reporting Standard (“FRS”) 102: “The Financial Reporting Standard applicable in the United Kingdom and the Republic of Ireland” (“FRS 102”) and Irish statute comprising the Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

BASIS OF PREPARATION

The financial statements have been prepared on a going concern basis for the Company under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through the profit or loss.

The format and certain wordings of the financial statements has been adapted from those contained in the Act, as amended, so that, in the opinion of the Directors, they more appropriately reflect the nature of the Company’s business as an investment fund.

The Company has availed of the exemption available to open-ended investment funds under Section 7 “Statement of Cash Flows” of FRS 102 not to prepare a cash flow statement on the basis that substantially all of the Company’s investments are highly liquid and carried at fair value, and the Company provides a statement of changes in net assets attributable to redeemable participating shareholders.

CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements requires the use of certain critical accounting estimates. It also requires the Directors to exercise its judgement in the process of applying the Company’s accounting policies. Management makes estimates and assumptions concerning the future. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities are discussed below within “Financial assets and liabilities at fair value through profit or loss – Fair value estimation”. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising beyond the control of the Funds. Such changes are reflected in the assumptions when they occur and are recognised prospectively.

FOREIGN CURRENCY TRANSLATION – FUNCTIONAL AND PRESENTATION CURRENCY

Items included in the Company’s financial statements are measured using the currency of the primary economic environment in which each Fund operates (the “functional currency”). The functional currency of each Fund has been evaluated by the Board of Directors based on the currency that most faithfully represents the economic effects of the underlying transactions, events, investors’ base and conditions. The financial statements of the Company are presented in US dollar, which is the Company’s presentational currency.

The functional and presentation currency of the Funds are US dollar, Euro, Sterling or Japanese yen as noted in the Statement of Financial Position.

Foreign currency assets and liabilities, including net assets attributable to redeemable participating shareholders are translated into the functional currency using the closing rate applicable at the financial year end date. Foreign currency income and expenses in the Statement of Comprehensive Income are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Proceeds from redeemable participating shares issued and the cost of redeemable participating shares redeemed are also translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses arising from transactions and translations are presented in the Statement of Comprehensive Income within “net gains/losses on financial assets/liabilities at fair value through profit or loss”.

For Company aggregation purposes, all assets and liabilities together with income and expenses for all classes of shares are translated into US dollar using the closing rate for assets and liabilities and the average rate for income and expenses including subscriptions and redemptions, as this is the currency of the primary economic environment in which the Company operates. A currency adjustment arises from the re-translation of the opening net assets at the financial year end exchange rates, as disclosed in the Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This method of allocation has no effect on the value of net assets allocated to the individual Funds.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – CLASSIFICATION

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception.

A financial asset or liability is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing in the near term or if on initial recognition is part of a portfolio of identifiable financial investments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorised as held for trading.

Financial assets and liabilities designated at fair value through profit or loss at inception are financial instruments that are not classified as held for trading but are managed, and their performance is evaluated on a fair value basis in accordance with the investment strategy of the Funds as documented in the prospectus.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – RECOGNITION, DERECOGNITION AND MEASUREMENT

Regular purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Financial assets and liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets and liabilities are derecognised when the rights to receive cash flows from or pay cash flows for the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the “financial assets or financial liabilities at fair value through profit or loss” category are presented in the Statement of Comprehensive Income within “net gains/ (losses) on financial assets/liabilities at fair value through profit or loss” in the financial year in which they arise using the average cost method.

For hedge share class level forward foreign currency contracts, the realised and unrealised gains or losses are allocated solely to the relevant share classes. The unrealised gains or losses on hedging activities are reflected in the “financial assets or financial liabilities at fair value through profit or loss” category in the Statement of Financial Position.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION

The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and trading securities) are based on quoted market prices at the financial year end date. In accordance with FRS 102, the Company has applied the recognition and measurement provisions of International Accounting Standards No. 39 “Financial Instruments: Recognition and Measurement” as adopted for use in the European Union. Accordingly, the quoted market price used for financial assets held is the mid-market price. When the Company holds derivatives with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk positions and applies this mid-market price to the net open position, as appropriate.

If a significant movement in fair value occurs subsequent to the valuation point of the Funds on the financial year end date, valuation techniques will be applied to determine the fair value. A significant event is any event that occurs after the last market price for a security, close of market or close of the foreign exchange, but before the Funds’ valuation time that materially affects the integrity of the closing prices for any security, instrument, currency or securities affected by that event so that they cannot be considered readily available market quotations.

The fair value of financial assets and liabilities that are not traded in an active market (for example over-the-counter derivatives) is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each reporting date. Valuation techniques used include the use of comparable recent arm’s length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants making the maximum use of market inputs and relying as little as possible on entity-specific inputs.

The carrying value less impairment provision of other receivables and payables are assumed to approximate their fair values.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION

cont'd.

The main valuation techniques of the Company are as follows:

- (a) Financial assets and liabilities listed and regularly traded on a recognised exchange and for which market quotations are readily available or traded on over-the-counter markets shall be valued at the mid-market price accordingly on the principal exchange in the market for such investment.
- (b) If the financial assets and liabilities are listed on several recognised exchanges, the mid-market price on the recognised exchange, which, in the opinion of the Directors in consultation with the relevant Investment Manager, constitutes the principal market for such assets, will be used.
- (c) If for specific financial assets or liabilities the mid-market price referred to in (a) or (b) above is not available or does not, in the opinion of the Directors in consultation with the relevant Investment Manager, reflect a fair or appropriate value, the value shall be calculated by alternative methods with care and in good faith by the Directors, as appropriate, approved for such purpose by the Bank of New York Mellon SA/NV, Dublin Branch (the "Depositor"), in consultation with the relevant Investment Manager, with a view to establishing the probable realisation value for such assets.
- (d) In the event that any financial assets or liabilities are not listed or dealt on any recognised exchange, such assets shall be valued by the Directors with care and in good faith and in consultation with the relevant Investment Manager at the probable realisation value. Such probable realisation value may be determined by using a quotation from a broker.
- (e) Cash and other liquid assets are valued at their face value with interest accrued, where applicable.
- (f) Units or shares in collective investment schemes (other than those valued pursuant to (a) or (b) above), are valued at the latest available net asset value, as a best estimate of fair value, of the relevant collective investment scheme.
- (g) Derivative instruments dealt on a market are fair valued at the settlement price for such instruments on such market. Where such derivative instruments are not dealt on a market, their value shall be the daily quotation from independent pricing service or market makers.
- (h) Forward foreign currency contracts are fair valued by an independent price source by reference to the price at which a new forward contract of the same size and maturity could be undertaken.
- (i) Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. Futures contracts are fair valued based upon their quoted daily settlement prices. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time the realised gains and losses are recognised. Unrealised gains or losses on futures contracts are shown in the Schedule of Investments. The variation margin receivable or payable at the reporting date is reported as an asset or liability, as applicable, in the Statement of Financial Position.
- (j) The premium on purchased put options exercised is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on purchased call options exercised is added to the cost of the securities or foreign currencies purchased. Premiums paid from the purchase of options, which expire unexercised are treated as realised losses. The premium on written call options exercised is added to the proceeds from the sale of the underlying security or foreign currency in determining the realised gain or loss. The premium on written put options exercised is subtracted from the cost of the securities or foreign currencies purchased. Premiums received from written options, which expire unexercised are treated as realised gains.
- (k) Interest rate, credit default and total return swap contracts are fair valued daily based upon quotations from independent pricing service or market makers and the change in the value if any is recorded as unrealised gains or losses. Payments received or made as a result of the contract termination are recognised net of any upfront payment as realised gains or losses. Income on over-the-counter derivatives accrues to the Funds and is not subject to any returns sharing arrangements with BNY Mellon Fund Management (Luxembourg) S.A (the "Manager") or any other parties.
- (l) Commercial paper and time deposits are valued at amortised cost, as a best estimate of fair value. The Company may invest in financial instruments that are not traded in an active market, whereby fair value may be determined by applying valuation techniques, such as discounted cash flow analysis and other valuation techniques used by market participants.
- (m) Exchange traded funds are fair valued based upon quotations of the net asset value per share, as a best estimate of fair value, from independent pricing sources.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

FINANCIAL ASSETS AND LIABILITIES AT FAIR VALUE THROUGH PROFIT OR LOSS – FAIR VALUE ESTIMATION

cont'd.

- (n) Certain Funds may enter into “TBA” (To Be Announced) purchase commitments to purchase securities for a fixed unit price at a future date beyond customary settlement time. Although the unit price has been established, the principal value has not been finalised. The Funds hold and maintain until settlement date, cash or high grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own. Income on the securities will not be earned until settlement date. TBA purchase commitments may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines prior to settlement date, which is in addition to the risk of decline in the value of the Funds’ other assets. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities. Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their portfolios or for delivery pursuant to option contracts that they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it the appropriate action.
- (o) Equity swaps are priced in accordance with the pricing basis for the underlying equity positions. Finance charges on equity swaps are accrued daily, reset on a monthly basis and subject to settlement on disposal of equity swaps. Income on equity swaps accrues to the Funds and is not subject to any returns sharing arrangements with the Manager or any other parties.
- (p) Loans are fair valued based on valuations provided by the pricing vendor Markit. Fees earned or paid and the receipt of payments of principal are recorded as a component of “net gains/(losses) on financial assets/liabilities at fair value through profit or loss” in the Statement of Comprehensive Income. Where Markit is unable to provide a value for a loan, the loan is fair valued based on a quotation obtained from a loan house. Unsettled loans are fair valued based on the agreed purchase price until a valuation from pricing vendor becomes available.
- (q) Certain Funds may use Participatory Notes (“P-Notes”) that are either listed or traded on eligible markets. P-Notes provide the Funds with the opportunity for economic exposure to specific equities in restricted or emerging markets, i.e. India, Sri Lanka, Vietnam, Bangladesh, China and Brazil, where owning local equity or equity related securities might be less efficient than the use of P-Notes, leading to a reduction in costs. P-Notes are valued by reference to the mid-market price of the underlying security.

LOANS

Certain Funds of the Company may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers. A Fund’s investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the “lender”) that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. A Fund may invest in multiple series or tranches of a loan, which may have varying terms and carry different associated risks. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. As a result, a Fund may be subject to the credit risk of both the borrower and the lender that is selling the loan agreement.

When a Fund purchases assignments from lenders, it acquires direct rights against the borrower of the loan. When investing in a loan, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt of payments by the lender from the borrower.

RECEIVABLES

Receivables include cash and cash equivalents, income receivable, receivable for investments sold, expense cap receivable from the manager, margins on derivatives contracts, subscriptions receivable and other receivables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

FINANCIAL LIABILITIES AT AMORTISED COST

Financial liabilities at amortised cost include bank overdraft, payable for investments purchased, redemptions payable, expenses payable, performance fees payable, margins on derivatives contracts, cash collateral payable to broker, income payable on swaps, finance charges payable on swaps, tax payable and other payables. These amounts are recognised initially at fair value and subsequently measured at amortised cost.

OFFSETTING FINANCIAL INSTRUMENTS

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

CROSS INVESTMENT

As at 31 December 2024, BNY Mellon Absolute Return Bond Fund, BNY Mellon Absolute Return Credit Fund, BNY Mellon Emerging Markets Corporate Debt Fund, BNY Mellon Euroland Bond Fund, BNY Mellon European Credit Fund and Responsible Horizons Euro Corporate Bond Fund invest in other Funds of the Company (31 December 2023: BNY Mellon Absolute Return Bond Fund, BNY Mellon Absolute Return Credit Fund, BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund). These cross investments have been eliminated in the financial statements of the Company. Where a Fund invests in another Fund or Funds of the Company, these cross investments have been deducted from the total net asset value when calculating the management fees payable. The realised gains and losses, including movements in unrealised gains and losses, on the cross investments have been eliminated in the Total Company amounts disclosed in the Statement of Comprehensive Income.

CASH AND CASH EQUIVALENTS AND BANK OVERDRAFTS

Cash and cash equivalents are valued at face value, with interest accrued where applicable at relevant valuation point on the relevant business day. Cash equivalents include deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdrafts are shown separately in the Statement of Financial Position. Unrealised gains and losses on spot currency contracts are incorporated within the balances for cash and cash equivalents and bank overdraft, respectively.

COLLATERAL

Cash collateral provided by the Funds is identified in the Statement of Financial Position as “margins on derivatives contracts” and is not included as a component of cash and cash equivalents. Cash collateral received by the Funds is identified in the Statement of Financial Position as “cash collateral received from broker”. The obligation to return the cash collateral is identified in the Statement of Financial Position as “cash collateral payable to broker”. Cash collateral received is restricted and does not form part of the Funds’ cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Funds classify that asset in its Statement of Financial Position separately from other assets and identify the asset as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the Schedule of Investments, as indicated by a “*” tick mark.

TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, advisers, brokers and dealers. In respect of equities and financial derivative instruments, the transaction costs, when incurred, are immediately recognised in the Statement of Comprehensive Income as an expense and are included in the “net gains/(losses) on financial assets/liabilities at fair value through profit or loss”. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

DIVIDEND INCOME

Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within “dividend income” when the right of the Funds to receive payments is established. Dividend income is shown gross of any non-recoverable withholding taxes.

DIVIDEND EXPENSE

Interest on short equity swaps is recognised in the Statement of Comprehensive Income as “Dividend expense”, which may be subject to change, dependant on periodic resetting and/or final disposal of underlying swap instruments.

INTEREST INCOME

Interest income on interest bearing financial instruments is shown as a component of “net gains/(losses) on financial assets/liabilities at fair value through profit or loss”. Bank interest income is accounted for on a cash receipts basis.

TAXATION

Under current law and practice, there is no income, gains or other taxes payable by the Funds. The Funds currently incur withholding taxes imposed by certain countries on investment income and capital gains. Withholding taxes are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Certain Funds accrue for capital gains tax on net realised and unrealised gains on investments. The capital gains tax is recorded in accordance with the tax regulation of each relevant country and rates on Irish investors. The capital gains tax expense and the amounts payable at the financial year end are reflected in the “withholding taxes on dividends and other investment income” and “tax payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

EXPENSES

Expenses are accounted for on an accruals basis. Any costs associated with the termination of a Fund are paid for by the Manager.

SECURITIES LENDING

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon SA/NV and the Depositary. The Company can lend securities with a value of up to 100% of any one line of stock, to borrowers approved by The Bank of New York Mellon. The Company receives securities, financial instruments or other assets as collateral against the loaned securities. The Company does accept cash as collateral but does not engage in cash collateral reinvestment. Collateral held (and pending) will not be less than 102% of the value of the securities on loan. Securities lending income is accounted for on a cash receipts basis. Details of the securities lending position at the financial year end are contained in Note 14 to the financial statements.

DISTRIBUTIONS TO REDEEMABLE PARTICIPATING SHAREHOLDERS

Distributions to redeemable participating shareholders are recognised as “finance costs” in the Statement of Comprehensive Income.

REDEEMABLE PARTICIPATING SHARES

The Company issues multiple classes of redeemable participating shares within each Fund which are redeemable at the holder's option and do not have identical rights. Such shares are classified as financial liabilities.

Redeemable participating shares can be put back to the Fund at any time for cash equal to a proportionate share of the Fund's net asset value attributable to the share class. The redeemable participating shares are carried at the redemption amount that is payable at the financial year end date if the holder exercises the right to put the share back to the Fund.

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's net asset value per share at the time of issue or redemption. The Fund's net asset value per share is calculated by dividing the net assets attributable to the holders of each class of redeemable participating shares with the total number of outstanding redeemable participating shares for each respective class in accordance with the provisions of the prospectus in determining the net asset value per share for subscriptions and redemptions.

DILUTION ADJUSTMENT

To mitigate the effects of dilution, the Directors may, at their discretion, make a dilution adjustment to the net asset value per share. The Directors will retain the discretion in relation to the circumstances in which to make such a dilution adjustment.

The decision to make a dilution adjustment will depend on the volume of subscriptions or redemptions of shares in the Fund. The Directors may in their discretion make a dilution adjustment if, in their opinion, the existing shareholders, in the case of subscriptions, or remaining shareholders, in the case of redemptions, might otherwise be adversely affected. In particular, the dilution adjustment may be made in the following circumstances:

- where a Fund is in continual decline (i.e. is experiencing a net outflow of redemptions);
- if the Fund is experiencing large levels of net subscriptions or net redemptions relevant to its size; and
- in any other circumstances where the Directors believe it will be in the interests of shareholders to make a dilution adjustment.

The dilution adjustment will involve adding to the net asset value per share when the Fund is in a net subscription position, and deducting from the net asset value per share when the Fund is in a net redemption position, such figure as the Directors consider represents an appropriate figure to meet transaction costs, including but not restricted to market spreads, brokerage fees and taxes, to preserve the value of the underlying assets of the relevant Fund and in any other circumstances where the Directors believe it will be in the interests of the shareholders. The resultant amount will be the price rounded to such number of decimal places, as the Directors deem appropriate.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES cont'd.

DILUTION ADJUSTMENT cont'd.

Where a dilution adjustment is made, it will increase the price at which shares shall be issued when there are net subscriptions and decrease the price at which shares shall be redeemed when there are net redemptions. The price at which each class of share shall be issued or redeemed (as appropriate) will be calculated separately but any dilution adjustment will in percentage terms affect the price of each class in an identical manner. Such dilution adjustment will not exceed 2% of the Fund's net asset value under normal market conditions; however, the Directors may temporarily increase the above mentioned maximum dilution adjustment if this is deemed necessary under exceptional market conditions and in the best interests of investors. As dilution is directly related to the inflows and outflows from a Fund, it is not possible to accurately predict whether dilution will occur at any future point in time. Consequently, it is also not possible to accurately predict how frequently the dilution adjustment will be applied.

2. SHARE CAPITAL

AUTHORISED SHARES

The initial authorised share capital of the Company is EUR 38,092 divided into 38,092 subscriber shares of EUR 1.00 each and 25,000,000,000 at no par value initially designated as unclassified shares. The unclassified shares are available for issue as participating shares.

SUBSCRIBER SHARES

The 38,092 subscriber shares at EUR 1.00 each were all issued as fully paid and are held by the Manager. The subscriber shares do not entitle the holders to any dividend and on a winding up, entitle the holders to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The subscriber shares do not form part of the net asset value of the Company and are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

REDEEMABLE PARTICIPATING SHARES

Redeemable participating shares carry the right to a proportionate share in the assets of the Funds and the holder of the share is entitled to one vote each on a poll. Shares are redeemed by shareholders at prices based on the value of net assets of the relevant class.

The activity on redeemable participating shares for the financial year ended 31 December 2024 is as follows:

Fund	Share Class	Currency	Shares in issue at beginning of financial year	Shares issued during the financial year	Shares redeemed during the financial year	Shares in issue at end of financial year

^ This share class was launched or closed during the financial year.

3. MANAGEMENT AND PERFORMANCE FEES

MANAGEMENT FEES

The Manager is entitled to receive out of the assets of a Fund an annual management fee in respect of each class, accruing daily and payable monthly in arrears at an agreed annual rate as set out in the relevant supplement of the prospectus. The table below outlines the range of annual management fee rates for each share class:

Share Class	Rate	Share Class	Rate
Class A	0.40% - 2.00%	Class N	0.90%
Class B	0.75% - 1.50%	Class R	1.00%
Class C	0.30% - 1.00%	Class S	0.50%
Class E	0.08% - 0.85%	Class SY	0.90% - 1.00%
Class F	0.35%	Class T	0.50%
Class G	0.30% - 1.00%	Class U	0.75%
Class H	0.40% - 2.00%	Class W	0.20% - 0.75%
Class I	0.45% - 1.00%	Class X	None
Class J	1.40% - 1.50%	Class Y	None
Class K	0.30% - 1.40%	Class Z	0.22% - 0.65%
Class L	0.14% - 0.30%		

3. MANAGEMENT AND PERFORMANCE FEES cont'd.

MANAGEMENT FEES (continued)

Management fees accrued to the Manager and the amounts due at the financial year end are included in the “Management Fee” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

PERFORMANCE FEES

In addition to the annual management fee, the Manager is entitled to an annual performance fee (the “Performance Fee”) in respect of certain classes of the following Funds, as detailed in the relevant supplement of the prospectus. The table below outlines the performance fee rates and benchmarks of the respective share class:

Fund	Benchmark	Rate
BNY Mellon Absolute Return Bond Fund	3 month EURIBOR / SOFR (90-day compounded) / SONIA (90-day compounded) / SARON (90-day compounded) / TONAR (90-day compounded)	Class D, R, S and T – 10.00%

4. ADMINISTRATION FEES

The Manager pays to BNY Mellon Fund Services (Ireland) Designated Activity Company (the “Administrator”) out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Administrator is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Administrator and the amounts due at the financial year end are included in the “Operating Expenses” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

5. DEPOSITARY FEES

The Company pays to the Depositary out of the assets of each Fund an annual fee which shall accrue daily and be payable monthly in arrears as detailed in the prospectus. The annual fee accrued to the Depositary is attributable to all share classes and represents a deduction from the net asset value of the Fund and, accordingly, each class. Fees accrued to the Depositary and the amounts due at the financial year end are included in the “Depositary Fee” and “Expenses Payable” figures in the Statement of Comprehensive Income and the Statement of Financial Position, respectively.

6. EXPENSE CAP

From time to time, for certain Funds, an expense cap is introduced, whereby expenses exceeding an agreed level of a relevant Fund's net asset value are borne by BNY Mellon Fund Management (Luxembourg) S.A. (the "Manager") or its affiliate. The expense cap is then applied to the relevant Fund until such time as the Board agrees to amend the relevant expense cap. At the date of these financial statements, the following expenses caps are in place:

Fund	Agreed Total Expense Ratio ("TER") Limit
BNY Mellon Absolute Return Credit Fund	TER limit of Annual Management Charge ("AMC") plus 15 basis points; increased to plus 18 basis points, effective 1 October 2024.
BNY Mellon Absolute Return Global Convertible Fund	TER limit of AMC plus 15 basis points
BNY Mellon Asian Income Fund	TER limit of AMC plus 9 basis points; increased to plus 25 basis points, effective 1 October 2024.

* Please refer to Note 19 of the financial statements.

The total expenses borne by the Manager, for Sub-Funds subject to an expense cap arrangement, during the financial year ended 31 December 2024 was USD 3,157,168 (31 December 2023: USD 2,827,631).

7. OPERATING EXPENSES

The operating expenses in the Statement of Comprehensive Income comprise of the following:

	31 December 2024	31 December 2023
Expense	USD	USD
Administration fee	10,421,966	10,829,456
Audit and taxation services	850,674	858,291
Directors' fee	133,663	119,770
Other expenses	5,411,294	3,745,329
Total operating expenses	16,817,597	15,552,846

Fees and expenses charged for the services of the statutory auditors, Ernst & Young, in respect of the financial year are as follows:

	31 December 2024	31 December 2023
	USD	USD
Statutory audit of financial statements (Ireland)	572,079	605,835
Other non-audit services - Investor Tax Reporting (United Kingdom)	122,684	151,722
Other non-audit services - Investor Tax Reporting (Austria)	155,911	100,734
Total	850,674	858,291

8. TRANSACTION COSTS

Transaction costs are costs incurred to acquire financial assets or liabilities at fair value through profit or loss and include the bid ask spread, fees and commissions paid to agents, advisers, brokers and dealers.

Transaction costs incurred for the purchases and sales of equities and financial derivative instruments are included in the "net gains/(losses) on financial assets/liabilities at fair value through profit or loss" in the Statement of Comprehensive Income and are detailed in the table below. In respect of all other securities, the bid ask spread is embedded in the purchase and sale price of the securities and cannot be separately verified or disclosed.

9. CASH AND CASH EQUIVALENTS

Cash held by the Company is deposited with The Bank of New York Mellon SA/NV, Dublin Branch and held by counterparties (Barclays Bank Plc, BNP Paribas, Canadian Imperial Bank of Commerce, Citigroup Global Markets Limited, Goldman Sachs & Co. LLC, Goldman Sachs International, HSBC Bank Plc, J.P. Morgan Securities Plc, J.P. Morgan Securities LLC, Lloyds Bank Plc, Morgan Stanley & Co International Plc, Natixis CIB, NatWest Markets Plc, State Street Bank and UBS AG) in respect of collateral and margin requirements. Cash balances include cash invested into short-term investment vehicles daily.

Cash account arrangements have been put in place in respect of the Funds as a consequence of the requirements relating to the subscription and redemption collection accounts pursuant to the Central Bank of Ireland (Supervision and Enforcement) Act 2013 (Section 48(i)) Investor Money Regulations 2015 for Fund Service Providers ("Investor Money Regulations").

9. CASH AND CASH EQUIVALENTS cont'd.

These cash accounts, held with the Global Sub-Custodian for collection of subscriptions and payment of redemptions and distributions for the Funds, are deemed assets of the Funds. The balances on these cash accounts as at 31 December 2024 and 31 December 2023 are deemed immaterial in respect of the relevant Fund to which they are due, with exception for GBP 267,577 as at 31 December 2023 on BNY Mellon Absolute Return Equity Fund (closed 9 October 2023), USD 122,470 as at 31 December 2024 (31 December 2023: USD 122,352) on BNY Mellon Asian Opportunities Fund, USD 4,812,410 as at 31 December 2024 on BNY Mellon Global Emerging Markets Opportunities Fund (closed 10 December 2024) and EUR 24,053 as at 31 December 2024 (31 December 2023: EUR 23,285) on BNY Mellon Pan European Fund (closed 9 March 2017).

10. TAXATION

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Tax Consolidation Acts, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of the shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (b) certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Distributions, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

The Manager assessed the implications of the OECD's Pillar Two framework which aims to ensure multi-national enterprises (“MNEs”) with global revenues above €750 million (or local currency equivalent) pay a minimum tax rate on income within each jurisdiction in which they operate. The framework imposes a Top-Up Tax on profits arising in jurisdictions where the effective tax rate is below 15%. The Manager determined that given the structure of the Company, it is not in scope for Pillar Two.

Certain Funds accrue for Brazilian and Indian capital gains tax on net realised and unrealised gains on investments. As at, 31 December 2024 a capital gains tax payable of USD 29,279 for BNY Mellon Asian Income Fund (31 December 2023: USD 34,405), a capital gains tax payable of USD 307,897 for BNY Mellon Asian Opportunities Fund (31 December 2023: USD 293,332), capital gains tax payable of USD 277,648 for BNY Mellon Brazil Equity Fund (31 December 2023: USD 861,322), a capital gains tax payable of USD Nil for BNY Mellon Global Emerging Markets Opportunities Fund (31 December 2023: USD 113,062), a capital gains tax payable of USD 5,046 for BNY Mellon Global Opportunities Fund (31 December 2023: USD Nil), a capital gains tax payable of USD 48,358 for BNY Mellon Sustainable Global Emerging Markets Fund (31 December 2023: USD 61,718), capital gains tax payable of USD 153,838 for BNY Mellon Sustainable Global Equity Fund (31 December 2023: USD Nil) and a capital gains tax payable of EUR Nil for BNY Mellon Sustainable Global Real Return Fund (EUR) Fund (31 December 2023: EUR 3,865) have been recorded in the Statement of Financial Position.

10. TAXATION cont'd.

For the financial year ended 31 December 2024, a capital gains tax provision credit release of USD 5,125 and capital gains tax expense of USD 13,554 for BNY Mellon Asian Income Fund (31 December 2023: USD 34,405), a capital gains tax expense of USD 283,202 for BNY Mellon Asian Opportunities Fund (31 December 2023: USD 301,433), capital gains tax provision credit release of USD 583,674 and capital gains tax expense of USD 97,703 for BNY Mellon Brazil Equity Fund (31 December 2023: USD 147,383), capital gains tax provision credit release of USD 113,062 and capital gains tax expense of USD 224,973 for BNY Mellon Global Emerging Markets Opportunities Fund (31 December 2023: USD 113,062), capital gains tax expense of USD 5,046 for BNY Mellon Global Opportunities Fund (31 December 2023: USD Nil), capital gains tax payments of USD 215,715 for BNY Mellon Mobility Innovation Fund (31 December 2023: USD Nil), capital gains tax provision credit release of USD 13,361 and capital gains tax expense of USD 69,770 for BNY Mellon Sustainable Global Emerging Markets Fund (31 December 2023: USD 61,715), capital gains tax expense of USD 153,838 for BNY Mellon Sustainable Global Equity Fund (31 December 2023: USD Nil) and capital gains tax provision credit release of USD 3,865 and capital gains tax expense of USD 4,315 for BNY Mellon Sustainable Global Real Return Fund (EUR) Fund (31 December 2023: USD 3,865), have been recorded in the Statement of Comprehensive Income under "Withholding taxes on dividends and other investment income".

11. RELATED PARTIES

In the Directors opinion, the Manager, the Investment Managers (Newton Investment Management Limited, Walter Scott & Partners Limited, Newton Investment Management North America LLC, ARX Investimentos Ltda, Insight Investment Management (Global) Limited, Insight North America LLC, Newton Investment Management Japan Ltd), the Sub-Investment Managers (Insight North America LLC, Newton Investment Management Limited and Newton Investment Management North America LLC), the Delegated Investment Manager (Insight North America LLC) and the Distributors are considered as related parties of the Company.

The Manager pays out of the fee received by it, the fees of the Investment Managers and the Distributors at an annual rate agreed between the parties. Fees paid in respect of all other material related party transactions during the financial year are fully disclosed in the Statement of Comprehensive Income and in Note 3 Management and Performance Fees, Note 4 Administration Fees, Note 5 Depositary Fees, Note 6 Expense Cap and Note 7 Operating Expenses of the financial statements.

The Directors are related parties of the Company.

* Please refer to Note 19 of the financial statements.

During the financial year, companies related to the Depositary and the Investment Managers were selected by the Investment Managers to execute investment transactions and foreign exchange transactions and to accept deposits on behalf of the Investment Managers. The Bank of New York Mellon, New York and The Bank of New York Mellon, London were counterparties to forward foreign currency contracts open at the financial year end as disclosed in appendices to the Schedule of Investments. The counterparties were selected by the Investment Managers and the terms of such transactions were negotiated by the Investment Managers with such companies.

The Manager owns 38,092 (31 December 2023: 38,092) of the Company's subscriber shares as disclosed in Note 2 of the financial statements. There was no ultimate controlling party of the Company during the financial years ended 31 December 2024 and 31 December 2023.

12. SOFT COMMISSION AND DIRECTED BROKERAGE ARRANGEMENTS

During the financial year, ARX Investimentos Ltda (the "Investment Manager") have entered into soft commission arrangements (also referred to as soft dollar arrangements) with brokers in respect of which certain goods and services used to support the investment process were received. The Investment Manager do not make direct payment for these services but either remunerate brokers through commissions paid on transactions or arrange for executing counterparties to pay some or all of their allocated research commission away to other brokers or non-brokering research providers. The goods and services utilised for the Company include economic and political analysis, industry, sector or company specific, investment related research and broker provide active order management. The Investment Manager consider these arrangements to be of benefit to its clients and the brokerage rates are not in excess of customary institutional full service brokerage rates.

14. EFFICIENT PORTFOLIO MANAGEMENT

The Company and each Fund may invest in Financial Derivative Instruments ("FDIs") for investment purposes where specified in the relevant supplement to the prospectus. In addition, each Fund may utilise techniques and instruments for efficient portfolio management purposes or to protect against foreign exchange rate risks, subject to the conditions and within the limits laid down by the Central Bank.

14. EFFICIENT PORTFOLIO MANAGEMENT cont'd.

Such techniques and instruments include, but are not limited to, futures, options, swaps, warrants, P-Notes, stock lending arrangements, repurchase/reverse repurchase agreements, forward foreign currency contracts and when issued and/or delayed delivery securities.

Efficient portfolio management transactions relating to the assets of a Fund may be entered into with one of the following aims: a reduction of risk, a reduction of cost with no increase or a minimal increase in risk or generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return). The Company currently invests in futures, options, swaps, forward foreign currency contracts and P-Notes, as evidenced in the relevant Schedule of Investments. Details of all open transactions at the financial year end are disclosed in the Schedule of Investments.

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon SA/NV and the Depositary. The securities lending income is currently split between the Company and The Bank of New York Mellon SA/NV in the proportion 81%:19%.

Securities lending transactions and the related collateral are settled and cleared in accordance with the tri-party and bilateral agreements.

The Company earned revenue from securities lending during the financial year ended 31 December 2024, as detailed in the table below:

Fund	Base Currency	Gross Earnings	Direct Costs (Paid to The Bank of New York Mellon SA/NV) (19%)	Net Earnings to Company (81%) [^]

15. NET ASSET VALUE

The net asset value of each class of redeemable participating share is determined by dividing the value of the net assets of the share class by the total number of redeemable participating shares in issue at the financial year end.

The published net asset value of each class of redeemable participating share is as follows:

Fund	Share Class	Currency	31 December 2024	31 December 2023	31 December 2022
BNY Mellon Absolute Return Bond Fund					
Total net assets		EUR	339,210,537	291,785,157	335,180,316

16. RISK MANAGEMENT OBJECTIVES AND POLICIES

STRATEGY IN USING FINANCIAL INSTRUMENTS

The Company's investment activities expose it to the various types of risk, which are associated with the financial instruments and markets in which it invests: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk. The Company has in place risk management programmes that seek to limit the potential adverse effects of these risks on the Funds' financial performances.

The assets of each Fund will be invested separately in accordance with the investment objectives and policies of the relevant Fund, which are set out in the relevant supplements to the prospectus. Where a Fund maintains in its name reference to a particular currency, country, region, economic sector or type of security, at least three quarters of the assets of that Fund will comprise investments corresponding to the relevant currency, country, region, economic sector or type of security (as appropriate).

The Funds may use FDI for efficient portfolio management purposes or to protect against foreign exchange risks. Some Funds have the facility to use FDI for investment purposes according to the Central Bank UCITS Regulations. In their Risk Management Process ("RMP") it explains whether each Fund uses the commitment approach or Value at Risk ("VaR") to calculate its global exposure. The commitment approach measures the leverage effect produced by the use of derivatives and is calculated by converting all derivative positions, whether used as part of the Fund's general investment policy, for purposes of risk reduction or for the purpose of efficient portfolio management, based on the market values of the underlying assets or contracts. VaR for a pre-defined time horizon measures the threshold loss in value of a portfolio of financial instruments that may be exceeded for a given probability (either Absolute^[1] or Relative^[2]). The quality of the VaR model forecasts is demonstrated by back-testing. As a complement to VaR, stress testing is used to evaluate the potential impact on portfolio values of extreme, although plausible, events or movements in a set of financial variables.

For a more detailed discussion, the RMP for each of the Funds is available on request.

[1] This is defined as the VaR of the Fund capped as a percentage of NAV.

[2] This is defined as the VaR of the Fund divided by the VaR of a benchmark or reference portfolio.

FINANCIAL RISK MANAGEMENT PROCESS

In order to achieve its investment objectives, the Company buys, sells and holds financial assets and liabilities. As a consequence, the Company is exposed to market price risk, interest rate risk, currency risk, credit risk and liquidity risk arising from the financial instruments it holds. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company's financial performance. The Company uses FDI to moderate certain risk exposures.

The risk management policies employed by the Company to manage these risks are discussed below.

INVESTMENT RISK

Activities of each Fund expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

MARKET RISK

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, interest rate risk and currency risk.

MARKET PRICE RISK

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

Many of the Funds trade in financial instruments, taking positions in traded securities in the equity and equity derivative markets. The investments of the Funds are subject to market fluctuations and there can be no assurances that investments will appreciate in value, therefore presenting a risk of loss of capital.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

MARKET PRICE RISK cont'd.

The Investment Managers manage market price risk through building diversified investment portfolios across a range of industry and/or geographic sectors as is appropriate for the Funds and in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. An analysis of exposures to market price risk is provided in the Schedule of Investments for each Fund. The market positions of the Funds are monitored on a daily basis by the Investment Managers, reviewed on a monthly basis by the Investment Management Oversight Committee and on a quarterly basis by the Board of Directors.

The Company's market risk strategy is driven by the Company's investment risk and return objectives. The Board of Directors has instructed the Investment Managers to manage each of the risks in accordance with an established risk management system.

The following table demonstrates by way of example the likely increase in net asset value as a result of a 5% upwards movement in the Funds' related market index (a 5% decrease would have similar negative results). Please note the table does not include the bond Funds as their main exposure is to interest rate risk, as detailed below. Detail of market sensitivity for these Funds is provided in the subsequent commentary. In the interests of providing consistent comparisons across the Funds, the table assumes a movement of 5%. It should be noted future market conditions could vary significantly and the table is meant for illustrative purposes only.

As at 31 December 2024 and 31 December 2023, for the Funds listed in the table below, should market value have increased or decreased by 5% with all other variables remaining constant, the increase or decrease in net assets attributable to redeemable participating shareholders for the financial year is shown.

** This Fund launched in financial reporting year 2023.

VaR is the risk measurement methodology used to assess the Funds' leverage and market risk volatility. When the VaR is calculated as a percentage of the net asset value of the Funds (absolute or relative VaR), it may not be greater than the Regulatory limits, as detailed in the prospectus. VaR is calculated on a daily basis using a one-tailed 99% confidence level and pre-determined holding period on either an absolute (where the figure is compared to the net asset value of the Fund) or relative basis (where VaR is compared to the benchmark or reference portfolio). The historical observation period will not be less than one year unless a shorter period is justified.

Some limitations of VaR analysis are:

- the models' methodologies are based on historical data and cannot take account of the fact that future market price movements, correlations between markets and levels of market liquidity in conditions of market stress may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number; and

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

MARKET PRICE RISK cont'd.

- the market price information represents a hypothetical outcome and is not intended to be predictive.

The minimum, average and maximum utilisation of the Regulatory limits calculated during the financial year ended 31 December 2024 are as follows:

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

MARKET PRICE RISK cont'd.

Leverage is calculated as the sum of the notionals of the derivatives used. (This may be supplemented with leverage calculated on the basis of a commitment approach. The creation of leveraged exposure to an index via FDI, or the inclusion of a leverage feature in an index, must also be taken into account in meeting the prospectus disclosure requirements).

The average level of leverage employed during the financial year ended 31 December 2024 and 31 December 2023 is as follows:

Fund	Average Level of Leverage 2024	Average Level of Leverage 2023
BNY Mellon Absolute Return Bond Fund	564.16%	488.79%

** This Fund launched or closed in financial reporting year 2023.

INTEREST RATE RISK

Interest rate risk is defined as the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rates. This risk arises on financial instruments whose fair value is affected by changes in interest rates.

The majority of the Company's financial assets and liabilities i.e. those Funds holding substantially equity or equity derivative instruments are non-interest bearing, as a result, these assets are not subject to significant amounts of risk due to fluctuations in the prevailing levels of market interest rates. Any excess cash and cash equivalents are invested at short-term market interest rates.

** This Fund launched in financial reporting year 2023.

For those Funds holding primarily interest bearing securities and as such exposed to the risk of fluctuations in the prevailing levels of market interest rates, the Investment Managers monitor the Funds' exposure to interest fluctuations on a daily basis. Whilst primarily an investment decision, the Investment Managers employ proprietary systems and processes to best position the Funds to benefit from or limit the risk of any fluctuations in the prevailing market levels of market interest rates.

The Investment Managers will endeavour to acquire interest bearing securities in liquid markets. However, not all securities invested by the Funds will be listed or rated and consequently liquidity may be low. Moreover the accumulation and disposal of holdings in some securities may be time consuming and need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity. The financial markets of emerging market countries in general, are less liquid than those of the more developed nations. Purchases and sales of investments may take longer than would otherwise be expected on developed stock markets and transactions may need to be conducted at unfavourable prices.

The table below demonstrates the impacts of 25 basis points ("bps") (31 December 2023: 75bps) increase in the market interest rates in the key markets the listed Funds were invested.

As at 31 December 2024, should interest rates have increased by 25 bps (31 December 2023: 75 bps) with all other variables remaining constant, the instantaneous shift in the Funds' total return is listed below; a 25 bps decrease (31 December 2023: 75bps) decrease would have similar but opposite results in the Funds' total return).

* Please refer to Note 19 of the financial statements.

** This Fund launched in financial reporting year 2023.

It should be noted that the future market conditions could vary significantly and the table is meant for illustrative purposes only.

For those Funds which use VaR, the interest rate risk sensitivity analysis has been incorporated into the calculation of market price risk.

CURRENCY RISK

Currency risk is the risk that a fair value of a financial instrument will fluctuate because of changes in foreign exchange rates. The risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

The Investment Managers monitor the Company's currency position on a daily basis and may act to manage the Company's currency exposure through the use of FDI such as forward foreign currency contracts or options. The Investment Managers of hedged non-base share classes may also use derivative instruments such as forward foreign currency contracts or options as a key component of their operating strategy. Currency risk does not arise from financial instruments denominated in the functional currency.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CURRENCY RISK cont'd.

The following tables set out the Company's material exposures to foreign currency risk as at 31 December 2024:

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CURRENCY RISK cont'd.

The following table demonstrates the impact on net assets attributable to redeemable participating shareholders of a movement in local currencies against the Funds' functional currency by way of illustration. In the interests of providing consistent comparisons across the Funds, the table assumes a 5% upward movement in the value of the local currencies (a negative 5% would have similar negative results).

As at 31 December 2024 and 31 December 2023, had the exchange rate between the local currencies held by the Fund and its functional currency increased or decreased by 5% with all other variables held constant, the increase or decrease, respectively, in net assets attributable to redeemable participating shareholders is listed in the table below.

Fund	Functional currency	Increase/(decrease) in net asset value 2024	Increase/(decrease) in net asset value 2023

** This Fund launched or closed in financial reporting year 2023.

BNY Mellon Efficient U.S. Fallen Angels Beta Fund had no foreign currency risk exposure as at 31 December 2024 and as at 31 December 2023.

For those Funds which use VaR, the currency risk sensitivity analysis has been incorporated into the calculation of market price risk.

CREDIT RISK

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk. Financial assets, which potentially expose the Company to credit risk, consist principally of interest bearing securities such as bonds, financial derivative instruments and investments in cash balances and deposits with and receivable from brokers.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CREDIT RISK cont'd.

The extent of the Company's exposure to credit risk in respect of these financial assets approximates their carrying values as recorded in the Statement of Financial Position.

The Investment Managers manage issuer risk through building diversified portfolios with a limited concentration of exposure (10%) to any one issuer in accordance with the Central Bank UCITS Regulations and the investment objectives of the Funds. Additionally, if required the Investment Managers will limit ownership of debt instruments to those instruments carrying a credit rating equal to or in excess of that provided for in the individual investment objectives of the Funds.

Substantially all of the assets of the Company are held by the Depositary. Bankruptcy or insolvency of the Depositary may cause the Company's rights with respect to securities and other positions held by the Depositary to be delayed or limited.

The Company only transacts with depositaries that are regulated entities subject to prudential supervision, or with high credit ratings assigned by international credit-rating agencies. The Directors monitor the credit quality of the Depositary, The Bank of New York Mellon SA/NV, Dublin Branch, on a quarterly basis in order to mitigate risk. Its long-term senior debt and long-term deposit rating by Standard & Poor's is AA- (31 December 2023: AA-) as at the end of the financial year.

The Company's securities and other positions are segregated from the assets of either the Depositary or its agents. Thus in the event of insolvency or bankruptcy of the Depositary, the Company's securities and other positions are segregated from those of the Depositary or its agents. The Company will, however, be exposed to the credit risk of the Depositary, or any custodian used by the Depositary, in relation to the Company's cash held by the Depositary and the subscription and redemption cash collection accounts held by the Global Sub-Custodian. In the event of insolvency or bankruptcy of the Depositary, the Company will be treated as a general creditor of the Depositary in relation to cash holdings of the Company.

Counterparty/issuer risk is monitored in the following manner:

- Each Investment Manager maintains an Approved Broker list which is subject to ongoing monitoring. The trading system only permits trading with approved brokers. New brokers are added, subject to a formal review process that includes a review of the broker's creditworthiness and financial strength.
- Measurement and monitoring of counterparty or issuer trade exposure is conducted daily and consists of reviewing all outstanding positions held.

The permanent risk function of the Company oversees this process as well as performing independent checks.

The long-term senior debt and long-term deposit rating by Standard & Poor's of the counterparties whom the Funds transacted with as at 31 December 2024 are listed in the table below (rating for 31 December 2023 is the same except where stated):

^ Credit Suisse AG merged with and into UBS AG in 2024, with UBS AG succeeding by operation of Swiss law to all assets and all liabilities of Credit Suisse AG.

For Funds using the cash sweep management, cash balances are automatically swept into the short-term investment vehicle daily. The cash investment auto-sweep is part of the daily cash management procedure. All money market funds available through the cash sweep management are triple-A rated by Standard & Poor's and Moody's and maintain a stable net asset value. US dollar, Euro and Sterling prime and treasury funds are available for investments, in addition to a number of funds in additional currencies, depending on the domicile of the investor and the tax implications.

The table below details the cash sweep balances as at 31 December 2024 and 31 December 2023:

Fund	Base Currency	31 December 2024	31 December 2023

* Please refer to Note 19 of the financial statements.

** This Fund launched in financial reporting year 2023.

All transactions in listed securities are settled or paid upon delivery using approved brokers. The risk of broker default is considered minimal as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset. As a seller of protection on credit default swaps, the Funds will generally receive from the buyer of protection a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Funds would effectively add leverage to their portfolios because, in addition to their total net assets, the Funds would be subject to investment exposure on the notional amounts of the swaps.

The maximum potential amount of future payments (undiscounted) that a Fund as a seller of protection could be required to make under a credit default swap equals the notional amount of the agreement. These potential amounts would be partially offset by any recovery values of the respective referenced obligations, upfront payments received upon entering into the agreement, or net amounts received from the settlement of buy protection credit default swap entered into by the Funds for the same referenced entity or entities.

** This Fund launched in financial reporting year 2023.

Where possible the Company restricts its exposure to credit losses on the trading derivative instruments it holds by entering into master netting arrangements which is a bilateral agreement between the Funds and the counterparties (approved brokers) with whom the Funds undertake a significant volume of over-the-counter derivative transactions (including total return swaps). Derivatives are held with counterparties on an unsegregated basis. Master netting arrangements do not result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Company's overall exposure to credit risk on derivative instruments subject to a master netting arrangement can change substantially within a short period, as it is affected by each transaction subject to the arrangement.

Certain over-the-counter derivatives are cleared through central clearing houses. Under this arrangement, over-the-counter trades entered with counterparties are given up to clearing houses, which after acceptance effectively replace the counterparty for the risk aspects of the trade.

The Company employs a risk management process which will enable it to measure, monitor and manage the risks attached to financial derivative positions and details of this process have been provided to the Central Bank.

For the purpose of providing margin or collateral in respect of transactions in financial derivative instruments, the Funds of the Company may transfer, mortgage, charge or encumber any assets or cash forming part of the Funds. The Funds may also be exposed to a credit risk in relation to the counterparties with whom they transact or place margin or collateral in respect of transactions in financial derivative instruments and may bear the risk of counterparty default.

The Funds may receive cash and eligible non-cash collateral in relation to derivative trading to reduce counterparty exposure. Cash collateral received by each Fund is shown as an asset in the Statement of Financial Position, which is offset by a corresponding liability.

As at 31 December 2024 and 31 December 2023, no counterparty pledged non-cash collateral in respect of financial derivative transactions held on the Sub-Funds.

Those Funds entering into securities lending arrangements are also exposed to counterparty risk. To minimise such risk, collateral is held, exceeding in value the amount of securities on loan. Details of these are provided in Note 14 of the financial statements.

A number of Funds have investments in leveraged loans which are held on an unsegregated basis with the agent banks. These loans are not held with the Depositary and accordingly the Funds are subject to the credit risk of the borrower. The Funds are also subject to the credit risk of the agent banks.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

LIQUIDITY RISK

Liquidity risk is the risk that the Company may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Company is exposed to the daily settlement of margin calls on derivatives and to daily cash redemptions of redeemable participating shares. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a listed exchange. Listed securities of each Fund are considered readily realisable, as they are listed on a regulated stock exchange.

The Investment Managers utilise derivative instruments and debt securities, if appropriate, such as exchange traded index future contracts to allow exposure to markets whilst maintaining sufficient liquidity.

Where any Fund acquires securities on the over-the-counter markets, there is no guarantee that the Fund will be able to realise the fair value of such securities due to their tendency to have limited liquidity and comparatively high price volatility.

The Company has the ability to borrow in the short term to ensure settlement. An overdraft facility is in place and has been utilised for settlement liquidity purposes. The Depositary shall be entitled to use available cash in the Fund's account and to liquidate securities in the account as is necessary to meet the Fund's obligations in connection with the provision of an overdraft facility to the Fund and/or unpaid amounts.

The Company's financial assets and liabilities are held for trading and are acquired principally for the purpose of selling in the short term. As these securities are not expected to be held to maturity or termination, the current market value represents the estimated cash flow that may be required to dispose of the securities. Future cash flows of the Funds and realised liabilities may differ from current liabilities based on changes in market conditions.

All financial liabilities are realisable within three months except those noted in the tables within this note.

Swaps and other derivative instruments shall be subject to disclosure in the below tables based on their contractual maturity settlements dates, which may be "Greater than 1 year", however given swaps and other derivative instruments are held for trading purposes, the respective Investment Managers may elect on an earlier settlement, dependent on market conditions.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

LIQUIDITY RISK cont'd.

The table below summarises the financial liabilities for the Funds with derivative exposures and other liabilities, into relevant maturity groupings based on the remaining period as at 31 December 2024 to the contractual maturity date. The tables have been prepared based on the undiscounted gross cash outflows relating to its financial liabilities:

** This Fund launched in financial reporting year 2023.

Redeemable shares are redeemed on demand at the holders' option. However, the Directors do not envisage that the contractual maturity will be representative of the actual cash outflows, as holders of these instruments typically retain them for the medium to long term.

In order to manage the Company's overall liquidity and to facilitate an orderly disposition of securities, the Directors are able to refuse to repurchase any shares in excess of one tenth of the shares in issue in a Fund on any one valuation day by way of the provisions in the prospectus.

The number of investors that held more than 10% of the net assets at trading valuation of the Fund at the end of the financial year are as follows:

NUMBER OF SHAREHOLDERS

The Company did not have less than 10 redeemable participating shareholders at the end of the current financial year and prior financial year.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

CAPITAL RISK MANAGEMENT

The capital of the Funds is represented by the net assets at the end of the financial year. The amount of net assets can change significantly on a daily basis as the Funds are subject to daily subscriptions and redemptions at the discretion of shareholders. The Funds' objective when managing capital is to safeguard the Funds' ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

In order to maintain or adjust the capital structure, it is part of the Company's policy to perform the following:

- The level of daily subscriptions and redemptions relative to the assets it expects to be able to liquidate is monitored and the amount of distributions payable to redeemable participating shareholders is adjusted accordingly.
- Redeemable participating shares are issued and redeemed in accordance with the prospectus and supplements of the Funds, which include the ability to restrict redemptions and requirement for certain minimum holdings and subscriptions.

FAIR VALUE ESTIMATION

The Company has classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

Instruments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded funds and derivatives, highly liquid government bonds (G7 countries), certificate of deposit and other quoted securities. The Company does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade government (non-G7 countries) and corporate bonds, over-the-counter derivatives, collective investment schemes, money market instruments, P-Notes and certain listed equities. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include leveraged loans and corporate debt securities which are priced at costs or fair valued using single broken quote. Unobservable inputs shall be used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, i.e. an exit price from the perspective of a market participant that holds the asset or owes the liability. Therefore, unobservable inputs shall reflect the assumptions that market participants would use when pricing the asset or liability, including assumptions about risk. The sensitivity of unobservable inputs used in the fair valuation of these level 3 securities is not readily determinable.

16. RISK MANAGEMENT OBJECTIVES AND POLICIES cont'd.

FAIR VALUE ESTIMATION cont'd.

The following table provides an analysis of financial instruments that are measured at fair value as at 31 December 2024:

** This Fund launched or closed in financial reporting year 2023.

Transfers are deemed to occur at the beginning of the financial year.

The transfer from Level 2 to Level 3 relates to bond positions whose issuers experienced reductions in trading activity and was inactive (i.e. stale) as at the financial year end. These securities are priced at cost or fair valued using single broker quote and resulted in the reclassification to Level 3.

The transfers out of Level 3 are related to securities that were priced at cost and subsequently were subject to active trading and normal vendor pricing.

17. COMMITMENTS AND CONTINGENCIES

There are no commitments or contingencies as at 31 December 2023 or 31 December 2024.

18. SEGREGATED LIABILITY

The Company avails of the segregated liability provisions of Section 1405 (1) of the Act. As such, under Irish Law the Company generally will not be liable as a whole to third parties and there generally will not be the potential for cross liability between the Funds.

19. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR

Claire Cawley was appointed as Chair of the Board of Directors, replacing David Dillon, effective 1 January 2024.

On 2 April 2024, the Supplement of BNY Mellon Absolute Return Bond was modified for some clarification updates.

On 2 April 2024, BNY Mellon Efficient Global High Yield Beta Fund and BNY Mellon Efficient IG Corporate Beta Fund were modified to allow for SFDR registration from Article 6 to Article 8.

On 2 April 2024, the fees were increased on non-Founders share classes in the Responsible Horizons Euro Impact Bond Fund.

On 2 May 2024, BNY Mellon Global Leaders Fund was modified to allow SFDR reclassification from Article 6 to Article 8.

On 22 May 2024, BNY Mellon Dynamic U.S. Equity Fund, BNY Mellon Efficient U.S. Fallen Angels Beta Fund, BNY Mellon Efficient U.S. High Yield Beta Fund, BNY Mellon Long-Term Global Equity Fund, BNY Mellon Mobility Innovation Fund BNY Mellon U.S. Equity Income Fund and BNY Mellon U.S. Municipal Infrastructure Debt Fund were registered in Korea.

BNY Mellon Efficient Euro High Yield Beta Fund was launched on 24 June 2024, following a modification to allow SFDR reclassification from Article 6 to Article 8.

BNY Mellon Global Aggregate Bond Fund was launched on 16 July 2024.

On 17 July 2024, the benchmark for BNY Mellon Dynamic Factor Premia V10 Fund changed from the FTSE 3 Month US T-Bill Index to the ICE BofA U.S. 3-Month Treasury Bill Index.

On 19 July 2024, the supplement of BNY Mellon Global Credit Fund was modified to allow for registration in Hong Kong.

Effective 26 August 2024, Greg Brisk resigned as Director of the Company.

On 3 September 2024, BNY Mellon Global Unconstrained Fund was renamed BNY Mellon Sustainable Global Multi-Asset Fund; and was modified to allow for SFDR registration from Article 6 to Article 8.

Effective 11 September 2024, Deirdre Gormley was appointed as Director of the Company.

Effective 12 September 2024, David Dillon resigned as Director of the Company.

The Company's Annual Prospectus Update occurred on 25 October 2025, incorporating the below changes:

- Updates to the supplements of BNY Mellon Euroland Bond Fund and BNY Mellon European Credit Fund, to reflect that these Sub-Funds can invest in callable and puttable bonds.

- The following supplements for these SFDR Article 8 or SFDR Article 9 Sub-Funds were updated to reflect these Sub-Funds may now utilise securities lending arrangements where these arrangements are compatible with the relevant Sub-Fund's categorisation and investment approach: BNY Mellon Absolute Return Bond Fund, BNY Mellon Efficient U.S. Fallen Angels Beta Fund, BNY Mellon Emerging Markets Corporate Debt Fund, BNY Mellon Floating Rate Credit Fund, BNY Mellon Global Short-Dated High Yield Bond Fund, BNY Mellon Long-Term European Equity Fund, BNY Mellon Long-Term Global Equity Fund, BNY Mellon U.S. Municipal Infrastructure Debt Fund, Responsible Horizons Euro Corporate Bond Fund, Responsible Horizons Euro Impact Bond Fund and Responsible Horizons EM Debt Impact Fund.

19. SIGNIFICANT EVENTS DURING THE FINANCIAL YEAR cont'd.

- The supplements for the following SFDR Article 8 or SFDR Article 9 Sub-Funds were updated to reflect clarifications and amendments to issuers and/or companies in which the Sub-Funds may not invest. The exclusion updates include clarifying that these Sub-Funds have existing exclusions related to adult entertainment, alcohol, gambling and thermal coal and introducing new exclusions related to oil and gas and fracking: BNY Mellon Blockchain Innovation Fund, BNY Mellon Mobility Innovation Fund, BNY Mellon Sustainable Global Dynamic Bond Fund, BNY Mellon Sustainable Global Emerging Markets Fund, BNY Mellon Sustainable Global Equity Fund and BNY Mellon Sustainable Global Real Return Fund (EUR).

- The supplement of BNY Mellon Global Equity Income Fund was updated to reflect amendments to the companies in which the Sub-Fund may not invest. The exclusion update introduced new exclusions related to oil and gas and removed the prohibition on the Sub-Fund investing in companies that have a material involvement in the production of alcoholic beverages.

- The following supplements were updated to reflect that certain adverse impacts of investment decisions on specific sustainability factors will be considered for these Sub-Funds from the perspective of the harm the investments positions might do externally to those sustainability factors, and what steps are taken to mitigate that harm: BNY Mellon Efficient U.S. Fallen Angels Beta Fund, BNY Mellon Emerging Markets Corporate Debt Fund, BNY Mellon Global Credit Fund and BNY Mellon U.S. Municipal Infrastructure Debt Fund.

- The supplement of Responsible Horizons EM Debt Impact Fund was updated to reflect that in the case of a split rating of debt and debt-related securities (i.e. different ratings given by two or more rating agencies), the lower of the two highest ratings, instead of the highest rating, will be considered.

- The supplement of BNY Mellon Absolute Return Global Convertible Fund was updated to clarify that the maximum exposure of the Sub-Fund to total return swaps ("TRS") shall be 75% rather than 500% of the Sub-Fund's Net Asset Value and the anticipated exposure to TRS is not expected to exceed 40% rather than 400% of the Sub-Fund's Net Asset Value.

- The supplements of BNY Mellon Long-Term European Equity Fund and BNY Mellon U.S. Equity Income Fund were updated to remove the Sub-Funds' ability to invest in master limited partnerships ("MLPs"). As part of their primary investment strategy, the Sub-Funds' invest in a range of equity and equity-related securities, examples of which currently include MLPs.

BNY Mellon Emerging Markets Debt Opportunistic Fund was closed on 30 October 2024.

On 10 December 2024, BNY Mellon Absolute Return Bond Fund was modified to allow registration from Article 6 to Article 8.

BNY Mellon Efficient Global IG Corporate Beta Fund, BNY Mellon Global Emerging Markets Opportunities Fund and BNY Mellon Sustainable Global Real Return Fund (EUR) were closed on 10 December 2024.

BNY Mellon Global Multi-Asset Income Fund, BNY Mellon S&P 500® Index Tracker and BNY Mellon U.S. Dynamic Value Fund were revoked by the Central Bank on 23 December 2024.

Other than as disclosed above, there were no other significant events affecting the Company during the financial year.

IMPORTANT INFORMATION (UNAUDITED)

BNY MELLON S&P 500® INDEX TRACKER

S&P 500® is a trademark of The McGraw-Hill Companies, Inc. and has been licensed for use by BNY Mellon Global Funds, plc. The BNY Mellon S&P 500® Index Tracker is not sponsored, endorsed, sold or promoted by Standard & Poor's and Standard & Poor's makes no representation regarding the advisability of investing in the BNY Mellon S&P 500® Index Tracker.

Please note: When a Fund of the Company invests in the shares of other collective investment schemes that are managed, directly or by delegation, by the Company's management company, BNY Mellon Fund Management (Luxembourg) S.A. ("BNY MFM Lux"), or by any other company with which BNY MFM Lux is linked by common management or control, or by a direct or indirect holding of more than 10% of the share capital or of the votes, BNY MFM Lux or that other company shall not charge management, subscription, conversion or redemption fees on account of the Fund's investment in the shares of such other collective investment scheme.

APPENDIX 1

UCITS V REMUNERATION POLICY (UNAUDITED)

In accordance with the UCITS V Directive, the Irish implementing Regulations and the ESMA UCITS Remuneration Guidelines (the “UCITS Remuneration Code”), the Company is required to disclose details of the remuneration paid by the Manager to its staff for the financial year.

In line with the requirements of Directive 2009/65/EC, as amended by Directive 2014/91/EU (the “UCITS Directive”), the Manager is subject to the rules on remuneration set out in Article 14(b) of the UCITS Directive. These rules require managers of UCITS to have remuneration policies, procedures and practices that:

- are consistent with and promote sound and effective risk management;
- do not encourage excessive risk-taking inconsistent with the risk profiles or governing documentation of the UCITS; and
- do not impair compliance with the Manager’s duty to act in the best interests of the UCITS.

The Manager applies its remuneration policy and practices in a manner that is proportionate to its size and that of the UCITS it manages, its internal organisation and the nature, scope and complexity of its activities. The Manager also applies this principle of proportionality to the appointment of any third-party that makes investment decisions on behalf of the UCITS under a formal delegation arrangement and which may affect the risk profile of the relevant sub-funds.

In broad terms, the Manager’s business model is designed such that it does not promote excessive risk-taking. In accordance with the requirements under the UCITS Directive, the Manager takes appropriate steps to identify individuals providing services to the Manager whose professional activities may have a material impact on the risk profile of the Manager and the UCITS that it manages, known as “Identified Staff”, including:

- statutory directors;
- senior management and others within the same remuneration bracket of senior management;
- the heads of the control functions; and
- other risk takers including all staff members whose professional activities – either individually or collectively, as members of a group – can have a material influence on the risk profiles of the Manager or of a UCITS it manages.

The executive directors do not receive any compensation directly from the Manager. The independent non-executive directors receive remuneration for their services from the Manager which comprises a fixed fee and no variable compensation component.

The operations and activities of the Manager and the UCITS for which it acts as manager are largely performed by employees of other companies within the BNY Mellon Group and the compensation of these individuals is determined by senior management of the relevant business line in accordance with the BNY Mellon policies, principles and practices at global and regional level. In such cases where services arrangements or formal delegation of portfolio management are in place, the Manager seeks to ensure that remuneration arrangements in respect of Identified Staff are considered to be equally effective as those to which the Manager is directly subject, including the principles of proportionality. Furthermore, the risk framework operated by the Manager in respect of delegated portfolio management arrangements is designed to ensure that individuals performing activities within such third-parties do not have capacity to have a material impact on the risk profile of the UCITS.

The BNY Mellon compensation philosophy and principles are based on offering an overall remuneration that supports its core values of: Client Focus, Integrity, Teamwork and Excellence. Performance is rewarded both at the individual and corporate level and determined on the basis of financial and non-financial factors. This is intended to align the interests of employees and shareholders and/or clients by incentivising actions that contribute to superior financial performance and long-term value and by ensuring that incentive compensation arrangements do not encourage employees to take unnecessary and excessive risks. BNY Mellon’s overall compensation structure is balanced between short-term and long-term incentives and a combination of cash and equity compensation. This is intended to discourage employees from taking excessive risks that may adversely affect the long-term performance of companies within the BNY Mellon Group and impact a substantial proportion of their own compensation.

BNY Mellon operates remuneration committees at a global, regional and enterprise level with responsibilities relating to the oversight of employee compensation and benefit policies and programmes. The Manager does not operate an individual remuneration committee.

Remuneration for identified staff in respect of the year ended 31 December 2024:

	USD
Total remuneration for the financial year (excludes VAT)	3,771,750
Of which fixed remuneration	2,066,725
Of which variable remuneration	1,705,025

APPENDIX 1

SECURITIES FINANCING TRANSACTIONS REGULATION DISCLOSURES (“SFTR”) (UNAUDITED)

SECURITIES LENDING TRANSACTIONS

The Company has entered into a securities lending agreement (as amended, assigned, novated and assumed) with The Bank of New York Mellon SA/NV (the “Agent Lender”) effective 27 November 2015.

The following table details the aggregate value of securities on loan by Fund as a proportion of total lendable assets and each Fund’s net asset value as at 31 December 2024:

Fund	Currency	Aggregate value of securities on loan	% of Total lendable assets	% of Net asset value
BNY Mellon Absolute Return Bond Fund	EUR	49,768,727	20.06	14.67

BNY Mellon U.S. Equity Income Fund	USD	30,202,531	4.49	4.29

The collaterals are held in the name of the Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Agent Lender’s books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used are Euroclear, Global Collateral Management – The Bank of New York Mellon Institutional Bank and JPMorgan Chase Bank, N.A. (where JPMorgan are the borrower). For bilateral transactions, the collaterals are held on account at the Agent Lender.

SECURITIES LENDING TRANSACTIONS cont'd.

APPENDIX 3

SUSTAINABLE FINANCE DISCLOSURE REGULATION AND TAXONOMY REGULATION (unaudited)

As at 31 December 2024, BNY Mellon Absolute Return Global Fund, BNY Mellon Asian Income Fund, BNY Mellon Asian Opportunities Fund, BNY Mellon Brazil Equity Fund, BNY Mellon Dynamic Factor Premium V10 Fund, BNY Mellon Dynamic U.S. Equity Fund, BNY Mellon Efficient U.S. High Yield Beta Fund, BNY Mellon Emerging Markets Debt Fund, BNY Mellon Emerging Markets Debt Local Currency Fund, BNY Mellon Emerging Markets Debt Total Return Fund, BNY Mellon Euroland Bond Fund#, BNY Mellon European Credit Fund, BNY Mellon Global Aggregate Bond Fund, BNY Mellon Global Bond Fund, BNY Mellon Global Dynamic Bond Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Global Infrastructure Income Fund, BNY Mellon Global Opportunities Fund, BNY Mellon Global Real Return Fund (EUR)#, BNY Mellon Global Real Return Fund (GBP), BNY Mellon Global Real Return Fund (USD), BNY Mellon Japan Small Cap Equity Focus Fund, BNY Mellon Small Cap Euroland Fund, BNY Mellon Targeted Return Bond Fund and BNY Mellon U.S. Equity Income Fund are classified as Article 6 Sub Funds. The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

BNY Mellon Emerging Markets Debt Opportunistic Fund and BNY Mellon Global Emerging Markets Opportunities Fund, Article 6 Sub Funds; and BNY Mellon Efficient Global IG Corporate Beta Fund and BNY Mellon Sustainable Global Real Return Fund (EUR), Article 8 Sub-Funds, closed in the financial year.

Please refer to Note 20 of the financial statements.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Absolute Return Bond Fund

Legal entity identifier: 213800MXNNFT8C38II36

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 10.00% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It made sustainable investments with a social objective: ____%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 10th December 2024 to 31st December 2024 (the "Reference Period").

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, corporate issuers that derived a certain percentage of revenue as determined by the Investment Manager from tobacco production, unconventional oil and gas extraction, controversial weapons production and thermal coal mining and/or thermal coal power generation, gambling, adult entertainment, cannabis production and fail a carbon intensity assessment are excluded. Corporate issuers will also be excluded where, in the opinion of the Investment Manager, the issuers are deemed to have violated the minimum standards of business practices represented in widely accepted global conventions. The Sub-Fund also excluded corporate issuers which, in the opinion of the Investment Manager, were highly carbon intensive. Sovereign issuers, such as Debt and Debt-Related Securities issued by governments, supranationals and/ or public international bodies that in the opinion of the Investment Manager had committed social violations including but not limited to human rights issues and sanctioned regimes were excluded. Investments in asset-backed and mortgage-backed securities were excluded issuers if in the opinion of the Investment Manager did not enable the Sub-Fund to attain the environmental or social characteristics it promoted.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments") and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 10% of its Net Asset Value in aggregate as at 31st December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Responsible consumption and production,
- Climate action,
- Life below water,
- Life on land.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31st December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Zero hunger,
- Good health & wellbeing,
- Quality education- clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 5% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31st December 2024, 10% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31st December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),
 - (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
 - Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **...AND COMPARED TO PREVIOUS PERIODS?**

No comparison for previous periods is available at the date of this periodic report.

● **WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?**

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Zero hunger
- Good health & wellbeing
- Quality education
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Reduced inequalities
- Good health & wellbeing
- Quality Education
- Clean water and sanitation

● **HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?**

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

● **HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?**

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
- 1. GHG Emissions: Scope 1, 2 and 3
- 2. Carbon Footprint: Scope 1, 2 and 3
- 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
- 4. Exposure to companies active in the fossil fuel sector
- 5. Share of non-renewable energy consumption and production
- 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
- 7. Activities negatively affecting biodiversity-sensitive areas
- 8. Emissions to water
- 9. Hazardous waste and radioactive waste ratio
- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 12. Unadjusted gender pay gap
- 13. Board gender diversity
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
- 16. Countries subject to social violations

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

The Sub-Fund’s investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable from Table 1 of Annex 1 of the Commission Delegated Regulation:

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
16. Countries subject to social violations

PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund’s corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.

- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager’s designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager’s analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It’s expected that PAIs can be applied to a greater portion of the Investment Manager’s investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 10th December 2024 to 31st December 2024

Largest investments	Sector	% of assets	Country
GERMAN 0% 09/18/24	GOVERNMENT	8.57%	GER

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, and an investment in a CIS.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments. The figure in #1B below also represents a proportion of the portfolio held in an investment in a CIS that is considered by the Investment Manager to align with the environmental and/or social characteristics promoted by the Sub-Fund.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at ("End of Reference Period") and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

** #1 Aligned with E/S characteristics percentage figure includes investments that are 76% of the NAV in direct holdings and 0% of the NAV in an indirect holding. the indirect holding refers to the Sub-Fund's investment in a CIS. Although in the opinion of the Investment Manager this CIS holding aligned with the Environmental and Social characteristics promoted by the Sub-Fund, this CIS holding did not fully (i) apply the exclusion criteria applied by the Sub-Fund (as detailed in the binding elements of the Sub-Fund's investment strategy outlined in the supplement) and (ii) align with the full set of PAIs taken into account by the Sub Fund.

*** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024 the Sub-Fund had mostly been exposed to Government, Banks, as illustrated below.

The above figures are provided as at 31st December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund did not commit to making investments aligned with the EU Taxonomy. However, out of the Sub-Funds allocation to SFDR Sustainable Investments, 33% of the Sustainable Investments with an environmental objective aligned with the EU Taxonomy as of 31st December 2024

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (Eu) 2020/852:

1. Climate change mitigation.
2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?**

Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

No comparison for previous periods is available at the date of this periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

67% of the of Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31st December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31st December 2024.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:

a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).

b) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

- The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

- During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**
Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Absolute Return Credit Fund

Legal entity identifier: 213800PDI8OGLAK3FZ66

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 15.00% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period"):

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments") and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 15% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,

- Responsible consumption and production,
- Climate action,
- Life below water,
- Life on land.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No Poverty,
- Zero hunger,
- Good health & wellbeing,
- Quality education
- Clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of December 2024 15% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),
 - (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
- Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	UN SDGs	Exclusion policy
1 January 2023 to 31 December 2023	The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained: 1) The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2023, 12% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2023 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period). 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"), (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

Period	UN SDGs	Exclusion policy
1 January 2024 to 31 December 2024	The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained: 1) The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of December 2024 15% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period). 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"), (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No Poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Good health & wellbeing
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
7. Activities negatively affecting biodiversity-sensitive areas
8. Emissions to water
9. Hazardous waste and radioactive waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable from Table 1 of Annex 1 of the Commission Delegated Regulation:

1. Green House Gas ("GHG") Emissions: Scope 1, 2 and 3

2. Carbon Footprint: Scope 1, 2 and 3
3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
7. Activities negatively affecting biodiversity-sensitive areas
8. Emissions to water
9. Hazardous waste and radioactive waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.

- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
BNY MEL G SH DUR HYB-U X	EQUITY	6.16%	IRE

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, and an investment in a CIS.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments. The figure in #1B below also represents a proportion of the portfolio held in an investment in a CIS that is considered by the Investment Manager to align with the environmental and/or social characteristics promoted by the Sub-Fund.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31st December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

** #1 Aligned with E/S characteristics percentage figure includes investments that are 73% of the NAV in direct holdings and 7.5% of the NAV in an indirect holding. the indirect holding refers to the Sub-Fund's investment in a CIS. Although in the opinion of the Investment Manager this CIS holding aligned with the Environmental and Social characteristics promoted by the Sub-Fund, this CIS holding did not fully (i) apply the exclusion criteria applied by the Sub-Fund (as detailed in the binding elements of the Sub-Fund's investment strategy outlined in the supplement) and (ii) align with the full set of PAIs taken into account by the Sub Fund.

*** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024, the Sub-Fund had mostly been exposed to Government, Banks, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund did not commit to making investments aligned with the EU Taxonomy. However, out of the Sub-Funds allocation to SFDR Sustainable Investments, 46% of the Sustainable Investments with an environmental objective aligned with the EU Taxonomy as of 31st December 2024.

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (Eu) 2020/852:

1. Climate change mitigation.
2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?**

0.00%

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by third-party data providers.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

54% of the of Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:

a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).

b) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

- The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

- During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**
Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Blockchain Innovation Fund

Legal entity identifier: 21380055OEJYI8WPBT81

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 70.69% of sustainable investments ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It made sustainable investments with a social objective: ____%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in companies that benefit from increased efficiency and transparency of business operations, with implications for resource use and environmental footprints of companies e.g., companies that provide, financial services to the underbanked, improved personal property and digital security, and increased access to and efficiency of digital services worldwide, among others.

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Sustainable trade
- Reducing carbon emissions
- Reducing waste

- Supporting the production and consumption of renewable energies through providing traceability
- Sustainable sourcing

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to improved digital security, and increased access to and efficiency of digital services
- Access to finance
- Cybersecurity
- Data privacy

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

- 1) No more than 5% of Net Asset Value in companies that:
 - Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
 - Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
 - Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

- 2) 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.
- 3) A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.
- 4) Innovation in supply chain as indicated through qualitative case studies.
- 5) Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

1. WisdomTree, Inc: 7.23% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: Wisdomtree, a leading ETF manager, is tokenizing assets in digital vehicles with the intent to provide greater liquidity and lower costs for investors. The company recently launched Wisdomtree Prime, a consumer digital wallet to facilitate real time trading, liquidity, and management of their tokenized fund offerings. Wisdomtree has worked with Securrency to build technology to ensure digital transactions on public blockchains comply with anti-money laundering (AML) and know-your-customer (KYC) regulation for market participants.

2. NVIDIA Corp: 7.23% of the sub-fund as of 31 December 2024

Sustainability indicator: Innovation in supply chain as indicated through qualitative case studies.

Sustainable Thematic Justification: NVDA is a hardware enabler of blockchain technology which requires processing power for current applications as well as future blockchain applications for Web 3.0 and the metaverse. From an environmental and social perspective, NVDA's demonstrated improvements in GPU power efficiency for datacentres and gaming/omniverse end markets reduces electricity cost, improves chip speeds and saves space.

3. Block, Inc. Class A: 6.17% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: Block is seeking to broaden access and lower the cost of financial service using blockchain technology. It has a dedicated business segment working on decentralizing finance, starting with creating a secure digital wallet and increasing the speed, functionality, and availability of payments for free using the Bitcoin Lightning network. The Lightning Network is an energy efficient layer-2 scaling solution that enables instant and cost-effective transactions for BTC.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Microsoft Corp.: 5.73% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: Microsoft offers a range of blockchain architectures focused on financial services and supply chain verticals. Microsoft recently announced their participation in the Canton Network, which is a privacy first blockchain network that addresses the need for strict security, legal and regulatory controls required for tokenizing, trading and settling assets in financial markets. In supply chain, the company provides digitization, traceability, visibility, auditability and a verifiable record of transfer of products and services for enterprises to reduce waste and increase operational efficiency.

5. Taiwan Semiconductor Manufacturing Company Ltd: 5.16% of the sub-fund as of 31 December 2024

Sustainability indicator: Access to improved digital security, and increased access to and efficiency of digital services worldwide as indicated through qualitative case studies.

Sustainable Thematic Justification: The largest semiconductor manufacturer, TSMC is a vital player in the development of technology demands that support a more advanced and interconnected and resource efficient digital world. Its manufacturing capacity is assisting the emergence of numerous technologies such as AI, 5G, IoT, cloud computing, and many others. With its most cutting-edge and extensive portfolio of specialized foundry process, TSMC is fostering transformation across practically all sectors, examples of which include healthcare, banking, sustainable energy, manufacturing, and cloud computing.

The data coverage for sustainability indicators #1 and #2 was 100% of the Sub-Fund. The data coverage for sustainability indicator #3 was 100% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Low – on a weighted average basis, the Sub-Fund was deemed by a third-party data provider to have a low level of unmanaged ESG risks.
Sustainability Indicator #4	Qualitative case studies for the top 5 holdings in the fund (by weight) included above
Sustainability Indicator #5	Qualitative case studies for the top 5 holdings in the fund (by weight) included above

● ...AND COMPARED TO PREVIOUS PERIODS?

Reference period	Sustainability Indicator #1	Sustainability Indicator #2	Sustainability Indicator #3	Sustainability Indicator #4	Sustainability Indicator #5
31 December 2023 – 31 December 2024	0%	0%	Low	Qualitative case studies for the 5 top holdings	Qualitative case studies for the 5 top holdings
31 December 2022 – 31 December 2023	0%	0%	Low	Qualitative case studies for the 5 top holdings	Qualitative case studies for the 5 top holdings

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Broadening access and lowering the cost of financial services using blockchain technology
- Increasing the speed and security of payments at a lower cost
- Using blockchain to improve the speed and security of insurance underwriting
- Addressing key risks in digital asset markets – regulatory compliance and security. Securely managing private keys for digital asset platforms in a scalable manner thus contributing to data privacy.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

- Implementing blockchain solutions that improve supply chain efficiency, traceability, and sustainability
- Provision of traceability for renewable power production & consumption
- Provision of distributed solar power systems utilizing blockchain technology, with solutions contributing to smarter, more efficient, more secure, and reliable energy production, usage and storage
- Developing enterprise blockchain based solutions to promote supply chains efficiency/sustainability and provide tracking, measurement and reduction of carbon footprint/emissions

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy.
17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company’s sector, the Investment Manager’s internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager’s ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager’s analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager’s analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager’s investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
WisdomTree Inc USD 0.01	DIVERSIFIED FINAN SERV	7.47%	USA
NVIDIA CORP USD 0.001	SEMICONDUCTORS	6.89%	USA

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 99.28% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 70.69% of Net Asset Value in SFDR Sustainable Investments of which 33.71% had an environmental objective not aligned with the EU Taxonomy and 36.70% had a social objective. 0.28% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 99.28% of Net Asset Value

#1A Sustainable: 70.69% of Net Asset Value

- Taxonomy-aligned: 0.28% of Net Asset Value
- Environmental: 33.71% of Net Asset Value
- Social: 36.70% of Net Asset Value

#1B Other E/S characteristics: 28.59% of Net Asset Value

#2 Other: 0.72% of Net Asset Value

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.28% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?**

Enabling activities: 0.27% (turnover)

Transitional activities: 0.00%

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by third-party data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 33.71% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 36.70% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 0.72% of Net Asset Value in category #2 (other) which comprised of:

0.72% in cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet environmental and social characteristics promoted by the Sub-Fund, the Investment Manager took the following actions:

- Invested at least 10% in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)

- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis. As further detailed above, the Investment Manager divested from a position in one company as the Investment Manager determined that the company no longer met the Investment Manager's ESG and sustainability criteria.
- Invested at least 80% of the Net Asset Value of the Sub-Fund in digital assets companies. Digital asset companies are companies likely to benefit from the emerging or ongoing revenue and/or cost savings opportunities offered by blockchain technology (synonymously known as distributed ledger technology) or companies which enable blockchain technology. Blockchain technology, can be most simply defined as an integrated software and hardware that enables companies to independently maintain and exchange digitalised transactional data in a standardised format.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Efficient Euro High Yield Beta Fund

Legal entity identifier: 213800Z1NSCPJYMEDP21

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made sustainable investments with a social objective: ____%	☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 24th June 2024 to 31st December 2024 (the "Reference Period").

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derive a certain percentage of revenue, as determined by JP Morgan (JPM), from tobacco production, thermal coal mining, thermal coal power generation and oil sands extraction, controversial weapons production and civilian and non-civilian weapons manufacturing and distribution were excluded. Issuers were also excluded where, in the opinion of JPM, the issuers were deemed to have violated the minimum standards of business practices as defined by the principles of the UN Global Compact.

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

- Derived any revenues
- the production of tobacco

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- the production of controversial weapons
- the extraction of thermal coal/generates electricity from thermal coal unless:
 - the issue purchased is a green bond as labelled by the Climate Bonds Initiative
- derived any revenue from the extraction of oil sands
- derived more than 10% of revenues from the manufacture and/or sale of non-civilian weapons
- derived any revenue from the manufacture and/or sale of civilian weapons.
- Were deemed by the Investment Manager to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles,
- have the lowest ESG score as determined by JPM, except if the bond is a green bond as labelled by the Climate Bonds Initiative.

As at the 31st December 2024 the Sub-Fund's investments were 90%* aligned with the environmental and social criteria promoted. The remaining 10% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

● ...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

Not applicable.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took a synthetic short exposure to the issuer. Reporting on consideration of PAIs are available in an annex to the annual report of the Sub-Fund. Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 24th June 2024 to 31st December 2024

Largest investments	Sector	% of assets	Country
INSIGHT-USD LIQUIDITY FD-	EQUITY	1.40%	IRE

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31st December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024 the Sub-Fund had mostly been exposed to the Telecommunications, Retail sectors, as well as Pipelines and REITS sectors, as illustrated below.

The above figures are provided as at 31st December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that are used for liquidity purposes
- ETFs used for investment purposes that may be held on a temporary basis to manage subscriptions and redemptions
- Derivatives (FDI) that were used for investment purposes and hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund’s supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
 3. Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group (“REG”), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Efficient Global High Yield Beta Fund

Legal entity identifier: 213800JEYSFINLEABK58

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
☒ ☐ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective: ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☐ with a social objective
	☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 25th October 2024 to 31st December 2024 (the "Reference Period").

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

The environmental and/or social best practices the Sub-Fund promoted included the reduction of exploitation of tar sands and thermal coal, reduction of production of controversial weapons and reduction of carbon emissions.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, Issuers derived a certain percentage of revenue as determined by the Investment Manager from tobacco production, thermal coal extraction, thermal coal power generation, oil sands extraction, controversial weapons production and civilian and non-civilian weapons manufacturing and distribution were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, the issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions.

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics

promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derived any revenues from:
 - the production of tobacco
 - the production of controversial weapons
 - the extraction of thermal coal/generates electricity from thermal coal unless:
 - the issue purchased is a green bond as labelled by the Climate Bonds Initiative
 - extraction of oil sands
 - derived any revenue from the manufacture and/or sale of civilian weapons, or
 - derived more than 10% of revenues from the manufacture and/or sale of non-civilian weapons
 - Were deemed by the Investment Manager to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles
 - have the lowest ESG score as determined by JPM, except if the bond is a green bond as labelled by the Climate Bonds Initiative.

As at the 31st December 2024 the Sub-Fund's investments were 98%* aligned with the environmental and social criteria promoted. The remaining 2% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

● ...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do not significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took a synthetic short exposure to the issuer. Reporting on consideration of PAIs are available in an annex to the annual report of the Sub-Fund. Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see ‘PAI Data Availability’ for further information on the PAI data sources and limitations.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 25th October 2024 to 31st December 2024.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31st December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024, the Sub-Fund had mostly been exposed to the Telecommunications, Retail sectors, as well as Pipelines and REITS sectors, as illustrated below.

The above figures are provided as at 31st December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that are used for liquidity purposes
- ETFs used for investment purposes that may be held on a temporary basis to manage subscriptions and redemptions
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund’s supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
 3. Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group (“REG”), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Efficient US Fallen Angels Beta Fund

Legal entity identifier: 213800YL6BXGT6FIQ433

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective: ___%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ___%	☐ with a social objective
	☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period")..

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

The environmental and/or social best practices the Sub-Fund promoted included the reduction of exploitation of tar sands and thermal coal, reduction of production of controversial weapons and reduction of carbon emissions.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, Issuers derived a certain percentage of revenue as determined by the Investment Manager from tar sands or thermal coal extraction, and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, the issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions.

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derived more than 30% of their revenues from tar sands or thermal coal,
- Produced controversial weapons,
- Fell below a pre-set environmental score, as per third party data, where that environmental score was deemed relevant by the Investment Manager, or fell below a pre-set score, as per third party data, on key issues relating to climate change themes,
- Have been allocated a red flag (or equivalent) in relation to key environmental criterion by third party data providers.
- Were deemed by third party, data providers to be involved in severe environmental, social or governance controversies including significant violations of UN Global Compact Principles,

As at the 31 December 2024 the Sub-Fund's investments were 98%* aligned with the environmental and social criteria promoted. The remaining 2% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	UN SDGs	Exclusion policy
1 January 2022 to 31 December 2022	the Sub-Fund's investments were 99%* aligned with the environmental and social criteria promoted. The remaining 1% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.
1 January 2023 to 31 December 2023	the Sub-Fund's investments were 99.9%* aligned with the environmental and social criteria promoted. The remaining 0.1% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.
1 January 2024 to 31 December 2024	the Sub-Fund's investments were 98%* aligned with the environmental and social criteria promoted. The remaining 2% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and

Development (OECD) Guidelines for Multinational Enterprises

- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact

principles and OECD Guidelines for Multinational Enterprises

- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI was considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took a synthetic short exposure to the issuer.

Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund.

Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors during the Reference Period.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
WESTERN D 4.75% 02/15/26	COMPUTERS	3.99%	USA

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to the Telecommunications, Retail sectors, as well as Pipelines and REITS sectors, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were used for liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund’s supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
 3. Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group (“REG”), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Emerging Markets Corporate Debt Fund

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
☒ ☒ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective : ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective : ____%	☒ It promoted E/S characteristics, but did not make any sustainable investments
	☐ with a social objective

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the “Reference Period”):

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental.

Exclusion criteria - as set out in the Sub-Fund’s supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from thermal coal extraction, tar sands, controversial weapons production were excluded and reduction of carbon emissions.

- Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions.

The Sub-Fund did not invest in SFDR Sustainable Investments.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derived more than 5% of their revenue from the production of tobacco,
- Were involved in the production of controversial weapons,
- Derived more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue from thermal coal power generation, unless: a) The issue purchased was a use-of proceeds impact bond which passed the Investment Manager's own assessment framework and/ or b) The issuer had a robust and clearly defined plan to reduce emissions in line with the Paris agreement goals, within the assessment of the Investment Manager and/or c) The issuer had a clearly defined plan to exit coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers;
- Fell below a pre-set environmental score, as per third party data, where that environmental score was deemed relevant by the Investment Manager, or fell below a pre-set score, as per third party data, on key issues relating to climate change themes,
- had allocated a red flag (or equivalent) in relation to key environmental criterion by third party Data Providers- Were deemed, by third party, Data Providers, to be in violation of the UN Global Compact principles (including environmental and governance principles, which include those relating to labour, human rights, bribery and corruption).

As at the 31 December 2024 the Sub-Fund's investments were 90%* aligned with the environmental and social criteria promoted. The remaining 10% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	Sustainable Investments	Exclusion policy
1 January 2023 to 31 December 2023	the Sub-Fund's investments were 96%* aligned with the environmental and social criteria promoted. The remaining 4% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.
1 January 2024 to 31 December 2024	the Sub-Fund's investments were 90%* aligned with the environmental and social criteria promoted. The remaining 10% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?**

Not applicable.

● **WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs are measured against certain defined thresholds which will trigger an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took synthetic short exposure to the issuer. Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund. Where the Sub-Fund invested in a broad market index, PAIs are not considered as the Investment Manager does not look-through to the underlying constituents of these indices.

Please see ‘PAI Data Availability’ for further information on the PAI data sources and limitations.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

What was the proportion of sustainability-related investments?

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other"; what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to Banks sector, as well as the Oil & Gas sectors, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

☐ DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Date	Comment
31 May 2023 to 31 December 2023	Turnover/Revenue – 0% CapEx - 0% OpEx – 0%
1 January 2024 to 31 December 2024	Turnover/Revenue – 0% CapEx - 0% OpEx – 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund’s supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
 3. Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group (“REG”), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Floating Rate Credit Fund

Legal entity identifier: 213800XU3DU834Z4IR30

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 12.00% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It made sustainable investments with a social objective: ____%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period"):

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;
- The Sub-Fund focused on higher scoring issuers in terms of their ESG profile by not investing in any securities with the lowest ESG rating (being a score of 5), as determined by the Investment Manager. By way of illustration, as at the Sub-Fund's year-end date of 31 December 2024, 33% of the portfolio's Net Asset Value in aggregate was invested in issuers with a rating of 1 and 2. The remainder was invested in issuers with an ESG rating of 3 or 4, or in assets which did not have an ESG rating (being any liquid and near-cash assets, including cash, and derivatives (FDI) that were specifically used for hedging purposes). Please see the next question for information on the Sub-Fund's asset-weighted overall ESG rating measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index;
- The Sub-Fund focused on issuers that the Investment Manager considered in its sole discretion to have lower carbon intensity. Please see the next question for details on the Sub-Fund's asset weighted average carbon intensity measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments") and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 12% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Responsible consumption and production,
- Climate action,
- Life on land.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Good health & wellbeing,
- Quality education,
- Clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities,
- Partnerships to achieve the goal.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 10% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 12% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

(b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.

- Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	UN SDGs	Exclusion policy
1 January 2023 to 31 December 2023	The Sub-Fund had 13% of its Net Asset Value in aggregate as at 31 December 2023 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.
1 January 2024 to 31 December 2024	The Sub-Fund had 12% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Partnerships to achieve the goal

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life on land
- Life below water

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Good health & wellbeing
- Quality education
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Partnerships to achieve the goal

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable from Table 1 of Annex 1 of the Commission Delegated Regulation:

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation:
4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation:
16. Lack of anti-corruption and anti-bribery policies.
- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-party data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
ILF-EUR LIQUIDITY-2	EQUITY	5.91%	IRE
Bertrand FRN 07/18/30	RETAIL	1.97%	FRC
SFL Corp FRN 09/25/29	TRANSPORT	1.95%	NOR
PLT VII F FRN 06/15/31	TELECOMMUNICATIONS	1.93%	LUX

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, higher scoring issuers and lower carbon intensity issuers.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

*** As at 31 December 2024, 4% of the NAV made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to the Commercial Services, Banks and Packaging & Containers, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy Regulation. However, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at 31 December 2024.

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

1. Climate change mitigation.
2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 31 December 2024.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

Reporting period	EU Taxonomy percentage alignment
1 January 2023 to 31 December 2023	The Sub-Fund did not commit to making investments aligned with the EU Taxonomy Regulation. However, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 9% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at 31st December 2023.
1 January 2024 to 31 December 2024	The Sub-Fund did not commit to making investments aligned with the EU Taxonomy Regulation. However, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at 31 December 2024.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

100% of the Sustainable investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 31 December 2024.

What was the share of socially sustainable investments?

Whilst the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31 December 2024.

* This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:
 - a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).
 - b) Ensured the Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, was not weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period.
 - c) Ensured the Sub-Fund's asset weighted average carbon intensity was at least 25% lower than the asset weighted average carbon intensity of the Benchmark during the Reference Period.
 - d) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

- The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

- During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- **HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Credit Fund

Legal entity identifier: 213800FUW383MBX2J760

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☐ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective: ___% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective
☐ It made sustainable investments with a social objective: ___%	☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social best practices the Sub-Fund promoted included the reduction of exploitation of tar sands and thermal coal, reduction of production of controversial weapons and reduction of carbon emissions.

Exclusion criteria - as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, controversial weapons production, thermal coal extraction were excluded.

- Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles)

The Sub-Fund did not invest in SFDR Sustainable Investments.

A reference benchmark was not designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator was used to measure how the environmental and/or social characteristics promoted by the Sub-Fund were attained:

The following sustainability indicator will be used to measure whether the Sub-Fund is attaining the environmental and/or social characteristics it promotes:

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

The sustainability indicator performed as follows:

The Exclusion policy was met because the Sub-Fund did not invest in securities issued by corporate entities that:

- Derive more than 5% of their revenue from the production of tobacco,
- Are involved in the production of controversial weapons,
- Derive more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue from thermal coal power generation, unless: a) The issue purchased is a use-of proceeds impact bond as described in the Supplement and/or b) The issuer has a clearly defined plan to exit coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers,
- Are deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles) party data, on key issues relating to climate change themes.

As at the 31 December 2024 the Sub-Fund's investments were 97%* aligned with the environmental and social criteria promoted. The remaining 3% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	UN SDGs	Exclusion policy
24 November 2023 to 31 December 2023	the Sub-Fund's investments were 89%* aligned with the environmental and social criteria promoted. The remaining 11% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.
1 January 2024 to 31 December 2024	the Sub-Fund's investments were 97%* aligned with the environmental and social criteria promoted. The remaining 3% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make - in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment

decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?**

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do not significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund did not consider principal adverse impacts on sustainability factors during the Reference Period.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
ISHARES USD CORP BOND USD	EQUITY	6.26%	UKK
BUNDES 2% 12/10/26	GOVERNMENT	4.48%	GER

What was the proportion of sustainability-related investments?

● **WHAT WAS THE ASSET ALLOCATION?**

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Asset allocation describes the share of investments in specific assets.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 and in #1B below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other"; what was their purpose and were there any minimum environmental or social safeguards?".

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Period	Taxonomy
24 November 2023 to 31 December 2023	Turnover 0% aligned CapEx 1% aligned OpEx 0% aligned
1 January 2024 to 31 December 2024	Turnover 0% aligned CapEx 0% aligned OpEx 0% aligned

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Other” were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that are used for liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.
- Debt and debt related securities issued by governments, supranationals and public international bodies that are used to achieve the Sub-Fund’s investment objective
- Asset backed and mortgage-backed securities that are used to achieve the Sub-Fund’s investment objective

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund’s supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
 3. Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group (“REG”), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Equity Income Fund

Legal entity identifier: 213800SLXMIXN6BQFB77

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 79.95% of sustainable investments ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

Avoid investment in companies that:

- generate any revenues from the production of tobacco;
- generate 10% or more of revenue from products that support the tobacco industry and/or tobacco;
- generate any revenue from the production of controversial weapons;
- generate 10% or more of revenues from the production of alcoholic beverages;
- generate 10% or more of revenues from the owning and/or operation of a gambling venue;
- generate 10% or more of revenues from the production of adult entertainment or the owning and/or operation of adult entertainment venues;
- generate 10% or more of revenues from the extraction of thermal coal;
- generate 10% or more of revenues from the extraction and/or production of oil and gas in offshore Arctic regions;
- generate 10% or more of revenues from the extraction of oil sands

All of the above characteristics were met by the Sub-Fund during the reference period. No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental and social characteristics promoted by the Sub-Fund were attained:

- Exclusion Policy: An assessment of whether the Sub-Fund has successfully and consistently executed its exclusion policy

The Sub-Fund successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and annex to the Sub-Funds' supplement during the Reference Period.

● ...AND COMPARED TO PREVIOUS PERIODS?

Reference Period	Performance of sustainability indicators
01 January 2024 – 31 December 2024	The Sub-Fund successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and annex to the Sub-Funds' supplement during the Reference Period
24 November 2023 – 31 December 2023	The Sub-Fund successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and annex to the Sub-Funds' supplement during the Reference Period

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Circular economy and recycling
- Reduction in natural resource usage
- Electrification

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to financial products and services
- Health & wellbeing
- Drug development
- Infrastructure
- Contribution to social objectives as a result of investee companies' internal business practices and successful management of competing interests of key stakeholder groups.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives.
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy.
17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered certain principal adverse impact indicators at the product level. The Investment Manager used a combination of externally and internally sourced data and research to identify companies that are involved in areas of material harm from an environmental or social perspective. The Investment Manager considered the following PAIs:

- Share of investments in investee companies involved in the manufacture or selling of controversial weapons;
- Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 97.06% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund did not make any commitments to invest in SFDR Sustainable Investments. 1.12% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 97.06% of Net Asset Value

#1A Sustainable: 79.95% of Net Asset Value

- Taxonomy-aligned: 1.12% of Net Asset Value
- Environmental: 27.20% of Net Asset Value
- Social: 51.62% of Net Asset Value

#1B Other E/S characteristics: 17.11% of Net Asset Value

#2 Other: 2.94% of Net Asset Value

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.12% of the Net Asset Value of the fund was invested in SFDR Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned: Fossil gas
■ Taxonomy-aligned: Nuclear
■ Taxonomy-aligned (no gas and nuclear)
■ Non Taxonomy-aligned

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned: Fossil gas
■ Taxonomy-aligned: Nuclear
■ Taxonomy-aligned (no gas and nuclear)
■ Non Taxonomy-aligned

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?**

Enabling activities: 0.62% (turnover)

Transitional activities: 0.00%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

The percentage of investments that were aligned with the EU Taxonomy marginally increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by third-party data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

27.20%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

51.62%

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 2.94% of Net Asset Value in category #2 (other) which comprised of cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that produce controversial weapons
- Excluded issuers that derive more than 10% of turnover from the production of alcohol
- Excluded issuers that derive more than 10% of turnover from gambling
- Excluded issuers that derive more than 10% of turnover from the extraction of thermal coal
- Excluded issuers that derive more than 10% of turnover from the extraction and/or production of oil and gas in offshore Arctic regions
- Excluded issuers that derive more than 10% of turnover from the extraction of oil sands
- Excluded issuers in breach of the principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)

How did this financial product perform compared to the reference benchmark?

- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**

Not applicable.

- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Leaders Fund

Legal entity identifier: 213800T8WBQXO7WXYO38

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.69% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It made sustainable investments with a social objective: ____%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The 'reference period' for this periodic report is from 02 May 2024 to 31 December 2024 (the "Reference Period").

During the Reference Period, this Sub-Fund promoted the environmental characteristic of responsible use of natural resources and the social characteristic of responsible business conduct through investing in companies which embrace high standards of environmental, social and governance (ESG) practice, or that were attractive due to their progression in environmental and social practice and exhibit good governance, and by deliberately avoiding investment in companies with below threshold ESG credentials as defined by the Investment Manager.

The environmental and social sustainability indicators considered by the Investment Manager are detailed below (the "Sustainability Indicators"):

Environmental Sustainability Indicators

- Greenhouse gas emissions
- Biodiversity and natural resources
- Climate and transition risks
- Pollution and waste management

Social Sustainability Indicators

- Business ethics, bribery and corruption
- Data privacy and security
- Labour practices and human rights safeguards
- Diversity, equality and inclusion

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Sub-Fund's SFDR Sustainable Investments with a social objective were aligned with the UN Sustainable Development Goal 1 – 'No Poverty' and the UN Sustainable Development Goal 3 – 'Good Health and Well-Being'. The Sub-Fund's SFDR Sustainable Investment with an environmental objective was aligned with the UN Sustainable Development Goal 12 – 'Responsible Consumption and Production'.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The Sub-Fund used eight Sustainability Indicators to measure how the environmental or social characteristics promoted by the Sub-Fund were attained which are supported by 14 data points.

ENVIRONMENTAL SUSTAINABILITY INDICATORS

Indicator #	Description	Supporting Data Points
Sustainability Indicator #1	Greenhouse Gas Emissions	1. Carbon intensity scope 1 and 2
Sustainability Indicator #2	Biodiversity and natural resources	2. Company has operations located in biodiversity-sensitive areas and is involved in controversies with severe impact on the environment 3. Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas
Sustainability Indicator #3	Climate and transition risks	4. Active fossil fuel sector exposure
Sustainability Indicator #4	Pollution and waste management:	5. Environment controversy score

SOCIAL SUSTAINABILITY INDICATORS

Indicator #	Description	Supporting Data Points
Sustainability Indicator #5	Business ethics, bribery and corruption	6. Controversial weapons – any tie 7. Total number of convictions for violations of anti-corruption and anti-bribery laws
Sustainability Indicator #6	Data privacy and security	8. Customers - Privacy and data security score 9. Data security breaches controversies
Sustainability Indicator #7	Labour practices and human rights safeguards	10. Labour compliance – Broad 11. Human rights compliance 12. Human rights - Impact on local communities score
Sustainability Indicator #8	Diversity, equality and inclusion	14. Discrimination and diversity controversies

Each of the Sub-Fund's equity investments was measured against the Sustainability Indicators listed above prior to the Sub-Fund converting to SFDR Article 8. In addition, they are also measured on a quarterly basis and at the end of the Reference Period, as well as upon each purchase of a new company. The supporting data points were compared to internally set thresholds and, if a threshold was met, a flag was generated which required analysis. This would prompt comment and conclusion from the 'Stock Champion' (a member of the Investment Manager's Research team responsible for the research in the equity company) and further review from the Additional Objectives Portfolios Group, an internal governance forum.

No holdings were sold during the Reference Period as a result of analysis against the Sustainability Indicators detailed above.

No derivatives (FDI) were used to meet the environmental or social characteristics.

There were no new flags deemed to be potentially material changes in data during the Reference Period.

The following table indicates the percentage weight of the Sub-Fund invested in companies which had a flag relating to each Sustainability Indicator as at the end of the Reference Period.

Indicator #	Description	% Weight of Flagged Companies
Sustainability Indicator #1	Greenhouse Gas Emissions	4.0
Sustainability Indicator #2	Biodiversity and natural resources	2.0
Sustainability Indicator #3	Climate and transition risks	0.0
Sustainability Indicator #4	Pollution and waste management:	2.0
Sustainability Indicator #5	Business ethics, bribery and corruption	6.4
Sustainability Indicator #6	Data privacy and security	0.0
Sustainability Indicator #7	Labour practices and human rights safeguards	17.0
Sustainability Indicator #8	Diversity, equality and inclusion	11.1

● ...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives to which the SFDR Sustainable Investments contributed were UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 – ‘Good Health and Well-Being’.

A SFDR Sustainable Investment contributed to this objective by having a minimum of 30% revenue aligned with UN Sustainable Development Goals. The Sub-Fund’s five SFDR Sustainable Investments contributed to the objectives as follows:

SFDR Sustainable Investments with a social objective:

- Novo Nordisk: global pharmaceuticals company largely focused on diabetes and obesity. 86% of revenue aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Edwards Lifesciences: market leader in the treatment of aortic stenosis, a serious heart condition that affects millions of people worldwide. 84% of revenues aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Roche: global pharmaceuticals and diagnostics business with a world leading oncology franchise. 45% of revenue aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.

There were no SFDR Sustainable Investments with an environmental objective.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Sub-Fund’s SFDR Sustainable Investments that met the minimum revenue threshold, as previously described, were then screened against a number of principal adverse impacts (PAIs) indicators for ‘do no significant harm’ (DNSH).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The following mandatory indicators in Table 1 of Annex I of the SFDR regulatory technical standards (RTS) and any relevant indicators (on a sector-by-sector basis) from Tables 2 and 3 of Annex I of the RTS were taken into account as follows during the Reference Period:

- Relevant indicators in Table 1 of Annex I of the RTS:
 1. Greenhouse gas emissions: Scope 1, 2 and 3
 3. Greenhouse gas intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

The Sub-Fund considered all mandatory indicators included in Table 1 of Annex I of the RTS with the exception of PAI 2, carbon footprint. For the DNSH assessment, the PAIs are required to be considered at company level. PAI 1 was converted to an intensity measure rather than an absolute number for this analysis. This was because the original PAI was designed for portfolio level consideration, rather than use at the company level, but the analysis for DNSH must be at the company level. PAI 2 is not considered separately as, having converted PAI 1 to an intensity measure, it would simply repeat the same information covered in PAIs 1 and 3.

- Relevant indicators in Table 2 of Annex I of the RTS:
 4. Investments in companies without carbon emission reduction initiatives
 8. Exposure to areas of high water stress
- Indicators in Table 3 of Annex I of the RTS:
 4. Lack of a supplier code of conduct
 6. Insufficient whistle-blower protection
 7. Incidents of discrimination
 9. Lack of a human rights policy
 14. Number of identified cases of severe human rights issues and incidents
 15. Lack of anti-corruption and anti-bribery policies

Each indicator was either considered versus a sector median or absolute threshold for all companies that met the percentage revenue threshold to qualify as a sustainable investment.

For quantitative indicators, a flag was raised if the designated threshold for sector median was surpassed. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the three securities which qualified as SFDR Sustainable Investments, there were seven flags as at the end of the Reference Period, five of which related to data gaps, while the remaining two flags related to surpassing the sector median. Specifically, these flags were for: PAI 1: Greenhouse gas emissions: Scope 1, 2 and 3; and PAI 3: Greenhouse gas intensity of investee companies: Scope 1, 2 and 3.

For other indicators, a flag was raised for a below threshold response. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the three securities which qualified

as SFDR Sustainable Investments, there were three flags as at the end of the Reference Period. Specifically, these flags were for: PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 8: Emissions to water; Additional Social; and PAI 4: Lack of a supplier code of conduct.

For all indicators (qualitative and otherwise), if the data was not available from the Investment Manager's third-party data provider, steps were taken by the Investment Manager to either source the required information or contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

In all cases where flags were raised, following further analysis it was concluded that there was no significant harm to any environmental or social sustainable investment objective and therefore the companies qualified as SFDR Sustainable Investments.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as no flags were raised in relation to the specific human rights, labour, controversy, and tax compliance screens which either (i) directly cover one or more of the Responsible Business Practices; or (ii) are considered an appropriate proxy for one or more of the Responsible Business Practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with Article 7 of SFDR, the adverse impacts of investment decisions on sustainability factors were considered in line with the PAI regime for this Sub-Fund from the perspective of the harm that investment positions might do externally to sustainability factors. The Sub-Fund considered seven of the mandatory indicators included in Table 1 of Annex I of the RTS at a portfolio level. Those were:

- PAI 2: Carbon footprint
- PAI 3: Greenhouse gas intensity of investee companies
- PAI 4: Exposure to companies active in the fossil fuel sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Thresholds were set against each indicator at an aggregate portfolio level. The approach to 'consider the PAIs' has been for the Investment Manager to apply the reasonable thresholds, above which it could be considered that the Sub-Fund has a 'material adverse impact' against any of the criteria listed above. The Sub-Fund was reviewed against these thresholds internally on a quarterly basis, as well as upon each purchase of a new company. When compared, none of these thresholds were exceeded.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 02 May 2024 to 31 December 2024

More important investments	Sector	% of assets	Country
Microsoft Corporation	Information technology - Software & Services	6.21%	United States
Alphabet	Communication services - Media & Entertainment	4.65%	United States
TAIWAN SEMICONDUCTOR MFG	Information technology - Semiconductors & Semiconductor Equipment	4.45%	Taiwan
Amazon.com	Consumer discretionary - Consumer Discretionary Distribution & Retail	4.4%	United States
Edwards Lifesciences	Health care - Health Care Equipment & Services	4.32%	United States
ASML	Information technology - Semiconductors & Semiconductor Equipment	4.29%	Netherlands
West Pharmaceutical Services	Health care - Pharmaceuticals Biotechnology & Life Sciences	4.18%	United States
Mastercard	Financials - Financial Services	4.1%	United States
Mettler Toledo International	Health care - Pharmaceuticals Biotechnology & Life Sciences	4.06%	United States
AIA Group	Financials - Insurance	4.06%	Hong Kong
Intuitive Surgical	Health care - Health Care Equipment & Services	4%	United States
Nike	Health care - Pharmaceuticals Biotechnology & Life Sciences	3.99%	United States
Automatic Data Processing	Industrials - Commercial & Professional Services	3.98%	United States
O'Reilly Automotive	Consumer discretionary - Consumer Discretionary Distribution & Retail	3.97%	United States
Keyence	Information technology - Technology Hardware & Equipment	3.95%	Japan

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

As at 31 December 2024, the asset allocation of the Sub-Fund was as shown in the diagram. This differs from the asset allocation diagram in the pre-contractual disclosure (Annex II) as this was intended to illustrate the planned asset allocation of the Sub-Fund and reflected the minimum investments referred to in that Annex.

As at 31 December 2024, 96.34% of the Net Asset Value of this Sub-Fund was invested in Equity and Equity-Related Securities that met the Investment Manager's "ESG Criteria" at the time of purchase and on an ongoing basis. The remainder of the Sub-Fund was invested in cash which, for the avoidance of doubt, is not required to meet the ESG Criteria.

The Sub-Fund met its commitment to investing a minimum of 5% of Net Asset Value in SFDR Sustainable Investments which contribute to an environmental or social objective. As at 31 December 2024, 9.69% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable Investments.

The asset allocation between environmental and social objectives is not fixed and as such, the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically contributed to either an environmental objective or social objective. As at 31 December 2024, 0.00% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with an environmental objective (without the intention to be aligned with the EU Taxonomy) and 9.69% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?**

As at 31 December 2024, the Sub-Fund's investments were in the following economic sectors:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?**

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100 % of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?**

0%

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

No comparison for previous periods is available at the date of this periodic report.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not have a commitment to investing a minimum percentage of Net Asset Value in socially sustainable investments, as at 31 December 2024 the Sub-Fund invested 9.69% of Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As at 31 December 2024, the Sub-Fund held 3.66% of Net Asset Value in cash held as ancillary liquidity. There are no minimum environmental or social safeguards associated with these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In summary, the actions taken to meet the environmental and/or social characteristics during the Reference Period were:

- Adherence to the Investment Manager's investment process in terms of stock selection and portfolio construction.
- Each potential investment idea was subject to a broad assessment incorporating relevant and material issues using a consistent framework – a materiality-based assessment of ESG factors.
- ESG data points and controversies screening were sourced from the Investment Manager's third-party data provider.
- Review of sustainable investment assessment, performance of Sustainability Indicators and portfolio level assessment against relevant PAIs by an internal governance forum, the Additional Objectives Portfolios Group.
- The environmental and social characteristics promoted by the Sub-Fund were monitored daily via the exclusions list detailed in the binding elements of the Sub-Fund's investment strategy.
- Due diligence carried out on the underlying assets of the Sub-Fund spanned the processes from generation of a potential investment idea to portfolio construction. The Additional Objectives Portfolios Group assessed potential investment ideas for suitability for inclusion in the Sub-Fund and provides a recommendation to the Investment Executive. The Investment Executive has overall responsibility for the composition of the Sub-Fund.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure

whether the financial product attains the environmental or social characteristics that they promote.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?**

Not applicable.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Global Short-Dated High Yield Bond Fund

Legal entity identifier: 213800B8FEADSCHQLG79

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
☒ ☒ Yes	☒ ☐ No
☐ It made sustainable investments with an environmental objective : ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.00% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective : ____%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1st January 2024 to 31st December 2024 (the “Reference Period”).

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria, as set out in the Sub-Fund’s then applicable supplement, were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;
- The Sub-Fund focused on higher scoring issuers in terms of their ESG profile by not investing in any securities with the lowest ESG rating (being a score of 5), as determined by the Investment Manager. By way of illustration, as at the Sub-Fund’s year-end date of 31st December 2024, 41% of the portfolio’s Net Asset Value in aggregate was invested in issuers with a rating of 1 and 2. The remainder was invested in issuers with an ESG rating of 3 or 4, or in assets which did not have an ESG rating (being any liquid and near-cash assets, including cash, and derivatives (FDI) that were specifically used for hedging purposes). Please see the next question for information on the Sub-Fund’s asset-weighted overall ESG rating measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index;

- The Sub-Fund focused on issuers that the Investment Manager considered in its sole discretion to have lower carbon intensity. Please see the next question for details on the Sub-Fund's asset weighted average carbon intensity measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments") and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 9% of its Net Asset Value in aggregate as at 31st December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Climate action,
- Responsible consumption and production.

The Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31st December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Clean water and sanitation.

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 5% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31st December 2024, 9% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31st December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),
 - (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
- Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	Sustainable Indicators	Exclusion policy
1 January 2023 to 31 December 2023	The Sub-Fund had 11% of its Net Asset Value in aggregate as at 31st December 2023 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.
1 January 2024 to 31 December 2024	The Sub-Fund had 9% of its Net Asset Value in aggregate as at 31st December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy

- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Good health & wellbeing
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Funds SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

During the Reference Period the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-party data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the following mentioned PAIs to the extent practicable as described from Table 1 of Annex 1 of the Commission Delegated Regulation:

10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-party data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1st January 2024 to 31st December 2024

Largest investments	Sector	% of assets	Country
INSIGHT-USD LIQUIDITY FD-	EQUITY	4.48%	IRE
OI Europe 6.25% 05/15/28	PACKAGING&CONTAINERS	1.84%	USA
Ithaca En 8.125% 10/15/29	OIL&GAS	1.81%	UKK
Assemblin 6.25% 07/01/30	ENGINEERING&CONSTRUCTION	1.77%	SWE
Ithaca En 9% 07/15/26	OIL&GAS	1.61%	UKK
TRIVIUM P 3.75% 08/15/26	PACKAGING&CONTAINERS	1.50%	NET
Q-PARK HO 2% 03/01/27	COMMERCIAL SERVICES	1.31%	NET

Sunrise H 5.5% 01/15/28	TELECOMMUNICATIONS	1.16%	NET

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, higher scoring issuers and lower carbon intensity issuers.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31st December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024, the Sub-Fund had mostly been exposed to the Packaging & Containers, Commercial Services and Chemicals, as illustrated below.

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy, however, out of the Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the Sustainable Investments with an environmental objective were aligned with the EU Taxonomy as at the 31st December 2024

The taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

1. Climate change mitigation.
2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

Date	Comment
3 April 2023 to 31 December 2023	Turnover/Revenue – 0% CapEx - 0% OpEx – 0%
1 January 2024 to 31 December 2024	Turnover/Revenue – 0% CapEx - 0% OpEx – 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

100% of the of sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31st December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 1%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31st December 2024.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:

a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).

- b) Ensured the Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, was not weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period.
- c) Ensured the Sub-Fund's asset weighted average carbon intensity was at least 25% lower than the asset weighted average carbon intensity of the Benchmark during the Reference Period
- d) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

- The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

- During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement. However, there was a breach on 18th January 2024 where the fund incorrectly invested in an asset with a ESG rating of 5. This was identified on the 19th January 2024 via the post trade compliance process and action was taken to immediately sell the same asset.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Long-Term European Equity Fund

Legal entity identifier: 2138004XGCRR77P7N117

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 11.11% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☒ with a social objective
☐	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The "reference period" for this periodic report is from 1 January 2024 to 31 December 2024 (the "Reference Period").

During the Reference Period, this Sub-Fund promoted the environmental characteristic of responsible use of natural resources and the social characteristic of responsible business conduct through investing in companies which embrace high standards of environmental, social and governance (ESG) practice, or that were attractive due to their progression in environmental and social practice and exhibit good governance, and by deliberately avoiding investment in companies with below threshold ESG credentials as defined by the Investment Manager.

The environmental and social sustainability indicators considered by the Investment Manager are detailed below (the "Sustainability Indicators"):

Environmental Sustainability Indicators

- Greenhouse gas emissions
- Biodiversity and natural resources
- Climate and transition risks
- Pollution and waste management

Social Sustainability Indicators

- Business ethics, bribery and corruption
- Data privacy and security
- Labour practices and human rights safeguards
- Diversity, equality and inclusion

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Sub-Fund's SFDR Sustainable Investments with a social objective were aligned with the UN Sustainable Development Goal 1 – 'No Poverty' and with the UN Sustainable Development Goal 3 – 'Good Health and Well-Being'. The Sub-Fund's SFDR Sustainable Investment with an environmental objective was aligned with the UN Sustainable Development Goal 12 – 'Responsible Consumption and Production'.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The Sub-Fund used eight Sustainability Indicators to measure how the environmental or social characteristics promoted by the Sub-Fund were attained which are supported by 14 data points. This is a change from prior reporting periods where the underlying data points were used by the Sub-Fund as the sustainability indicators and reflects a change made to the Sub-Fund's pre-contractual disclosure during the Reference Period.

ENVIRONMENTAL SUSTAINABILITY INDICATORS

Indicator #	Description	Supporting Data Points
Sustainability Indicator #1	Greenhouse Gas Emissions	1. Carbon intensity scope 1 and 2
Sustainability Indicator #2	Biodiversity and natural resources	2. Company has operations located in biodiversity-sensitive areas and is involved in controversies with severe impact on the environment 3. Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas
Sustainability Indicator #3	Climate and transition risks	4. Active fossil fuel sector exposure
Sustainability Indicator #4	Pollution and waste management:	5. Environment controversy score

SOCIAL SUSTAINABILITY INDICATORS

Indicator #	Description	Supporting Data Points
Sustainability Indicator #5	Business ethics, bribery and corruption	6. Controversial weapons – any tie 7. Total number of convictions for violations of anti-corruption and anti-bribery laws
Sustainability Indicator #6	Data privacy and security	8. Customers - Privacy and data security score 9. Data security breaches controversies
Sustainability Indicator #7	Labour practices and human rights safeguards	10. Labour compliance – Broad 11. Human rights compliance 12. Human rights - Impact on local communities score
Sustainability Indicator #8	Diversity, equality and inclusion	14. Discrimination and diversity controversies

Each of the Sub-Fund's equity investments was measured against the Sustainability Indicators listed above on a quarterly basis and at the end of the Reference Period, as well as upon each purchase of a new company. The supporting data points were compared to internally set thresholds and, if a threshold was met, a flag was generated which required analysis. This would prompt comment and conclusion from the 'Stock Champion' (a member of the Investment Manager's Research team responsible for the research in the equity company) and further review from the Additional Objectives Portfolios Group, an internal governance forum.

No holdings were sold during the Reference Period as a result of analysis against the Sustainability Indicators detailed above.

No derivatives (FDI) were used to meet the environmental or social characteristics.

There were no new flags deemed to be potentially material changes in data during the Reference Period.

The following table indicates the percentage weight of the Sub-Fund invested in companies which had a flag relating to each Sustainability Indicator as at the end of the Reference Period.

Indicator #	Description	% Weight of Flagged Companies
Sustainability Indicator #1	Greenhouse Gas Emissions	3.8
Sustainability Indicator #2	Biodiversity and natural resources	10.2
Sustainability Indicator #3	Climate and transition risks	1.9
Sustainability Indicator #4	Pollution and waste management:	2.6
Sustainability Indicator #5	Business ethics, bribery and corruption	4.2
Sustainability Indicator #6	Data privacy and security	2.2
Sustainability Indicator #7	Labour practices and human rights safeguards	9.8
Sustainability Indicator #8	Diversity, equality and inclusion	0.0

● ...AND COMPARED TO PREVIOUS PERIODS?

In prior reporting periods, the 14 supporting data points set out above were used by the Sub-Fund as the sustainability indicators used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained. However, following an amendment to the Sub-Fund's pre-contractual disclosure during the Reference Period, the Sub-Fund now uses the eight overarching environmental and social themes, which are supported by the same 14 data points, as the sustainability indicators. Please see the section above titled "How did the sustainability indicators perform?" for further detail. The following table compares the performance of the eight Sustainability Indicators during the Reference Period against their performance in the prior reference period.

Indicator #	Description	2023	2024
Sustainability Indicator #1	Greenhouse Gas Emissions	3.5	3.8
Sustainability Indicator #2	Biodiversity and natural resources	3.5	10.2
Sustainability Indicator #3	Climate and transition risks	2.3	1.9
Sustainability Indicator #4	Pollution and waste management:	1.9	2.6
Sustainability Indicator #5	Business ethics, bribery and corruption	4.1	4.2
Sustainability Indicator #6	Data privacy and security	2.0	2.2
Sustainability Indicator #7	Labour practices and human rights safeguards	10.1	9.8
Sustainability Indicator #8	Diversity, equality and inclusion	0.0	0.0

Sustainability Indicator #2 (Biodiversity and natural resources): The increase in weight in companies with one or more flags relating to this sustainability indicator was due our third-party data provider changing the underlying methodology behind the data points informing this sustainability indicator.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives to which the SFDR Sustainable Investments contributed were UN Sustainable Development Goal 1 – 'No Poverty' and UN Sustainable Development Goal 3 – 'Good Health and Well-Being'. The environmental objective to which the SFDR Sustainable Investments contributed was UN Sustainable Development Goal 12 – 'Responsible Consumption and Production'.

A SFDR Sustainable Investment contributed to this objective by having a minimum of 30% revenue aligned with UN Sustainable Development Goals. The Sub-Fund's five SFDR Sustainable Investments contributed to the objectives as follows:

SFDR Sustainable Investments with a social objective

- Novo Nordisk: global pharmaceuticals company largely focused on diabetes and obesity. 86% of revenue aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Novartis: global diversified pharmaceutical company which engages in innovative medicines. 52% of revenues aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Recordati: global diversified biopharmaceuticals company which operates through the Specialty and Primary Care, and Rare Diseases segments. 50% of revenues aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Roche: global pharmaceuticals and diagnostics business with a world leading oncology franchise. 45% of revenue aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.

SFDR Sustainable Investment with an environmental objective

- Dassault Systemes: the world's leading producer of 3D Product Lifecycle Management software. 36% of revenue aligned with UN Sustainable Development Goal 12 – ‘Responsible Consumption and Production’.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Sub-Fund's SFDR Sustainable Investments that met the minimum revenue threshold, as previously described, were then screened against a number of principal adverse impacts (PAIs) indicators for ‘do no significant harm’ (DNSH).

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The following mandatory indicators in Table 1 of Annex I of the SFDR regulatory technical standards (RTS) and any relevant indicators (on a sector-by-sector basis) from Tables 2 and 3 of Annex I of the RTS were taken into account as follows during the Reference Period:

- Relevant indicators in Table 1 of Annex I of the RTS:
 1. Greenhouse gas emissions: Scope 1, 2 and 3
 3. Greenhouse gas intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

The Sub-Fund considered all mandatory indicators included in Table 1 of Annex I of the RTS with the exception of PAI 2, carbon footprint. For the DNSH assessment, the PAIs are required to be considered at company level. PAI 1 was converted to an intensity measure rather than an absolute number for this analysis. This was because the original PAI was designed for portfolio level

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

consideration rather than use at the company level but the analysis for DNSH must be at the company level. PAI 2 is not considered separately as, having converted PAI 1 to an intensity measure, it would simply repeat the information covered in PAIs 1 and 3.

- Indicators in Table 2 of Annex I of the RTS:
 4. Investments in companies without carbon emission reduction initiatives
 8. Exposure to areas of high water stress
- Indicators in Table 3 of Annex I of the RTS:
 4. Lack of a supplier code of conduct
 6. Insufficient whistle-blower protection
 7. Incidents of discrimination
 9. Lack of a human rights policy
 14. Number of identified cases of severe human rights issues and incidents
 15. Lack of anti-corruption and anti-bribery policies

Each indicator was either considered versus a sector median or absolute threshold for all companies that met the percentage revenue threshold to qualify as an SFDR Sustainable Investment.

For quantitative indicators, a flag was raised if the designated threshold for sector median was surpassed. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the five securities which qualified as SFDR Sustainable Investments, there were eight flags as at the end of the reference period, with seven of those related to data gaps, while the remaining flag was related to surpassing the sector median. Specifically, PAI 1: Greenhouse gas emissions: Scope 1, 2 and 3.

For other indicators, a flag was raised for a below threshold response. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the five securities which qualified as SFDR Sustainable Investments, there were six flags as at the end of the reference period. Specifically, these flags were for: PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 8: Emissions to water; Additional Social; and PAI 4: Lack of a supplier code of conduct.

For all indicators (qualitative and otherwise), if the data was not available from the Investment Manager's third-party data provider, steps were taken by the Investment Manager to either source the required information or contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

In all cases where flags were raised, following further analysis it was concluded that there was no significant harm to any environmental or social sustainable investment objective and therefore the companies qualified as SFDR Sustainable Investments.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as no flags were raised in relation to the specific human rights, labour, controversy, and tax compliance screens which either (i) directly cover one or more of the Responsible Business Practices; or (ii) are considered an appropriate proxy for one or more of the Responsible Business Practices.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with Article 7 of SFDR, the adverse impacts of investment decisions on sustainability factors were considered in line with the PAI regime for this Sub-Fund from the perspective of the harm that investment positions might do externally to sustainability factors. The Sub-Fund considered seven of the indicators included in Table 1 of Annex I of the RTS at a portfolio level. Those were:

- PAI 2: Carbon footprint
- PAI 3: Greenhouse gas intensity of investee companies
- PAI 4: Exposure to companies active in the fossil fuel sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Thresholds were set against each indicator at an aggregate portfolio level. The approach to ‘consider the PAIs’ has been for the Investment Manager to apply the reasonable thresholds, above which it could be considered that the Sub-Fund has a ‘material adverse impact’ against any of the criteria listed above. The Sub-Fund was reviewed against these thresholds internally on a quarterly basis, as well as upon each purchase of a new company. When compared, none of these thresholds were exceeded.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

More important investments	Sector	% of assets	Country
ASML	Information technology - Semiconductors & Semiconductor Equipment	3.27%	Netherlands
SAP	Information technology - Software & Services	3.01%	Germany
Diploma	Industrials - Capital Goods	2.69%	United Kingdom
Novo Nordisk	Health care - Pharmaceuticals Biotechnology & Life Sciences	2.67%	Denmark
The Sage Group	Information technology - Software & Services	2.64%	United Kingdom
Inditex	Consumer discretionary - Consumer Discretionary Distribution & Retail	2.64%	Spain
Halma	Information technology - Technology Hardware & Equipment	2.63%	United Kingdom
Wolters Kluwer	Industrials - Commercial & Professional Services	2.61%	Netherlands
ASM International	Information technology - Semiconductors & Semiconductor Equipment	2.51%	Netherlands
Compass Group	Consumer discretionary - Consumer Services	2.45%	United Kingdom
Rational	Industrials - Capital Goods	2.38%	Germany
Reply	Health care - Pharmaceuticals Biotechnology & Life Sciences	2.38%	Italy
Roche	Health care - Pharmaceuticals Biotechnology & Life Sciences	2.31%	Switzerland
Hermès International	Consumer discretionary - Consumer Durables & Apparel	2.26%	France

More important investments	Sector	% of assets	Country
Ferrari	Consumer discretionary - Automobiles & Components	2.23%	Italy

What was the proportion of sustainability-related investments?

WHAT WAS THE ASSET ALLOCATION?

As at 31 December 2024, the asset allocation of the Sub-Fund was as shown in the diagram. This differs from the asset allocation diagram in the pre-contractual disclosure (Annex II) as this was intended to illustrate the planned asset allocation of the Sub-Fund and reflected the minimum investments referred to in that Annex.

As at 31 December 2024, 98.83% of the Net Asset Value of this Sub-Fund was invested in Equity and Equity-Related Securities that met the Investment Manager's "ESG Criteria" at the time of purchase and on an ongoing basis. The remainder of the Sub-Fund was invested in cash which, for the avoidance of doubt, is not required to meet the ESG Criteria.

The Sub-Fund met its commitment to investing a minimum of 5% of Net Asset Value in SFDR Sustainable Investments which contribute to an environmental or social objective. As at 31 December 2024, 11.11% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable Investments.

The asset allocation between environmental and social objectives is not fixed and as such, the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically contributed to either an environmental objective or social objective. As at 31 December 2024, 1.97% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with an environmental objective (without the intention to be aligned with the EU Taxonomy) and 9.14% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with a social objective.

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund's investments were in the following economic sectors:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

While it is not the Investment Manager's intention to invest in holdings with EU Taxonomy alignment, the SFDR Sustainable Investment with an environmental objective were aligned to a degree with the EU Taxonomy. 0.66% of the Net Asset Value of the Sub-Fund invested in SFDR Sustainable Investment with an environmental objective aligned with EU Taxonomy. For reporting purposes, please see the table below for the breakdown of the company's revenue, operating expenditure and capital expenditure considered to be aligned with the EU Taxonomy. The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

Companies qualifying as Sustainable Investments must pass a DNSH process determined by the Investment Manager (using the mandatory and additional PAIs), as well as the additional minimum social safeguards requirements relating to OECD/UNGP alignment. One company qualified as contributing to an environmental objective (Dassault Systemes). Within the company's annual reports, the EU Taxonomy eligible and aligned figures were used and,

combining the figures of eligible revenue/OpEx/CapEx with the fact that Dassault has passed the Investment Manager's DNSH process, these figures were multiplied by the weight of the holding within the Sub-Fund to arrive at total Sub-Fund EU Taxonomy aligned values.

The Investment Manager was partly dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Specifically, the DNSH and minimum social safeguard assessment used third-party data as an input to the process, and thus this assessment was subject to the potential data limitations detailed in the adverse impact section above. However, where data was limited, the Investment Manager undertook further analysis (as described in the Sustainable Investment section above) to assess potential significant harm and minimum social safeguards.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?**

- ☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● **WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?**

0%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

In the prior reference period, one investee company was identified as having EU Taxonomy eligible and aligned revenue, OpEx and CapEx. Previously, the company reported an 'eligible' revenue figure, but no 'aligned' revenue figure, and the Investment Manager had assumed all eligible revenue figures also had 100% alignment. During the current Reference Period, the company provided both figures in their annual report, reporting that approximately half of the eligible revenue, OpEx, and CapEx are considered EU Taxonomy aligned. Thus, the Sub-Fund's reported exposure to aligned revenue, OpEx, and CapEx has decreased since the last Periodic Disclosure.

Due to a slight decrease in the Sub-Fund's weight in this company, as well as the aforementioned reporting change, during the Reference Period the Aligned Portfolio Turnover has decreased from 1.38% to 0.66%, Aligned Portfolio Operating Expenditure has decreased from 1.00% to 0.44%, and Aligned Portfolio Capital Expenditure has decreased from 1.36% to 0.43%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

66.6% of the SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy. The Sub-Fund is invested in one company which is considered to be a SFDR Sustainable Investment with an environmental objective in economic activities aligned with EU Taxonomy. For this company, the EU Taxonomy eligible revenue was 67.3% (approximately half of which was deemed to be EU Taxonomy aligned revenue by the investee company), as per the company's 2023 annual report.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not have a commitment to investing a minimum percentage of Net Asset Value in socially sustainable investments, as at 31 December 2024 the Sub-Fund invested 11.11% of Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As at the 31 December 2024, the Sub-Fund held 1.17% of Net Asset Value in cash held as ancillary liquidity. There are no minimum environmental or social safeguards associated with these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In summary, the actions taken to meet the environmental and/or social characteristics during the reference period were:

- Adherence to the Investment Manager's investment process in terms of stock selection and portfolio construction.
- Each potential investment idea was subject to a broad assessment incorporating relevant and material issues using a consistent framework – a materiality-based assessment of ESG factors.
- ESG data points and controversies screening were sourced from the Investment Manager's third-party data provider.
- Review of sustainable investment assessment, performance of sustainability indicators and portfolio level assessment against relevant PAIs by an internal governance forum, the Additional Objectives Portfolios Group.

- The environmental and social characteristics promoted by the Sub-Fund were monitored daily via the exclusions list detailed in the binding elements of the Sub-Fund's investment strategy.
- Due diligence carried out on the underlying assets of the Sub-Fund spanned the processes from generation of a potential investment idea to portfolio construction. The Additional Objectives Portfolios Group assessed potential investment ideas for suitability for inclusion in the Sub-Fund and provides a recommendation to the Investment Executive. The Investment Executive has overall responsibility for the composition of the Sub-Fund.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Long-Term Global Equity Fund

Legal entity identifier: 21380054NDC4BXEMBP84

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 8.69% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It made sustainable investments with a social objective: ____%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The 'reference period' for this periodic report is from 1 January 2024 to 31 December 2024 (the "Reference Period").

During the Reference Period, this Sub-Fund promoted the environmental characteristic of responsible use of natural resources and the social characteristic of responsible business conduct through investing in companies which embrace high standards of environmental, social and governance (ESG) practice, or that were attractive due to their progression in environmental and social practice and exhibit good governance, and by deliberately avoiding investment in companies with below threshold ESG credentials as defined by the Investment Manager.

The environmental and social sustainability indicators considered by the Investment Manager are detailed below (the "Sustainability Indicators"):

Environmental Sustainability Indicators

- Greenhouse gas emissions
- Biodiversity and natural resources
- Climate and transition risks
- Pollution and waste management

Social Sustainability Indicators

- Business ethics, bribery and corruption
- Data privacy and security
- Labour practices and human rights safeguards
- Diversity, equality and inclusion

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

There was no intention for the SFDR Sustainable Investments underlying this Sub-Fund to contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The Sub-Fund's SFDR Sustainable Investments with a social objective were aligned with the UN Sustainable Development Goal 1 – 'No Poverty' and the UN Sustainable Development Goal 3 – 'Good Health and Well-Being'. The Sub-Fund's SFDR Sustainable Investment with an environmental objective was aligned with the UN Sustainable Development Goal 12 – 'Responsible Consumption and Production'.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The Sub-Fund used 8 Sustainability Indicators to measure how the environmental or social characteristics promoted by the Sub-Fund were attained which were supported by 14 data points. This is a change from prior reporting periods where the underlying data points were used by the Sub-Fund as the sustainability indicators and reflects a change made to the Sub-Fund's pre-contractual disclosure during the Reference Period.

ENVIRONMENTAL SUSTAINABILITY INDICATORS

Indicator #	Description	Supporting Data Points
Sustainability Indicator #1	Greenhouse Gas Emissions	1. Carbon intensity scope 1 and 2
Sustainability Indicator #2	Biodiversity and natural resources	2. Company has operations located in biodiversity-sensitive areas and is involved in controversies with severe impact on the environment 3. Operational sites owned, leased, managed in, or adjacent to, protected areas and areas of high biodiversity value outside protected areas
Sustainability Indicator #3	Climate and transition risks	4. Active fossil fuel sector exposure
Sustainability Indicator #4	Pollution and waste management	5. Environment controversy score

SOCIAL SUSTAINABILITY INDICATORS

Indicator #	Description	Supporting Data Points
Sustainability Indicator #5	Business ethics, bribery and corruption	6. Controversial weapons – any tie 7. Total number of convictions for violations of anti-corruption and anti-bribery laws
Sustainability Indicator #6	Data privacy and security	8. Customers - Privacy and data security score 9. Data security breaches controversies
Sustainability Indicator #7	Labour practices and human rights safeguards	10. Labour compliance – Broad 11. Human rights compliance 12. Human rights - Impact on local communities score
Sustainability Indicator #8	Diversity, equality and inclusion	14. Discrimination and diversity controversies

Each of the Sub-Fund's equity investments was measured against the Sustainability Indicators listed above on a quarterly basis and at the end of the Reference Period, as well as upon each purchase of a new company. The supporting data points were compared to internally set thresholds and, if a threshold was met, a flag was generated which required analysis. This would prompt comment and conclusion from the 'Stock Champion' (a member of the Investment Manager's Research team responsible for the research in the equity company) and further review from the Additional Objectives Portfolios Group, an internal governance forum.

No holdings were sold during the Reference Period as a result of analysis against the Sustainability Indicators detailed above.

No derivatives (FDI) were used to meet the environmental or social characteristics.

There were no new flags deemed to be potentially material changes in data during the Reference Period.

The following table indicates the percentage weight of the Sub-Fund invested in companies which had a flag relating to each Sustainability Indicator as at the end of the Reference Period.

Indicator #	Description	% Weight of Flagged Companies
Sustainability Indicator #1	Greenhouse Gas Emissions	2.3
Sustainability Indicator #2	Biodiversity and natural resources	7.3
Sustainability Indicator #3	Climate and transition risks	5.8
Sustainability Indicator #4	Pollution and waste management:	2.0
Sustainability Indicator #5	Business ethics, bribery and corruption	5.8
Sustainability Indicator #6	Data privacy and security	1.9
Sustainability Indicator #7	Labour practices and human rights safeguards	9.4
Sustainability Indicator #8	Diversity, equality and inclusion	7.0

● ...AND COMPARED TO PREVIOUS PERIODS?

In prior reporting periods, the 14 supporting data points set out above were used by the Sub-Fund as the sustainability indicators used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained. However, following an amendment to the Sub-Fund's pre-contractual disclosure during the Reference Period, the Sub-Fund now uses the eight overarching environmental and social themes, which are supported by the same 14 data points, as the sustainability indicators. Please see the section above titled "How did the sustainability indicators perform?" for further detail. The following table compares the performance of the eight Sustainability Indicators during the Reference Period against their performance in the prior reference period.

Indicator #	Description	2023	2024
Sustainability Indicator #1	Greenhouse Gas Emissions	2.0	2.3
Sustainability Indicator #2	Biodiversity and natural resources	0.0	7.3
Sustainability Indicator #3	Climate and transition risks	6.9	5.8
Sustainability Indicator #4	Pollution and waste management:	1.8	2.0
Sustainability Indicator #5	Business ethics, bribery and corruption	5.8	5.8
Sustainability Indicator #6	Data privacy and security	2.1	1.9
Sustainability Indicator #7	Labour practices and human rights safeguards	11.3	9.4
Sustainability Indicator #8	Diversity, equality and inclusion	2.6	7.0

Sustainability Indicator #2 (Biodiversity and natural resources): The increase in weight in companies with one or more flags relating to this Sustainability Indicator was due to the third-party data provider changing the underlying methodology behind the data points informing this Sustainability Indicator.

Sustainability Indicator #8 (Diversity, equality and inclusion): The beginning weight of 2.6% is a single company in the portfolio, while the ending weight of 7.0% is two companies in the portfolio. The increase in weight in companies with one or more flags relating to this Sustainability Indicator was due to (i) one company inheriting a flag from an acquisition made during the reporting period; and (ii) the increase in weight within the portfolio of another company with an existing flag from the beginning of the period.

● **WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?**

The social objectives to which the SFDR Sustainable Investments contributed were UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 – ‘Good Health and Well-Being’. The environmental objective to which the SFDR Sustainable Investments contributed was UN Sustainable Development Goal 12 – ‘Responsible Consumption and Production’.

A SFDR Sustainable Investment contributed to this objective by having a minimum of 30% revenue aligned with UN Sustainable Development Goals. The Sub-Fund’s five SFDR Sustainable Investments contributed to the objectives as follows:

SFDR Sustainable Investments with a social objective

- Novo Nordisk: global pharmaceuticals company largely focused on diabetes and obesity. 86% of revenue aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Edwards Lifesciences: market leader in the treatment of aortic stenosis, a serious heart condition that affects millions of people worldwide. 84% of revenues aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- CSL: one of the largest companies in the global blood plasma products industry whose treatments address rare, mostly chronic conditions such as immune and blood clotting disorders. 65% of revenue aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.
- Roche: global pharmaceuticals and diagnostics business with a world leading oncology franchise. 45% of revenue aligned with UN Sustainable Development Goal 1 – ‘No Poverty’ and UN Sustainable Development Goal 3 ‘Good Health and Well-Being’.

There were no SFDR Sustainable Investments with an environmental objective.

● **HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?**

The Sub-Fund’s SFDR Sustainable Investments that met the minimum revenue threshold, as previously described, were then screened against a number of principal adverse impacts (PAIs) indicators for ‘do no significant harm’ (DNSH).

● **HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?**

The following mandatory indicators in Table 1 of Annex I of the SFDR regulatory technical standards (RTS) and any relevant indicators (on a sector-by-sector basis) from Tables 2 and 3 of Annex I of the RTS were taken into account as follows during the Reference Period:

- Relevant indicators in Table 1 of Annex I of the RTS:
 1. Greenhouse gas emissions: Scope 1, 2 and 3
 3. Greenhouse gas intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

The Sub-Fund considered all mandatory indicators included in Table 1 of Annex I of the RTS with the exception of PAI 2, carbon footprint. For the DNSH assessment, the PAIs are required to be considered at company level. PAI 1 was converted to an intensity measure rather than an absolute number for this analysis. This was because the original PAI was designed for portfolio level consideration, rather than use at the company level, but the analysis for DNSH must be at the company level. PAI 2 is not considered separately as, having converted PAI 1 to an intensity measure, it would simply repeat the same information covered in PAIs 1 and 3.

- Relevant indicators in Table 2 of Annex I of the RTS:
- 4. Investments in companies without carbon emission reduction initiatives
- 8. Exposure to areas of high water stress
- Indicators in Table 3 of Annex I of the RTS:
- 4. Lack of a supplier code of conduct
- 6. Insufficient whistle-blower protection
- 7. Incidents of discrimination
- 9. Lack of a human rights policy
- 14. Number of identified cases of severe human rights issues and incidents
- 15. Lack of anti-corruption and anti-bribery policies

Each indicator was either considered versus a sector median or absolute threshold for all companies that met the percentage revenue threshold to qualify as a SFDR Sustainable Investment.

For quantitative indicators, a flag was raised if the designated threshold for sector median was surpassed. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the four securities which qualified as SFDR Sustainable Investments, there were nine flags as at the end of the Reference Period, seven of which related to data gaps, while the remaining two flags related to surpassing the sector median. Specifically, these flags were for: PAI 1: Greenhouse gas emissions: Scope 1, 2 and 3, and PAI 3: Greenhouse gas intensity of investee companies: Scope 1, 2 and 3.

For other indicators, a flag was raised for a below threshold response. In such instances, further analysis was undertaken to determine whether the investment did no significant harm and therefore was in fact a SFDR Sustainable Investment. Across the four securities which qualified as SFDR Sustainable Investments, there were four flags as at the end of the Reference Period. Specifically, these flags were for: PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises; PAI 8: Emissions to water; Additional Social; and PAI 4: Lack of a supplier code of conduct.

For all indicators (qualitative and otherwise), if the data was not available from the Investment Manager's third-party data provider, steps were taken by the Investment Manager to either source the required information or contact the investee company. If the company did not report that data point, then proxy or alternative contextual information was used.

In all cases where flags were raised, following further analysis it was concluded that there was no significant harm to any environmental or social sustainable investment objective and therefore the companies qualified as SFDR Sustainable Investments.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as no flags were raised in relation to the specific human rights, labour, controversy, and tax compliance screens which either (i) directly cover one or more of the Responsible Business Practices; or (ii) are considered an appropriate proxy for one or more of the Responsible Business Practices.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

In accordance with Article 7 of SFDR, the adverse impacts of investment decisions on sustainability factors were considered in line with the PAI regime for this Sub-Fund from the perspective of the harm that investment positions might do externally to sustainability factors. The Sub-Fund considered seven of the mandatory indicators included in Table 1 of Annex I of the RTS at a portfolio level. Those were:

- PAI 2: Carbon footprint
- PAI 3: Greenhouse gas intensity of investee companies
- PAI 4: Exposure to companies active in the fossil fuel sector
- PAI 7: Activities negatively affecting biodiversity-sensitive areas
- PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- PAI 13: Board gender diversity
- PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons)

Thresholds were set against each indicator at an aggregate portfolio level. The approach to 'consider the PAIs' has been for the Investment Manager to apply the reasonable thresholds, above which it could be considered that the Sub-Fund has a 'material adverse impact' against any of the criteria listed above. The Sub-Fund was reviewed against these thresholds internally on a quarterly basis, as well as upon each purchase of a new company. When compared, none of these thresholds were exceeded.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

More important investments	Sector	% of assets	Country
TAIWAN SEMICONDUCTOR MFG	Information technology - Semiconductors & Semiconductor Equipment	4.14%	Taiwan
Microsoft Corporation	Information technology - Software & Services	3.76%	United States
Alphabet	Communication services - Media & Entertainment	3.21%	United States
Mastercard	Financials - Financial Services	3.19%	United States
Amphenol	Information technology - Technology Hardware & Equipment	3.08%	United States
Novo Nordisk	Health care - Pharmaceuticals Biotechnology & Life Sciences	2.76%	Denmark
Linde	Materials - Materials	2.72%	United States
Moody's Corp	Financials - Financial Services	2.41%	United States
Texas Instruments	Information technology - Semiconductors & Semiconductor Equipment	2.35%	United States
Fortinet	Information technology - Software & Services	2.31%	United States
Automatic Data Processing	Industrials - Commercial & Professional Services	2.31%	United States

More important investments	Sector	% of assets	Country
Keyence	Health care - Pharmaceuticals Biotechnology & Life Sciences	2.29%	Japan
Booking Holdings	Consumer discretionary - Consumer Services	2.28%	United States
ResMed	Health care - Health Care Equipment & Services	2.26%	United States
TJX Companies	Consumer discretionary - Consumer Discretionary Distribution & Retail	2.25%	United States

What was the proportion of sustainability-related investments?

WHAT WAS THE ASSET ALLOCATION?

As at 31 December 2024, the asset allocation of the Sub-Fund was as shown in the diagram. This differs from the asset allocation diagram in the pre-contractual disclosure (Annex II) as this was intended to illustrate the planned asset allocation of the Sub-Fund and reflected the minimum investments referred to in that Annex.

As at 31 December 2024, 98.12% of the Net Asset Value of this Sub-Fund was invested in Equity and Equity-Related Securities that met the Investment Manager's "ESG Criteria" at the time of purchase and on an ongoing basis. The remainder of the Sub-Fund was invested in cash which, for the avoidance of doubt, is not required to meet the ESG Criteria.

The Sub-Fund met its commitment to investing a minimum of 5% of Net Asset Value in SFDR Sustainable Investments which contribute to an environmental or social objective. As at 31 December 2024, 8.69% of the Sub-Fund's Net Asset Value was invested in SFDR Sustainable Investments.

The asset allocation between environmental and social objectives is not fixed and as such, the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically contributed to either an environmental objective or social objective. As at 31 December 2024, 0.00% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with an environmental objective and 8.69% of the Sub-Fund's Net Asset Value was in SFDR Sustainable Investments with a social objective.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund's investments were in the following economic sectors:

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

0%

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

In the prior reference period, one investee company was identified as having EU Taxonomy eligible and aligned revenue, OpEx and CapEx. This holding was sold to nil in 2024. Thus, within the Reference Period (i) Aligned Portfolio Turnover decreased from 1.14% to 0.00%; (ii) Aligned Portfolio Operating Expenditure decreased from 0.82% to 0.00%; and (iii) Aligned Portfolio Capital Expenditure decreased from 1.12% to 0.00%.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

There were no SFDR Sustainable Investments with an environmental objective, and therefore no SFDR Sustainable Investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not have a commitment to investing a minimum percentage of Net Asset Value in socially sustainable investments, as at 31 December 2024 the Sub-Fund invested 8.69% of Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

As at 31 December 2024, the Sub-Fund held 1.88% of Net Asset Value in cash held as ancillary liquidity. There are no minimum environmental or social safeguards associated with these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In summary, the actions taken to meet the environmental and/or social characteristics during the Reference Period were:

- Adherence to the Investment Manager's investment process in terms of stock selection and portfolio construction.
- Each potential investment idea was subject to a broad assessment incorporating relevant and material issues using a consistent framework – a materiality-based assessment of ESG factors.
- ESG data points and controversies screening were sourced from the Investment Manager's third-party data provider.
- Review of sustainable investment assessment, performance of Sustainability Indicators and portfolio level assessment against relevant PAIs by an internal governance forum, the Additional Objectives Portfolios Group.
- The environmental and social characteristics promoted by the Sub-Fund were monitored daily via the exclusions list detailed in the binding elements of the Sub-Fund's investment strategy.
- Due diligence carried out on the underlying assets of the Sub-Fund spanned the processes from generation of a potential investment idea to portfolio construction. The Additional Objectives Portfolios Group assessed potential investment ideas for suitability for inclusion in the Sub-Fund and provides a recommendation to the Investment Executive. The Investment Executive has overall responsibility for the composition of the Sub-Fund.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Mobility Innovation Fund

Legal entity identifier: 213800OBBVFZ8TN6N134

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 90.79% of sustainable investments ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It made sustainable investments with a social objective: ____%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Improved environmental outcomes and other societal benefits, potentially provided by companies that are focused on innovation in transportation and related technologies.

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub- Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Improved digital infrastructure and connectivity that can have implications for transportation and its systems
- Improved infrastructure and products contributing to safer driving
- Contribution to social objectives as a result of investee companies' internal business practices and successful management of competing interests of key stakeholder groups.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All companies invested in by the Sub-Fund to align to the Investment Manager's proprietary CASE framework. This framework identifies which of the following theme(s) a company aligns to:

- Connectivity, which covers sub-themes including cloud storage, and high-speed data towers
- Autonomous Vehicles, which covers sub-themes including advanced driver assistance systems, and next generation auto parts
- Sharing, which covers sub-themes including ride hailing technology
- Electrification, which covers sub-themes including EV infrastructure, smart grid, and battery technology

Excluding instruments held for liquidity and hedging purposes, the data coverage for the sustainability indicators was as follows:

Sustainability indicators #1 and #2 - 100% of the Sub-Fund.

Sustainability indicator #3 - 97% of the Sub-Fund.

Sustainability indicator #4 - 100% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Low – on a weighted average basis, the Sub-Fund was deemed by a third-party data provider to have a low level of unmanaged ESG risks.
Sustainability Indicator #4	100% of investments (excluding those held for liquidity and hedging purposes)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ...AND COMPARED TO PREVIOUS PERIODS?

Reference period	Sustainability Indicator #1	Sustainability Indicator #2	Sustainability Indicator #3	Sustainability Indicator #4
31 December 2023 – 31 December 2024	0%	0%	Low	100% of investments (excluding those held for liquidity and hedging purposes)
31 December 2022 – 31 December 2023	0%	0%	Low	100% of investments (excluding those held for liquidity and hedging purposes)

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Production of components used in systems that contribute to or enable enhanced vehicle safety
- Creation of products that enable a better and wider connected digital world.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

- Electrification, or the enabling of, batteries and transport, contributing to reduced emissions

Contributing to the transition towards a net zero world through efficiency, green technology, and reduced car usage.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy.
17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
INFINEON TECHNOLO EUR NPV	SEMICONDUCTORS	4.31%	GER

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 98.86% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 90.79% of

Net Asset Value in SFDR Sustainable Investments of which 83.34% had an environmental objective not aligned with the EU Taxonomy and 6.16% had a social objective. 1.29% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.29% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives were aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Enabling activities: 1.17% (turnover)

Transitional activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy marginally increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by investee companies as opposed to estimated by third-party data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 83.34% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 6.16% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 1.14% of Net Asset Value in category #2 (other) which comprised of:

1.14% in cash held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 20% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the “Non-ESG Assets”) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
- Invested at least 80% of the Net Asset Value of the Sub-Fund in Mobility Innovation Companies. Mobility Innovation Companies include automobile manufacturers, component suppliers and automobile technology providers that focus on innovation in transportation relating to use, control and power such as enhanced infrastructure and data processing capabilities, clean energy production, the safety implications of advanced driver-assistance systems, and the companies which make use of or enable such mobility innovations.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Dynamic Bond Fund

Legal entity identifier: 2138003QS1W6U007GI98

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ Yes	☐ ☐ No
☐ It made sustainable investments with an environmental objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.74% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ____%	☒ with a social objective
	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

Characteristics relating to investing in companies that align with the Investment Manager's proprietary carbon red line; investing in companies proactively seeking to manage social and environmental factors well; and investing in sovereign issuers proactively seeking to manage social and environmental factors well, were met by the Sub-Fund during the reference period.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Access to financial products and services
- Connectivity and digital access
- Financial protection
- Access to housing

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The data coverage for sustainability indicators #1 and #2 was 100% (by weight) of the Sub-Fund's corporate investments (excluding sovereign issuers, FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 40% (by weight) of the Sub-Fund's investments.

The data coverage for sustainability indicator #4 was 100% (by weight) of sovereign issuers held by the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Low
Sustainability Indicator #4	100%

● ...AND COMPARED TO PREVIOUS PERIODS?

Reference period	Sustainability Indicator #1	Sustainability Indicator #2	Sustainability Indicator #3	Sustainability Indicator #4
31 December 2023 - 31 December 2024	0%	0%	Low	100%
31 December 2022 - 31 December 2023	0%	0%	Low	100%

● **WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?**

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Facilitating access to financial products that contribute to financial safety and wellbeing
- Provision of social housing to underserved sections of society
- Provision of technology solutions to the life sciences industry that enable and accelerate clinical development of medical treatments for rare diseases
- Promotion of digital infrastructure in emerging markets

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The sustainable investments contributed to these environmental objectives in the following ways:

- Promoting green finance instruments (green mortgages) and leveraging instruments like green bonds to onward finance low-carbon assets.
- Improving water quality and controlling levels of wastage.
- Establishment of policies, programmes and targets to reduce emissions and control waste within own operations
- Setting net zero targets to reducing financed emissions by reducing exposures to fossil fuel financing
- Provision of packaging solutions that provide a more easily recyclable alternative to plastics, and target for 100% recyclability in all products.
- Reduction in GHG emissions and implementation of a climate-change strategy to capitalise on opportunities in low-carbon transportation

● **HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?**

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

● **HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?**

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3. GHG intensity of investee companies: Scope 1, 2 and 3
4. Exposure to companies active in the fossil fuel sector
5. Share of non-renewable energy consumption and production
6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
7. Activities negatively affecting biodiversity-sensitive areas
8. Emissions to water
9. Hazardous waste and radioactive waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether

such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs. For instance, data indicated that an investee company was in violation of the principles of the UN Global Compact (PAI #10), which resulted in divestment of that issuer.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
US TSY 3.5% 02/15/33	GOVERNMENT	3.47%	USA

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 96.17% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 35.74% of Net Asset Value in SFDR Sustainable Investments of which 17.49% had an environmental objective not aligned with the EU Taxonomy and 17.08% had a social objective. 1.17% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 96.17% of Net Asset Value

#1A Sustainable: 35.74% of Net Asset Value

- Taxonomy-aligned: 1.17% of Net Asset Value
- Environmental: 17.49% of Net Asset Value
- Social: 17.08% of Net Asset Value

#1B Other E/S characteristics: 60.44% of Net Asset Value

#2 Other: 3.83% of Net Asset Value

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

1.17% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Enabling activities: 0.27% (turnover)

Transitional activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy marginally increased compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by third-party data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 17.49% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 17.08% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 3.83% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 10% of the Sub-Fund's Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption).
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the “Non-ESG Assets”) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: **BNY Mellon Sustainable Global Emerging Markets Fund**

Legal entity identifier: **213800C4HLFO7W5C5209**

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?			
☒ ☒ Yes		☐ ☐ No	
☒ It made sustainable investments with an environmental objective: 44.85%		☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments	
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy		☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy	
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
☒ It made sustainable investments with a social objective: 53.52%		☐ with a social objective	
		☐ It promoted E/S characteristics, but did not make any sustainable investments	

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period"):

The Sub-Fund aims to achieve long-term capital growth and has a sustainable investment objective. Specifically, the Sub-Fund aims to contribute to social and environmental objectives by investing in securities of emerging market companies that demonstrate attractive investment attributes and support sustainable development. With the exception of instruments held for liquidity and hedging purposes, the Sub-Fund invested exclusively in SFDR Sustainable Investments over the course of the reference period. The SFDR Sustainable Investments contributed to the sustainable investment objective by supporting sustainable development through contributing to the UN Sustainable Development Goals (UN SDGs).

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- SDG #7: Affordable and Clean Energy
- SDG #9: Industry, Innovation and Infrastructure
- SDG #11: Sustainable Cities and Communities
- SDG #13: Climate Action

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- SDG #2: Zero Hunger
- SDG #3: Good Health & Wellbeing
- SDG #4: Quality Education
- SDG #5: Gender Equality
- SDG #6: Clean Water and Sanitation
- SDG #7: Affordable and Clean Energy
- SDG #8: Decent Work and Economic Growth
- SDG #9: Industry, Innovation and Infrastructure
- SDG #10: Reduced Inequality
- SDG #11: Sustainable Cities and Communities
- SDG #12: Responsible Consumption and Production

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the sustainable investment objective of the Sub-Fund was attained:

Sustainability Indicator #1: No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2: 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3: A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4: All investments to demonstrate alignment to one or more of the UN SDGs, as further evidenced through qualitative case studies.

The data coverage for sustainability indicators #1 and #2 was 100% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

The data coverage for sustainability indicator #3 was 100% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

The data coverage for sustainability indicator #4 was 100% of the Sub-Fund's investments net of instruments used for FDI, liquidity and hedging purposes.

No derivatives (FDI) were used to attain the sustainable investment objective of the Sub-Fund.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Low
Sustainability Indicator #4	100% of companies aligned to one or more of the UN SDGs as indicated through a sample of qualitative case studies for the top 5 holdings as of the end of the reference period, appended to this document.

Qualitative Case Studies – Demonstration of Alignment to the UN Sustainable Development Goals for the Top 5 Holdings (by weight) in the fund as of 31 December 2024

1. Taiwan Semiconductor Manufacturing Co, 9.77% weight in the fund. Aligned with:

a. SDG 7 - Ensure access to affordable, reliable, sustainable and modern energy for all. TSMC are leading the high-performance, energy-saving semiconductor technologies that enable customers to deliver energy-efficient products. Calculations using the Industry, Science, and Technology International Strategy Centre's model revealed that, in 2020, TSMC helped the world conserve 4kWh of energy for each 1kWh spent in production. Their semiconductors are realised in applications of new technologies and support global, inclusive growth of smart manufacturing, smart energy and smart building.

b. SDG 4 - Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. TSMC has established research centres in collaboration with top-ranked universities in Taiwan and dedicated research funds to encourage university professors to conduct groundbreaking semiconductor research projects. As the research centres strive to develop leading-edge technologies in semiconductor devices, material science, manufacturing process, and IC design. TSMC also works with universities in Taiwan and overseas to promote joint development projects covering a range of technologies areas. The annual research funds exceed NT\$338 million, and over 157 US patent applications were filed.

c. SDG 9 - Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation. C is the first to realize automated manufacturing. The Company has applied AI to the big data and machine learning platform for wafer fabrication to create an intelligent manufacturing environment featuring self-diagnosis and self-feedback capabilities. In response to the increasingly diversified and growing need for high-quality chips, TSMC initiated a comprehensive digital transformation. Digitized fabs are launched to transform the manufacturing process. With automated data collection, system assistance and AI judgment, process efficiency per batch is increased by 30% to 40%. In accelerating intelligent manufacturing, TSMC has also built an AI quality control system for wafer fabs to ensure production quality, facilitate benchmarking among different fabs, and strengthen technology transfer capacity.

d. SDG 12 - Ensure sustainable consumption and production patterns. A core mission of TSMC is to purchase raw materials responsibly by making suppliers to make advancements in the following aspects: technology, quality, delivery, environmental protection, human rights, safety and health. All tier 1 suppliers have signed the TSMC Supplier Code of Conduct and they ensure a cumulative total of 145 local raw materials suppliers receive support on process enhancement and quality improvement. They also look to reduce waste production among local suppliers by 35% as compared to 2014.

2. MercadoLibre, 4.53% weight in the fund. Aligned with:

a. SDG 8 Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.

Mercadolibre currently enables more than 574,000 SMEs to trade, and provides more than half of their revenues for 40% of them. On top of that, Mercado Pago continues to grow, helping democratise financial inclusion for thousands of individuals and enterprises that had been locked out of the traditional system: more than 68.8 million unique users executed 300 transactions per second, with over 30,4 million users investing through MELI's digital bank.

Mercado Pago offers digital accounts and payment methods that make it easier to access basic financial transactions, as well as investment and credit solutions. This allows more people and businesses to manage their finances and operate in the formal economy. Over 500,000 SMEs sell on MELI's platform and over 1 million families have MELI as their main source of income. MELI's scale and reach (>30% e-commerce market share in Latin America) allows for network effects to play out in full and massively expands the addressable market for SMEs that otherwise would not have been able to reach.

3. MediaTek Inc, 4.42% weight in the fund. Aligned with:

a. SDG 7: Affordable and clean energy

MediaTek Inc. is a Taiwanese company which operates as a fabless semiconductor company for wireless communications and digital multimedia solutions for wireless communications, high-definition TV, optical storage, digital video disc (DVD), and Blu-ray products. Investment creates impact by progressing the development and production of energy efficient semiconductor-based technologies and solutions, leading to environmental benefits such as reduced GHGs and air pollution whilst creating socio-economic opportunities.

Investment in MediaTek Inc. fosters continuous advancements in the availability of increasingly efficient semiconductor technologies. This includes contributions to ongoing research and development efforts, enabling the company to increase market share, innovate, and address evolving energy efficiency needs from existing societal products and services to reduce society's overall energy demand. All of which leads to both environmental and social progress through

reduced emissions, improved air quality, and socio-economic growth. Without the company, reductions in energy demands by products and services offered by manufacturers would likely be slower, hindering progress related to reducing society's use of fossil fuels.

4. Advantech Co Ltd, 4.33% weight in the fund. Aligned with:

a. SDG 7: Affordable and clean energy

Advantech is a Taiwanese company which is the world's largest industrial PC, or IPC, supplier, offering single-board computers, fan-less IPCs, digital posts and more. Investment creates impact by driving innovation, allowing the company to develop advanced technologies for industrial automation, IoT, and embedded computing. This allows for the progression and development of energy efficient solutions, leading to environmental benefits such as reduced GHGs and air pollution while creating socio-economic opportunities.

Investment in Advantech fosters continuous advancements in the availability of and standard of integrated industrial computing technologies. This includes contributions to ongoing research and development efforts, enabling the company to increase market share, innovate, and address evolving energy efficiency needs from existing societal products and services to reduce society's overall energy demand. All of which leads to both environmental and social progress through reduced emissions, improved air quality, and socio-economic growth. Without the company, reductions in energy demands by various products and services offered by various industries would likely be slower, hindering progress on reducing society's fossil fuel use.

5. E Ink Holdings Inc, 4.19% weight in the fund. Aligned with:

a. SDG 12: Responsible Consumption and Production

E Ink Holdings, Inc. is a Taiwanese company which develops, manufactures, and markets consumer electronic products through electronic paper, electronic ink, electronic inkfilm, and other products as well as Internet of Things (IoT) application services. Investment creates impact by progressing the development and production of energy-efficient display technologies and solutions, leading to environmental benefits through reduced energy and raw material consumption (printed paper) compared to traditional display technologies.

Investment in E Ink Holdings, Inc. fosters continuous advancements in the availability of increasingly efficient display technologies. This includes contributions to ongoing research and development efforts, enabling the company to increase market share, innovate, and address evolving energy consumption challenges from existing products and services to reduce society's overall energy demand. All of which leads to both environmental and social progress through reduced emissions, improved air quality, and socio-economic growth. Without the company, reductions in energy demands by products and services offered by manufacturers would likely be slower, hindering progress on reducing society's overall energy demand.

● ...AND COMPARED TO PREVIOUS PERIODS?

Reference period	Sustainability Indicator #1	Sustainability Indicator #2	Sustainability Indicator #3	Sustainability Indicator #4
31 December 2023 - 31 December 2024	0%	0%	Low	100% of companies aligned to one or more of the UN SDGs as indicated through a sample of qualitative case studies for the top 5 holdings as of the end of the reference period.
31 December 2022 - 31 December 2023	0%	0%	Medium	100% of companies aligned to one or more of the UN SDGs as indicated through a sample of qualitative case studies for the top 5 holdings as of the end of the reference period.

● HOW DID THE SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Data availability and coverage was in many case limited for the Sub-Fund given its focus on emerging markets: where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 98.37% of the Net Asset Value was invested in SFDR Sustainable Investments. Whilst the asset allocation between environmental and social objectives is not fixed and as such the Sub-Fund does not commit to invest a minimum percentage of Net Asset Value in SFDR Sustainable Investments which have specifically an environmental objective or specifically a social objective, 44.85% of Net Asset Value was invested in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy, and 53.52% of Net Asset Value was invested in SFDR Sustainable Investments with a social objective. 0.01% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

#1 Sustainable: 98.37% of Net Asset Value

- Other environmental: 44.85% of Net Asset Value
- Social: 53.52% of Net Asset Value

#2 Not Sustainable: 1.63% of Net Asset Value

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.01% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

☒ No

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

0.40% (enabling)

HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy was marginally higher than the previous reference period (0.01% vs 0.00%).

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 44.85% of NAV in SFDR Sustainable Investments with an environmental objective that were not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was

are sustainable investments with an environmental objective that **do not take into**

account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 53.52% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 1.63% of Net Asset Value in category #2 (Not Sustainable) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, and currency positions. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

In order to attain the sustainable investment objective, the Investment Manager took the following actions:

- Invested at least 75% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, currency related FDI and FDI used for hedging purposes (the “Non-ESG Assets”) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.
- Invested at least 75% of its Net Asset Value in companies in emerging market countries that contribute to social or environmental objectives by supporting sustainable development, through contributing to one or more of the UN Sustainable Development Goals (the “SDGs”). Examples of the SDGs include climate action, affordable and clean energy, sustainable cities and communities, good health and wellbeing, quality education, and zero hunger.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the sustainable investment objective of the Sub-Fund

● HOW DID THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

Reference benchmarks are indexes to measure

whether the financial product attains the sustainable objective

- **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE SUSTAINABLE INVESTMENT OBJECTIVE?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**
Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Equity Fund

Legal entity identifier: 213800YDXSXADAYMRQ85

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 83.38% of sustainable investments ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective
☐ It made sustainable investments with a social objective: ____%	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Circular economy and recycling
- Reduction in natural resource usage
- Electrification

The SFDR Sustainable Investments underlying this Sub- Fund contributed to the following social objectives:

- Access to financial products and services
- Health & wellbeing

- Drug development
- Infrastructure
- Contribution to social objectives as a result of investee companies' internal business practices and successful management of competing interests of key stakeholder groups.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Excluding instruments held for liquidity and hedging purposes, the data coverage for the sustainability indicators was as follows:

Sustainability indicators #1 and #2 - 100% of the Sub-Fund.

Sustainability indicator #3 - 97% of the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Low – on a weighted average basis, the Sub-Fund was deemed by a third-party data provider to have a low level of unmanaged ESG risks.

● ...AND COMPARED TO PREVIOUS PERIODS?

Reference period	Sustainability Indicator #1	Sustainability Indicator #2	Sustainability Indicator #3
31 December 2023 - 31 December 2024	0%	0%	Low
23 February 2023 - 31 December 2023	0%	0%	Low

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Developing gene therapies to improve patients' quality of life, longevity, and productivity while reducing physical and economic waste that is associated with chronic treatments
- Offering financial products and services to a diverse customer base, including the underbanked

- Enabling safe and effective drug development & innovation

0.29% of the SFDR Sustainable Investments underlying this Sub-Fund contributed to the environmental objective of Climate Change Mitigation as set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contribution to the transition to a net zero world
- Electrification
- Circular economy and recycling
- Reduction in natural resource usage

The SFDR Sustainable Investments contributed to environmental objectives not aligned with the EU Taxonomy in the following ways:

Contributing to the transition towards a net zero world through the development of renewable energy, efficiency, and green technology

- Improving efficiencies in value chains and implementing strong waste management practices
- Minimising power loss, heat, and achieving better power conversion efficiency, helping end users to reduce their own operational emissions and carbon footprints as result.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
 - Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
 - Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy.
17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company’s sector, the Investment Manager’s internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager’s ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some

adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
MICROSOFT USD 0.00000625	SOFTWARE	6.23%	USA

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 97.74% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 83.38% of Net Asset Value in SFDR Sustainable Investments of which 43.85% had an environmental objective not aligned with the EU Taxonomy and 39.24% had a social objective. 0.29% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.29% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Enabling activities: 0.27% (turnover)

Transitional activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy marginally decreased compared to the previous reference period.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 0.29% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 39.24% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 2.26% of Net Asset Value in category #2 (other) which comprised of cash and liquidity vehicles held for liquidity purposes only. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 50% of its Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**
Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Multi-Asset Fund

Legal entity identifier: 2138002A693E30JMX948

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.00% of sustainable investments ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 3 September 2024 to 31 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary climate qualification test
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

Characteristics relating to investing in companies that align with the Investment Manager's proprietary carbon red line; investing in companies proactively seeking to manage social and environmental factors well; and investing in sovereign issuers proactively seeking to manage social and environmental factors well, were met by the Sub-Fund during the reference period.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to financial products and services
- Connectivity and digital access
- Financial protection
- Access to housing

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The data coverage for sustainability indicators #1 and #2 was 100% (by weight) of the Sub-Fund's corporate investments (excluding sovereign issuers, FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 63% (by weight) of the Sub-Fund's investments.

The data coverage for sustainability indicator #4 was 100% (by weight) of sovereign issuers held by the Sub-Fund.

No derivatives (FDI) were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Low
Sustainability Indicator #4	100%

● ...AND COMPARED TO PREVIOUS PERIODS?

No comparison for previous periods is available at the date of this periodic report.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Facilitating access to financial products that contribute to financial safety and wellbeing

- Provision of social housing to underserved sections of society
- Provision of technology solutions to the life sciences industry that enable and accelerate clinical development of medical treatments for rare diseases
- Promotion of digital infrastructure in emerging markets

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling

The sustainable investments contributed to these environmental objectives in the following ways:

- Promoting green finance instruments (green mortgages) and leveraging instruments like green bonds to onward finance low-carbon assets.
- Improving water quality and controlling levels of wastage.
- Establishment of policies, programmes and targets to reduce emissions and control waste within own operations
- Setting net zero targets to reducing financed emissions by reducing exposures to fossil fuel financing
- Provision of packaging solutions that provide a more easily recyclable alternative to plastics, and target for 100% recyclability in all products.
- Reduction in GHG emissions and implementation of a climate-change strategy to capitalise on opportunities in low-carbon transportation

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

9. Hazardous waste and radioactive waste ratio
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
12. Unadjusted gender pay gap
13. Board gender diversity
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

● **WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager’s own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company’s sector, the Investment Manager’s internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager’s ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs. For instance, data indicated that an investee company was in violation of the principles of the UN Global Compact (PAI #10), which resulted in divestment of that issuer.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 3 September 2024 to 31 December 2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 88.39% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 65.00% of Net Asset Value in SFDR Sustainable Investments of which 31.19% had an environmental objective not aligned with the EU Taxonomy and 33.36% had a social objective. 0.45% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 88.39% of Net Asset Value

#1A Sustainable: 65.00% of Net Asset Value

- Taxonomy-aligned: 0.45% of Net Asset Value
- Environmental: 31.19% of Net Asset Value
- Social: 33.36% of Net Asset Value

#1B Other E/S characteristics: 23.40% of Net Asset Value

#2 Other: 11.61% of Net Asset Value

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.45% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Enabling activities: 0.49% (turnover, excluding sovereign bonds)

Transitional activities: 0.00%

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

No comparison for previous periods is available at the date of this periodic report.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 31.19% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 33.36% of its Net Asset Value in SFDR Sustainable Investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 11.61% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- Invested at least 30% of the Sub-Fund's Net Asset Value in SFDR Sustainable Investments
- Excluded issuers that produce tobacco products
- Excluded issuers that derive more than 10% of turnover from the sale of tobacco
- Excluded issuers that generate revenues from the production of controversial weapons
- Excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption).
- Invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the “Non-ESG Assets”) in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

- **HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon Sustainable Global Real Return Fund

Legal entity identifier: 213800MU54AM2UKX6758

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ___%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 47.20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
☐ It made sustainable investments with a social objective: ___%	☒ with a social objective
☐	☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 10 December 2024 (the "Reference Period").

The environmental and/or social characteristics promoted were:

- Investment in companies that align with the Investment Manager's proprietary carbon red line
- Avoid investment in companies that have material unresolvable issues relating to human rights, labour, the environment, and corruption
- Investment in companies proactively seeking to manage social and environmental factors well
- Investment in sovereign issuers proactively seeking to manage social and environmental factors well

All of the above characteristics were met by the Sub-Fund during the reference period.

No reference benchmark was designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to the environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with the EU Taxonomy:

- Contributing to the transition to a net zero world
- Circular economy and recycling
- Electrification

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following social objectives:

- Access to financial products and services
- Health & wellbeing
- Drug development
- Infrastructure
- Access to digital infrastructure
- Societal protection
- Access to housing
- Education & training

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators are used to measure how the environmental or social characteristics promoted by the Sub-Fund are attained:

Sustainability Indicator #1 - No more than 5% of Net Asset Value in companies that:

- Are in the following sectors as defined by the Global Industry Classification Standard (GICS): materials, industrials, utilities, and energy; and
- Have a business incompatible with a scenario in which global temperatures rise more than 2 degrees Celsius above pre-industrial levels, as determined by the Investment Manager's proprietary framework; and
- Do not have an adequate strategy to address emissions / climate change, or a credible transition plan, as determined by the Investment Manager's proprietary framework.

In addition, where third party data is not available to assess these criteria or indicates that specific companies meet these criteria, the Investment Manager retains discretion to determine alignment with this sustainability indicator solely on the basis of its qualitative review process.

Sustainability Indicator #2 - 0% of Net Asset Value in investee companies that have been involved in violations of the UNGC principles.

Sustainability Indicator #3 - A weighted average ESG risk rating of 'medium' or better at the portfolio level. Such rating to be determined using third party data.

Sustainability Indicator #4 - All investments in sovereign issuers to have either strong current positioning, and/or are demonstrating progress in respect of the management of environmental, social and governance factors, as determined by the Investment Manager's proprietary sovereign sustainable framework.

The data coverage for sustainability indicators #1 and #2 was 100% of the Sub-Fund's corporate investments (excluding FDI, cash and cash equivalents).

The data coverage for sustainability indicator #3 was 55% of the Sub-Fund Investments (excluding FDI, cash and cash equivalents).

The data coverage for sustainability indicator #4 was 100% of sovereign issuers held by the Sub-Fund.

No FDI were used to meet the environmental or social characteristics.

The sustainability indicators performed as follows:

Indicator #	How did the indicator perform in the reference period?
Sustainability Indicator #1	0%
Sustainability Indicator #2	0%
Sustainability Indicator #3	Low
Sustainability Indicator #4	100%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ...AND COMPARED TO PREVIOUS PERIODS?

Reference period	Sustainability Indicator #1	Sustainability Indicator #2	Sustainability Indicator #3	Sustainability Indicator #4
1 January 2024 to 10 December 2024 (the "Reference Period").	0%	0%	Low	100%
31 December 2022 - 31 December 2023	0%	0%	Low	100%

● **WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?**

The social objectives of the SFDR Sustainable Investments the Sub-Fund partially made are included above.

The SFDR Sustainable Investments underlying this Sub-Fund did not contribute to environmental objectives set out in Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments contributed to the above social objectives in the following ways:

- Facilitating access and knowledge of financial products and services to the non-banked market in a developing country
- Provision of social infrastructure which supports societal needs including healthcare, education and affordable housing.
- Provision of digital infrastructure
- Financing the discovery, development and/or marketing of pioneering drugs
- Provision of health care products and services
- Provision of access to affordable housing

The SFDR Sustainable Investments underlying this Sub-Fund contributed to environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation.

The SFDR Sustainable Investments underlying this Sub-Fund contributed to the following environmental objectives not aligned with Article 9 of the EU Taxonomy Regulation:

- Contributing to the transition to a net zero world
- Circular economy and recycling
- Electrification

The sustainable investments contributed to these environmental objectives in the following ways:

- Provision of key parts for the generation of renewable energy
- Provision of grid automation solutions, access and connectivity to continued electricity supply and business efficiency by creating systems that enable efficiency in power distribution and access and those that will enable transition to low carbon
- Offering renewable and circular economy solutions in the form of biofuels
- Production of EV batteries, energy storage systems, and other products that enable the transition to a lower carbon economy
- Development and manufacture of markets machines used to recycle beverage containers, supporting resource efficiency and productivity through recycling, food sorting and waste management services
- Manufacture and distribution of uninterruptible power supplies (UPSs), photovoltaic products, and electronic materials, contributing to clean energy penetration and enabling energy saving and carbon reduction for users.

● **HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?**

The Investment Manager determined that SFDR Sustainable Investments in the Sub-Fund did no significant harm to any environmental or social objectives by assessing each SFDR Sustainable Investment's involvement in areas deemed to be harmful from an environmental or social perspective. Issuers that had involvement in activities deemed to be harmful from an environmental or social perspective were excluded from investment. Involvement in such activities was monitored on an ongoing basis.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?**

The Investment Manager reviewed the indicators for adverse impacts on sustainability factors for all SFDR Sustainable Investments where data was available. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG emissions: Scope 1, 2 and 3
 2. Carbon footprint: Scope 1, 2 and 3
 3. GHG intensity of investee companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- Table 2 of Annex I of the Commission Delegated Regulation: 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation: 9. Lack of a human rights policy. 17. Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws. 19. Freedom of expression score. 23. Political stability score. 24. Rule of law score.

● **WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a very broad range of areas of responsible business, encompassing everything from labour rights to consumer protection to support for internationally recognised human rights within a company's or issuer's sphere of influence.

SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each company invested in passed screens provided by third parties which either directly cover one or more of the Responsible Business Practices or are considered appropriate proxies for one or more of the Responsible Business Practices. Each company invested in also passed the Investment Manager's own qualitative review process which takes into account the Responsible Business Practices. In addition, where the companies invested in do not pass the relevant screens provided by third parties, the Investment Manager retains discretion to establish alignment with the Responsible Business Practices solely on the basis of its qualitative review process.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager reviewed principal adverse impacts at the product level on a frequent basis during the reference period, notwithstanding certain data coverage and data quality issues as further described below. The Investment Manager reviewed PAIs for investee issuers using data from a designated third party data provider. If a given PAI or PAIs for an issuer or product appeared to exceed expectations based on the data obtained from the designated third-party data provider, further qualitative review was undertaken with respect to those issuer(s) and that product in order to determine whether such data indicated the evidence of significant harm. In cases where, in the view of the Investment Manager, unresolvable significant harm was identified following further qualitative review, further action would be taken up to and including divestment. Over the course of the reference period no unresolvable significant harm was identified for investments in the Sub-Fund. Where there were data gaps and the PAI was considered material for a company's sector, the Investment Manager's internal qualitative assessment was used to assess the PAIs.

PAIs were categorised based on their characteristics (including their materiality and the Investment Manager's ability to estimate them), and such categories were used for the purpose of determining the actions and outcome when assessing the PAIs.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 10 December 2024

Largest investments	Sector	% of assets	Country

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The asset allocation diagram illustrates the asset allocation of this Sub-Fund. 86.99% of Net Asset Value was used to meet the environmental or social characteristics promoted by the Sub-Fund in accordance with the binding elements of the investment strategy. The Sub-Fund invested 47.20% of Net Asset Value in SFDR Sustainable Investments of which 24.84% had an environmental objective not aligned with the EU Taxonomy and 22.30% had a social objective. 0.05% of the Net Asset Value of the Sub-Fund was invested in sustainable investments with an environmental objective aligned with the EU Taxonomy.

#1 Aligned with E/S characteristics: 86.99% of Net Asset Value

#1A Sustainable: 47.20% of Net Asset Value

- Taxonomy-aligned: 0.05% of Net Asset Value
- Environmental: 24.84% of Net Asset Value
- Social: 22.30% of Net Asset Value

#1B Other E/S characteristics: 39.79% of Net Asset Value

#2 Other: 13.01% of Net Asset Value

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

The above figures are provided as at ("End of Reference Period") only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.05% of the Net Asset Value of the Sub-Fund was invested in SFDR Sustainable Investments with environmental objectives aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

The assessment of whether these investments complied with the EU Criteria for Environmentally Sustainable Economic Activities was not subject to an assurance provided by one or more auditors or a review by one or more third parties.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

☒ No

renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Enabling: 0.03% (turnover)

Transitional: 0.00%

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

The percentage of investments that were aligned with the EU Taxonomy increased marginally compared to the previous reference period. This was due to improvements in the availability of data that was reported by companies as opposed to estimated by third-party data providers.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-Fund invested 24.84% of NAV in SFDR Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was

are sustainable investments with an environmental objective that **do not take into**

account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 22.30% of its Net Asset Value in SFDR Sustainable Investments with a social objective

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Sub-Fund invested 13.01% of Net Asset Value in category #2 (other) which comprised of FDI, liquidity and hedging instruments only, including cash, cash equivalents, currency positions, currency related FDI and FDI used for hedging purposes. These instruments were held to either (a) ensure the Sub-Fund had sufficient liquidity; and/or (b) hedge against potential currency movements. These instruments were not subject to environmental or social safeguards as the Investment Manager does not view environmental or social considerations as relevant for these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In order to meet the environmental and social characteristics, the Investment Manager took the following actions:

- invested 20% in SFDR Sustainable Investments
- excluded issuers that produce tobacco products
- excluded issuers that derive more than 10% of turnover from the sale of tobacco
- excluded issuers that generate revenues from the production of controversial weapons
- excluded issuers in breach of the Principles of the UN Global Compact (which includes principles relating to human rights, labour, environment and anti-corruption)
- invested at least 90% of the Net Asset Value of the Sub-Fund net of the Sub-Fund's exposure to cash and liquid near cash assets, money market funds, and currency related FDI and FDI used for hedging purposes (the "Non-ESG Assets") in companies that meet the Investment Manager's ESG and sustainability criteria at time of purchase and on an ongoing basis.

Engagement is not a part of the environmental or social investment strategy of the Sub-Fund. However, engagement is an integral part of the Investment Manager's approach to investing as they believe that constructive dialogue with management teams not only affords real insight into how a company operates, it is an opportunity to advocate for positive change.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**

Not applicable.

- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: BNY Mellon US Municipal Infrastructure Debt Fund

Legal entity identifier: 213800RGF16LW6526386

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ ☒ ☐ Yes	☒ ☐ ☒ No
☐ It made sustainable investments with an environmental objective : ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective : ____%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☒ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1st January 2024 to 31st December 2024 (the "Reference Period").

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria – as set out in the Sub-Fund's supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco production, controversial weapons production and thermal coal mining and/or thermal coal power generation are excluded. Issuers will also be excluded where, in the opinion of the Investment Manager, the issuers are deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;

The Sub-Fund did not invest in SFDR Sustainable Investments.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicator was used to measure how the environmental and/or social characteristics promoted by the Sub-Fund were attained:

A minimum environmental and/or social standard that mitigated or avoided practices that the Investment Manager deems environmentally and/or socially detrimental.

A exclusion criteria was used to achieve this minimum standard. For example, issuers that derived a certain percentage of revenue as determined by the Investment Manager from tobacco production, controversial weapons production and thermal coal mining and/or thermal coal power generation

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

were excluded. Issuers were excluded where, in the opinion of the Investment Manager, the issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;

Positive environmental and/or social investments by aiming to:

have higher exposures to bonds where the proceeds were exclusively applied to finance or re-finance in part or in full projects with positive environmental ("green") and/or social impacts, but did not meet the definition of SFDR Sustainable Investments as assessed by the Investment Manager (hereafter "Use of Proceeds Bonds"); versus the Blended Benchmark; and

Targeted a carbon intensity level below the level of the Blended Benchmark.

A reference benchmark had not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund

Exclusion Policy: An assessment of whether the Sub-Fund had successfully and consistently executed its exclusion policy, to not invest in securities issued by corporate entities that met any of the below:

- Derived more than 5% of their revenue from the production of tobacco
- Derived more than 5% of their revenue from unconventional oil and gas extraction unless:
 - the exposure is achieved via a Use of Proceeds Bonds; and/or
 - the Investment Manager believes the issuer has a robust, clearly defined, long-term plan to address its environmental impact
- Are involved in the production of controversial weapons;
- Derived more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue (or equivalent revenue) from thermal coal power generation, unless:
 - the exposure was achieved via a Use of Proceeds Bonds; and/or
 - the issuer had a clearly defined plan to exit thermal coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers
- Derived more than 5% of their revenue from gambling
- Were deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles)

The sustainability indicator performed as follows:

No investment was made in securities which:

- Derived more than 5% of their revenue from the production of tobacco
- Derived more than 5% of their revenue from unconventional oil and gas extraction unless:
 - the exposure is achieved via a Use of Proceeds Bonds; and/or
 - the Investment Manager believes the issuer has a robust, clearly defined, long-term plan to address its environmental impact
- Are involved in the production of controversial weapons;
- Derived more than 5% of their revenue from thermal coal mining and/or more than 10% of revenue (or equivalent revenue) from thermal coal power generation, unless:
 - the exposure was achieved via a Use of Proceeds Bonds; and/or
 - the issuer had a clearly defined plan to exit thermal coal mining and/or generation before (i) 2030 in the case of developed market domiciled issuers or (ii) 2040 in the case of emerging market domiciled issuers
- Derived more than 5% of their revenue from gambling
- Were deemed to be involved in severe environmental, social or governance controversies (including significant violations of UN Global Compact Principles)

As at the 31st December 2024 the Sub-Fund's investments were 98.4%* aligned with the environmental and social criteria promoted. The remaining 1.6% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.

*This percentage figure is provided as at 31st December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	UN SDGs	Exclusion policy
1 January 2023 to 31 December 2023	the Sub-Fund's investments were 99.5%* aligned with the environmental and social criteria promoted. The remaining 0.5% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.
1 January 2024 to 31 December 2024	the Sub-Fund's investments were 98.4%* aligned with the environmental and social criteria promoted. The remaining 1.6% was held in cash and derivatives for hedging purposes and therefore not aligned with environmental and social criteria promoted.	The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund's supplement.

● WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?

Not applicable. The Sub-Fund did not make – in accordance with the SFDR pre-contractual disclosure - any investments during the Reference Period which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR.

● HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

Not applicable.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

the Sub-Fund considered the following PAIs from Table 1 of Annex I of the Commission Delegated Regulation:

- 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).
- 16. Investee countries subject to social violations

The PAIs were measured against certain defined thresholds which then will have triggered an additional qualitative review by the Investment Manager to determine if they had been breached. Following this process, if a PAI was considered to have been breached the Investment Manager excluded the relevant issuer from the Sub-Fund or took a synthetic short exposure to the issuer.

Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund.

Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see PAI Data Availability for further information on the PAI data sources and limitations.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31st December 2024

Largest investments	Sector	% of assets	Country
Commonwea 3.68% 07/15/26	MUNICIPAL	2.18%	USA
Metropoli 5.175% 11/15/49	MUNICIPAL	2.00%	USA
Detroit C 6.645% 05/01/29	MUNICIPAL	1.73%	USA
Californi 4% 02/01/52	MUNICIPAL	1.68%	USA
Californi 5.183% 11/01/53	MUNICIPAL	1.62%	USA

Maryland 5.942% 05/31/57	MUNICIPAL	1.24%	USA

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 below represents the proportion of the portfolio that has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

The percentages in this section as outlined in the diagram below are provided as at ("End of Reference Period") and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash and derivatives (FDI) for hedging. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31st December 2024, the Sub-Fund had mostly been exposed to the Municipal and Health Services as illustrated below.

The above figures are provided as at 31st December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100% of the total investments

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels
corresponding to the
best performance.

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

Period	Taxonomy data
24 November 2023 – 31st December 2023	Turnover/Revenue – 0% CapEx – 0% OpEx – 0%
1st January 2024 – 31st December 2024	Turnover/Revenue – 0% CapEx – 0% OpEx – 0%

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the reference period are:

- The Investment Manager employed exclusion criteria as outlined in the Sub-Fund's supplement.
- The Investment Manager ensured the exclusion criteria was met by excluding certain issuers as outlined in the supplement (and above). This was monitored by coding the binding elements (exclusions) into trading systems.
- The Investment Manager also employed the following internal control mechanisms to monitor adherence to the coded binding elements of the Sub-Fund during the Reference Period:
 1. Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
 2. Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

3. Oversight of internal exclusions lists used to ensure certain binding elements were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

● **HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?**

Not applicable.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?**

Not applicable.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**

Not applicable.

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons EM Debt Impact Fund

Legal entity identifier: 213800RV5KK3ZK331996

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.	Did this financial product have a sustainable investment objective?	
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.	☒ ☒ Yes	☐ ☐ No
	☒ It made sustainable investments with an environmental objective: 73.00% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments
	☒ It made sustainable investments with a social objective: 12.00%	

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of this Sub-Fund is to aim to achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in emerging market debt and debt related securities and related FDI.

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period from 1 January 2024 to 31 December 2024 (the "Reference Period"), by investing in Use of Proceeds Impact Bonds and Impact Issuers which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR ("SFDR Sustainable Investments"):

- In the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts that demonstrated a clear alignment, by contributing to varying extents, to the following UN Sustainable Development Goals ("UN SDGs") (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
- Affordable and clean energy
- Industry, innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land
- Partnerships to achieve the goal

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health and wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were linked to positive environmental and/or social activities which contributed to the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
- Responsible consumption and production
- Sustainable cities and communities
- Industry, Innovation & Infrastructure

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Affordable and Clean Energy
- Decent work and economic growth
- Good Health & Wellbeing

The Sub-Fund did not invest in Improving Issuers (as described in the SFDR Annex III) during the Reference Period. The SFDR Sustainable Investments may, in some cases have, contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund has a sustainable investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the sustainable investment objective of the Sub-Fund was attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 80% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 85% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs") or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation,

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

(b) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/or were defined as “environmentally sustainable economic activities” by the EU Taxonomy Regulation.

No derivatives (FDI) were used during the Reference Period to attain the sustainable investment objective of the Sub-Fund.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	SFDR SI
1 January 2023 to 31 December 2023	The Sub-Fund successfully and consistently invested a minimum of 80% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2023, 92% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2023 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).
1 January 2024 to 31 December 2024	The Sub-Fund successfully and consistently invested a minimum of 80% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 85% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).

● HOW DID THE SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investment objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Fund's SFDR Sustainable Investments:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

13. Board gender diversity

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-party data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider principal adverse impacts on sustainability factors. The availability and quality of such data impacted the extent to which each such PAI could be considered. In particular, the lack or incomplete reporting of metrics by some issuers meant that there was limited data on some adverse indicators. As such for some of the mandatory PAIs, data coverage was low. The Investment Manager's analysis of adverse indicators relied on this third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of adverse indicators was necessarily limited. As the data availability improves over time, it is expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe. This will allow for enhanced insight into the adverse impacts caused by issuers.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments pursuant to SFDR were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered by the Investment Manager an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted that the availability and quality of data may have impacted the screening process.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered PAIs as part of its DNSH analysis on SFDR Sustainable Investments as described in response to the above question "How were the indicators for adverse impacts on sustainability factors taken into account?"

The Sub-Fund also considered the following PAIs:

- Table 2 of Annex I of the Commission Delegated Regulation:
- 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation:
- 16. Lack of anti-corruption and anti-bribery policies.

There were no breaches of the PAI thresholds set by the Investment Manager.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
MEXICO 2.25% 08/12/36	GOVERNMENT	2.27%	MEX

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund had a sustainable investment objective and committed to investing a minimum of 80% of NAV in aggregate in SFDR Sustainable Investments with an environmental and/or social objective.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

By way of illustration, as at 31 December 2024, 85% of the Sub-Fund's Net Asset Value in aggregate was invested in SFDR Sustainable Investments with an environmental and/or social objective, thus exceeding the minimum outlined in the Sub-Fund's supplement. The allocation to SFDR Sustainable Investments is referenced in #1.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

* As at 31 December 2024, 30% of the SFDR Sustainable Investments made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

** #2 Not Sustainable contains investments that are not categorised as SFDR Sustainable Investments i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "Not Sustainable", what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to Banks and the Government sectors, as well as the Telecommunications and Electric sectors, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy, and, out of Sub-Fund's allocation to SFDR Sustainable Investments, 0% of the SFDR Sustainable investments with an environmental objective aligned with the EU Taxonomy as at the 31 December 2024.

The EU Taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

1. Climate change mitigation.
2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was

not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

Period	Taxonomy
1 January 2023 to 31 December 2023	Turnover/Revenue – 2% CapEx – 0% OpEx – 0%
1 January 2024 to 31 December 2024	Turnover/Revenue – 0% CapEx – 0% OpEx – 0%

 What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

100% of SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

 What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 12%* of its Net Asset Value in SFDR Sustainable Investments with a social objective as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

 What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

Investments included under “#2 Not Sustainable” were:

- Liquid and near-cash assets including cash held for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were used for liquidity purposes.
- Derivatives (FDI) used for hedging purposes.
- SFDR Sustainable Investments in breach of DNSH which are in the process of being sold. No minimum environment or social safeguards were considered for these investments.

Their proportion and use do not affect the delivery of the sustainable investment objective on a continuous basis because under normal circumstances they were a maximum of 20% of Net Asset Value.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken to attain the sustainable investment objective during the Reference Period were as follows:

To achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI, the Sub-Fund invested in Impact Issuers and Use of Proceeds Impact Bonds where:

- a) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to help realise one or more of the 17 UN SDGs;
- b) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least (...) % of their revenue streams were aligned to help realise one or more of the 17 UN SDGs.

Each applicable security was assessed according to the Investment Manager's assessment framework, which ascertained the level of contribution to the UN SDGs. Two frameworks were deployed for this assessment:

- a) Use of Proceeds Impact Bonds: The Investment Manager employed an assessment framework that generally considered the following three components: issuer profile; framework of bond issuance and reporting and transparency;
- b) Impact Issuers: The Investment Manager assessed issuers using external and/or internal data to determine the revenue alignment of such issuer's products and services with the UN SDGs. Where no external data was available, an assessment was conducted by the Investment Manager's ESG analysts and ratings approved by the Investment Manager's 'Impact Committee'.

The SFDR Sustainable Investments in the Sub-Fund were monitored by the Investment Manager throughout the Reference Period by coding binding elements into trading systems.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

- Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- Oversight of the relevance of criteria used to meet the sustainable investment objective of the Sub-Fund was provided by the Responsible Investment Group ("RIG"), a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Manager's 'Responsible Horizons' strategies.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

- **HOW DID THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE SUSTAINABLE INVESTMENT OBJECTIVE?**
Not applicable.
- **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?**
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

● **HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?**

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons Euro Corporate Bond Fund

Legal entity identifier: 2138009IC4PGITKRBI83

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

●● ☐ Yes	●○ ☒ No
☐ It made sustainable investments with an environmental objective: ____% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ It made sustainable investments with a social objective: ____%	☒ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.00% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the Sub-Fund were met to the following extent during the reference period 1 January 2024 to 31 December 2024 (the "Reference Period").

- The Sub-Fund promoted a minimum environmental and/or social standard that sought to mitigate or avoid practices that the Investment Manager deemed environmentally and/or socially detrimental. Exclusion criteria - as set out in the Sub-Fund's then applicable supplement - were used to achieve this minimum standard. For example, as referenced in the pre-contractual disclosure, issuers that derived a certain percentage of revenue as (determined by the Investment Manager) from tobacco, defence, gambling, coal extraction and controversial weapons production were excluded. Issuers were also excluded where, in the opinion of the Investment Manager, such issuers were deemed to have violated the minimum standards of business practices represented in widely accepted global conventions;
- The Sub-Fund focused on higher scoring issuers in terms of their ESG profile by not investing in any securities with the lowest ESG rating (being a score of 5), as determined by the Investment Manager. By way of illustration, as at the Sub-Fund's year-end date of 31 December 2024, 55% of the portfolio's Net Asset Value in aggregate was invested in issuers with a rating of 1 and 2. The remainder was invested in issuers with an ESG rating of 3 or 4, or in assets which did not have an ESG rating (being any liquid and near-cash assets, including cash, and derivatives (FDI) that were specifically used for hedging purposes). Please see the next question for information on the Sub-Fund's asset-weighted overall ESG rating measured as against the Bloomberg Barclays Euro Aggregate Corporate Total Return Index; and

Carbon Reduction: The Sub-Fund focused on:

- Investing a minimum of 75% of its allocation to corporate debt issuers that are, in the opinion of the Investment Manager, at least committed to achieving the Net Zero Target;

- Increasing the allocation year on year and by the end of by the end of 2030 the Sub-Fund aims to invest at least 85% of its allocation to corporate debts issuers that are at least committed to achieving the Net Zero Target. While the Sub-Fund's allocation to corporate debt issuers may vary over time, the Sub-Fund focused on investing at least 51% of its Net Asset Value in fixed or floating investment grade corporate debt;
- Achieving a carbon intensity level, as defined and calculated by the Investment Manager that is at least 30% lower than the level of the Benchmark as at the end of 2020 (the "Base Year Carbon Intensity");
- The Investment Manager aims to decrease the carbon intensity level of the Sub-Fund year on year and by the end of 2030 the Sub-Fund aims to achieve a carbon intensity level that is 40% lower than the Base Year Carbon Intensity.

Additionally, the Sub-Fund made investments in Use of Proceeds Impact Bonds and Impact Issuers, which were considered by the Investment Manager to qualify as SFDR Sustainable Investments (as determined by the Investment Manager) ("SFDR Sustainable Investments" *) and which in the opinion of the Investment Manager, contributed positively to the attainment of the UN Sustainable Development Goals ("UN SDGs"). The Sub-Fund had 35% of its Net Asset Value in aggregate as at 31 December 2024 invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which are considered to qualify as SFDR Sustainable Investments.

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy,
- Industry innovation and infrastructure,
- Sustainable cities and communities,
- Responsible consumption and production,
- Climate action,
- Life below water,
- Life on land,
- Partnerships to achieve the Goal.

The SFDR Sustainable Investments may, in some cases have contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund promotes environmental and/or social characteristics and does not have sustainable investment as its investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy Regulation, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

The Investment Manager considers that the Sub-Fund's SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty,
- Zero hunger,
- Good health & wellbeing,
- Quality education,
- Gender equality,
- Clean water and sanitation,
- Decent work and economic growth,
- Reduced inequalities.
- Peace and justice strong institutions

A reference benchmark was not designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the environmental or social characteristics promoted by the Sub-Fund were attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 35% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 35% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum at all times during the Reference Period).
- 2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:
 - (a) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 20% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals ("UN SDGs"),
 - (b) in the case of each such Use of Proceeds Impact Bonds in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
- ESG Rating: The Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, has not been weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period. By way of illustration, as at the Sub-Fund's year end set out above, the Sub-Fund's asset-weighted overall ESG rating was 2.2 against the Benchmark score of 2.4 (where 1=best, 5=worst).
- Carbon Reduction: The Sub-Fund's has successfully:
 - Invested a minimum of 85% of its allocation to corporate debt issuers that are, in the opinion of the Investment Manager, at least committed to achieving the Net Zero Target;
 - Increased the allocation year on year and by the end of by the end of 2030 the Sub-Fund aims to invest at least 51% of its allocation to corporate debts issuers that are at least committed to achieving the Net Zero Target. While the Sub-Fund's allocation to corporate debt issuers may vary over time, the Sub-Fund invested at least 94% of its Net Asset Value in fixed or floating investment grade corporate debt;
 - Achieved a carbon intensity level, as defined and calculated by the Investment Manager that is at least 30% lower than the level of the Benchmark as at the end of 2020 (the "Base Year Carbon Intensity");
 - The Investment Manager will aim to decrease the carbon intensity level of the Sub-Fund year on year and by the end of 2030 the Sub-Fund aims to achieve a carbon intensity level that is 40% lower than the Base Year Carbon Intensity.
- Exclusion policy: The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

No derivatives (FDI) were used during the Reference Period to meet the environmental or social characteristics of the Sub-Fund.

● ...AND COMPARED TO PREVIOUS PERIODS?

- UN SDGs

1st January 2022 – 31 December 2022:

The Fund successfully and consistently invested a minimum of 10% of its Net Asset Value in Sustainable Investments, with 31% of the Net Asset Value being invested in Sustainable Investments as at the Fund's year end of 31 December 2022.

1st January 2023 to 31 December 2023:

The Fund successfully and consistently invested a minimum of 10% of its Net Asset Value in Sustainable Investments, with 37% of the Net Asset Value being invested in Sustainable Investments as at the Fund's year end of 31 December 2023.

1st January 2024 to 31 December 2024

The Sub-Fund successfully and consistently invested a minimum of 35% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be “SFDR Sustainable Investments” (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund’s year end of 31 December 2024, 35% of the Sub-Fund’s Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024

- ESG Rating

1st January 2022 – 31 December 2022:

The Fund’s asset-weighted overall ESG rating was not weaker than the asset-weighted overall rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index at any point during the Reference Period.

The Fund’s asset-weighted overall ESG rating was 1.8 against the Benchmark score of 1.9.

1st January 2023 to 31 December 2023:

The Fund’s asset-weighted overall ESG rating was not weaker than the asset-weighted overall rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index at any point during the Reference Period.

The Fund’s asset-weighted overall ESG rating was 2.2 against the Benchmark score of 2.3.

1st January 2024 – 31 December 2024:

the Sub-Fund’s asset-weighted overall ESG rating was 2.2 against the Benchmark score of 2.4

- Carbon Intensity/reduction

1st January 2022 – 31 December 2022:

The Fund’s asset weighted average carbon intensity has successfully and consistently been at least 25% lower than the asset weighted average carbon intensity of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index

1st January 2023 to 31 December 2023:

The Fund’s asset weighted average carbon intensity has successfully and consistently been at least 25% lower than the asset weighted average carbon intensity of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index

1st January 2024 – 31 December 2024:

Invested a minimum of 85% of its allocation to corporate debt issuers that are, in the opinion of the Investment Manager, at least committed to achieving the Net Zero Target

- Exclusion policy

1st January 2022 – 31 December 2022:

The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund’s supplement.

1st January 2023 to 31 December 2023:

The Fund successfully and consistently met its exclusion policy as outlined in the then applicable supplement and the annex to the Fund’s supplement.

1st January 2024 – 31 December 2024:

The Sub-Fund has successfully and consistently met its exclusion policy as outlined in the Sub-Fund’s supplement and the annex to the Sub-Fund’s supplement.

● **WHAT WERE THE OBJECTIVES OF THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE AND HOW DID THE SUSTAINABLE INVESTMENT CONTRIBUTE TO SUCH OBJECTIVES?**

The objective of the SFDR Sustainable Investments the Sub-Fund partially made was to achieve positive environmental and/or social impacts.

The Sub-Fund's SFDR Sustainable Investments contributed to environmental or social objectives by investing in:

Use of Proceeds Impact Bonds: The proceeds were applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action
- Life below water
- Life on land
- Partnerships to achieve the goal

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health & wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

Debt securities issued by Impact Issuers: At least 20% of these investments revenue streams were linked to positive environmental and/or social impacts using the UN SDGs as a guide to environmental targets. These SFDR Sustainable Investments contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):

- Affordable and clean energy
- Industry innovation and infrastructure
- Sustainable cities and communities
- Responsible consumption and production
- Climate action

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Good health & wellbeing
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions

The SFDR Sustainable Investments may, in some cases have contributed to the environmental objectives as set out in Article 9 of the EU Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investments.

● **HOW DID THE SUSTAINABLE INVESTMENTS THAT THE FINANCIAL PRODUCT PARTIALLY MADE NOT CAUSE SIGNIFICANT HARM TO ANY ENVIRONMENTAL OR SOCIAL SUSTAINABLE INVESTMENT OBJECTIVE?**

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investments objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

● **HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?**

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Fund SFDR Sustainable Investments:

The Sub-Fund took into account the following PAIs from:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity
 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner and solely in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to the instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?**

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the “Responsible Business Practices”) collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company’s or issuer’s sphere of influence.

The Sub-Fund’s investments determined by the Investment Manager to be SFDR Sustainable Investments were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted, that the availability and quality of data may have impacted the screening process.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered the above mentioned PAIs to the extent practicable as described in the response to the above question “How were the indicators for adverse impact on sustainability factors taken into account?” Plus the additional following PAIs:

- Table 2 of Annex I of the Commission Delegated Regulation:
- 4. Investments in companies without carbon emission reduction initiatives
- Table 3 of Annex I of the Commission Delegated Regulation:
- 16. Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery.

PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable to the instrument held. The PAI thresholds were only applied to the Sub-Fund’s corporate and sovereign holdings which were considered by the Investment Manager to be SFDR Sustainable Investments.

The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against these thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager’s designated third-part data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager’s analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It’s expected that PAIs can be applied to a greater portion of the Investment Manager’s investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
ILF-EUR LIQUIDITY-2	EQUITY	3.31%	IRE

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund promoted environmental or social characteristics during the Reference Period using an exclusionary approach and allocations to certain SFDR Sustainable Investments, higher scoring issuers and lower carbon intensity issuers.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

The figure in #1 represents a combination of both approaches. The allocation to SFDR Sustainable Investments is referenced in #1A. The figure in #1B below represents the proportion of the portfolio that is not considered by the Investment Manager to be SFDR Sustainable Investments but has excluded certain types of investments as detailed in the binding elements of the investment strategy outlined in the supplement and therefore such proportion of the portfolio was aligned with the environmental or social characteristics promoted by the Sub-Fund through the absence of those investments.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

* The Investment Manager was dependent upon information and data from third party data providers in order to be able to consider alignment with some of the E/S characteristics. In particular, the lack or incomplete reporting of metrics by some investments meant that there was only limited data on such investments. As such, for some of the Sub-Fund's investments, data coverage (such as for carbon footprint) was very low and in the absence of relevant data, such investments were assumed by the Investment Manager to be aligned with E/S characteristics.

** #2 Other contains investments that do not align with E/S characteristics promoted by the fund i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?".

*** As at 31 December 2024, 5% of the NAV made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

● IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to Banks and the Electric sectors, as well as the Commercial Services sectors, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy. However, out of Sub-Fund's allocation to SFDR Sustainable Investments, 45% of the Sustainable Investments with an environmental objective aligned with the EU Taxonomy as at the 31 December 2024.

The taxonomy aligned investments contributed to the at least one or both of the following objectives as set out in Article 9 of Regulation (Eu) 2020/852:

1. Climate change mitigation.
2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. The availability, accuracy and quality of data impacted the extent to which such alignment could be considered. In particular, the insufficient reporting of information including in relation to some investee companies to which the Sub-Fund had exposure meant that there was limited data to evidence EU Taxonomy alignment or that there was no sufficient data to complete certain sections of this Annex. The Investment Manager's analysis of EU Taxonomy alignment relied on third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of alignment was necessarily limited.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on

emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?**

- ☐ Yes:
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?**

Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?**

Period	Taxonomy
1st January 2023 – 31st December 2023	Turnover/Revenue – 1% CapEx – 10% OpEx – 0%
1st January 2023 – 31st December 2023	Turnover/Revenue – 2% CapEx – 13% OpEx – 0%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

55% of the of sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. The availability, accuracy and quality of data impacted the extent to which such alignment could be considered. In particular, the insufficient reporting of information including in relation to some investee companies to which the Sub-Fund had exposure meant that there was limited data to evidence EU Taxonomy alignment or that there was no sufficient data to complete certain sections of this Annex. The Investment Manager's analysis of EU Taxonomy alignment relied on third-party information and data, and where such information was not available or was incomplete, the Investment Manager's analysis of alignment was necessarily limited.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 0%* of its Net Asset Value in SFDR Sustainable Investments with a social objective, as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" were:

- Liquid and near-cash assets including cash held or used for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were specifically used for liquidity purposes.
- Derivatives (FDI) that were specifically used for hedging purposes.

No minimum environment or social safeguards were considered for these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The actions taken to meet the environmental and/or social characteristics during the Reference Period are:

- The Investment Manager:
 - a) Invested in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be "SFDR Sustainable Investments" (as determined by the Investment Manager).
 - b) Ensured the Sub-Fund's asset-weighted overall ESG rating, as determined by the Investment Manager, was not weaker than the asset-weighted overall ESG rating of the Bloomberg Barclays Euro Aggregate Corporate Total Return Index (the "Benchmark") at any point during the Reference Period.
 - c) Ensured the Sub-Fund's asset weighted average carbon intensity was at least 25% lower than the asset weighted average carbon intensity of the Benchmark during the Reference Period
 - d) Employed an exclusion policy as outlined in the Sub-Fund's supplement and the annex to the Sub-Fund's supplement.

These binding elements of the Sub-Fund were coded into the trading systems and used to monitor the environmental and social characteristics promoted during the reference period.

- The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.

Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.

Oversight of the relevance of criteria used to meet characteristics promoted was provided by the Responsible Investment Group, a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Managers 'Responsible Horizons' strategies. Oversight of internal exclusions lists used to ensure certain binding criteria were met, was provided by the Ratings and Exclusions Group ("REG"), a governance group within the Investment Manager.

- During the Reference Period, no engagement with the issuers in which the Sub-Fund has invested was required or undertaken as a consequence of there being no breaches of any of the binding elements outlined in Sub-Fund's supplement.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● HOW DOES THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE ENVIRONMENTAL OR SOCIAL CHARACTERISTICS PROMOTED?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.

Periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Responsible Horizons Euro Impact Bond Fund

Legal entity identifier: 2138006IFGV5VYOFVZ45

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.	Did this financial product have a sustainable investment objective?	
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.	☒ ☒ ☒ Yes	☐ ☐ ☐ No
	☒ It made sustainable investments with an environmental objective: 99.00% ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☒ It made sustainable investments with a social objective: 8.00%	☐ It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ____% of sustainable investments ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy ☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy ☐ with a social objective ☐ It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The sustainable investment objective of this Sub-Fund is to aim to achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI.

The sustainable investment objective of the Sub-Fund was met to the following extent during the reference period from 1 January 2024 to 31 December 2024 (the "Reference Period"), by investing in Use of Proceeds Impact Bonds and Impact Issuers which were considered by the Investment Manager to qualify as sustainable investments pursuant to SFDR ("SFDR Sustainable Investments"):

- In the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects with positive environmental and/or social impacts that demonstrated a clear alignment, by contributing to varying extents, to the following UN Sustainable Development Goals ("UN SDGs") (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
 - Affordable and clean energy
 - Industry, innovation and infrastructure
 - Sustainable cities and communities
 - Responsible consumption and production
 - Climate action
 - Life below water
 - Life on land

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- No poverty
- Zero hunger
- Good health and wellbeing
- Quality education
- Gender equality
- Clean water and sanitation
- Decent work and economic growth
- Reduced inequalities
- Peace and justice strong institutions
- Improving Issuers demonstrated that their core investment plans (affecting at least 50% of their revenue streams, capital expenditure and/or operating expenditure including non capitalised costs that represent research and development) were compliant with the EU Taxonomy Regulation, and
- Each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were linked to positive environmental and/or social activities which contributed to the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to environmental objectives):
- Responsible consumption and production
- Sustainable cities and communities
- Industry, Innovation & Infrastructure

These SFDR Sustainable Investments also contributed to varying extents to one or more of the following UN SDGs (which, for the purposes of this section, are also considered by the Investment Manager to equate to social objectives):

- Affordable and Clean Energy
- Decent work and economic growth
- Good Health & Wellbeing

The Sub-Fund did not invest in Improving Issuers (as described in the SFDR Annex III) during the Reference Period.

The SFDR Sustainable Investments may, in some cases have, contributed to some of the environmental objectives as set out in Article 9 of the Taxonomy Regulation. However, this was not explicitly considered by the Investment Manager in their assessment of the investment.

Please note that the Sub-Fund has a sustainable investment objective. There is no commitment or minimum allocation to sustainable investments with environmental objectives aligned with the EU Taxonomy, however this Annex contains certain information in relation to EU Taxonomy alignment of relevant sustainable investments with environmental objectives held by the Sub-Fund as at 31 December 2024.

As such, information in relation to EU Taxonomy alignment is provided as at the above date and does not reflect the position as at other points during the Reference Period (which may be materially different).

● HOW DID THE SUSTAINABILITY INDICATORS PERFORM?

The following sustainability indicators were used to measure how the sustainable investment objective of the Sub-Fund was attained:

- 1) The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

2) The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager:

(a) Such Impact Issuers demonstrated that at least 50% of their revenue streams were aligned to help realising one or more of the 17 UN SDGs or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation.

(b) such Improving Issuers demonstrated that their core investment plans (affecting at least 50% of their revenue streams, capital expenditure and/or operating expenditure including non capitalised costs that represent research and development) are compliant with the EU Taxonomy Regulation, and

(c) In the case of Use of Proceeds Impact Bonds, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/or are defined as “environmentally sustainable economic activities” by the EU Taxonomy Regulation.

No derivatives (FDI) were used during the Reference Period to attain the sustainable investment objective of the Sub-Fund.

● ...AND COMPARED TO PREVIOUS PERIODS?

Period	Sustainable Investments	Impact Issuers/Bonds
10 January 2022 to 31 December 2022	The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2022, 93% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2022 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).	The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) Each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least 50% of their revenue streams were aligned to help realise one or more of the 17 UN Sustainable Development Goals (“UN SDGs”); (b) In the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs.
1 January 2023 to 31 December 2023	The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2023, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2023 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).	The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) Such Impact Issuers demonstrated that at least 50% of their revenue streams were aligned to help realising one or more of the 17 UN SDGs or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation (b) In the case of Use of Proceeds Impact Bonds, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/or are defined as “environmentally sustainable economic activities” by the EU Taxonomy Regulation.

Period	Sustainable Investments	Impact Issuers/Bonds
1 January 2024 to 31 December 2024	The Sub-Fund successfully and consistently invested a minimum of 90% of its Net Asset Value during the Reference Period in Use of Proceeds Impact Bonds and Impact Issuers, each of which were considered to be SFDR Sustainable Investments (as determined by the Investment Manager). By way of illustration, as at the Sub-Fund's year end of 31 December 2024, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in such Use of Proceeds Impact Bonds and Impact Issuers. This percentage figure is provided as at 31 December 2024 only and the percentage so invested has varied during the Reference Period (while remaining above the minimum set out in SFDR Annex III at all times during the Reference Period).	The Impact Issuers and Use of Proceeds Impact Bonds invested in by the Sub-Fund successfully and consistently met the following thresholds as assessed by the Investment Manager: (a) Such Impact Issuers demonstrated that at least 50% of their revenue streams were aligned to help realising one or more of the 17 UN SDGs or at least 50% of their economic activities were compliant with the EU Taxonomy Regulation. (b) such Improving Issuers demonstrated that their core investment plans (affecting at least 50% of their revenue streams, capital expenditure and/or operating expenditure including non capitalised costs that represent research and development) are compliant with the EU Taxonomy Regulation, and (c) In the case of Use of Proceeds Impact Bonds, the proceeds raised were aimed to be exclusively applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to helping realise one or more of the 17 UN SDGs and/or are defined as "environmentally sustainable economic activities" by the EU Taxonomy Regulation.

● HOW DID THE SUSTAINABLE INVESTMENTS NOT CAUSE SIGNIFICANT HARM TO ANY SUSTAINABLE INVESTMENT OBJECTIVE?

During the Reference Period, the Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments did not cause significant harm to any environmental or social sustainable investment objective as they were not in breach of the PAIs thresholds set by the Investment Manager.

● HOW WERE THE INDICATORS FOR ADVERSE IMPACTS ON SUSTAINABILITY FACTORS TAKEN INTO ACCOUNT?

During the Reference Period, the indicators for adverse impacts in Table 1 of Annex 1 and any relevant indicators in Tables 2 and 3 of that Annex were taken into account as follows in respect of the Sub-Fund's SFDR Sustainable Investments:

- Table 1 of Annex I of the Commission Delegated Regulation:
 1. GHG Emissions: Scope 1, 2 and 3
 2. Carbon Footprint: Scope 1, 2 and 3
 3. GHG Intensity of Investee Companies: Scope 1, 2 and 3
 4. Exposure to companies active in the fossil fuel sector
 5. Share of non-renewable energy consumption and production
 6. Energy consumption intensity per high impact climate sector: NACE A, B, C, D, E, F, G, H and L
 7. Activities negatively affecting biodiversity-sensitive areas
 8. Emissions to water
 9. Hazardous waste and radioactive waste ratio
 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
 11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
 12. Unadjusted gender pay gap
 13. Board gender diversity

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, and biological weapons).

During the Reference Period, the Sub-Fund took into account the above PAIs, in the following manner in respect of its SFDR Sustainable Investments:

- PAI thresholds were set by the Investment Manager at an issuer and/or Sub-Fund level where applicable in relation to instrument held by the Sub-Fund. The PAI thresholds were only applied to the Sub-Fund's corporate and sovereign holdings.
- The Investment Manager measured the performance of the issuer and/or the Sub-Fund, as applicable, against the PAI thresholds which may then have triggered an additional qualitative review where appropriate to determine crossing of PAI thresholds at the time of investment and on an ongoing basis during the above period using data obtained from the Investment Manager's designated third-party data provider.

There were no breaches of such PAI thresholds set by the Investment Manager.

The Investment Manager was dependent upon information and data from third party data providers to be able to consider principal adverse impacts on sustainability factors. Data coverage was previously low and incomplete for some of the mandatory PAIs which impacted the Investment Manager's analysis of adverse indicators. Data quality and completeness has improved over time with the Investment Manager utilising a data provider which has greater coverage. It's expected that PAIs can be applied to a greater portion of the Investment Manager's investable universe, allowing enhanced insight into the adverse impacts caused by issuers.

● WERE SUSTAINABLE INVESTMENTS ALIGNED WITH THE OECD GUIDELINES FOR MULTINATIONAL ENTERPRISES AND THE UN GUIDING PRINCIPLES ON BUSINESS AND HUMAN RIGHTS?

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights (the "Responsible Business Practices") collectively cover a broad range of areas of responsible business, including labour rights, consumer protection and support for internationally recognised human rights within a company's or issuer's sphere of influence.

The Sub-Fund's investments determined by the Investment Manager to be SFDR Sustainable Investments pursuant to SFDR were considered aligned with the Responsible Business Practices as each issuer passed a broad controversy screen provided by a third party which either directly covered one or more of the Responsible Business Practices or was considered by the Investment Manager an appropriate proxy for one or more of the Responsible Business Practices. The Investment Manager was dependant on the information and data available to such third party in order to complete the broad controversy screen. It should be noted that the availability and quality of data may have impacted the screening process.

How did this financial product consider principal adverse impacts on sustainability factors?

The Sub-Fund considered PAIs as part of its DNSH analysis on SFDR Sustainable Investments as described in response to the above question "How were the indicators for adverse impacts on sustainability factors taken into account?".

The Sub-Fund also considered the following PAIs:

- Table 2 of Annex I of the Commission Delegated Regulation:
- 4. Investments in companies without carbon emission reduction initiatives.
- Table 3 of Annex I of the Commission Delegated Regulation:
- 16. Lack of anti-corruption and anti-bribery policies.

The PAIs are measured against defined thresholds which may have triggered an additional qualitative review by the Investment Manager to determine if they have been breached. Following this process, if a PAI is considered to have been breached the Investment Manager may of taken any of the following actions including (but not limited to):

The exclusion of the issuer from within the Sub-Fund;

A reduction in % allocation to the issuer within the Sub-Fund

Mitigation of the impact on a security and/or Sub-Fund; and/or

Engagement with the relevant issuer in an attempt to mitigate the impact at source. If data the Investment Manager received indicates a PAI threshold has been crossed and the Investment Manager decided to engage, the relevant issuer has one year from the time the Investment Manager raised the issue with them to take reasonable steps to resolve it after which time the Investment Manager will make reasonable endeavours to remove the allocation to the relevant security;

No action, with justification. In such cases this particular issuer or holding will not be categorised as within the SFDR Sustainable Investment allocation.

Reporting on consideration of PAIs is available in an annex to the annual report of the Sub-Fund.

Where the Sub-Fund invested in a broad market index, PAIs were not considered as the Investment Manager did not look-through to the underlying constituents of these indices.

Please see 'PAI Data Availability' for further information on the PAI data sources and limitations.

There were no breaches of the PAI thresholds set by the Investment Manager.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 1 January 2024 to 31 December 2024

Largest investments	Sector	% of assets	Country
ILF-EUR LIQUIDITY-2	EQUITY	4.38%	IRE
RCI Banqu 4.875% 06/14/28	AUTO MANUFACTURERS	1.81%	FRC

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

WHAT WAS THE ASSET ALLOCATION?

The Sub-Fund had a sustainable investment objective and committed to investing a minimum of 90% of Net Asset Value in aggregate in SFDR Sustainable Investments with an environmental and/or social objective.

Please note that the percentage figures provided in the diagram below reflect percentages out of the Net Asset Value of the Fund as at the end of Reference Period.

By way of illustration, as at 31 December 2024, 99% of the Sub-Fund's Net Asset Value in aggregate was invested in SFDR Sustainable Investments with an environmental and/or social objective, thus exceeding the minimum outlined in the Sub-Fund's supplement. The allocation to SFDR Sustainable Investments is referenced in #1.

It should be noted that the percentages in this section as outlined in the diagram below are provided as at 31 December 2024 and do not necessarily reflect the position as at other points during the Reference Period (which may be materially higher or lower).

* As at 31 December 2024, 51% of the SFDR Sustainable Investments made by the Sub-Fund contributed to both an environmental and social objective. However, it is the Investment Manager's understanding that for each SFDR Sustainable Investment, SFDR requires consideration of one single environmental or social objective. Therefore, where any SFDR Sustainable Investment held by the Sub-Fund contributed to both an environmental and social objective, such SFDR Sustainable Investment has been included under "Environmental" in the diagram above.

** #2 Not sustainable contains investments that are not categorised as SFDR Sustainable Investments i.e., cash, derivatives (FDI) for hedging and collective investment schemes (CIS) for liquidity purposes. For further detail please see the question below "What investments were included under "Not Sustainable", what was their purpose and were there any minimum environmental or social safeguards?".

IN WHICH ECONOMIC SECTORS WERE THE INVESTMENTS MADE?

As at 31 December 2024, the Sub-Fund had mostly been exposed to the Banks and Electric sectors, as well as the REITS, Real Estate and the Water sectors, as illustrated below.

The above figures are provided as at 31 December 2024 only and do not necessarily reflect the position as at other points during the Reference Period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund did not commit to making investments aligned with the EU Taxonomy, however, out of Sub-Fund's allocation to SFDR Sustainable Investments, 27% of the Sustainable investments with an environmental objective aligned with the EU Taxonomy as at the 31 December 2024.

The EU Taxonomy aligned investments contributed to the at least one of the following objectives as set out in Article 9 of Regulation (EU) 2020/852:

1. Climate change mitigation.
2. Climate change adaptation.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

● DID THE FINANCIAL PRODUCT INVEST IN FOSSIL GAS AND/OR NUCLEAR ENERGY RELATED ACTIVITIES COMPLYING WITH THE EU TAXONOMY ¹?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● WHAT WAS THE SHARE OF INVESTMENTS MADE IN TRANSITIONAL AND ENABLING ACTIVITIES?

Transitional activities: 0.00%

Enabling activities: 0.00%

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● HOW DID THE PERCENTAGE OF INVESTMENTS THAT WERE ALIGNED WITH THE EU TAXONOMY COMPARE WITH PREVIOUS REFERENCE PERIODS?

Date	Taxonomy
10 January 2022 to 31 December 2022	Turnover/revenue – N/A CapEx – N/A OpEx – N/A
1 January 2023 to 31 December 2023	Turnover/revenue – 0% CapEx – 25% OpEx – N/A
1 January 2024 to 31 December 2024	Turnover/revenue – 1% CapEx – 21% OpEx – N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

73% of SFDR Sustainable Investments with an environmental objective were not aligned with the EU Taxonomy as at 31 December 2024.

The Investment Manager was dependent upon information and data from third party data providers in order to be able to assess EU Taxonomy alignment of relevant investments. Although the source of information and data disclosed is considered to be reliable, the Investment Manager cannot guarantee the completeness, accuracy and quality of such information and data. In addition, where such information from third party data providers was not available or was considered as incomplete, the Investment Manager's analysis of alignment

are sustainable investments with an environmental objective that **do not take into account the criteria for**

environmentally sustainable economic activities under the EU Taxonomy.

was necessarily limited. The Sub-Fund invested in SFDR Sustainable Investments with an environmental objective in economic activities that are not EU Taxonomy aligned because evidence of EU Taxonomy alignment is dependent on the availability of accurate, detailed and complete data on the investee companies to which the Sub-Fund has exposure. While data availability is improving and is expected to improve over time, at this time and for the Reference Period, the data available remains limited and varies between investee companies.

All figures and disclosures in relation to EU Taxonomy alignment in this Annex reflect the Sub-Fund's positions as at the end of the Reference Period using the most recent data available from relevant third party data providers as at 2nd January 2025.

What was the share of socially sustainable investments?

While the Sub-Fund does not commit to investing a minimum percentage of its Net Asset Value in socially sustainable investments, the Sub-Fund invested 8%* of its Net Asset Value in SFDR Sustainable Investments with a social objective as at 31 December 2024.

*This percentage figure is provided as at 31 December 2024 only and does not necessarily reflect the position as at other points during the Reference Period.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Not Sustainable" were:

- Liquid and near-cash assets including cash held for ancillary liquidity purposes.
- Collective Investment Schemes (CIS) that were used for liquidity purposes.
- Derivatives (FDI) used for hedging purposes.
- SFDR Sustainable Investments in breach of DNSH which are in the process of being sold.

No minimum environment or social safeguards were considered for these investments.

Their proportion and use do not affect the delivery of the sustainable investment objective on a continuous basis because under normal circumstances they were a maximum of 10% of Net Asset Value.

What actions have been taken to attain the sustainable investment objective during the reference period?

The actions taken to attain the sustainable investment objective during the Reference Period were as follows:

To achieve positive environmental and/or social impacts while generating a total return comprised of income and capital growth by investing in a broad range of Euro-denominated debt and debt related securities and related FDI, the Sub-Fund invested in Impact Issuers and Use of Proceeds Impact Bonds where:

- a) in the case of each such Use of Proceeds Impact Bond in which the Sub-Fund was invested, the proceeds raised were applied to finance or re-finance in part or in full projects that demonstrated a clear alignment to help realise one or more of the 17 UN SDGs.
- b) each such Impact Issuer in which the Sub-Fund was invested demonstrated that at least (...) % of their revenue streams were aligned to help realise one or more of the 17 UN SDGs.

Each applicable security was assessed according to the Investment Manager's assessment framework, which ascertained the level of contribution to the UN SDGs. Two frameworks were deployed for this assessment:

- a) Use of Proceeds Impact Bonds: The Investment Manager employed an assessment framework that generally considered the following three components: issuer profile; framework of bond issuance and reporting and transparency.
- b) Impact Issuers: The Investment Manager assessed issuers using external and/or internal data to determine the revenue alignment of such issuer's products and services with the UN SDGs. Where no external data was available, an assessment was conducted by the Investment Manager's ESG analysts and ratings approved by the Investment Manager's 'Impact Committee'.

The SFDR Sustainable Investments in the Sub-Fund were monitored by the Investment Manager throughout the Reference Period by coding binding elements into trading systems.

The following internal control mechanisms were used by the Investment Manager for such monitoring during the Reference Period:

- Pre-trade warnings appeared in the trade system prior to trading to inform portfolio managers of a prohibition or limit.
- Post-trade warnings were also reviewed by the monitoring team and escalated as appropriate.
- Oversight of the relevance of criteria used to meet the sustainable investment objective of the Sub-Fund was provided by the Responsible Investment Group ("RIG"), a governance group within the Investment Manager which has overall oversight of ensuring effective implementation of ESG due diligence at asset class level and for defining adherence criteria for the Investment Manager's 'Responsible Horizons' strategies.

How did this financial product perform compared to the reference benchmark?

A reference benchmark has not been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Sub-Fund.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective

● HOW DID THE REFERENCE BENCHMARK DIFFER FROM A BROAD MARKET INDEX?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM WITH REGARD TO THE SUSTAINABILITY INDICATORS TO DETERMINE THE ALIGNMENT OF THE REFERENCE BENCHMARK WITH THE SUSTAINABLE INVESTMENT OBJECTIVE?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE REFERENCE BENCHMARK?

Not applicable.

● HOW DID THIS FINANCIAL PRODUCT PERFORM COMPARED WITH THE BROAD MARKET INDEX?

Not applicable.
