The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

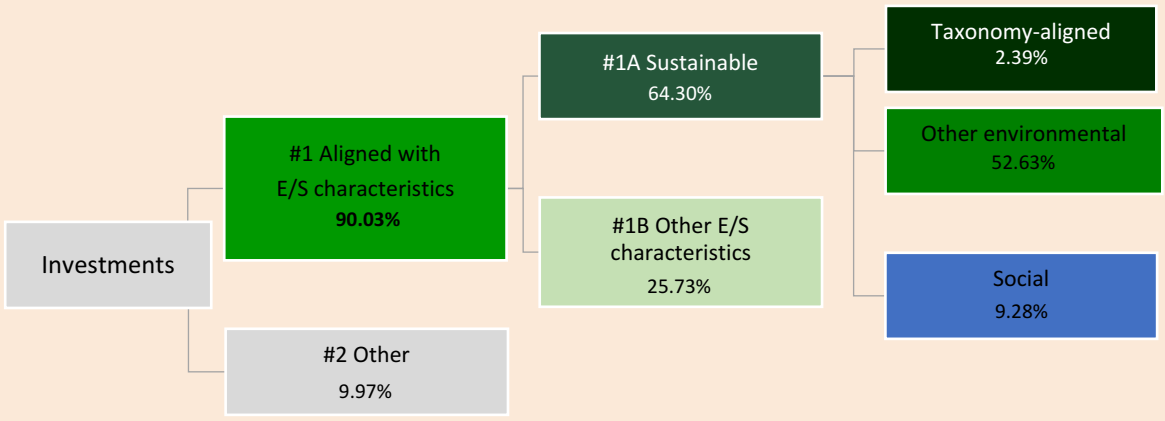
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	4.28%
NOVARTIS AG-REG	Health Care	Pharmaceuticals Biotech & Life Sciences	Switzerland	2.28%
TOTALENERGIES SE PARIS	Energy	Oil, Gas & Consumable Fuels	France	1.69%
HSBC HOLDING PLC GBP	Financials	Banks	United Kingdom	1.60%

NESTLE SA-REG	Consumer Staples	Food, Beverage & Tobacco	Switzerland	1.23%
SAFRAN SA	Industrials	Capital goods	France	1.12%
SAP SE / XETRA	Information Technology	Software & Services	Germany	1.10%
BANCO SANTANDER SA MADRID	Financials	Banks	Spain	1.06%

What was the proportion of sustainability-related investments?

The fund invested 64.30% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.39% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

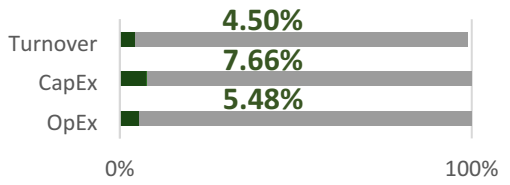
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

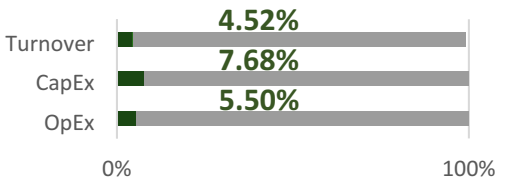
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	94.52%	92.34%	95.50%
Taxonomy-aligned: Fossil Gas	0.03%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	5.46%	7.65%	4.49%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	94.50%	92.32%	95.48%
Taxonomy-aligned: Fossil Gas	0.03%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	5.47%	7.68%	4.51%

This graph represents 99.7% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.41% and the share of investment in enabling activities was 2.69%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.68%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **52.63%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 9.28%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 83.97% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL EQUITY CONSERVATIVE

Legal entity identifier: 529900QOYD9Y5ZBAUZ70

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.22% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **MSCI World Index**. In determining the ESG score of the Product and the benchmark, ESG performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the

How did the sustainability indicators perform?

environmental or social characteristics promoted by the financial product are attained.

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.085 (D).**
- The weighted average ESG rating of the benchmark is **-0.197** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.082 (D) and the weighted average ESG rating of the benchmark was -0.185 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

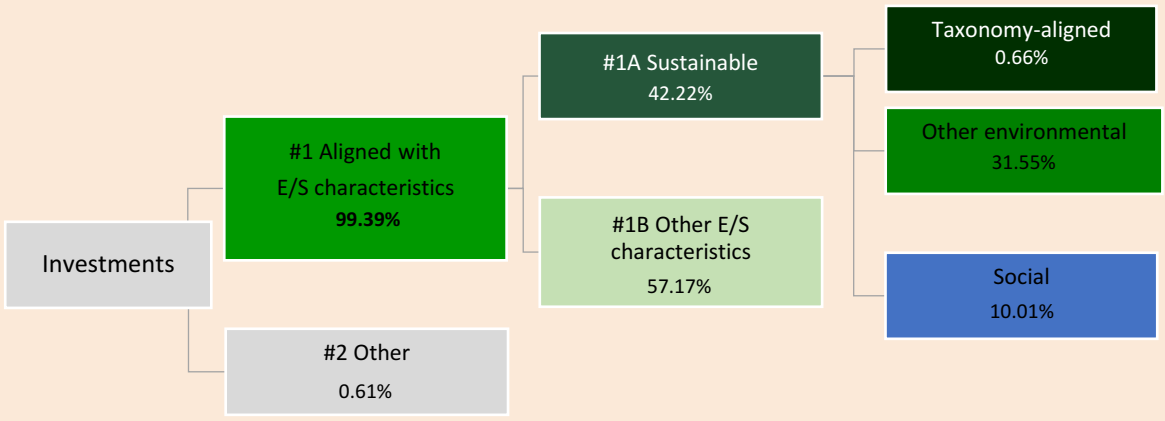
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
JOHNSON & JOHNSON	Health Care	Pharmaceuticals Biotech & Life Sciences	United States	2.02%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.66% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

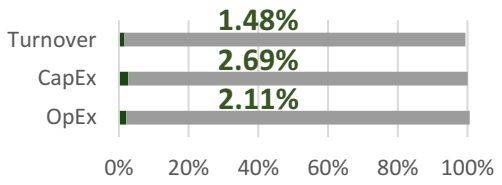
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

[ ] No

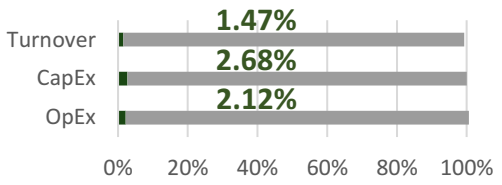
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full



among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.89%	97.31%	98.52%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.01%	0.04%	0.01%
Taxonomy-aligned [No gas and nuclear]	2.10%	2.64%	1.47%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.88%	97.32%	98.53%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.01%	0.04%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.11%	2.64%	1.47%

This graph represents 99.3% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.99%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.25%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **31.55%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 10.01%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 87.59% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL EQUITY DYNAMIC MULTI FACTORS

Legal entity identifier: 549300YXILW3O14Y0587

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 36.41% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **MSCI World (dividend reinvested) Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **-0.092 (D).**
- The weighted average ESG rating of the benchmark is **-0.197** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.076 (D) and the weighted average ESG rating of the benchmark was -0.185 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

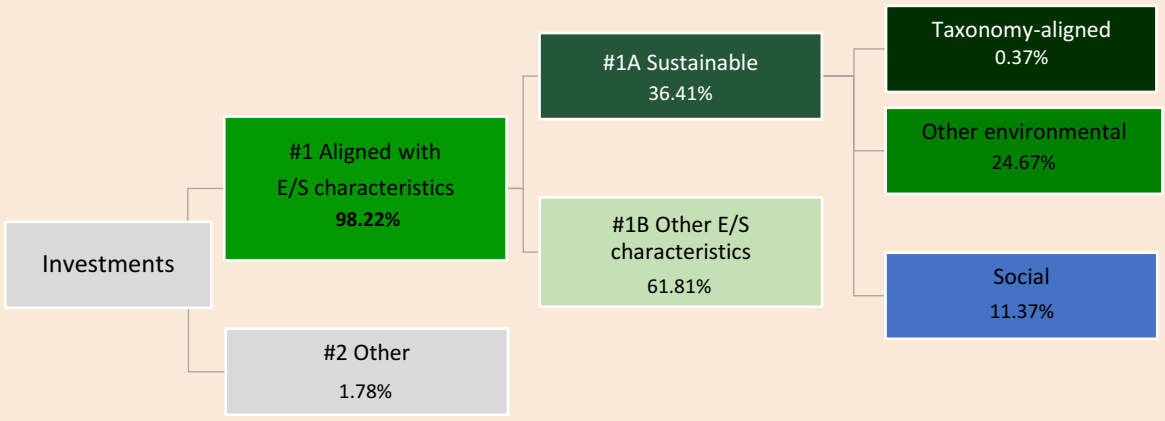
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
NVIDIA CORP	Information Technology	Semiconductors & Semiconductor Equipment	United States	5.91%
APPLE INC	Information Technology	Technology Hardware & Equipment	United States	3.86%
MICRON TECHNOLOGY INC	Information Technology	Semiconductors & Semiconductor Equipment	United States	3.04%
ALPHABET INC CL A	Communication Services	Media & Entertainment	United States	2.97%
ALPHABET INC CL C	Communication Services	Media & Entertainment	United States	2.58%
MICROSOFT CORP	Information Technology	Software & Services	United States	2.38%

CATERPILLAR INC	Industrials	Capital goods	United States	1.14%
VISA INC-CLASS A SHARES	Financials	Financial Services	United States	1.04%

What was the proportion of sustainability-related investments?

The fund invested 36.41% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

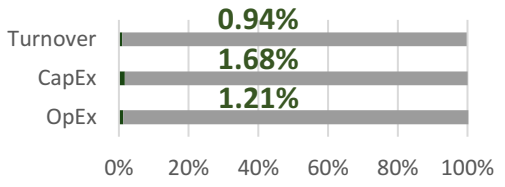
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.37% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

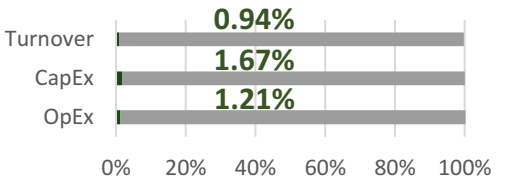
☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.79%	98.32%	99.06%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	1.20%	1.68%	0.94%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.79%	98.33%	99.06%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	1.20%	1.67%	0.94%

This graph represents 99.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.12% and the share of investment in

enabling activities was 0.54%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.42%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **24.67%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 11.37%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 93.97% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EUROPEAN CONVERTIBLE BOND

Legal entity identifier: 529900644PSS3LALW918

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **69.03%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its Benchmark **Refinitiv Convertible Europe Focus Hedged EUR Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The Benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.899 (C).**
- The weighted average ESG rating of the Benchmark is **0.857** (**C).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.774 (C) and the weighted average ESG rating of the Benchmark was 0.768 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

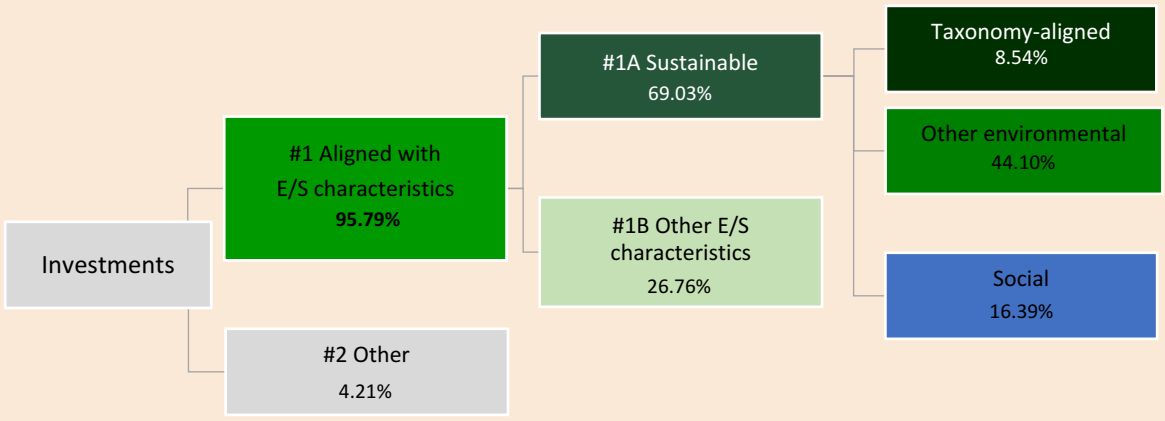
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
TUIGR 1.95% 07/31 EUR CV	Consumer Discretionary	Consumer Services	Germany	5.68%
QIAGEN NV 2% 09/32 USD CV	Health Care	Pharmaceuticals Biotech & Life Sciences	Netherlands	5.45%

What was the proportion of sustainability-related investments?

The fund invested 69.03% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Industrials	*Capital goods*	*33.18%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

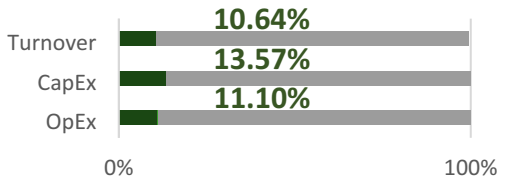
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 8.54% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

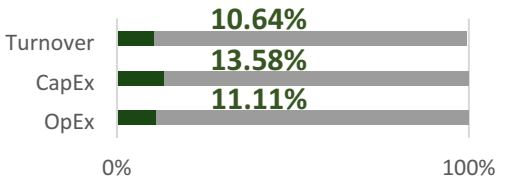
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	88.90%	86.43%	89.36%
Taxonomy-aligned: Fossil Gas	0.02%	0.02%	0.04%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.03%
Taxonomy-aligned [No gas and nuclear]	11.08%	13.54%	10.57%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	88.89%	86.42%	89.36%
Taxonomy-aligned: Fossil Gas	0.02%	0.02%	0.04%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.03%
Taxonomy-aligned [No gas and nuclear]	11.09%	13.55%	10.58%

This graph represents 99.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.88% and the share of investment in enabling activities was 5.58%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 5.55%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **44.10%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 16.39%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 85.47% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:
Amundi Funds Montpensier Global Convertible Bond

Legal Entity Identifier:
529900LZ9GLOP969J692

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** ___%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 37.6% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** ___%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted environmental and/or social characteristics within the meaning of article 8 as per the Sustainable Finance Disclosure Regulation (SFDR) in order to manage the environmental and social implications of its portfolio. Environmental and social characteristics were taken into account by the fund in order to unify financial performance and the wish to positively influence, when possible, the issuer in terms of ESG performance, by encouraging companies to improve the integration of ESG criteria in their activities and valuing best practices.

As part of its investment process, the Fund has incorporated ESG criteria to define its investable universe. This strategy has been implemented through:

- Negative screening, excluding the following :
    - Underlying companies involved in controversial activities, as defined in Montpensier Arbevel exclusion policy ;
    - Underlying companies subject to a Red controversy as per MSCI ESG Research. Underlying companies subject to Red controversies include companies in violation of the United Nation Global Compact (UNGC) principles (Human Rights, labor laws, corruption...).
- Positive screening based on best-in-class ESG rating, where at least 90% of underlying companies are rated B or higher, on a scale ranging from CCC to AAA. The data used is mainly provided by MSCI ESG Research. It may be supplemented, modified, or updated with other sources.

The Fund invested 37.6% of its net assets in sustainable investments.

No specific benchmark had been designated to determine whether the Fund has met the environmental and social characteristics it promotes.

How did the sustainability indicators perform?

The following indicators demonstrate that the Fund promoted environmental and social characteristics. Results are shown based on the invested portfolio, excluding cash and cash equivalents:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

	30/06/26	30/06/25	28/06/24	30/06/23
Share of investments compliant with the exclusion policy	100%	100%	ND	ND
Share of investments with a B rating or higher (on a scale of CCC to AAA)	100%	100%	ND	ND
Share of investments in line with Montpensier Arbevel's sustainable investment methodology	34.73%	36.84%	ND	ND

Source: Montpensier Arbevel using MSCI data

These have been sustainability indicators since 2025 onwards. No available historical comparison.

…and compared to previous periods?

As above.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have a sustainable investment objective, the Fund invested 34.7% of its net assets in sustainable investments as per Montpensier Arbevel's model, demonstrating a positive contribution to an environmental or social objective through a dual approach:

- An assessment of companies' contribution to the United Nations Sustainable Development Goals (SDGs), using our proprietary MIA (Montpensier Arbevel Impact Assessment) methodology:
    - The model is centred around all 17 SDGs, grouped based on their corresponding theme (environmental or social). Contribution to a sustainable objective based on the SDGs is assessed through a qualitative analysis of companies, in order to identify and analyze companies' contribution to the environment and society;
    - Based on the results of this qualitative analysis, positive or negative contribution is assessed to determine company eligibility. Companies with positive contribution to an SDG positively contribute to a sustainable investment objective, whether social or environmental based on our proprietary classification system.
- An assessment of companies' good governance practices, using our proprietary MGF (Montpensier Arbevel Governance Flag) methodology. The model emphasizes good governance practices, aiming for shareholder interests' alignment. This assessment is based on a list of sub-criteria:
    - Board (rate of independence, female members, etc.),
    - Remuneration (criteria, transparency, …),
    - Shareholding structure (majority shareholding, unequal voting rights …),
    - Accounting practices (auditor's opinion on company accounts, etc.).

Companies identified as Type I (green share exceeding 50% of revenue) or II (green share between 10% and 50% of revenue), according to the Greenfin label definition, contribute positively and fully to a sustainable investment objective. Similarly, a company positively contributing to an SDG fully contributes to a sustainable investment objective as per Montpensier Arbevel proprietary methodology. The green share of companies is assessed by the share of revenue derived from activities that positively contribute to climate transition (ie, 8 "green" economic activities, as defined by the Greenfin label). No investment was identified as sustainable as per this classification during the reporting period.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Montpensier Arbevel applied its proprietary model in order to ensure that sustainable investments made by the Fund do not cause significant harm to any other objective, so that these sustainable investments do not include:

- investments causing significant harm to one of the principal adverse impact indicators (PAIs), which Montpensier Arbevel must consider as per the SFDR regulation;
- investments in violation of the minimum social safeguards laid out in the SFDR regulation.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Securities with a negative impact as per Montpensier Arbevel proprietary MIA (Montpensier Arbevel Impact Assessment) methodology are no longer considered as not respecting the DNSH criterion. This evolution will be reflected in future updates to the precontractual disclosures.

How were the indicators for adverse impacts on sustainability factors taken into account?

Montpensier Arbevel assessed all of the Fund's sustainable investments against all PAI indicators that must be considered under SFDR. For each PAI, Montpensier Arbevel uses a combination of quantitative and qualitative tests, drawing on available third-party data provided by the portfolio company or MSCI ESG Research. Different types of thresholds are applied to PAIs to assess whether an investment is likely to cause significant harm:

- Absolute thresholds: company performance exceeds a pre-set threshold, based on quantitative criteria or qualitative assessment (score, flag,...);
- Relative thresholds: company performance exceeds a quantitative threshold established in comparison with a subset of companies in the same sector, of the same size - and identified as having the most negative impact on the assessed PAI;
- Controversy-based thresholds: company performance, with regards to controversies, is assessed qualitatively and is at the highest level of harmful impact.
- For some environmental PAI indicators, an exemption may be granted to companies deriving a substantial portion of their revenue from activities directly aimed at mitigating such environmental damage (according to the European Taxonomy regulation).

PAI relevance and coverage in the analysis may vary depending on the sector, industry and region in which a company operates.

Thresholds are reviewed twice each year. If, based on the PAI methodology implemented by Montpensier Arbevel, it appears that an investment could cause significant harm to a sustainable investment objective, Montpensier Arbevel conducts additional research to verify the reliability of the data provided by MSCI ESG Research and confirm the validity of the assessment. If, following this internal analysis, it is concluded that the issuer does not pose a significant risk, the investment may be reinstated and a justification duly recorded.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated in Montpensier Arbevel's ESG methodology, including sustainable investments. Montpensier Arbevel excludes from the investment universe companies that are not aligned with certain international standards and conventions, in particular the principles of the United Nations Global Compact (UNGC), the conventions of the International Labor Organization (ILO) and the United Nations Guiding Principles on Business and Human Rights (UNGPBHR).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

For its sustainable investments, the Fund considered mandatory principal adverse impacts as described above in the section: *How were the indicators for adverse impacts on sustainability factors taken into account?*

With regards to the Fund's share of investments which were not considered sustainable as per Montpensier Arbevel's methodology, PAIs were also considered relying on a combination of exclusion policies (normative and sectoral), ESG integration into the investment process, and engagement, as follows:

- Exclusion: the Fund applies normative exclusion criteria, based on activities and sectors covering certain negative impact indicators listed in SFDR (controversial weapons, international standards, human rights...);
- ESG integration : excluding CCC rated issuers as per MSCI ESG Research;
- Engagement: continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

PAI relevance and coverage in the analysis may vary depending on the sector, industry and region in which a company operates. Indicators related to the potential negative impacts of investment decisions on sustainability factors are included in the appendix.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 30th June 2026

Largest investments	Sector	% assets	Country
CloudFlare - 0% - 06/2030	Technology	2,4%	United States
Akamai Technologies Inc - 0.25% - 05/2033	Technology	2,2%	United States
Live Nation Entertainment - 2.875% - 01/2030	Consumer, Cyclical	1,8%	United States
Uber Technologies Inc - 0.875% - 12/2028	Communications	1,8%	United States

Total weight of top 15 investments vs fund's net assets as at 30/06/26: 24.3%

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The basis for computing percentages below is the Fund's net assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***In which economic sectors were the investments made?***

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

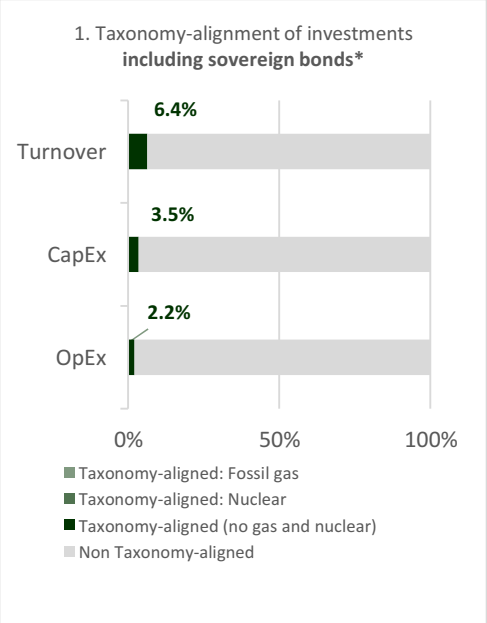
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

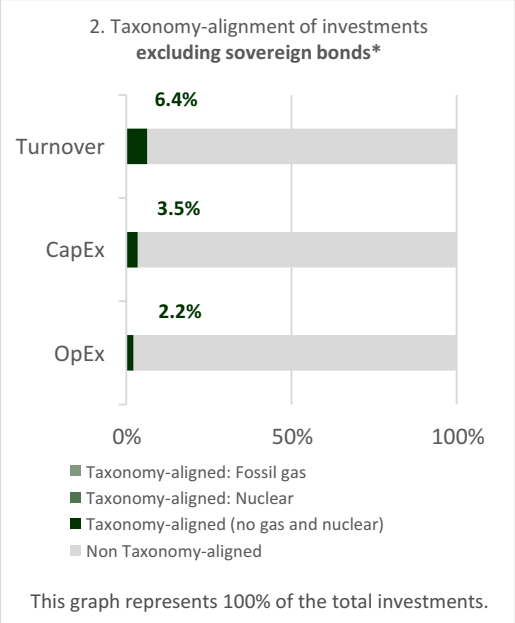
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[12]?



☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

Information relating to companies' involvement in fossil gas and/or nuclear energy activities, in line with the taxonomy, are determined by only taking into account published information.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*
Turnover data is estimated by MSCI ESG Research.
CapEx and Opex data only make up of reported data.

[12] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

	30/06/2026	
Activity type	**Transitional (% AUM)**	**Enabling (% AUM)**
Turnover	0.0%	0.0%
CapEx	0.0%	0.0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	30/06/26	30/06/25	28/06/24	30/06/23
Taxonomy alignment	**% AUM**	**% AUM**	**% AUM**	**% AUM**
Amundi Funds Montpensier Global Convertible	6.4%	6.1%	8.4%	9.5%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of the date of this report, 5.3% of the Fund's net assets were sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. It should be noted that Montpensier Arbevel deems that 7% of investments, excluding cash and cash equivalents, contributed to an environmental objectives. However, for reporting purposes, the share of taxonomy-aligned investments is excluded.

The EU Taxonomy does not comprehensively cover all sectors or industries, nor does it cover all environmental objectives. Consequently, Montpensier Arbevel has used its own methodology to determine whether investments can be considered sustainable. The Fund had not committed to allocating a minimum proportion of its sustainable investments to environmental objectives aligned with the European Taxonomy.

What was the share of socially sustainable investments?

As of the date of this report, 25.9% of net assets were invested in sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash, cash equivalents as well as any other instrument held for the purpose of liquidity and portfolio risk management (such as derivatives) are included in #2 Other. They amount to 3.9% of the Fund's net assets. No minimum environmental or social safeguards were applied.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reporting period, Montpensier Arbevel ensured that the Fund's investments were consistent with the environmental and social characteristics it promotes. Any investment held by the Fund that became restricted after their acquisition were sold, in accordance with the procedures established within Montpensier Arbevel.

In addition, Montpensier Arbevel monitors improvements or deteriorations in the sustainability performance of the securities held by the Fund, based on internal methodology as well as ESG ratings. Montpensier Arbevel also engaged in dialogue with some underlying companies regarding their sustainability practices and potential controversies, in order to promote best practices. These engagement activities have also contributed, in a qualitative and non-binding manner, to the assessment of principal adverse impacts indicators and good governance.

How did this financial product perform compared to the reference benchmark?

The Fund did not use a sustainable reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

  Not applicable.

- ***How did this financial product perform compared with the broad market index?***

  Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO AGGREGATE BOND

Legal entity identifier: 529900DJK6EP37QSNF19

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **40.43%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **5% JP MORGAN EMBI GLOBAL + 85% BLOOMBERG EURO AGGREGATE + 10% ICE BOFA GLOBAL HIGH YIELD Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **1.052 (C).**
- The weighted average ESG rating of the investment universe is **0.960** (**C).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 1.035 (C) and the weighted average ESG rating of the investment universe was 0.952 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

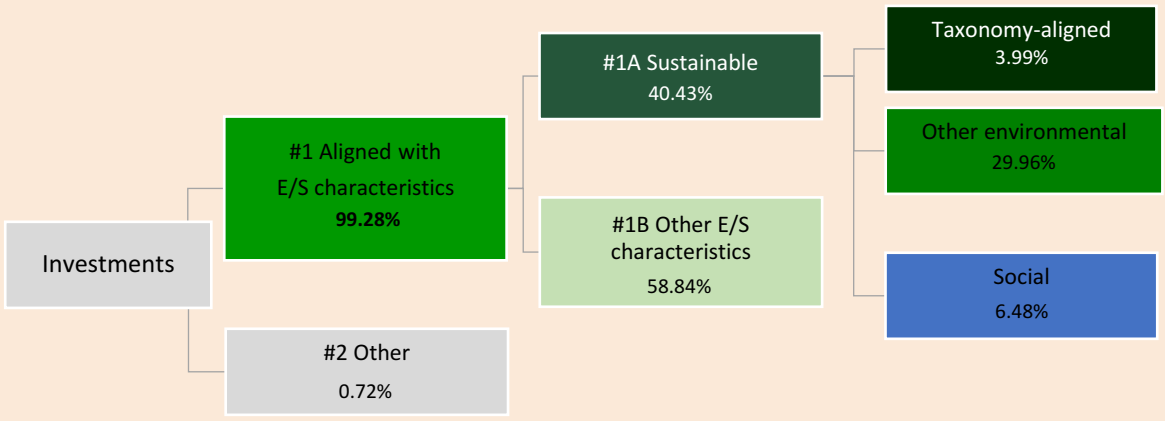
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 40.43% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

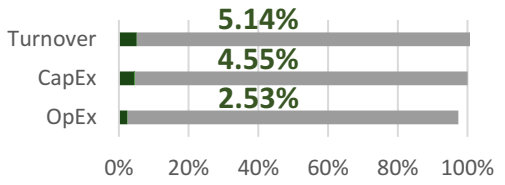
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 3.99% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

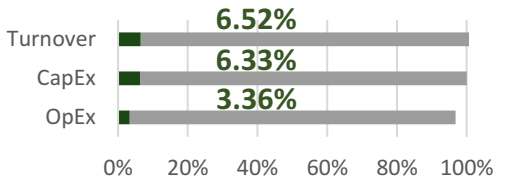
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.47%	95.45%	94.86%
Taxonomy-aligned: Fossil Gas	0.00%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.18%	0.13%	0.06%
Taxonomy-aligned [No gas and nuclear]	2.35%	4.41%	5.08%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.64%	93.67%	93.48%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.02%	0.01%
Taxonomy-aligned [No gas and nuclear]	3.36%	6.30%	6.51%

This graph represents 46.2% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.14% and the share of investment in enabling activities was 0.62%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.72%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **29.96%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 6.48%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 51.66% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO BOND INCOME

Legal entity identifier: 2221009D0WCSI3Q32Q11

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **49.71%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **60% Bloomberg Euro Aggregate Corporate +40% ICE BofA European Currency High Yield Constrained Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.801 (C).**
- The weighted average ESG rating of the investment universe is **0.484** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

- ***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.73 (C) and the weighted average ESG rating of the investment universe was 0.435 (D).

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

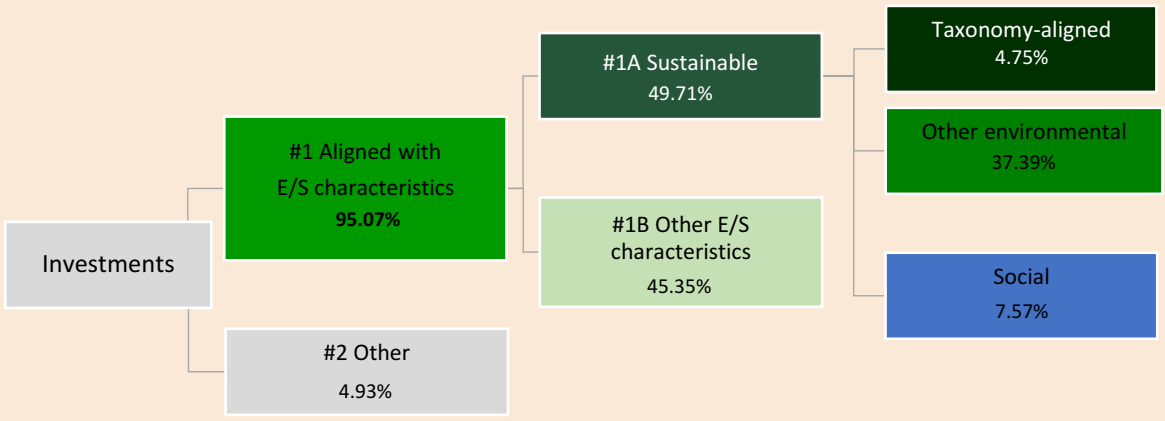
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AM EURO LIQUIDITY S-T RESP - Z (C)	Financials	Mutual Funds	France	1.04%

What was the proportion of sustainability-related investments?

The fund invested 49.71% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

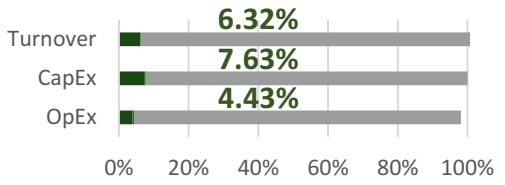
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.75% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

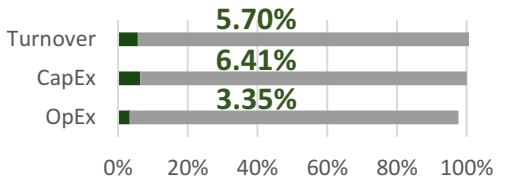
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.57%	92.37%	93.68%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.53%	0.44%	0.18%
Taxonomy-aligned [No gas and nuclear]	3.90%	7.19%	6.14%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.65%	93.59%	94.30%
Taxonomy-aligned: Fossil Gas	0.01%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.14%	0.15%	0.01%
Taxonomy-aligned [No gas and nuclear]	3.20%	6.26%	5.69%

This graph represents 95.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.34% and the share of investment in enabling activities was 0.81%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.87%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **37.39%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.57%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 58.90% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO CORPORATE BOND SELECT

Legal entity identifier: EJCJD2QBJY0UVP7HMP10

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**

☐ It made **sustainable investments with an environmental objective:** _____

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made a **sustainable investments with a social objective:** _____

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **58.78%** of sustainable investments

- ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **Bloomberg Euro-Agg Corporates (E) Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.954 (C).**
- The weighted average ESG rating of the benchmark is **0.603** (**C).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.768 (C) and the weighted average ESG rating of the benchmark was 0.564 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

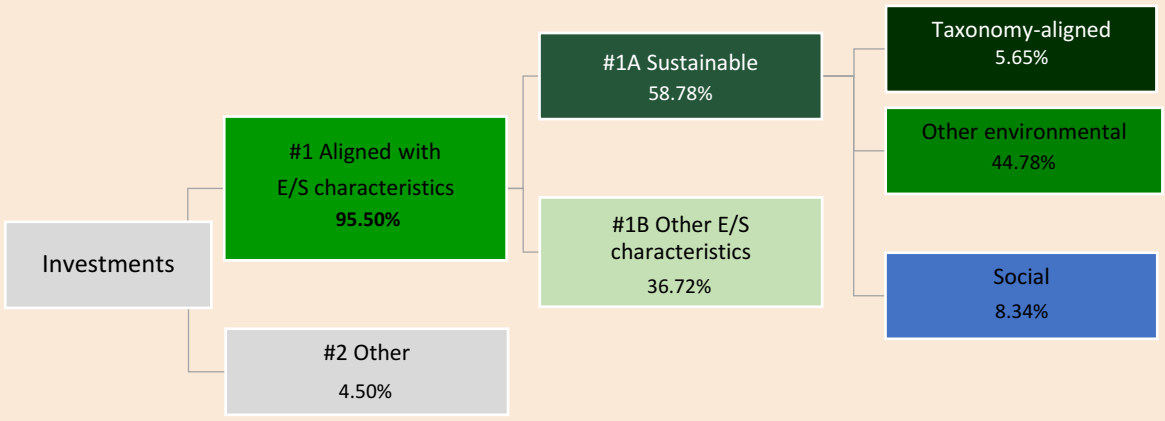
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AMUNDI ABS AAA I	Financials	Mutual Funds	France	1.58%

What was the proportion of sustainability-related investments?

The fund invested 58.78% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

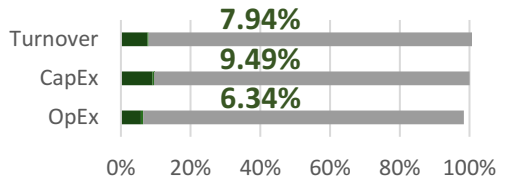
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 5.65% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

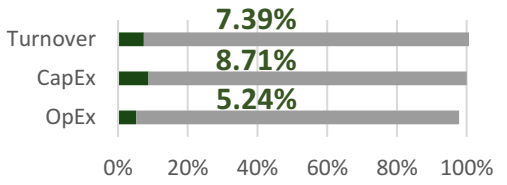
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.66%	90.51%	92.06%
Taxonomy-aligned: Fossil Gas	0.00%	0.02%	0.00%
Taxonomy-aligned: Nuclear	0.61%	0.42%	0.37%
Taxonomy-aligned [No gas and nuclear]	5.73%	9.05%	7.57%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	94.76%	91.29%	92.61%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.01%	0.02%	0.01%
Taxonomy-aligned [No gas and nuclear]	5.23%	8.68%	7.38%

This graph represents 95.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.62% and the share of investment in enabling activities was 1.22%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 4.52%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **44.78%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 8.34%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 68.99% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO GOVERNMENT BOND RESPONSIBLE

Legal entity identifier: 529900SX4UQ95340NW59

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.70%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and/or social characteristics by investing at least 30% of net assets in Green, Social and Sustainability (GSS) bonds meeting the criteria and guidelines of the Green Bond Principles (GBP), Social Bond Principles (SBP) or Sustainability Bond Guidelines (SBG), as published by the ICMA. In addition, issuers with an ESG rating of F or G are excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach.

Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

For more detail, please refer to the Sustainable Investment section of the Prospectus.

At the end of the period :

- The weighted average ESG rating of the portfolio is **1.169 (C)**
- The weighted average ESG rating of the reference index is **1.269 (C)**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

At the end of the period, the portfolio holds **34.98%** of green, social and sustainability (GSS) bonds.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 1.319 (C) and the weighted average ESG rating of the reference index was 1.304 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

A specific process is applied for green, social and sustainable debt instruments. The GSS instruments are analysed by Amundi's ESG analysts to ensure it complies with Amundi's GSS requirements (including funding rationale, issuer ESG performance, project analysis and transparency). After the analysis has ensured full compliance, corporate use of proceeds bonds are considered as sustainable investment provided that the issuers pass the DNSH tests and good governance criteria. GSS bonds issued by a sovereign entity undergo the same compliance analysis process and are considered as Sustainable Investment provided that Sovereign bond is not excluded by Amundi's Exclusion Policy.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria

including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

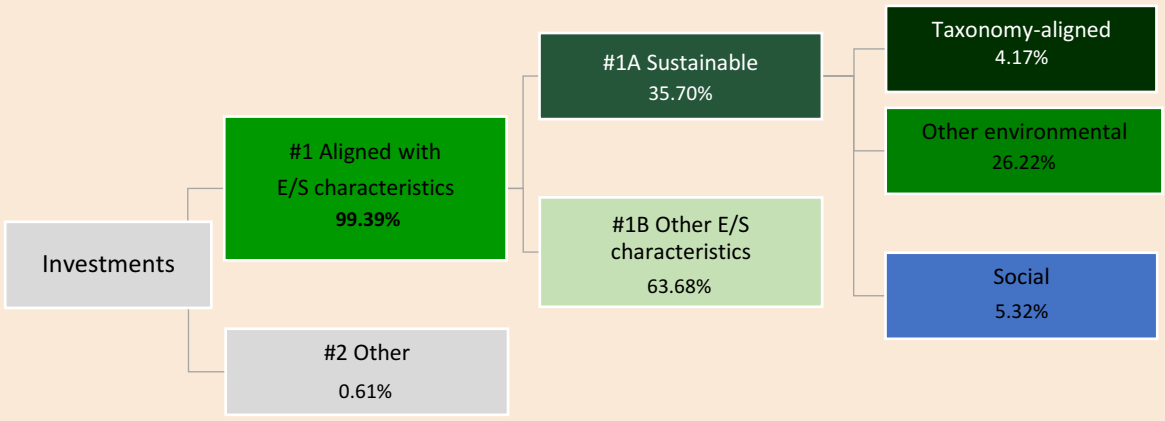
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
UK TSY 4.375% 03/28	Treasuries	Treasuries	United Kingdom	5.62%

What was the proportion of sustainability-related investments?

The fund invested 35.70% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Treasuries	*Treasuries*	*63.09%*

Cash	*Cash*	*0.50%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

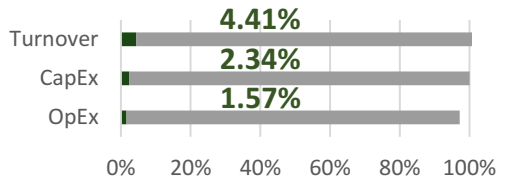
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.17% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

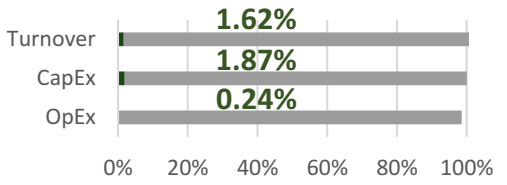
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.43%	97.66%	95.59%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	1.57%	2.34%	4.41%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.76%	98.13%	98.38%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	0.24%	1.85%	1.61%

This graph represents 1.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.19%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.17%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.22%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.32%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 35.08% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS STRATEGIC BOND

Legal entity identifier: 5493009E9QZ9NKKEW632

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **31.19%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **50% BofAML Eur HY Constrained + 35% JPM CEMBI High Yield + 15% BofAML US Corporate Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.354 (D).**
- The weighted average ESG rating of the investment universe is **0.064** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

- ***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.16 (D) and the weighted average ESG rating of the investment universe was 0 (D).

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

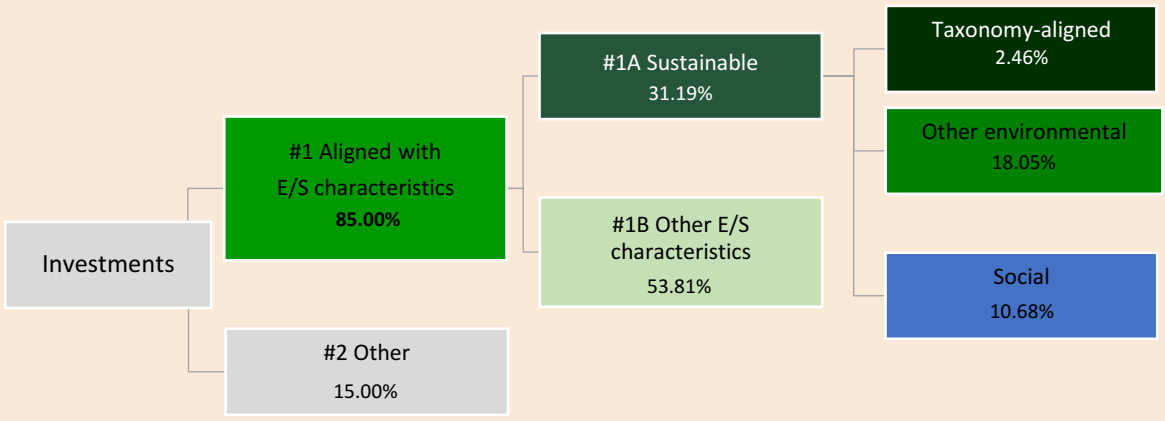
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AIF - EMG MKT SOVEREIGN BD - S	Financials	Mutual Funds	Luxembourg	3.23%
AMU PLAN-EM GR ONE-SEN USDC	Financials	Mutual Funds	Luxembourg	1.75%
WOMCHH 5% 04/32 USD CV REGS	Others	Others	Chile	1.33%

What was the proportion of sustainability-related investments?

The fund invested 31.19% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.46% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

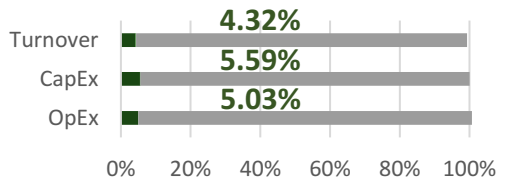
contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

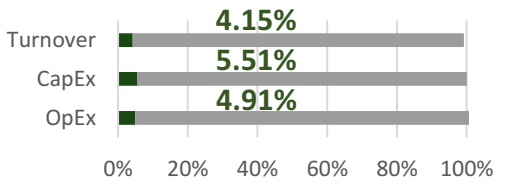
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	94.97%	94.41%	95.68%
Taxonomy-aligned: Fossil Gas	0.00%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.14%	0.12%	0.12%
Taxonomy-aligned [No gas and nuclear]	4.88%	5.46%	4.19%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.09%	94.49%	95.85%
Taxonomy-aligned: Fossil Gas	0.00%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	4.90%	5.49%	4.13%

This graph represents 90.8% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.59% and the share of investment in enabling activities was 0.92%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.92%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **18.05%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 10.68%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 47.98% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO HIGH YIELD BOND

Legal entity identifier: E1BBUNTIB1P10L18SD26

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **41.04%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **ML European Curr H YLD BB-B Rated Constrained Hed Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.454 (D).**
- The weighted average ESG rating of the Benchmark is **0.326** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.356 (D) and the weighted average ESG rating of the Benchmark was 0.252 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

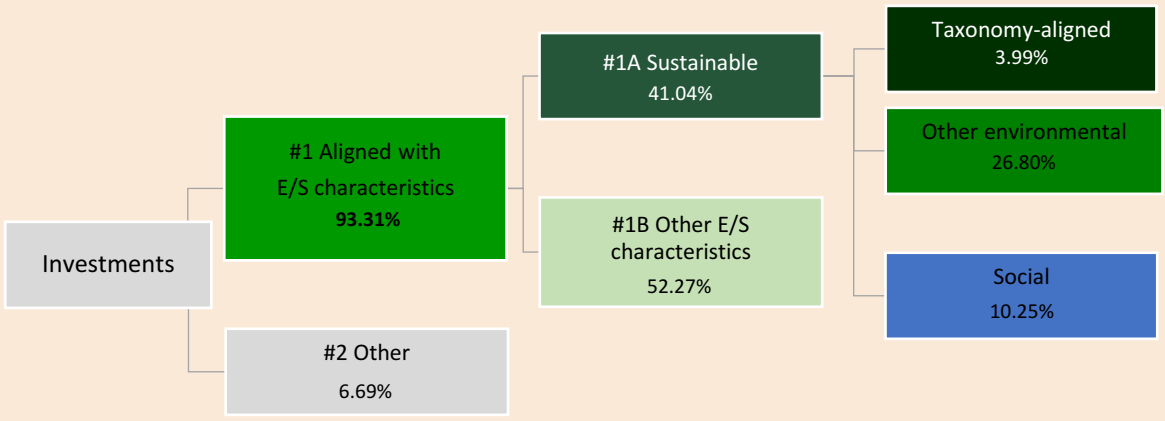
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 41.04% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 3.99% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

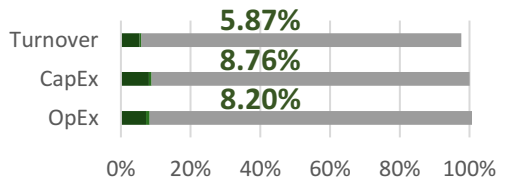
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

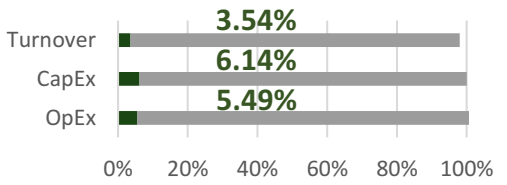
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	91.80%	91.24%	94.13%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.95%	0.77%	0.53%
Taxonomy-aligned [No gas and nuclear]	7.24%	7.99%	5.33%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	94.51%	93.86%	96.46%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	5.48%	6.13%	3.52%

This graph represents 95.7% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.81% and the share of investment in enabling activities was 1.49%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.82%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.80%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 10.25%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 48.56% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO HIGH YIELD SHORT TERM BOND

Legal entity identifier: 529900Q3IK91XCA88E07

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **47.10%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **Merril Lynch Euro High Yield 1-3 Non Fin, BB-B, Constrained Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.366 (D).**
- The weighted average ESG rating of the benchmark is **0.285** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.392 (D) and the weighted average ESG rating of the benchmark was 0.28 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

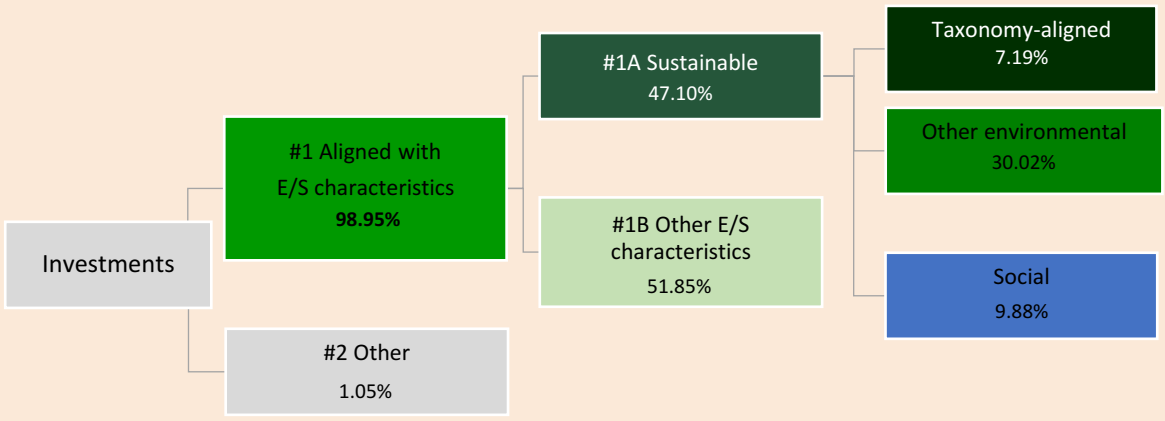
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 7.19% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

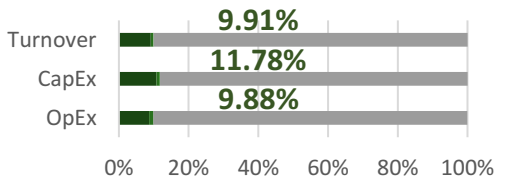
- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

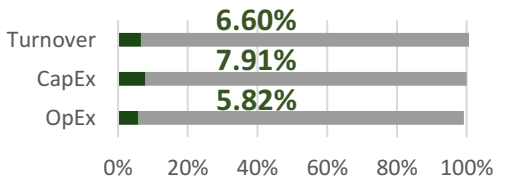
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	90.12%	88.22%	90.09%
Taxonomy-aligned: Fossil Gas	0.03%	0.03%	0.02%

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **30.02%** at the end of the period.

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 9.88%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 51.62% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO SUBORDINATED BOND RESPONSIBLE

Legal entity identifier: 2221006F1314ERENWD22

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **63.45%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment u niverse **Bloomberg Euro Aggregate Corporate Index.** In determining the ESG score of the P roduct and the investment universe, ESG /performance was continuously assessed by com paring the average performance of a security against the security issuer's industry, in res pect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.992 (C).**
- The weighted average ESG rating of the investment universe is **0.603** (**C).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.979 (C) and the weighted average ESG rating of the investment universe was 0.564 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

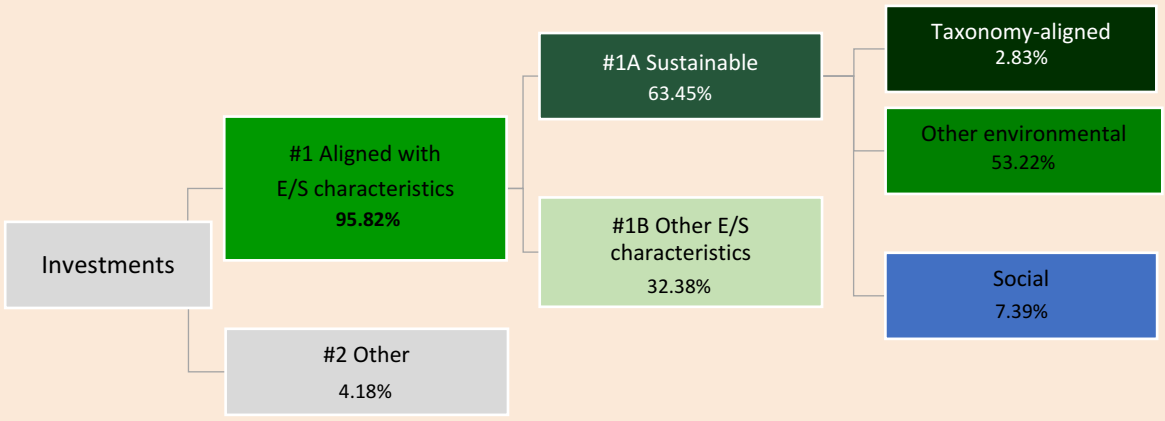
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
HEIBOS VAR PERP	Corporates	Other Financials	Sweden	2.15%
NOVALJ VAR PERP	Corporates	Banking	Slovenia	2.13%
ARNDTN VAR PERP	Corporates	Other Financials	Luxembourg	1.96%
BACR VAR PERP	Corporates	Banking	United Kingdom	1.93%

TVLRO VAR PERP	Corporates	Banking	Romania	1.62%

What was the proportion of sustainability-related investments?

The fund invested 63.45% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Corporates	*Banking*	*47.57%*
Corporates	*Insurance*	*21.37%*
Corporates	*Other Financials*	*7.67%*

Treasuries	*Treasuries*	*0.00%*
Forex	*Forex*	*-0.21%*
Cash	*Cash*	*0.83%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.83% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

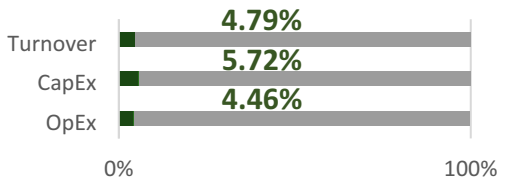
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

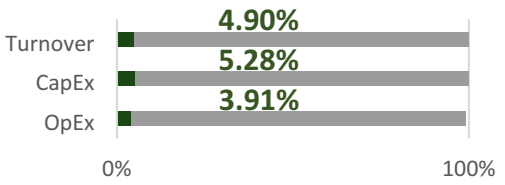
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.54%	94.28%	95.21%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.31%	0.26%	0.01%
Taxonomy-aligned [No gas and nuclear]	4.15%	5.46%	4.78%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.09%	94.72%	95.10%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.02%	0.01%
Taxonomy-aligned [No gas and nuclear]	3.91%	5.26%	4.89%

This graph represents 97.6% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.73% and the share of investment in enabling activities was 0.30%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 4.88%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **53.22%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.39%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 76.09% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL HIGH YIELD BOND RESPONSIBLE

Legal entity identifier: 213800O2125EN6NGE460

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 41.89% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **ICE BofA ML Global High Yield USD Hedged Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.287 (D).**
- The weighted average ESG rating of the Benchmark is **-0.262** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.178 (D) and the weighted average ESG rating of the Benchmark was -0.333 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

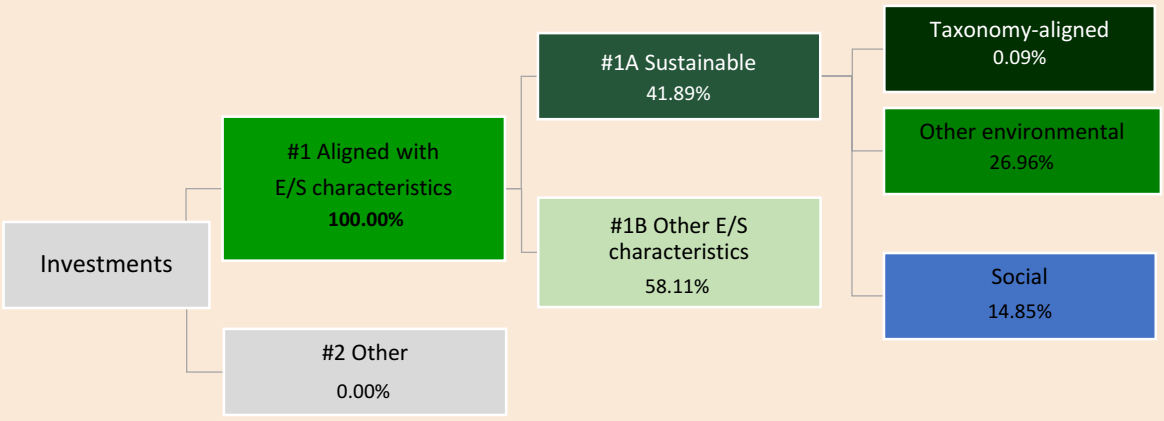
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ABRAGF FRN 10/29 144A	Corporates	Transportation	Cayman Islands	1.75%

What was the proportion of sustainability-related investments?

The fund invested 41.89% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

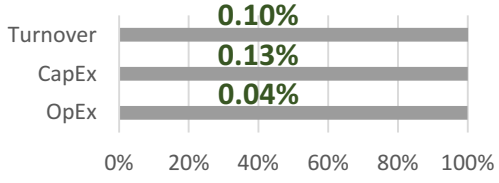
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.09% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

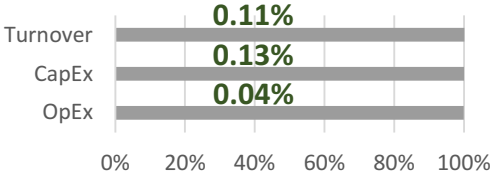
☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.96%	99.87%	99.90%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.04%	0.13%	0.10%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.96%	99.87%	99.89%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.04%	0.13%	0.11%

This graph represents 98.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.01%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.08%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.96%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 14.85%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 36.97% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL SUBORDINATED BOND

Legal entity identifier: 549300YM7XSURJOGN349

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **57.15%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **37.5% ICE BofA ML Global Hybrid Non-Financial Corporate Index (hedged to EUR); 30% ICE BofA ML Contingent Capital Index (hedged to EUR); 15% ICE BofA ML Perpetual Preferred Securities Index (hedged to EUR); 17.5% ICE BofA ML Global Hybrid Non-Financial High Yield (hedged to EUR) Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.688 (C).**
- The weighted average ESG rating of the benchmark is **0.402** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.591 (C) and the weighted average ESG rating of the benchmark was 0.425 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

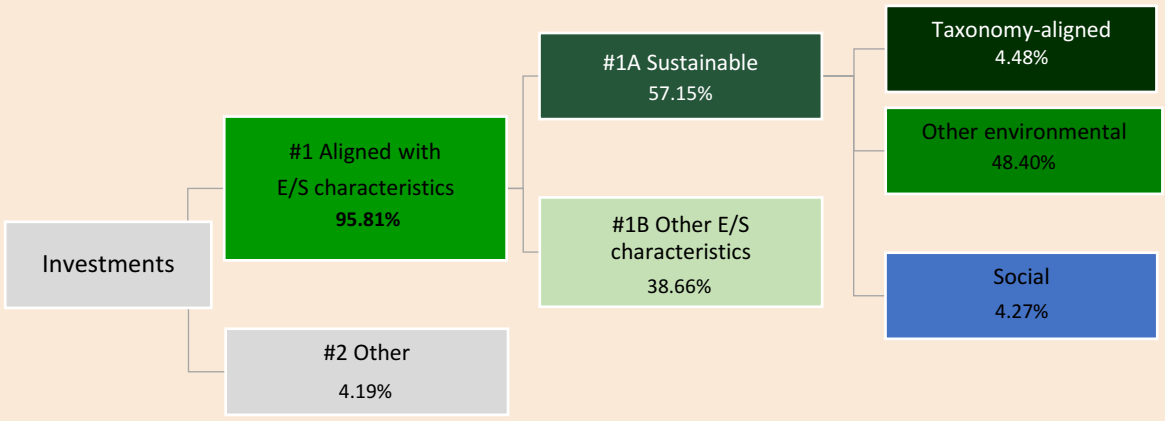
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.48% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

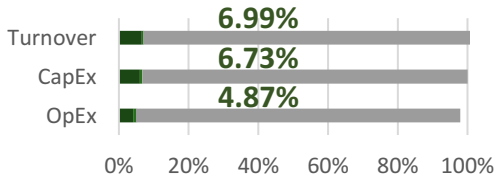
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

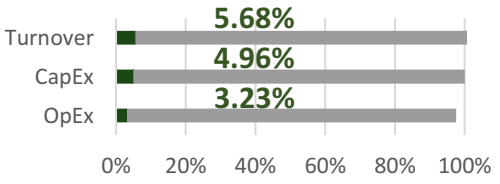
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover

Taxonomy-aligned: Nuclear	0.76%	0.61%	0.45%
Taxonomy-aligned [No gas and nuclear]	4.11%	6.04%	6.53%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.77%	95.04%	94.32%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	3.22%	4.94%	5.66%

This graph represents 94.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 1.06% and the share of investment in enabling activities was 0.71%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.26%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **48.40%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 4.27%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 80.75% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS PIONEER GLOBAL HIGH YIELD BOND

Legal entity identifier: 5493001ZUQBYXT5ICJ95

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **16.03%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark BLOOMBERG GLOBAL HIGH YIELD. In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics. The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **-0.062 (D).**
- The weighted average ESG rating of the Benchmark is **-0.213** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.078 (D) and the weighted average ESG rating of the Benchmark was -0.276 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial

data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations.

Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

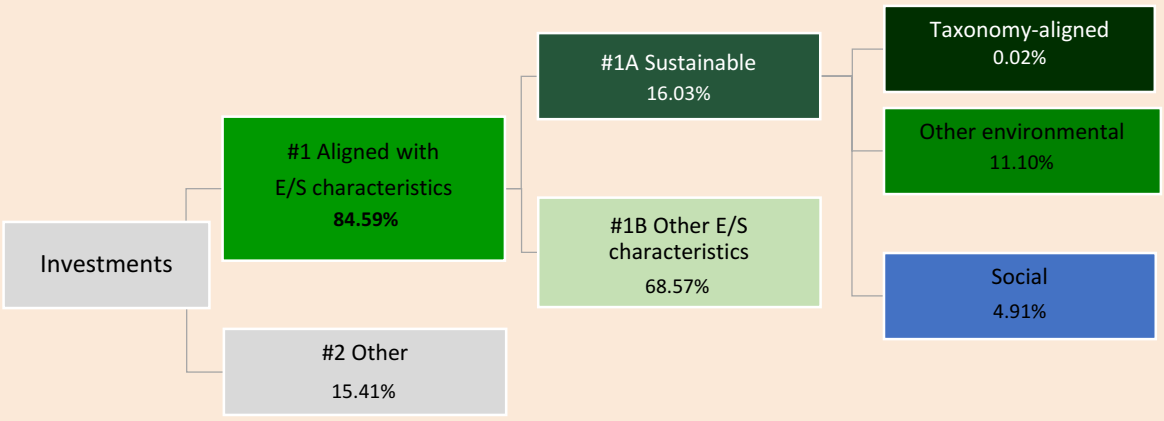
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
A-F GLOBAL H-Y BD RESP-Z USD-C	Financials	Mutual Funds	Luxembourg	3.40%
TOTALP 11.125% 12/32 144A	Corporates	Communications	Mexico	1.69%
ATENTO LUXCO 1 SA	Consumer Discretionary	Consumer Services	Luxembourg	1.59%
ABRAGF FRN 10/29 144A	Corporates	Transportation	Cayman Islands	1.56%

USACUT 9.75% 05/29 144A	Corporates	Consumer Staples	United States	1.07%

What was the proportion of sustainability-related investments?

The fund invested 16.03% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

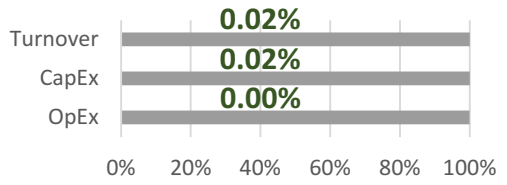
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.02% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

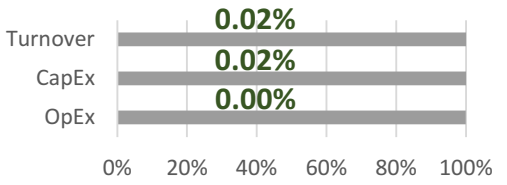
☒ No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	99.98%	99.98%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.02%	0.02%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	99.98%	99.98%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.02%	0.02%

This graph represents 91.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.02%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **11.10%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 4.91%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 31.96% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS US HIGH YIELD BOND

Legal entity identifier: 5493003QDKL8L48UQW51

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.60% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **ICE BofA ML US High Yield Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **-0.284 (D).**
- The weighted average ESG rating of the Benchmark is **-0.406** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.251 (D) and the weighted average ESG rating of the Benchmark was -0.462 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

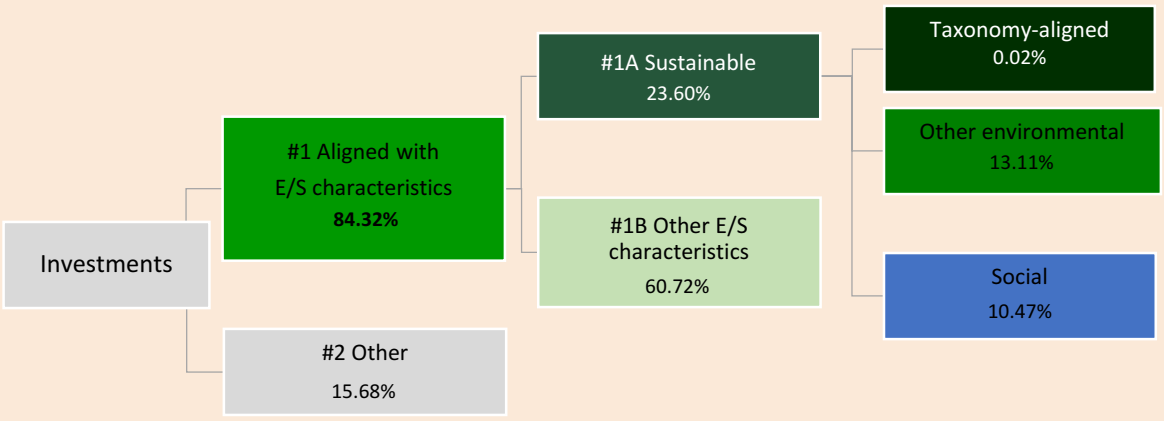
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
CHTR 4.5% 06/33 144A	Corporates	Communications	United States	1.76%
GALCLD 8.75% 09/27 144A	Corporates	Finance Companies	Cayman Islands	1.67%
BHCCN 10% 04/32 144A	Corporates	Consumer Staples	Canada	1.63%

WILDFI 7.5% 10/29 144A	Corporates	Energy	United States	1.21%

What was the proportion of sustainability-related investments?

The fund invested 23.60% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Corporates	*Consumer Discretionary*	*14.15%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.02% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy. The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

nuclear energy, the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

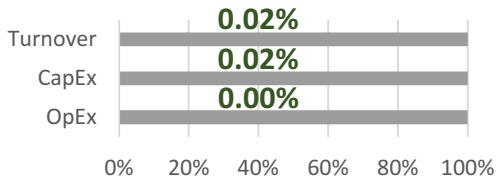
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

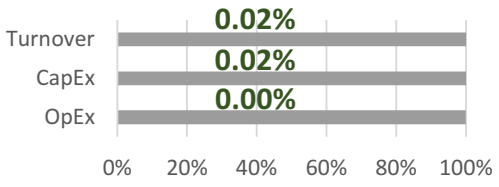
☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	99.98%	99.98%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.02%	0.02%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	99.98%	99.98%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.02%	0.02%

This graph represents 100.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **13.11%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 10.47%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 34.98% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL AGGREGATE BOND

Legal entity identifier: 1BXU0IWD1I54BQDOY676

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 28.55% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.835 (C).**
- The weighted average ESG rating of the investment universe is **0.491** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.874 (C) and the weighted average ESG rating of the investment universe was 0.445 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

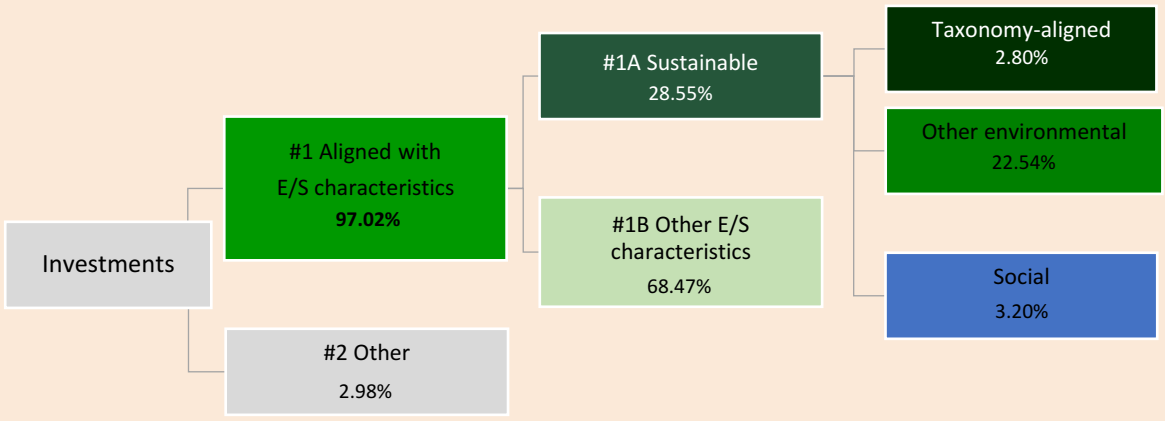
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 28.55% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

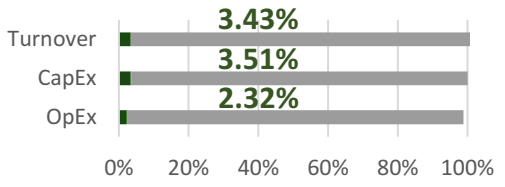
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.80% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

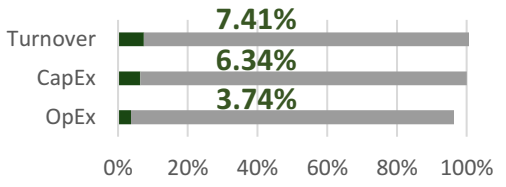
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.68%	96.49%	96.57%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.24%	0.20%	0.09%
Taxonomy-aligned [No gas and nuclear]	2.08%	3.31%	3.34%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.26%	93.66%	92.59%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.03%	0.01%
Taxonomy-aligned [No gas and nuclear]	3.74%	6.31%	7.40%

This graph represents 36.1% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.12% and the share of investment in

enabling activities was 0.37%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.67%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **22.54%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 3.20%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 59.99% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL GOVERNMENT BOND

Legal entity identifier: 529900LNWLLVPZNRTX63

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.18%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and/or social characteristics by investing at least 20% of net assets in Green, Social and Sustainability (GSS) bonds meeting the criteria and guidelines of the Green Bond Principles (GBP), Social Bond Principles (SBP) or Sustainability Bond Guidelines (SBG), as published by the ICMA. In addition, issuers with an ESG rating of F or G are excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period :

- The weighted average ESG rating of the portfolio is **1.074 (C)**
- The weighted average ESG rating of the benchmark is **1.027 (C)**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

At the end of the period, the portfolio holds **26.97%** of green, social and sustainability (GSS) bonds.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 1.08 (C) and the weighted average ESG rating of the benchmark was 1.083 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

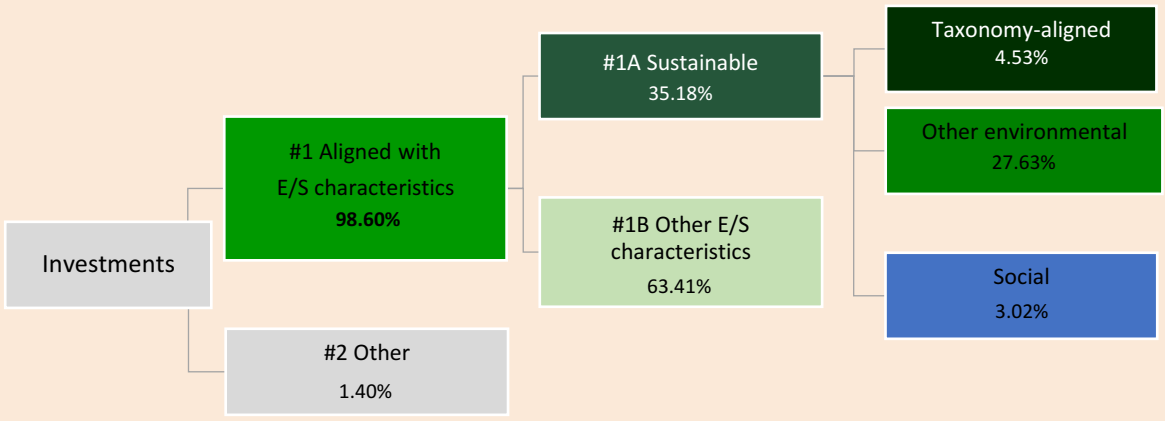
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
UK TSY 0.875% 07/33	Treasuries	Treasuries	United Kingdom	6.54%
A-F GLOBAL CORPORATE BD SELCT-Z USD-C	Financials	Mutual Funds	Luxembourg	4.83%
SPAIN 0.6% 10/29	Treasuries	Treasuries	Spain	4.25%

What was the proportion of sustainability-related investments?

The fund invested 35.18% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

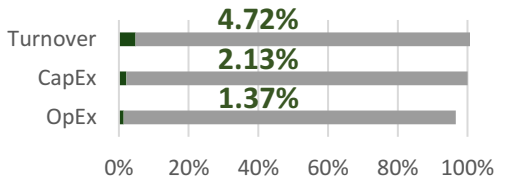
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.53% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

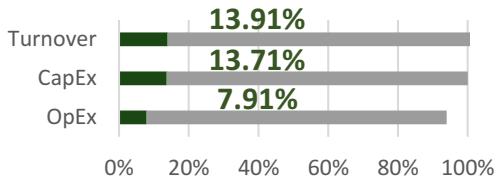
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.63%	97.87%	95.28%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.02%	0.03%	0.01%
Taxonomy-aligned [No gas and nuclear]	1.34%	2.10%	4.71%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	92.09%	86.29%	86.09%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.04%	0.13%	0.02%
Taxonomy-aligned [No gas and nuclear]	7.86%	13.57%	13.88%

This graph represents 11.6% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.03% and the share of investment in enabling activities was 0.11%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.89%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **27.63%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 3.02%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 37.94% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL BOND INCOME

Legal entity identifier: 213800V5M5CGXBVYTN91

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **34.14%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and/or social characteristics by aiming to have a higher ESG score than that of the investment universe. In determining the ESG score of the Sub-Fund and the Investment Universe, ESG performance is assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three ESG characteristics of environmental, social and governance.

For the purpose of this measurement, the investment universe is defined in reference to the following composite index: 50% Bloomberg Global Aggregate Hedged +30% ICE Bofa High Yield Index +20% JP Morgan EMBI Global Diversified Composite. No ESG Reference Index has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period :

- The weighted average ESG rating of the portfolio is **0.453 (D)**

- The weighted average ESG rating of the investment universe is **0.168 (D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

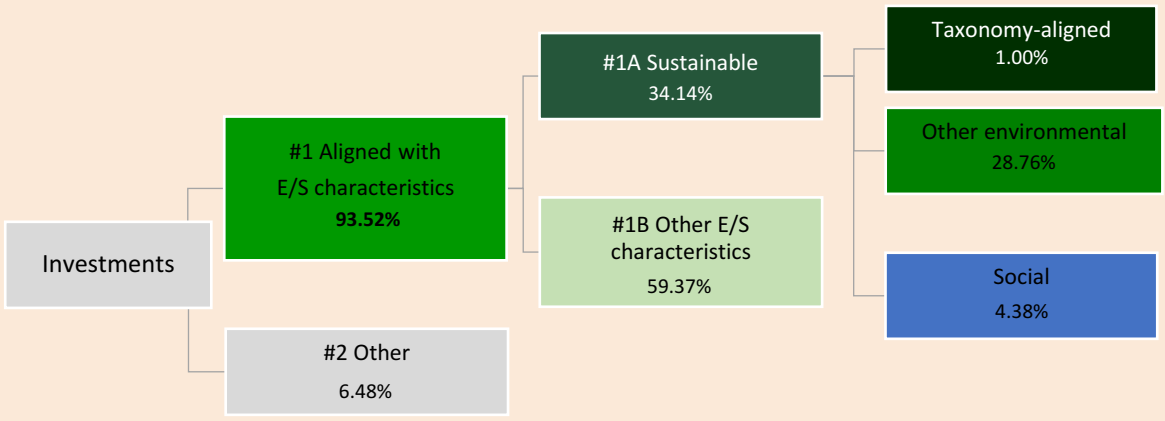
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
BTPS 2.95% 07/30 5Y	Treasuries	Treasuries	Italy	3.38%
BTPS 3.65% 08/35 10Y	Treasuries	Treasuries	Italy	1.94%
MEXICO 3.5% 09/29	Government-Related	Sovereign	Mexico	1.62%

RIBL VAR 01/36 EMTN	Corporates	Banking	Saudi Arabia	1.05%

What was the proportion of sustainability-related investments?

The fund invested 34.14% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.00% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

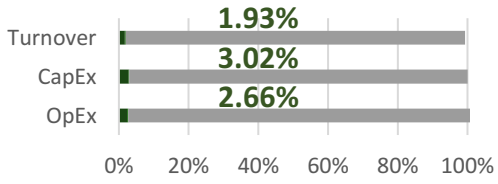
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

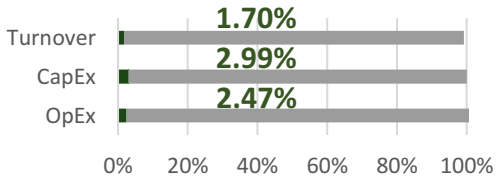
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.34%	96.98%	98.07%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.30%	0.25%	0.26%
Taxonomy-aligned [No gas and nuclear]	2.36%	2.77%	1.67%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.53%	97.01%	98.30%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.47%	2.98%	1.70%

This graph represents 82.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.39% and the share of investment in enabling activities was 0.46%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

This is the first SFDR periodic report produced for this sub-fund.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **28.76%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 4.38%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 65.95% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL CORPORATE BOND

Legal entity identifier: XJOH2VT7DMIW80J7DZ04

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **54.13%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **ICE BofA ML Global Large Cap Corporate USD Hedged Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.323 (D).**
- The weighted average ESG rating of the benchmark is **0.034** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.414 (D) and the weighted average ESG rating of the benchmark was 0.042 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

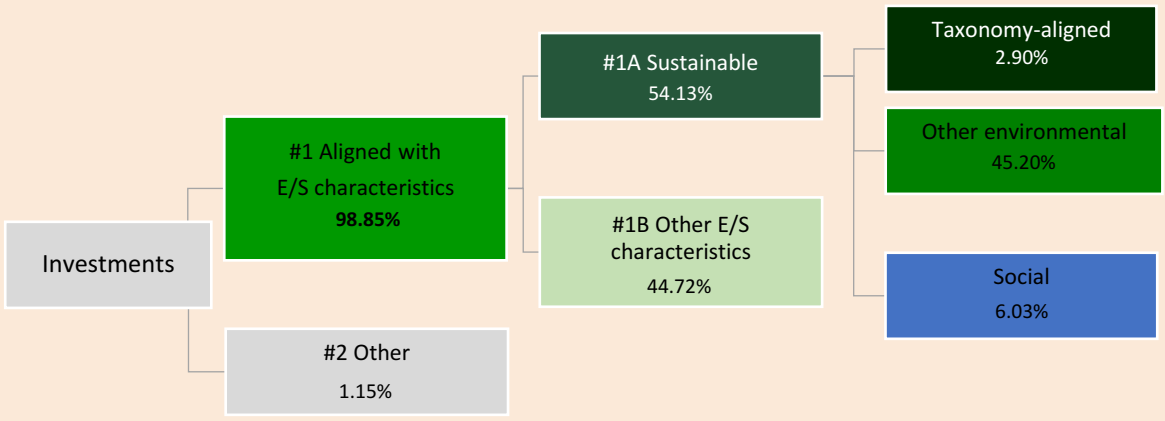
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AMUNDI FUNDS MULTI SECTOR CREDIT	Financials	Mutual Funds	Luxembourg	2.00%

What was the proportion of sustainability-related investments?

The fund invested 54.13% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.90% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

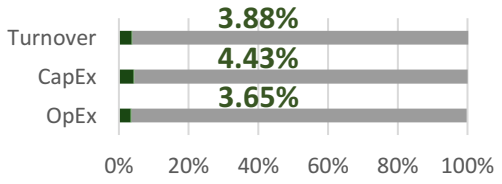
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

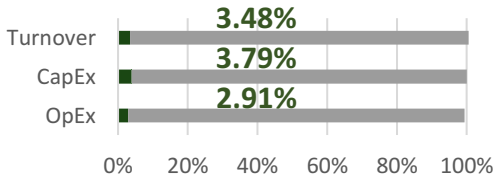
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.35%	95.57%	96.12%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.38%	0.30%	0.21%
Taxonomy-aligned [No gas and nuclear]	3.27%	4.13%	3.66%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.09%	96.21%	96.52%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.91%	3.78%	3.48%

This graph represents 97.6% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.41% and the share of investment in enabling activities was 0.57%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.93%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **45.20%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 6.03%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 84.70% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL CORPORATE BOND SELECT

Legal entity identifier: 2138002V2U9FP8L55Z17

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **62.94%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **ICE BofA ML Global Large Cap Corporate USD Hedged Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.
The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.567 (C).**
- The weighted average ESG rating of the benchmark is **0.034** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.692 (C) and the weighted average ESG rating of the benchmark was 0.042 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

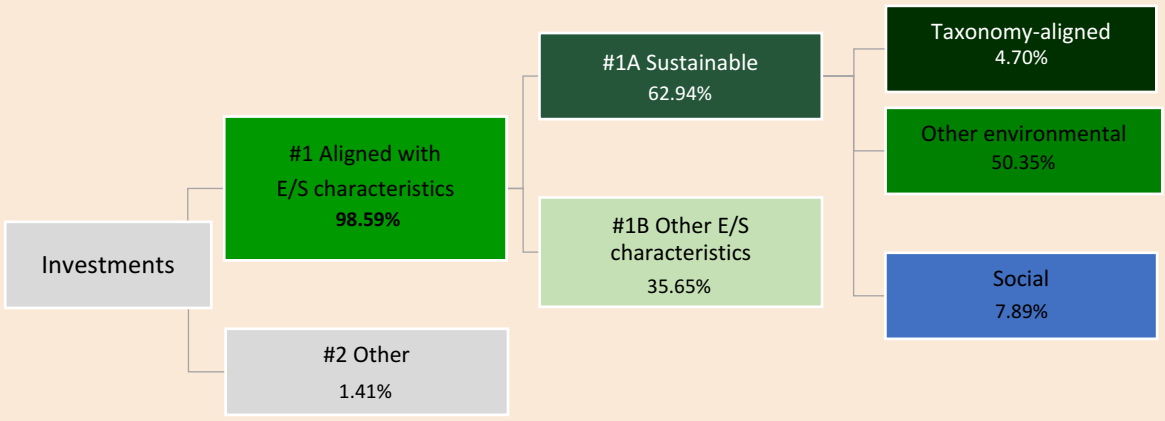
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AMGN 2.45% 02/30	Corporates	Consumer Staples	United States	1.64%

What was the proportion of sustainability-related investments?

The fund invested 62.94% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.70% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

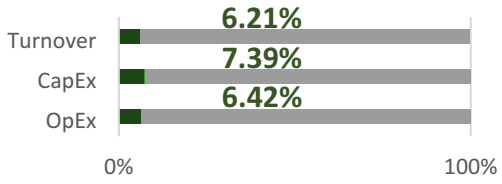
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

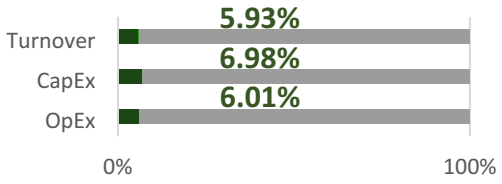
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.58%	92.61%	93.79%
Taxonomy-aligned: Fossil Gas	0.02%	0.04%	0.02%
Taxonomy-aligned: Nuclear	0.20%	0.17%	0.11%
Taxonomy-aligned [No gas and nuclear]	6.20%	7.19%	6.08%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.99%	93.02%	94.07%
Taxonomy-aligned: Fossil Gas	0.02%	0.03%	0.02%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	5.99%	6.94%	5.90%

This graph represents 99.3% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.27% and the share of investment in enabling activities was 1.40%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.33%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **50.35%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.89%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 93.26% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL HIGH YIELD BOND

Legal entity identifier: 222100AIHPWCQOF6UQ48

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 18.76% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **ICE BOFA ML GLOBAL HIGH YIELD USD-HEDGED Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **-0.092 (D).**
- The weighted average ESG rating of the Benchmark is **-0.262** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.148 (D) and the weighted average ESG rating of the Benchmark was -0.333 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

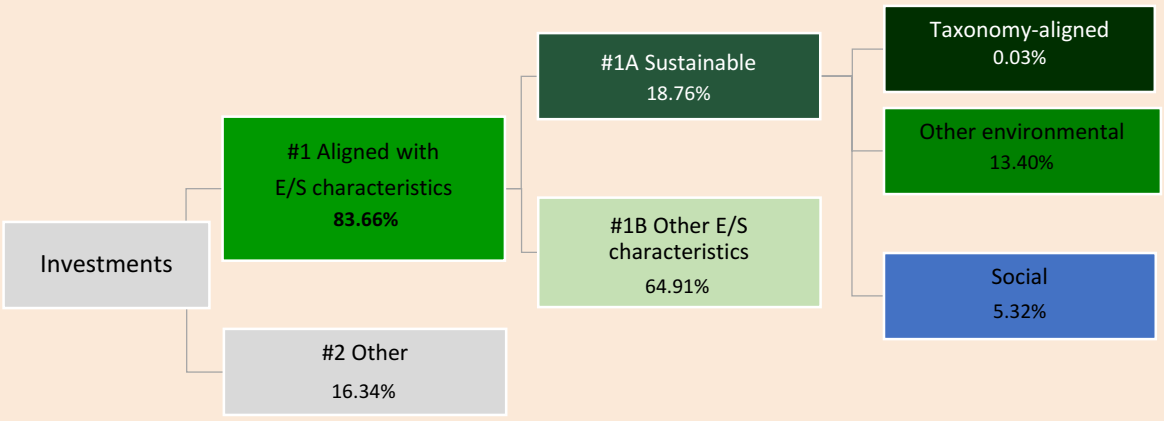
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
TBIP USA 09/07/26	Treasuries	Treasuries	United States	2.54%
A-F GLOBAL H-Y BD RESP-Z USD-C	Financials	Mutual Funds	Luxembourg	2.39%
TOTALP 11.125% 12/32 144A	Corporates	Communications	Mexico	1.78%
PRIHEA 9.375% 09/29 144A	Corporates	Consumer Staples	United States	1.61%
GALCLD 8.75% 09/27 144A	Corporates	Finance Companies	Cayman Islands	1.41%
AEROMX 8.625% 11/31 144A	Corporates	Transportation	Mexico	1.39%
UWMC 6.25% 03/31 144A	Corporates	Finance Companies	United States	1.28%
B 6.75% 02/32 144A	Corporates	Capital Goods	United States	1.13%
BHCCN 10% 04/32 144A	Corporates	Consumer Staples	Canada	1.12%
VEGLPL 6.75% 01/36 144A	Corporates	Energy	United States	1.12%
TCELLT 7.65% 01/32 144A	Corporates	Communications	Turkey	1.11%
NRG 6% 01/36 144A	Corporates	Electric	United States	1.11%
IHS 6.25% 11/28 144A	Corporates	Capital Goods	Cayman Islands	1.09%
MXPRLL 7.75% 07/30 144A	Corporates	Basic Industry	Luxembourg	1.09%
NEWARC 9.75% 03/33 144A	Corporates	Basic Industry	United States	1.05%

What was the proportion of sustainability-related investments?

The fund invested 18.76% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

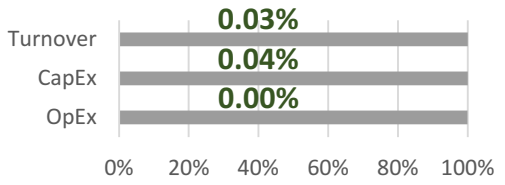
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.03% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

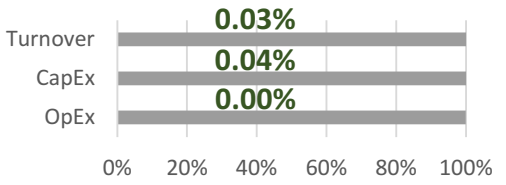
☒ No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	99.96%	99.97%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.04%	0.03%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	99.96%	99.97%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.04%	0.03%

This graph represents 97.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.03%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **13.40%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.32%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 30.43% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL SHORT TERM BOND

Legal entity identifier: 213800N25O8X71IK7M94

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **44.61%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **80% BLOOMBERG GLOBAL AGGREGATE + 10% JP MORGAN EMBI GLOBAL + 10% ICE BOFA GLOBAL HIGH YIELD composite index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund.
No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.955 (C).**
- The weighted average ESG rating of the investment universe is **0.489** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.864 (C) and the weighted average ESG rating of the investment universe was 0.444 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

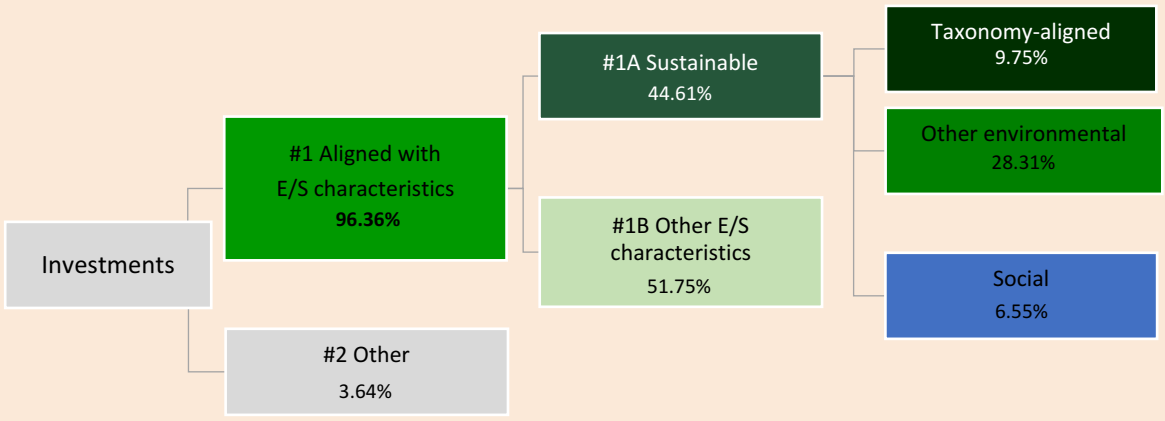
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
NZGB 0.25% 05/28 0528	Treasuries	Treasuries	New Zealand	5.95%
NZGB 3% 04/29 0429	Treasuries	Treasuries	New Zealand	5.30%

JGB 2.2% 9/26	Treasuries	Treasuries	Japan	1.47%

What was the proportion of sustainability-related investments?

The fund invested 44.61% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 9.75% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

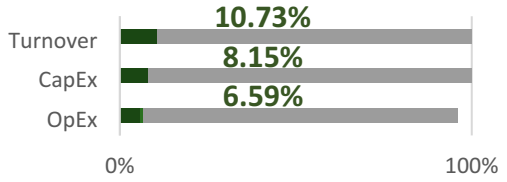
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

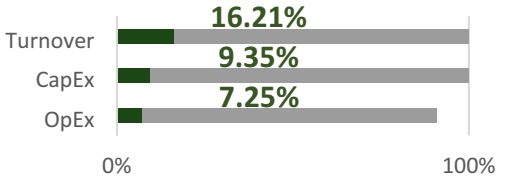
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.41%	91.85%	89.27%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.64%	0.26%	0.20%
Taxonomy-aligned [No gas and nuclear]	5.95%	7.89%	10.53%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	92.75%	90.65%	83.79%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	7.25%	9.35%	16.21%

This graph represents 36.7% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.23% and the share of investment in enabling activities was 0.48%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 7.96%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **28.31%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 6.55%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 61.34% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL BOND FLEXIBLE

Legal entity identifier: 222100PZ5D2ORNFR7S72

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 11.62% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **40% JP MORGAN GLOBAL GOVERNMENT BOND INDEX BROAD + 10% BLOOMBERG GLOBAL AGGREGATE GOVERNMENT RELATED + 10% BLOOMBERG GLOBAL AGGREGATE CORPORATE + 20% BLOOMBERG GLOBAL HIGH YIELD HEDGED + 20% JP MORGAN EMERGING MARKET BOND composite index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics. The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.788 (C).**
- The weighted average ESG rating of the investment universe is **0.478** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.674 (C) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

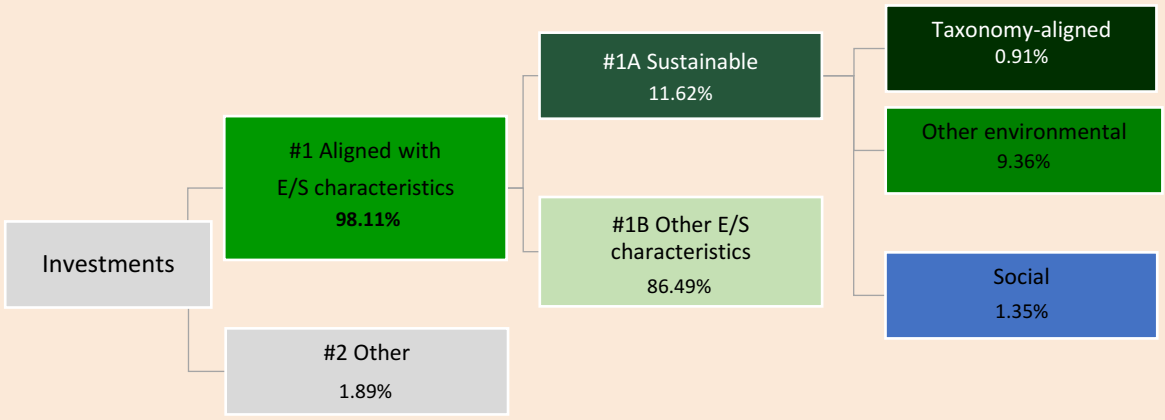
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 11.62% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

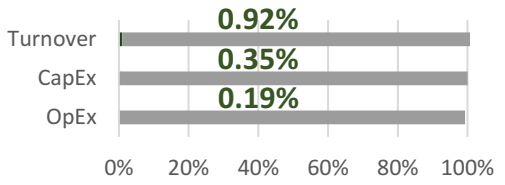
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.91% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

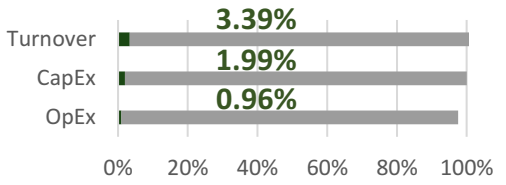
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.81%	99.65%	99.08%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.01%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	0.18%	0.34%	0.91%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.04%	98.01%	96.61%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.96%	1.98%	3.39%

This graph represents 15.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.04%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.03%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **9.36%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 1.35%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.
- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 41.96% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS MULTI SECTOR CREDIT

Legal entity identifier: 222100C0Q8DZ0ONZYS48

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 39.47% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **50% ICE BofA Global Large Cap Corporate Index + 50% ICE BofA Global High Yield Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.581 (C).**
- The weighted average ESG rating of the investment universe is **-0.105** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.512 (C) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

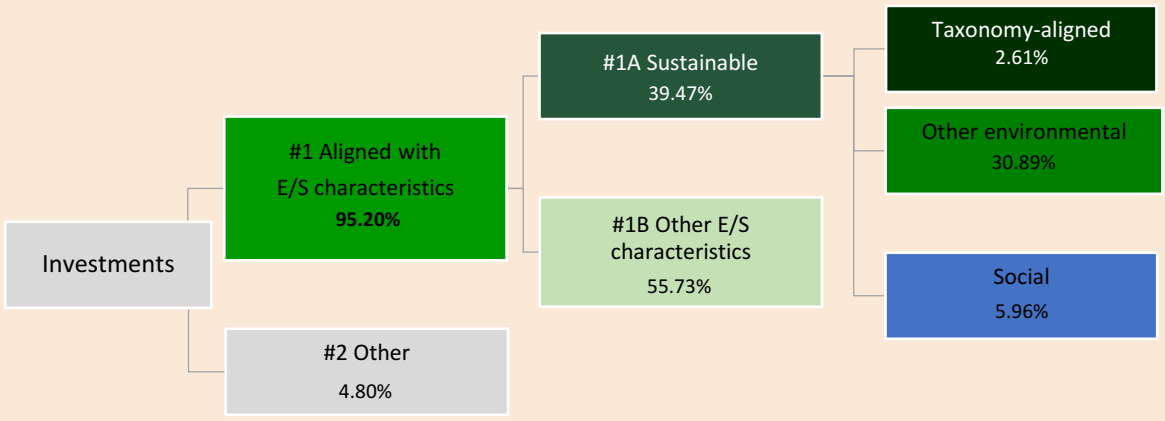
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
UK TSY 4.5% 06/28	Treasuries	Treasuries	United Kingdom	3.88%
US TSY 4.125% 10/29	Treasuries	Treasuries	United States	3.49%

CAJAMA VAR 06/31 EMTN	Corporates	Banking	Spain	0.93%

What was the proportion of sustainability-related investments?

The fund invested 39.47% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

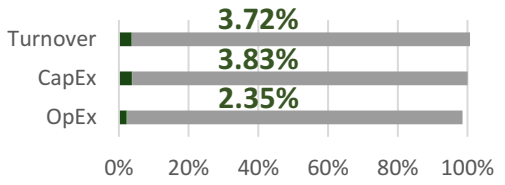
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.61% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

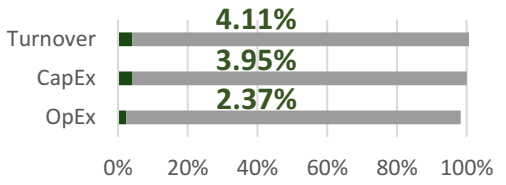
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.65%	96.17%	96.28%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.18%	0.14%	0.08%
Taxonomy-aligned [No gas and nuclear]	2.17%	3.68%	3.65%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.63%	96.05%	95.89%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.37%	3.95%	4.10%

This graph represents 83.8% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.36% and the share of investment in enabling activities was 0.41%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.53%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **30.89%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.96%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 63.38% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL CORPORATE BOND CLIMATE

Legal entity identifier: 213800ZDJ7583Z2H5G06

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.51%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The Benchmark is a broad market index which assesses and includes constituents according to environmental characteristics, and therefore is aligned with the environmental characteristics promoted by the Sub-Fund.

The product is labeled SRI (Social and Responsible Investment). It sought throughout the year to promote the 3 dimensions (environmental, social and governance) by taking into account the ESG rating of issuers in the construction of the portfolio.

The ESG rating of issuers aims to assess their ability to manage the potential negative impact of their activities on sustainability factors. This analysis thus aims to assess their Environmental and Societal behaviors in terms of Governance by assigning them an ESG rating ranging from A (best rating) to G (worse rating), so as to achieve a more global assessment of the risks.

1. The portfolio has consistently applied the following Amundi exclusion policy:
- Legal exclusions on controversial weapons
- Companies that seriously and repeatedly contravene one or more of the 10 principles of the Global Compact (UN Global Compac), without credible corrective measures;
- The sectoral exclusions of the Amundi group on Coal and Tobacco; (details of this policy are available in Amundi's Responsible Investment Policy available on the website www.amundi.fr)
2. No investment has been made in issuers rated F or G. For any issuer whose rating has been downgraded to F or G, the securities already present in the portfolio were sold within the timeframe committed to in the prospectus and taking into account financial interest of holders
3. The weighted average ESG score of the portfolio has consistently been higher than the weighted average ESG score of the fund's benchmark after eliminating the 20% of the worst issuers
4. The fund has favored issuers that are leaders in their sector of activity according to the ESG criteria identified by the team of extra-financial analysts of the management company ("best in class" approach). With the exception of the above exclusions, all economic sectors are represented in this approach and the UCI may therefore be exposed to certain controversial sectors.

During the financial year, the product continuously promoted environmental characteristics by aiming to reduce its carbon intensity by aligning its carbon footprint intensity to that of its Benchmark **SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX.**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.614 (C).**
- The weighted average ESG rating of the Benchmark is **0.185** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

The sustainability indicator used is the portfolio carbon footprint intensity, which is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Benchmark. As a result, securities with relatively low environmental footprints had a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints.

- The weighted average carbon footprint intensity of the portfolio is **67.25**
- The weighted average carbon footprint intensity of the Benchmark is **86.97**

In Addition, the Sub-Fund is committed to outperform the benchmark with respect to two indicators relating to principal adverse impact on sustainability: Total carbon intensity (tCO2e/M€ invested) and Investments in companies without carbon emissions reduction initiatives (%), both as defined under Commission Delegated Regulation (EU) 2022/1288.

- The total carbon intensity (tCO2e/M€ invested) of the portfolio is **89.**
- The total carbon intensity (tCO2e/M€ invested) of the Benchmark is **104.**

- Investments in companies without carbon emissions reduction initiatives of the portfolio is **10.1%.**
- Investments in companies without carbon emissions reduction initiatives of the Benchmark is **26.8%.**

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.591 (C) and the weighted average ESG rating of the Benchmark was 0.189 (D).At the end of the previous period, the weighted average carbon intensity of the portfolio was 88.81 and the weighted average carbon intensity reference index was 95.99

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

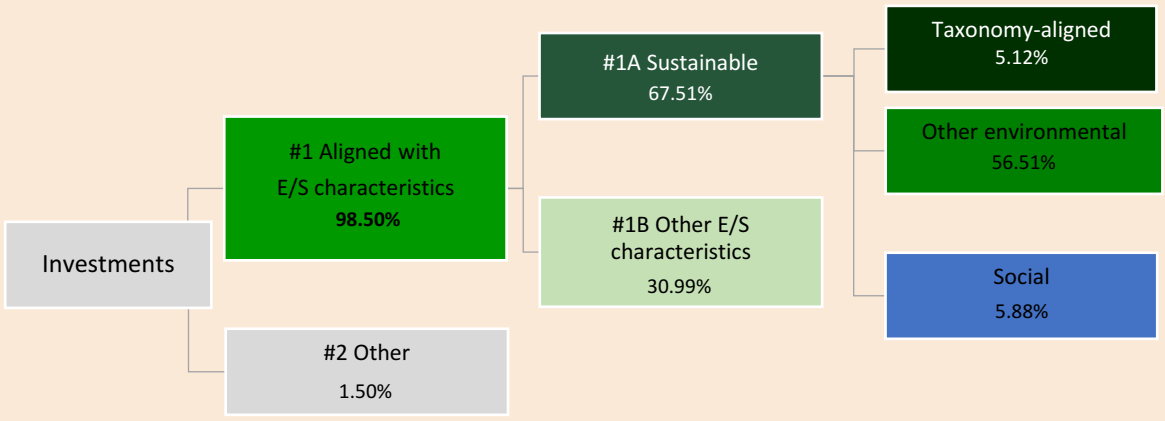
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
TMUS 3.4% 10/52	Corporates	Communications	United States	1.29%

What was the proportion of sustainability-related investments?

The fund invested 67.51% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

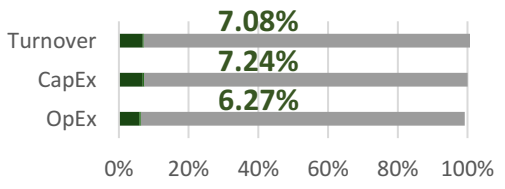
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 5.12% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

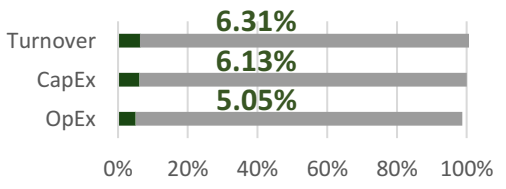
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.73%	92.76%	92.92%
Taxonomy-aligned: Fossil Gas	0.01%	0.02%	0.02%
Taxonomy-aligned: Nuclear	0.42%	0.40%	0.22%
Taxonomy-aligned [No gas and nuclear]	5.84%	6.83%	6.85%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	94.95%	93.87%	93.69%
Taxonomy-aligned: Fossil Gas	0.01%	0.02%	0.02%
Taxonomy-aligned: Nuclear	0.01%	0.08%	0.02%
Taxonomy-aligned [No gas and nuclear]	5.02%	6.04%	6.27%

This graph represents 98.3% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.27% and the share of investment in enabling activities was 1.59%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.53%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **56.51%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.88%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 94.39% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The sustainable investment objective is attained by aligning the carbon footprint reduction objectives of the fund with SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX. The portfolio carbon footprint intensity is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Index.

As a result, securities with relatively low environmental footprints have a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints. In addition, the fund excludes companies on the basis of controversial behavior and (or) controversial products in accordance with the Responsible Investment Policy.

• The weighted average carbon footprint intensity of the portfolio is 67.25
• The weighted average carbon footprint intensity of the Benchmark is 86.97

How does the reference benchmark differ from a broad market index ?

A broad market index, does not assess or include its constituents according to environment characteristics and therefore is not aligned with environmental characteristics.

The index used is a "Paris Aligned Benchmark" which incorporates specific objectives related to emission reductions and the transition to a low-carbon economy through the selection and weighting of underlying constituents.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The weighted average ESG rating of the portfolio is 0.614 (C).

The weighted average ESG rating of the Benchmark is 0.185 (D).

• The weighted average carbon footprint intensity of the portfolio is 67.25
• The weighted average carbon footprint intensity of the Benchmark is 86.97

How did this financial product perform compared with the reference benchmark ?

The sustainable investment objective is attained by aligning the carbon footprint reduction objectives of the fund with SOLACTIVE PARIS ALIGNED GLOBAL CORPORATE USD HEDGED INDEX. The portfolio carbon footprint intensity is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Index.

As a result, securities with relatively low environmental footprints have a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints. In addition, the fund excludes companies on the basis of controversial behavior and (or) controversial products in accordance with the Responsible Investment Policy.

- The weighted average carbon footprint intensity of the portfolio is 67.25
- The weighted average carbon footprint intensity of the Benchmark is 86.97

How did this financial product perform compared with the broad market index ?

A broad market index, does not assess or include its constituents according to environment characteristics and therefore is not aligned with environmental characteristics.

The index used is a "Paris Aligned Benchmark" which incorporates specific objectives related to emission reductions and the transition to a low-carbon economy through the selection and weighting of underlying constituents.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS OPTIMAL YIELD

Legal entity identifier: 549300SEXJO4VZFPO521

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **34.15%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **67% BofAML Eur HY Constrained + 23% JPM CEMBI High Yield + 10% BofAML US Corporate Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.354 (D).**
- The weighted average ESG rating of the investment universe is **0.145** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.241 (D) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

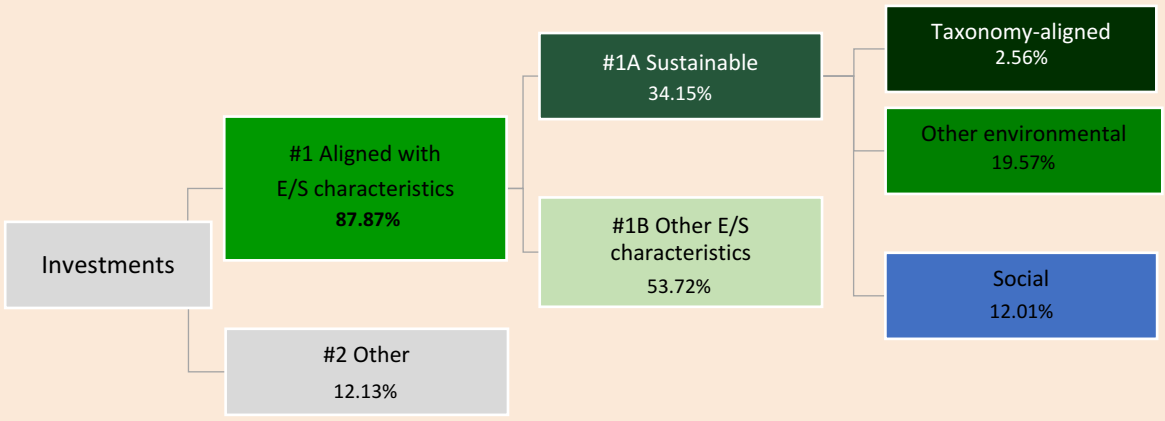
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 34.15% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Corporates	*Consumer Discretionary*	*16.04%*
Corporates	*Communications*	*13.91%*
Corporates	*Consumer Staples*	*10.08%*
Corporates	*Electric*	*8.96%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

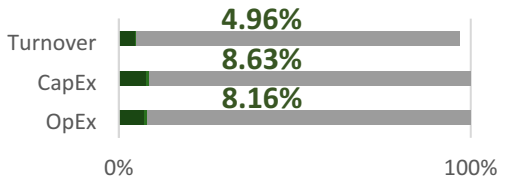
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.56% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

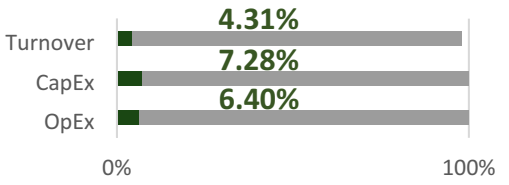
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	91.84%	91.37%	95.04%
Taxonomy-aligned: Fossil Gas	0.01%	0.02%	0.02%
Taxonomy-aligned: Nuclear	0.99%	0.79%	0.29%
Taxonomy-aligned [No gas and nuclear]	7.16%	7.82%	4.65%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.60%	92.72%	95.69%
Taxonomy-aligned: Fossil Gas	0.01%	0.02%	0.02%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	6.38%	7.26%	4.29%

This graph represents 90.8% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.91% and the share of investment in enabling activities was 2.07%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.98%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **19.57%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 12.01%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 49.14% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS OPTIMAL YIELD SHORT TERM

Legal entity identifier: 549300NI6I5JE79M9X21

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.71% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **60% BofAML Eur HY Constrained + 30% JPM CEMBI High Yield + 10% BofAML US Corporate Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.395 (D).**
- The weighted average ESG rating of the investment universe is **0.115** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.256 (D) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

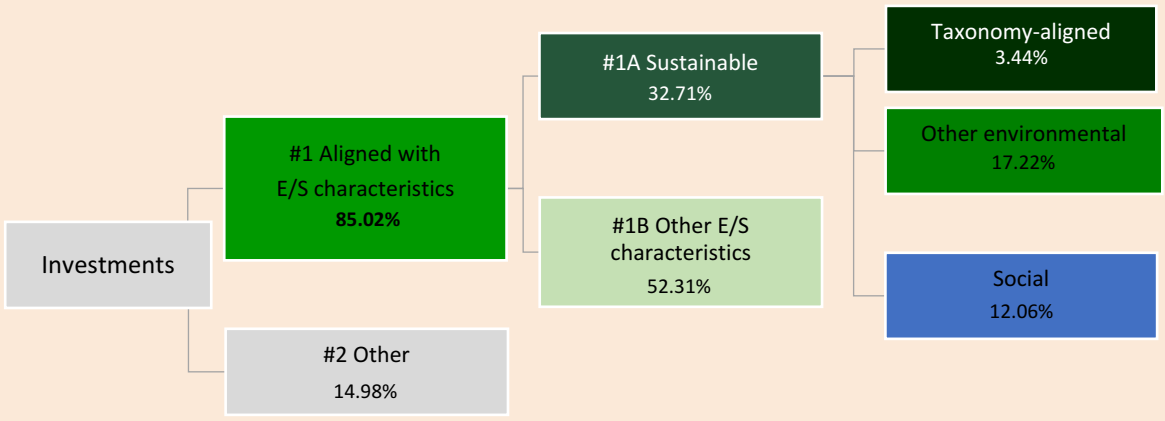
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 32.71% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

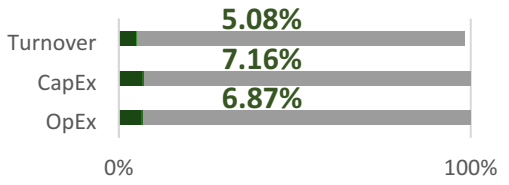
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 3.44% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

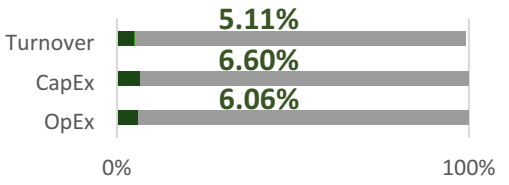
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.13%	92.84%	94.92%
Taxonomy-aligned: Fossil Gas	0.01%	0.02%	0.02%
Taxonomy-aligned: Nuclear	0.56%	0.45%	0.01%
Taxonomy-aligned [No gas and nuclear]	6.30%	6.70%	5.06%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.94%	93.40%	94.89%
Taxonomy-aligned: Fossil Gas	0.01%	0.02%	0.02%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	6.05%	6.57%	5.09%

This graph represents 91.1% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.27% and the share of investment in enabling activities was 1.43%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.29%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **17.22%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 12.06%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 46.29% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS STRATEGIC INCOME

Legal entity identifier: 5493004ZTK6D21CGCO05

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.37% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **BLOOMBERG US UNIVERSAL INDEX.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.409 (D).**
- The weighted average ESG rating of the Benchmark is **0.391** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.27 (D) and the weighted average ESG rating of the Benchmark was 0.232 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

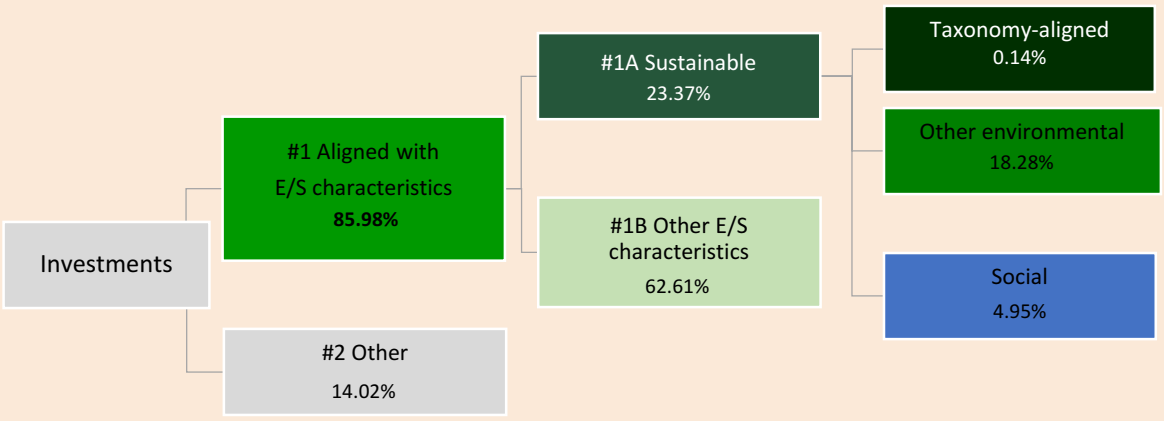
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
TBIP USA 16/07/26	Treasuries	Treasuries	United States	3.20%
IBRD 3.5% 10/30	Government-Related	Supranationals	United States	2.24%
IBRD 4.5% 04/31	Government-Related	Supranationals	United States	2.10%
EIB 3.75% 03/31	Government-Related	Supranationals	LUX	1.36%
TII 1.875% 07/35	Treasuries	Treasuries	United States	1.07%
AEP VAR 03/56 C	Corporates	Electric	United States	1.05%
SOCGEN VAR 04/33 144A	Corporates	Banking	France	0.93%
LLOYDS VAR 06/30	Corporates	Banking	United Kingdom	0.79%
FNCI 5.5 7/26	Securitized	Agency MBS	United States	0.75%
HILCRP 7.25% 02/35 144A	Corporates	Energy	United States	0.73%
HSBC VAR 11/30	Corporates	Banking	United Kingdom	0.66%
G2SF 5.5 7/26	Securitized	Agency MBS	United States	0.65%
FN MA5994	Securitized	Agency MBS	United States	0.64%
G2 MA8042	Securitized	Agency MBS	United States	0.61%
F 6.5% 02/35	Corporates	Consumer Discretionary	United States	0.61%

What was the proportion of sustainability-related investments?

The fund invested 23.37% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.14% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

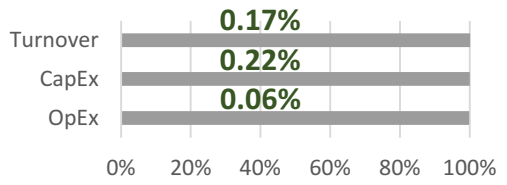
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

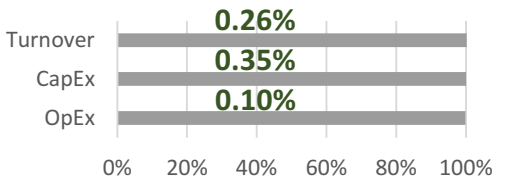
☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.94%	99.78%	99.83%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.06%	0.22%	0.17%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.90%	99.65%	99.74%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.10%	0.35%	0.26%

This graph represents 63.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.02%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.16%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **18.28%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 4.95%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 52.94% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS US CORPORATE BOND CLIMATE

Legal entity identifier: 213800VWP1P2KAFPEU55

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **33.76%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **Bloomberg US Corporate Index.** In determining the ESG score of the Product and the Investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

During the financial year, the product continuously promoted environmental characteristics by aiming to reduce its carbon intensity by aligning its carbon footprint intensity to that of its Benchmark **MSCI USD IG Climate Paris Aligned Corporate Bond Index.**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.255 (D).**
- The weighted average ESG rating of the benchmark is **-0.132 (D).**
- The weighted average ESG rating of the Investment universe is **-0.253 (D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

The sustainability indicator used is the portfolio carbon footprint intensity, which is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Benchmark. As a result, securities with relatively low environmental footprints had a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints.

- The weighted average carbon footprint intensity of the portfolio is **50.24**
- The weighted average carbon footprint intensity of the Benchmark is **100.42**

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.133 (D) and the weighted average ESG rating of the Investment universe was - 0.111 (D). At the end of the previous period, the weighted average carbon intensity of the portfolio was 49.58 and the weighted average carbon intensity reference index was 140.83

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

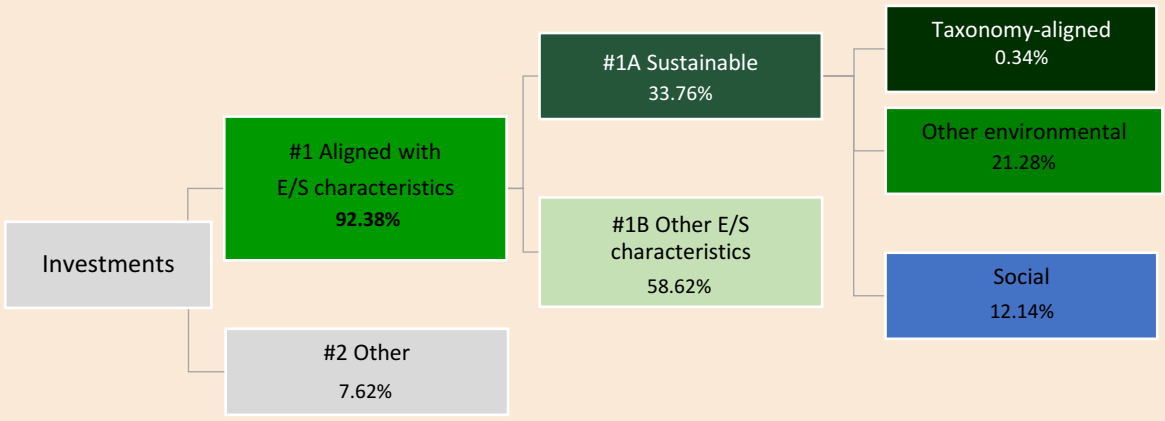
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

What was the proportion of sustainability-related investments?

The fund invested 33.76% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.34% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

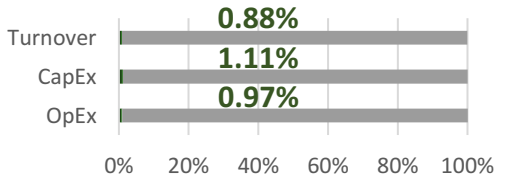
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

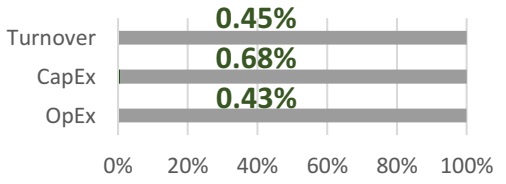
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.03%	98.89%	99.12%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.30%	0.24%	0.26%
Taxonomy-aligned [No gas and nuclear]	0.67%	0.87%	0.63%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.57%	99.32%	99.55%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.43%	0.68%	0.45%

This graph represents 80.8% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.27% and the share of investment in enabling activities was 0.29%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.28%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **21.28%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 12.14%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 59.33% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The sustainable investment objective is attained by aligning the carbon footprint reduction objectives of the fund with MSCI USD IG Climate Paris Aligned Corporate Bond Index. The portfolio carbon footprint intensity is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Index.

As a result, securities with relatively low environmental footprints have a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints. In addition, the fund excludes companies on the basis of controversial behavior and (or) controversial products in accordance with the Responsible Investment Policy.

• The weighted average carbon footprint intensity of the portfolio is 50.24
• The weighted average carbon footprint intensity of the Benchmark is 100.42

How does the reference benchmark differ from a broad market index ?

A broad market index, does not assess or include its constituents according to environment characteristics and therefore is not aligned with environmental characteristics.

The index used is a "Paris Aligned Benchmark" which incorporates specific objectives related to emission reductions and the transition to a low-carbon economy through the selection and weighting of underlying constituents.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The weighted average ESG rating of the portfolio is 0.255 (D).
The weighted average ESG rating of the Investment universe is -0.132 (D).

• The weighted average carbon footprint intensity of the portfolio is 50.24
• The weighted average carbon footprint intensity of the Benchmark is 100.42

How did this financial product perform compared with the reference benchmark ?

The sustainable investment objective is attained by aligning the carbon footprint reduction objectives of the fund with MSCI USD IG Climate Paris Aligned Corporate Bond Index. The portfolio carbon footprint intensity is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Index.

As a result, securities with relatively low environmental footprints have a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints. In addition, the fund excludes companies on the basis of controversial behavior and (or) controversial products in accordance with the Responsible Investment Policy.

- The weighted average carbon footprint intensity of the portfolio is 50.24
- The weighted average carbon footprint intensity of the Benchmark is 100.42

How did this financial product perform compared with the broad market index ?

A broad market index, does not assess or include its constituents according to environment characteristics and therefore is not aligned with environmental characteristics.

The index used is a "Paris Aligned Benchmark" which incorporates specific objectives related to emission reductions and the transition to a low-carbon economy through the selection and weighting of underlying constituents.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS US BOND

Legal entity identifier: 5493005LBJJ6BWRENA39

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 23.28% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **Bloomberg US Aggregate Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.489 (D).**
- The weighted average ESG rating of the Benchmark is **0.447** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.455 (D) and the weighted average ESG rating of the Benchmark was 0.289 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

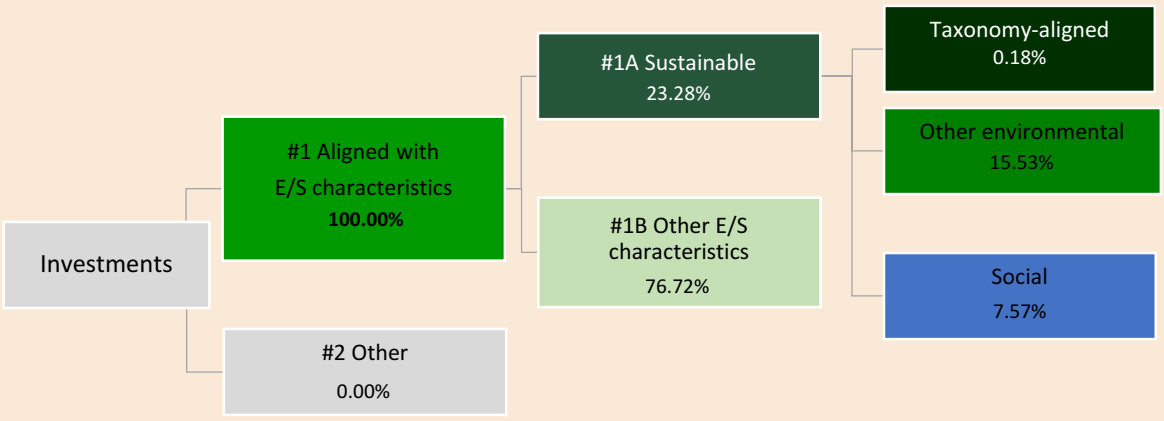
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

1670

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

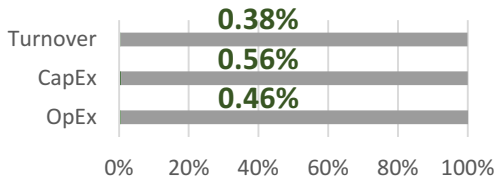
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.18% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

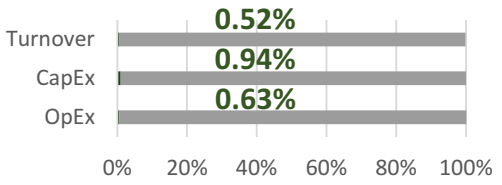
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.



Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

☐ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.54%	99.44%	99.62%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.10%	0.08%	0.09%
Taxonomy-aligned [No gas and nuclear]	0.36%	0.48%	0.30%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.37%	99.06%	99.48%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.63%	0.94%	0.52%

This graph represents 39.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.10% and the share of investment in enabling activities was 0.14%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.13%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **15.53%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.57%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 49.11% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS US CORPORATE BOND SELECT

Legal entity identifier: 222100LE431F865A4S54

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **33.19%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **BLOOMBERG US CORPORATE INDEX.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.11 (D).**
- The weighted average ESG rating of the Benchmark is **-0.312** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.112 (D) and the weighted average ESG rating of the Benchmark was -0.286 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

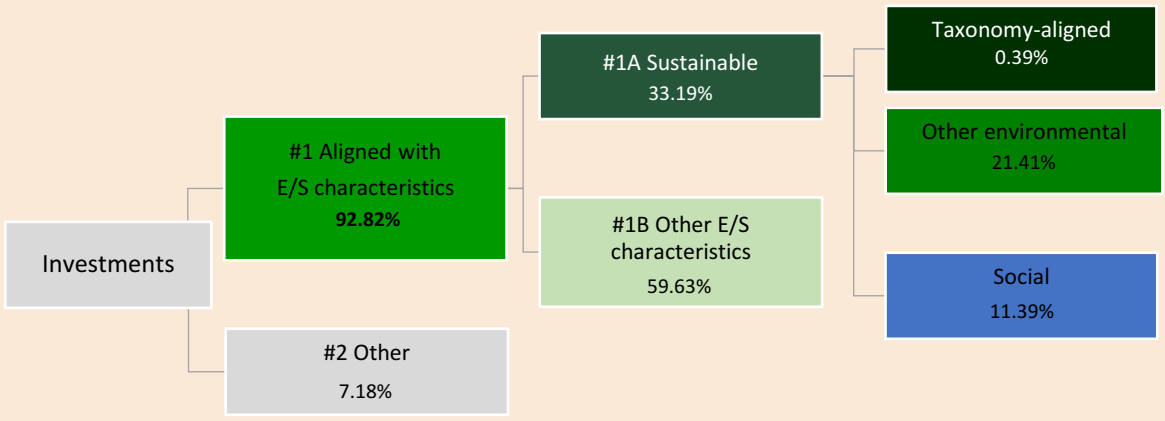
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ET 6.3% 01/56	Corporates	Energy	United States	1.32%
AMG 5.5% 02/36	Corporates	BROKERAGE	United States	1.31%
MUTOMA 4.546% 01/31 144A	Corporates	Insurance	United States	1.29%
BPCEGP VAR 05/31 144A	Corporates	Banking	France	1.20%
FARMER FRN 11/57	Corporates	Insurance	United States	1.16%
MYLIFE VAR 06/55 144A	Corporates	Insurance	Japan	1.11%

MS VAR 01/38	Corporates	Banking	United States	0.95%
DUK 5% 08/52	Corporates	Electric	United States	0.95%

What was the proportion of sustainability-related investments?

The fund invested 33.19% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Corporates	*Banking*	*25.32%*
Corporates	*Insurance*	*13.16%*
Corporates	*Electric*	*11.13%*
Corporates	*Consumer Discretionary*	*8.97%*

Corporates	*Energy*	*8.46%*

Corporates	*Basic Industry*	*1.50%*
Corporates	*Transportation*	*1.46%*
Government-Related	*Sovereign*	*0.99%*
Corporates	*Finance Companies*	*0.99%*
Government-Related	*Agencies*	*0.54%*
Corporates	*Other Utilities*	*0.11%*
Others	*Others*	*-0.07%*
Forex	*Forex*	*-0.57%*
Cash	*Cash*	*0.26%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

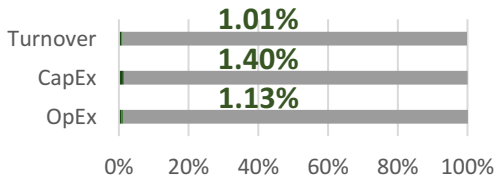
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.39% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

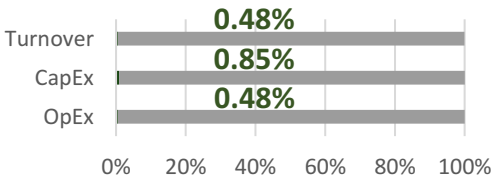
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.87%	98.60%	98.99%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.32%	0.26%	0.28%
Taxonomy-aligned [No gas and nuclear]	0.81%	1.14%	0.73%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.52%	99.15%	99.52%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.48%	0.85%	0.47%

This graph represents 94.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.29% and the share of investment in enabling activities was 0.30%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.39%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **21.41%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 11.39%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 74.02% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS US SHORT TERM BOND

Legal entity identifier: 549300QBCEQZSOFGDW23

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 12.34% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **ICE BOFA 0-1 YEAR US CORPORATE INDEX (ESG).** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.018 (D).**
- The weighted average ESG rating of the Investment universe is **-0.136** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.192 (D) and the weighted average ESG rating of the Investment universe was -0.184 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

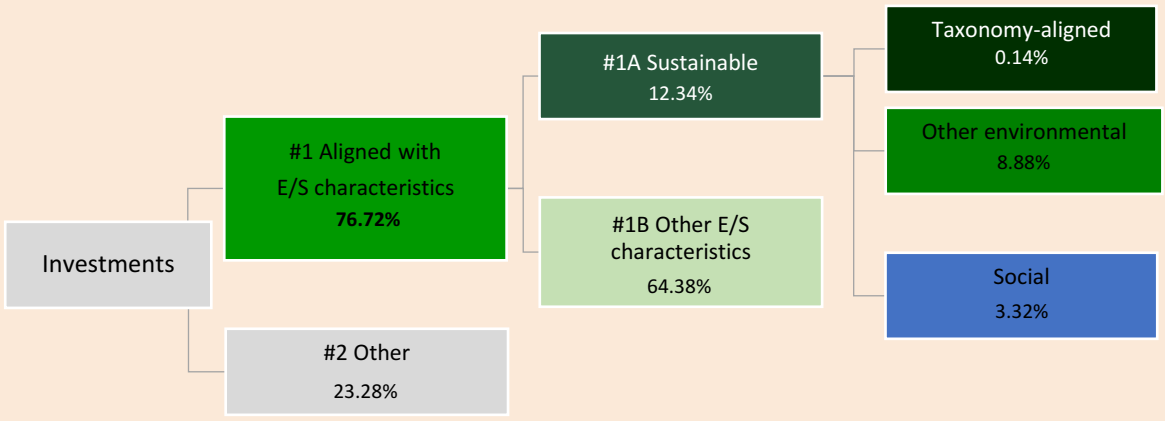
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
TBIP USA 14/07/26	Treasuries	Treasuries	United States	2.14%

What was the proportion of sustainability-related investments?

The fund invested 12.34% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

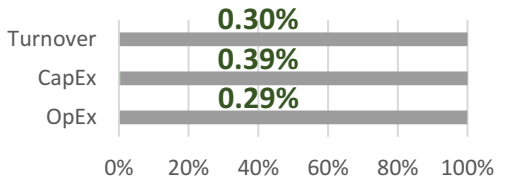
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.14% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

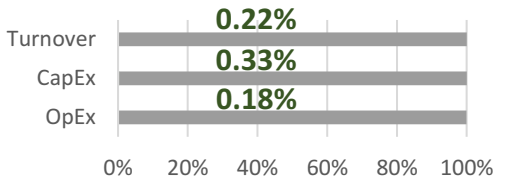
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.71%	99.61%	99.70%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.07%	0.06%	0.06%
Taxonomy-aligned [No gas and nuclear]	0.22%	0.33%	0.24%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.82%	99.67%	99.78%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.18%	0.33%	0.22%

This graph represents 77.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.07% and the share of investment in enabling activities was 0.10%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.13%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **8.88%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 3.32%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 49.37% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS ASIA BOND INCOME RESPONSIBLE

Legal entity identifier: 213800UVZ2BRX4N1ZK70

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **37.80%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **90% JPM Asia Credit Index + 10% Markit iBoxx ALBI (USD Unhedged).** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.530 (C).**
- The weighted average ESG rating of the investment universe is **0.007** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.293 (D) and the weighted average ESG rating of the investment universe was -0.224 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

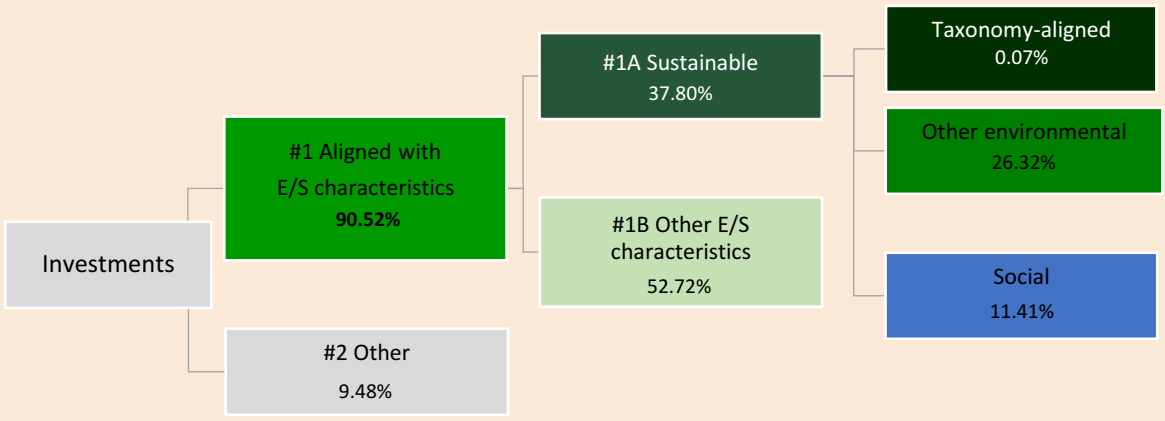
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
HYSAN VAR PERP	Corporates	Other Financials	British Virgin Islands (BVI)	2.59%

What was the proportion of sustainability-related investments?

The fund invested 37.80% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

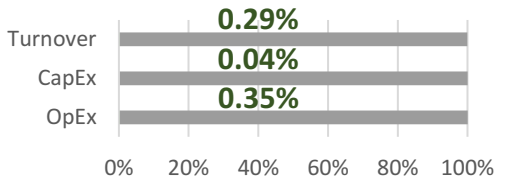
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.07% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

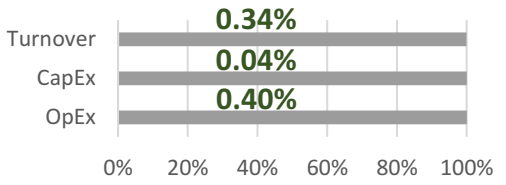
☒ No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.65%	99.96%	99.71%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.35%	0.04%	0.29%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.60%	99.96%	99.66%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.40%	0.04%	0.34%

This graph represents 86.2% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.06%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.02%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.32%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 11.41%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 57.60% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS CHINA RMB AGGREGATE BOND

Legal entity identifier: 213800R541S7BYLJJK77

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **10.55%** of sustainable investments
  - [ ] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **BLOOMBERG CHINA AGGREGATE INDEX.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **-0.126 (D).**
- The weighted average ESG rating of the Benchmark is **-0.226** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.239 (D) and the weighted average ESG rating of the Benchmark was -0.285 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

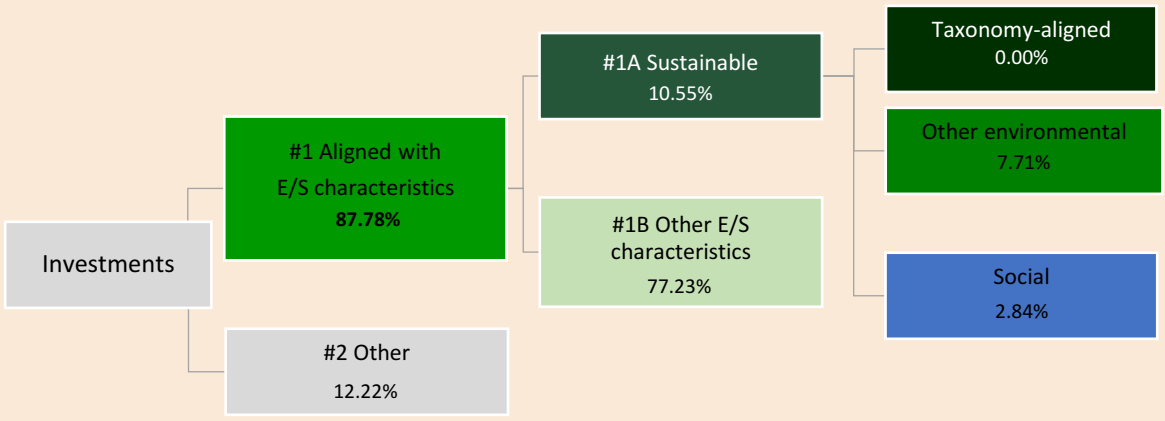
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
CGB 2.11% 08/34 INBK	Treasuries	Treasuries	China	7.40%
CGB 2.88% 02/33 INBK	Treasuries	Treasuries	China	6.23%

What was the proportion of sustainability-related investments?

The fund invested 10.55% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

This graph represents 32.5% of the total investments

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.00%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **7.71%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 2.84%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 41.72% of the product has been subject to an active engagement that promotes dialogue with investee companies.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS BLENDED BOND

Legal entity identifier: 222100ABBJIBM1BE8222

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **10.20%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **JP Morgan EMBI Global Diversified (hedged to EUR) Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **-0.001 (D).**
- The weighted average ESG rating of the investment universe is **-0.103** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.041 (D) and the weighted average ESG rating of the investment universe was -0.127 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

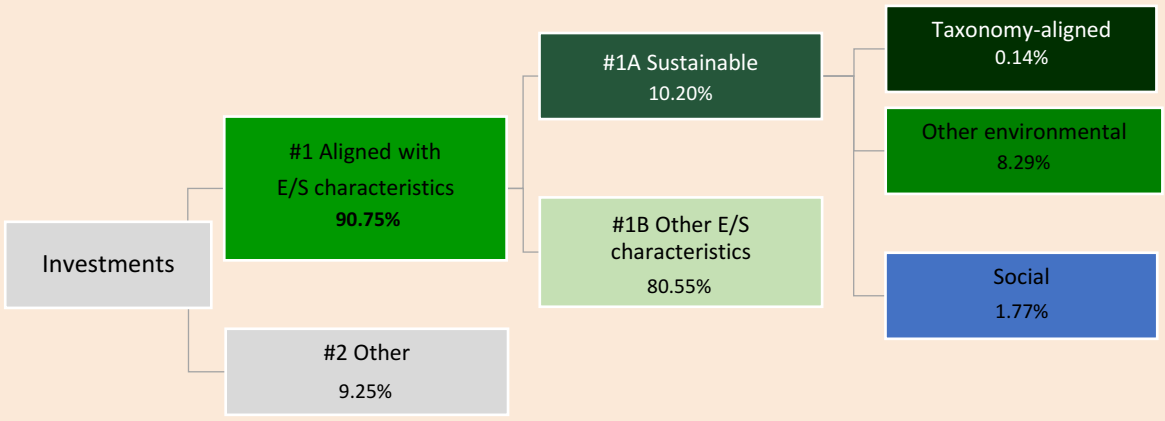
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
A-F EMERGING MKT CORP BD - Z- USD	Financials	Mutual Funds	Luxembourg	2.18%
COLTES 13.25% 02/33 B	Treasuries	Treasuries	Colombia	1.99%
INDOGB 6.5% 04/36 108	Treasuries	Treasuries	Indonesia	1.51%
AMU PLAN-EM GR ONE-SEN USDC	Financials	Mutual Funds	Luxembourg	1.26%
BTF 30/09/26 14W	Treasuries	Treasuries	France	1.23%
TURKEY 6.375% 05/31	Government-Related	Sovereign	Turkey	1.04%
MEXICO 6.625% 01/38	Government-Related	Sovereign	Mexico	1.01%

ARGENT FRN 07/46	Government-Related	Sovereign	Argentina	0.85%
PHILIP 5.325% 06/36	Government-Related	Sovereign	Philippines	0.84%

What was the proportion of sustainability-related investments?

The fund invested 10.20% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

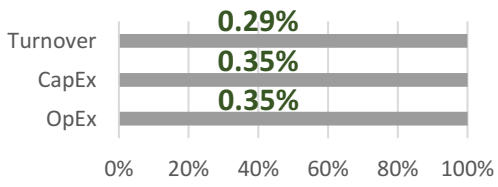
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.14% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

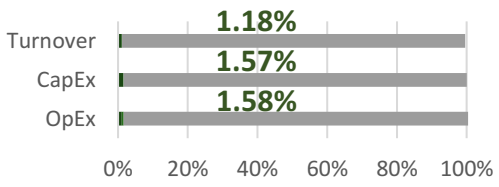
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.65%	99.65%	99.71%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.12%	0.02%	0.03%
Taxonomy-aligned [No gas and nuclear]	0.22%	0.33%	0.27%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.42%	98.43%	98.82%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.58%	0.09%	0.12%
Taxonomy-aligned [No gas and nuclear]	1.01%	1.48%	1.05%

This graph represents 20.8% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.05%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.24%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **8.29%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 1.77%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 47.19% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS BOND

Legal entity identifier: 549300KZW6KQ7WLJO866

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.48% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **50% JP Morgan EMBI Global Diversified Index + 50% JP Morgan CEMBI Global Diversified Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **-0.111 (D).**
- The weighted average ESG rating of the investment universe is **-0.090** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

- ***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.147 (D) and the weighted average ESG rating of the investment universe was -0.156 (D).

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

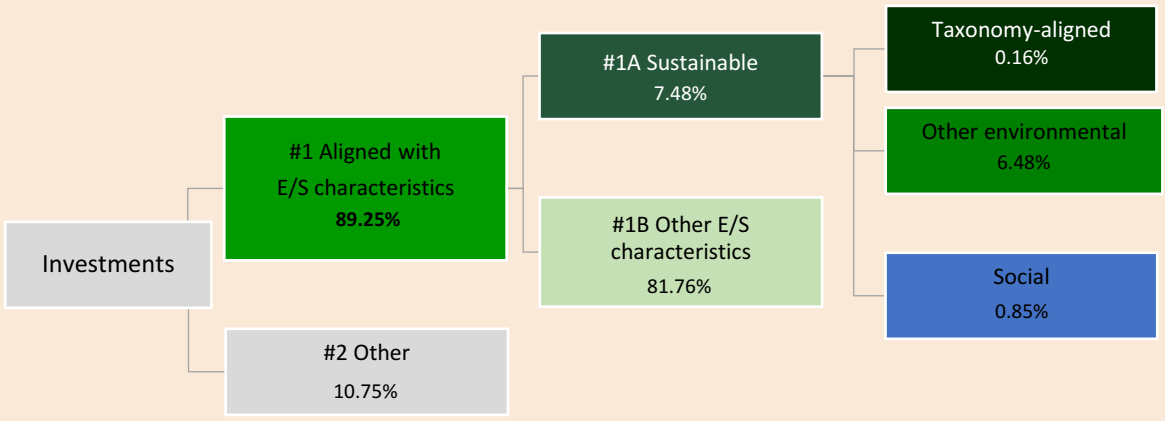
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

What was the proportion of sustainability-related investments?

The fund invested 7.48% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.16% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

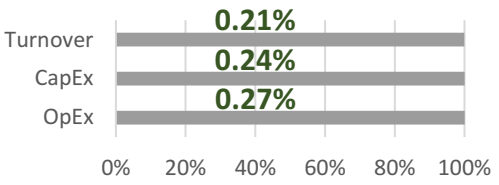
Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

[ ] No

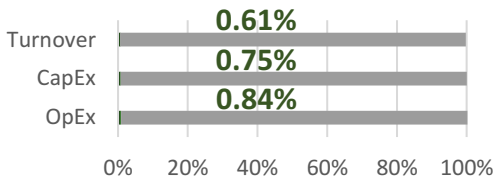
[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full



among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.73%	99.76%	99.79%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.07%	0.01%	0.02%
Taxonomy-aligned [No gas and nuclear]	0.20%	0.23%	0.19%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.16%	99.25%	99.39%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.22%	0.03%	0.05%
Taxonomy-aligned [No gas and nuclear]	0.61%	0.71%	0.56%

This graph represents 29.3% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.03%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.05%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **6.48%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 0.85%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 35.19% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS CORPORATE BOND

Legal entity identifier: 529900YJOJ3E3FRQQ325

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **26.87%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **JP Morgan CEMBI Broad Diversified Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.036 (D).**
- The weighted average ESG rating of the benchmark is **-0.076** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.123 (D) and the weighted average ESG rating of the benchmark was -0.187 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

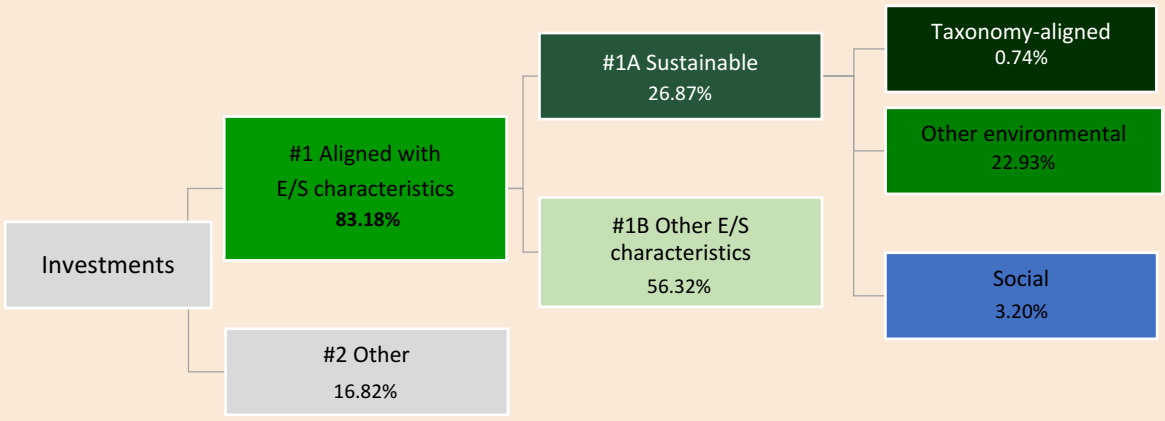
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

What was the proportion of sustainability-related investments?

The fund invested 26.87% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

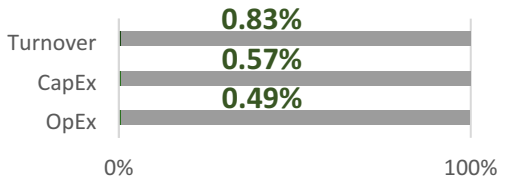
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.74% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

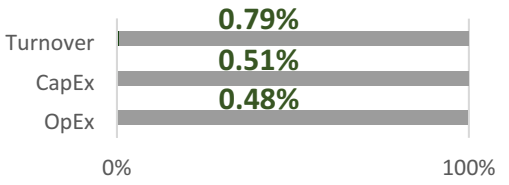
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.51%	99.43%	99.17%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%

Taxonomy-aligned [No gas and nuclear]	0.39%	0.50%	0.77%

This graph represents 90.7% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.04% and the share of investment in enabling activities was 0.05%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.10%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **22.93%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 3.20%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 49.09% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS CORPORATE HIGH YIELD BOND

Legal entity identifier: 5493006QGDCTMW9Y1N50

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It made **sustainable investments with an environmental objective:** _____
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made a **sustainable investments with a social objective:** _____

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 24.19% of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its Benchmark **JP Morgan CEMBI Broad Diversified High Yield Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The Benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.076 (D).**
- The weighted average ESG rating of the Benchmark is **-0.143** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.092 (D) and the weighted average ESG rating of the Benchmark was -0.214 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

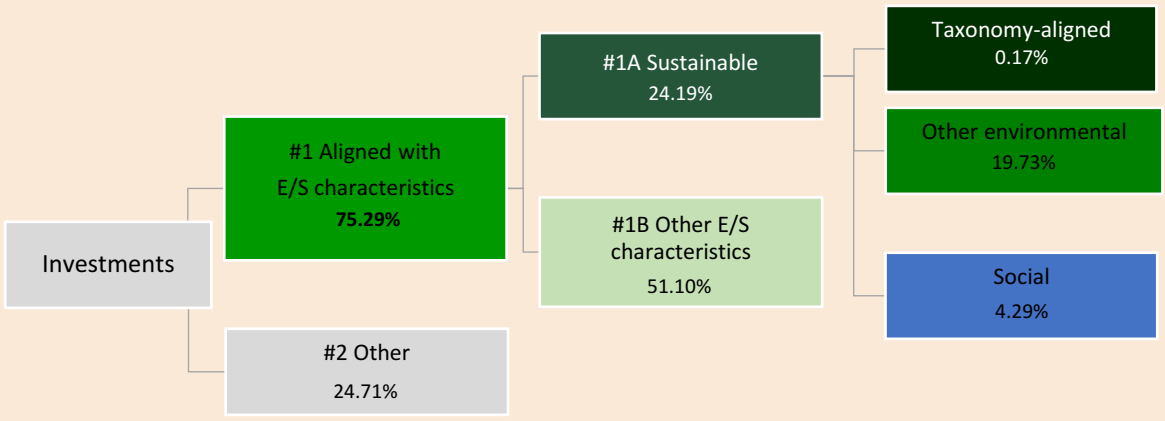
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
YPFDAR 8.75% 09/31 REGS	Government-Related	Agencies	Argentina	2.28%
VEDLN 10.875% 09/29 REGS	Corporates	Basic Industry	United Kingdom	2.02%
TECOAR 9.25% 05/33 REGS	Corporates	Communications	Argentina	1.99%
AUNA 8.75% 11/32 REGS	Corporates	Consumer Staples	Luxembourg	1.56%
KOS 7.5% 03/28 REGS	Corporates	Energy	United States	1.50%
A-F ASIA BD INC RESPONSIBLE-Z USD-C	Financials	Mutual Funds	Luxembourg	1.44%
WYNMAC 6.75% 02/34 REGS	Corporates	Consumer Discretionary	Cayman Islands	1.25%

AICNRA 5.75% 06/33 REGS	Corporates	Energy	Spain	0.86%
COLTEL 4.95% 07/30 REGS	Corporates	Communications	Colombia	0.84%

What was the proportion of sustainability-related investments?

The fund invested 24.19% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

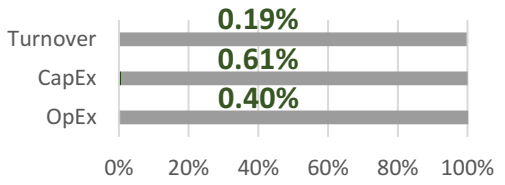
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.17% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

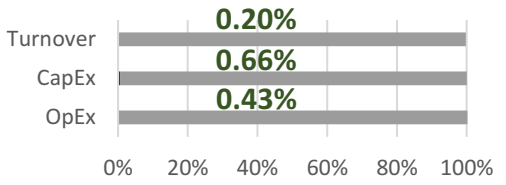
☒ No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.60%	99.39%	99.81%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.40%	0.61%	0.18%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.57%	99.34%	99.80%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.43%	0.66%	0.20%

This graph represents 92.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.12%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.24%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **19.73%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 4.29%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 35.93% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS GREEN BOND

Legal entity identifier: 2138001AOC3QUTY9SA42

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **61.67%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [ ] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **JP Morgan EM Credit Green Bond Diversified Index (Hedged to USD).** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

The sub-fund maintained the committed share of its allocation invested in the use of green bonds.

Green bonds' objective is to finance projects that generate a positive and measurable impact on the environment. The key indicator measuring the green bonds' impact is the "Avoided tons of CO2 emissions per million of euros invested in a year". Beyond the quantitative and qualitative financial analysis of the bonds that are likely to compose the portfolio, the selection process includes an ESG strategy assessment at the issuer level and a green bond assessment following several points of analysis:

1. Amundi has developed a proprietary ESG scoring system based on a seven-letter scale, ranging from A to G, where A is the best and G the worst rating. Any issuer with a G-rating is excluded from all of Amundi's actively managed portfolios. We implement the verification of the issuer's ESG rating and check the rating's compliance with the related fund's criteria. As stated above, issuers with a G-rating on Amundi's ESG rating scale are not eligible for investment. If there are weaknesses, the ESG Research team will look for any controversy on the related pillar (E, S and G) in more detail.
2. Green bond assessment in terms of: (i) project analysis, via analysis of the geographical location of assets, action on the assets, assessment of any additional impact of the green project on the environment, biodiversity, local communities, or other social aspects (Do no significant harm), alignment to industry standards (e.g. alignment with International Capital Markets Association Green Bond Principles, Climate Bond Initiative, EU Taxonomy). (ii) issuer analysis at global ESG strategy and controversy levels, (iii) green funding rationale (type of projects funded, allocation of green assets, type of instruments funding green projects) and (iv) transparency (green bond report, second party opinion existence)
3. Ongoing monitoring (ex-post investment), which includes regular review of allocation and impact report of the green bond, controversies the issuer is involved in and issuer's environmental strategy.

Finally, all selected Green Bonds shall meet the criteria and guidelines of the Green Bond Principles as published by the International Capital Market Association. Please visit Amundi's Responsible Investment Policy for more details on the above.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.419 (D).**
- The weighted average ESG rating of the benchmark is **0.259** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common

to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

At the end of the period, the portfolio holds **84.64%** of green bonds.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.239 (D) and the weighted average ESG rating of the benchmark was 0.097 (D).At the end of the previous period, the portfolio held 87.20% of green bonds.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Concerning green, social and sustainable debt instruments (“GSS”), as defined by the International Capital Market Association (“ICMA”), and structured in accordance with its principles or guidelines contribute by design to an environmental or social objective they are deemed to pass the Contribution Test described above, provided that:

– Where applicable, the issuers operate in an activity which is compatible with long-term sustainability and development goals; or

– The GSS instruments have been analysed by Amundi’s ESG analysts and comply with Amundi’s GSS requirements (including funding rationale, issuer ESG performance, project analysis and transparency).

Principal adverse impacts are the most significant negative impacts of investment decisions

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of

this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

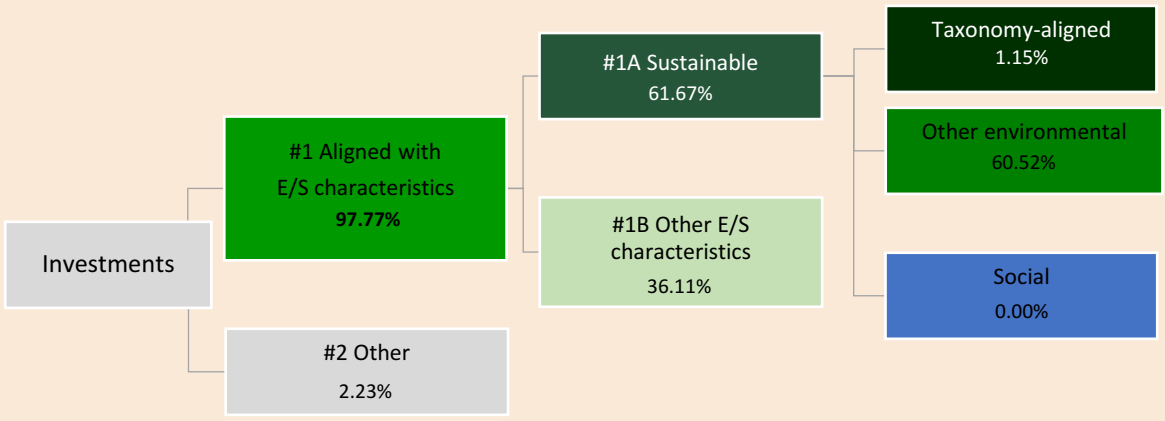
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AMU PLAN-EM GR ONE-SEN USDC	Financials	Mutual Funds	Luxembourg	5.02%
REPHUN 1.75% 06/35 15Y	Government-Related	Sovereign	Hungary	2.94%
ROMANI 5.625% 02/36 REGS	Government-Related	Sovereign	Romania	1.99%

GNNEIA 7.75% 12/33 REGS	Corporates	Electric	Argentina	1.43%

What was the proportion of sustainability-related investments?

The fund invested 61.67% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

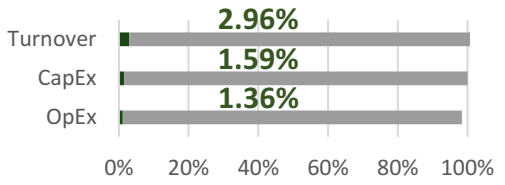
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.15% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

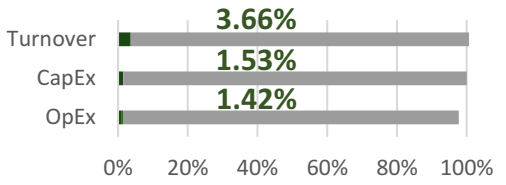
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.64%	98.41%	97.04%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.44%	0.07%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.92%	1.52%	2.96%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.58%	98.47%	96.34%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.59%	0.09%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.83%	1.44%	3.66%

This graph represents 74.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.82%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **60.52%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

This product did not commit to have socially sustainable investments over the period.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 50.34% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS HARD CURRENCY BOND

Legal entity identifier: 549300CF4H3SXCNRP626

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **9.29%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its Benchmark **JP Morgan EMBI Global Diversified (hedged to EUR) Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The Benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.020 (D).**
- The weighted average ESG rating of the Benchmark is **-0.103** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was -0.027 (D) and the weighted average ESG rating of the Benchmark was -0.127 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

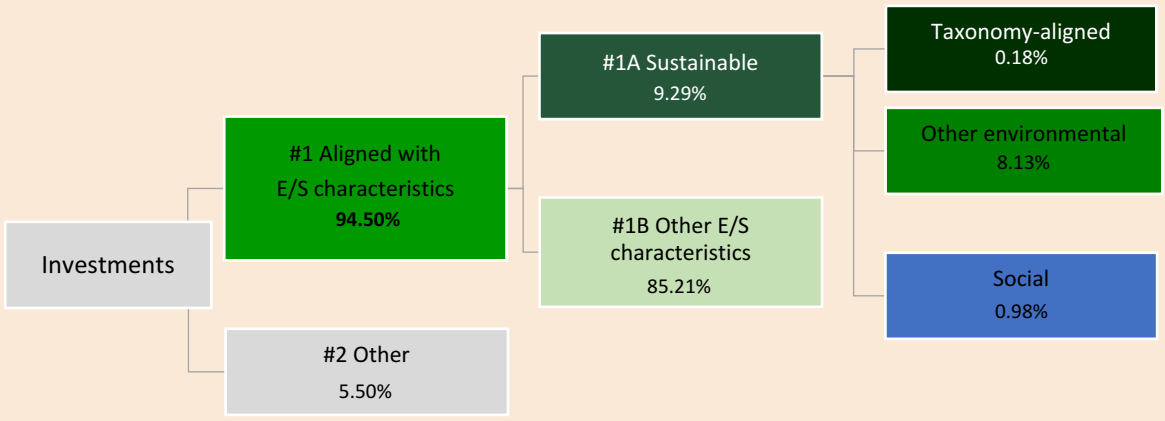
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 9.29% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Forex	*Forex*	*-0.22%*
Cash	*Cash*	*2.95%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

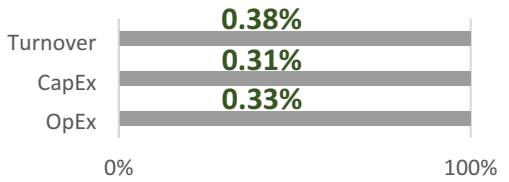
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.18% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

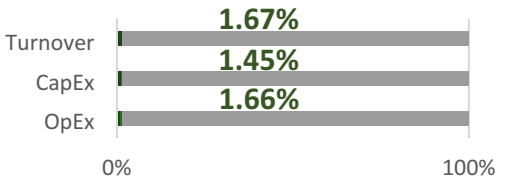
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.



Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

☐ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.67%	99.69%	99.62%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.14%	0.02%	0.03%
Taxonomy-aligned [No gas and nuclear]	0.19%	0.28%	0.35%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.34%	98.55%	98.33%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.74%	0.11%	0.15%
Taxonomy-aligned [No gas and nuclear]	0.92%	1.34%	1.52%

This graph represents 18.6% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.05%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.08%

are sustainable investments with an environmental objective that **do not take into account the** criteria

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **8.13%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 0.98%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 38.19% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS LOCAL CURRENCY BOND

Legal entity identifier: 549300JJ3276S8R63L30

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.94% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **80% JPM GBI EM GLOBAL DIVERSIFIED Index + 20% ICE BOFA BROAD LOCAL EMERGING MARKETS NON-SOVEREIGN Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.321 (D).**
- The weighted average ESG rating of the investment universe is **0.200** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.336 (D) and the weighted average ESG rating of the investment universe was 0.182 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

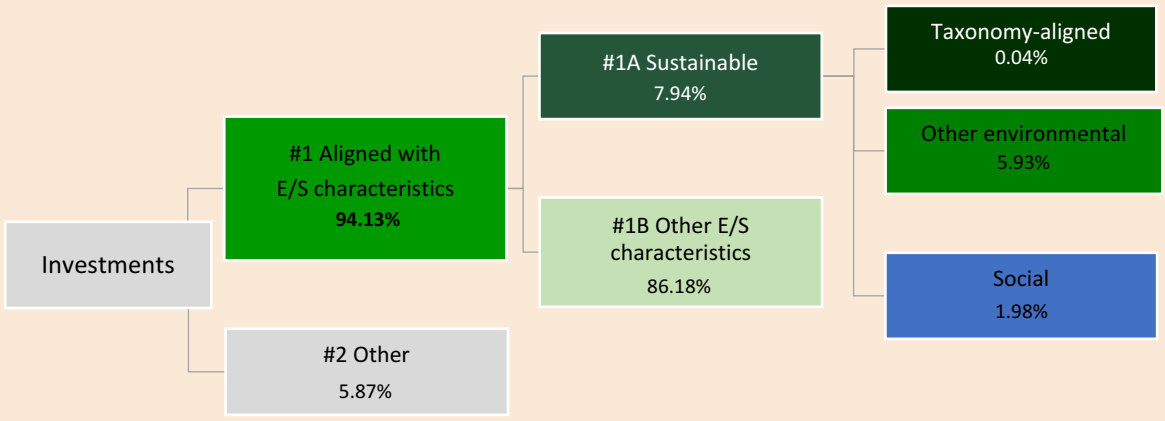
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
MGS 3.844% 4/33	Treasuries	Treasuries	Malaysia	2.15%

What was the proportion of sustainability-related investments?

The fund invested 7.94% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Treasuries	*Treasuries*	*80.36%*

Real Estate	*Real Estate Management & Development*	*0.00%*
Forex	*Forex*	*-0.06%*
Cash	*Cash*	*5.01%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

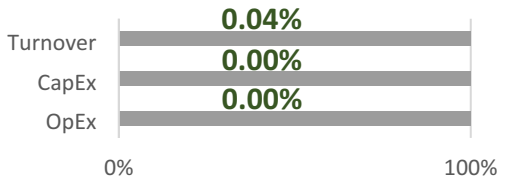
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.04% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

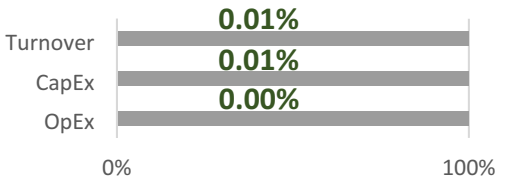
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.



Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

[X] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	100.00%	99.96%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.00%	0.04%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	100.00%	99.99%	99.99%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.00%	0.01%	0.01%

This graph represents 8.3% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.03%

are sustainable investments with an environmental objective that **do not take into account the**

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **5.93%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 1.98%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 64.38% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EMERGING MARKETS SHORT TERM BOND

Legal entity identifier: 5493000K4D8P0NQAIA67

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **21.23%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **25% JPM EMBI GLOBAL DIVERSIFIED 1-3 Y INDEX + 75% JP MORGAN CEMBI BROAD DIVERSIFIED HIGH YIELD Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.334 (D).**
- The weighted average ESG rating of the investment universe is **-0.201** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.225 (D) and the weighted average ESG rating of the investment universe was -0.245 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

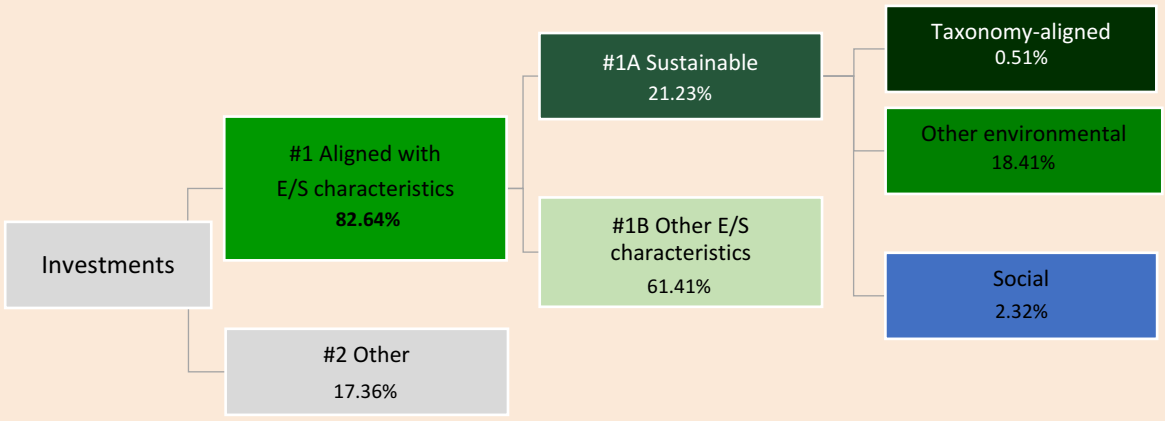
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
ROMANI 6.25% 09/34 REGS	Government-Related	Sovereign	Romania	7.83%
AIF - EMG MKT SOVEREIGN BD - S	Financials	Mutual Funds	Luxembourg	5.33%
BOAD VAR 02/55 REGS	Government-Related	Supranationals	TGO	2.82%

AYDEMT 9.875% 09/30 REGS	Corporates	Electric	Turkey	1.20%

What was the proportion of sustainability-related investments?

The fund invested 21.23% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Government-Related	*Sovereign*	*13.17%*
Corporates	*Electric*	*10.11%*
Corporates	*Banking*	*9.60%*

Cash	*Cash*	*2.29%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

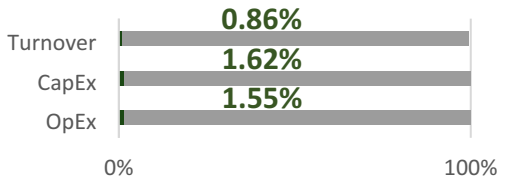
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.51% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

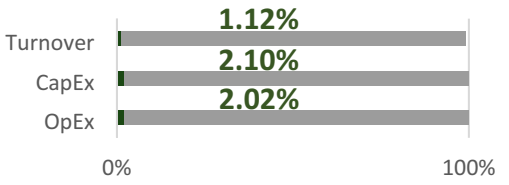
☒ No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.45%	98.38%	99.14%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	1.55%	1.61%	0.86%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.98%	97.90%	98.88%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.01%	2.10%	1.11%

This graph represents 76.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.29%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.26%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **18.41%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 2.32%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 34.77% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS ASIA MULTI ASSET TARGET INCOME

Legal entity identifier: 213800D8TH8Y8YWFBV59

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.64% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **50% MSCI Emerging Markets Index, 30% J.P. Morgan EMBI Global Diversified Composite and 20% J.P. Morgan CEMBI Broad Diversified Composite.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.458 (D).**
- The weighted average ESG rating of the investment universe is **0.188** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.192 (D) and the weighted average ESG rating of the investment universe was -0.083 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

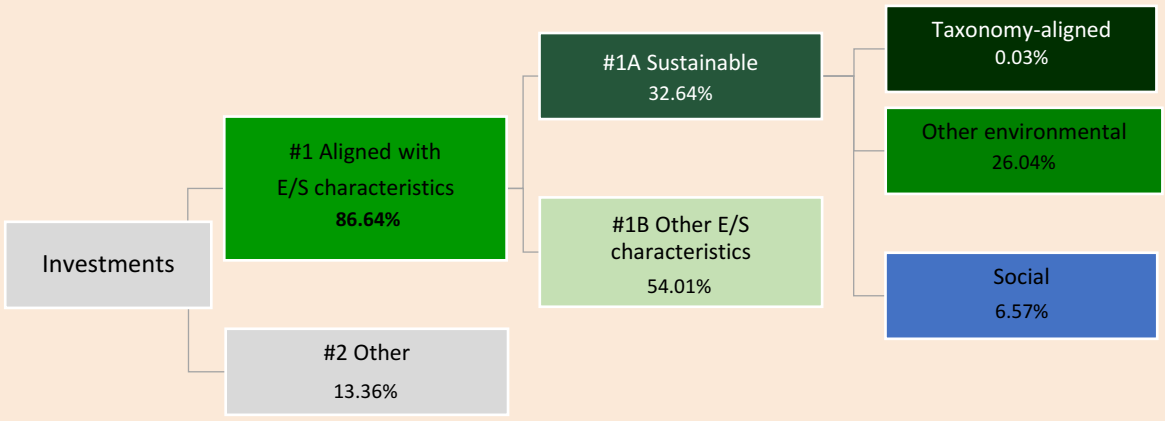
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
TAIWAN SEMICONDUCTOR MANUFAC	Information Technology	Semiconductors & Semiconductor Equipment	Taiwan	5.11%

What was the proportion of sustainability-related investments?

The fund invested 32.64% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.03% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

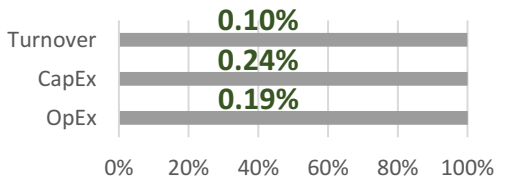
- ***Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?***

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

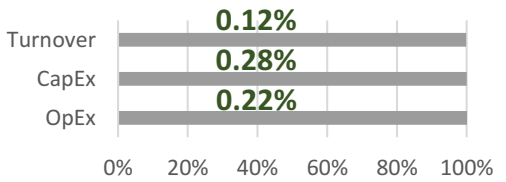
☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.81%	99.76%	99.90%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.19%	0.24%	0.10%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.78%	99.72%	99.88%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	0.22%	0.28%	0.12%

This graph represents 86.1% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.06%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.01%

are sustainable investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.04%** at the end of the period.

environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 6.57%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 56.25% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS EURO MULTI-ASSET TARGET INCOME

Legal entity identifier: 549300MRV3FILX0BHB52

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.71%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **15% JP MORGAN EMBI GLOBAL + 15% ICE BOFA Global High Yield Index + 30% MSCI AC WORLD Index +40% BLOOMBERG Global Aggregate Index.** In determining the ESG score of the Product and the Investment Universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Investment Universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.693 (C).**
- The weighted average ESG rating of the Investment Universe is **0.162** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.674 (C) and the weighted average ESG rating of the Investment Universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

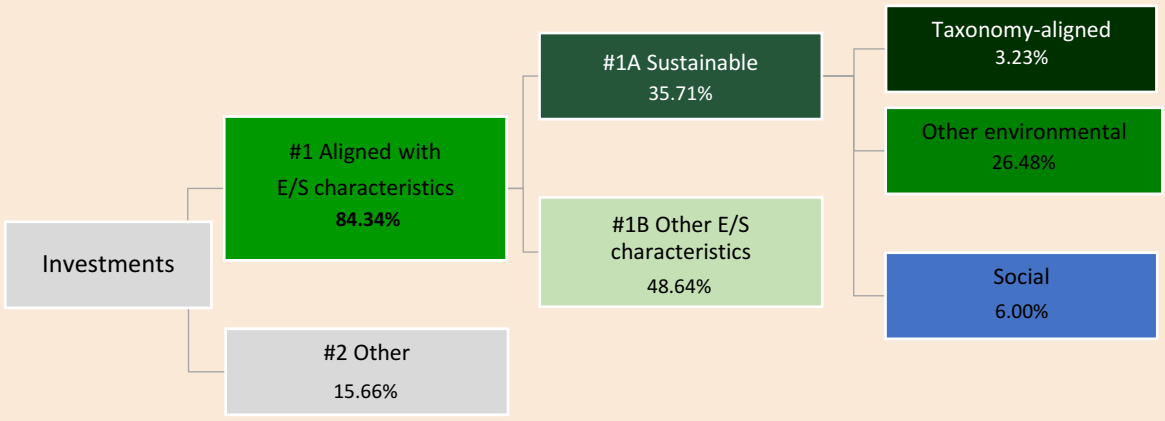
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 35.71% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

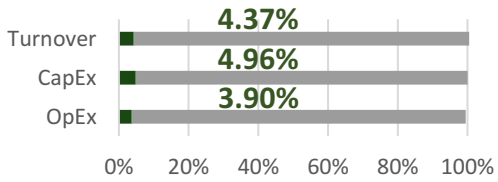
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 3.23% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

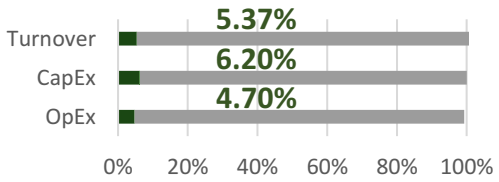
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.10%	95.04%	95.63%
Taxonomy-aligned: Fossil Gas	0.00%	0.01%	0.01%

Taxonomy-aligned [No gas and nuclear]	3.65%	4.75%	4.18%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.30%	93.80%	94.63%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	4.69%	6.19%	5.36%

This graph represents 70.6% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.33% and the share of investment in enabling activities was 1.24%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.47%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.48%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 6.00%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 60.35% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL MULTI-ASSET

Legal entity identifier: 549300OD7WDES3BYBD54

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **34.87%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **5% JP MORGAN EMBI GLOBAL + 5% ICE BOFA Global High Yield Index + 3% ICE BOFA US High Yield Index + 60% MSCI AC WORLD Index +27% BLOOMBERG Global Aggregate Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.272 (D).**
- The weighted average ESG rating of the investment universe is **0.073** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.255 (D) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

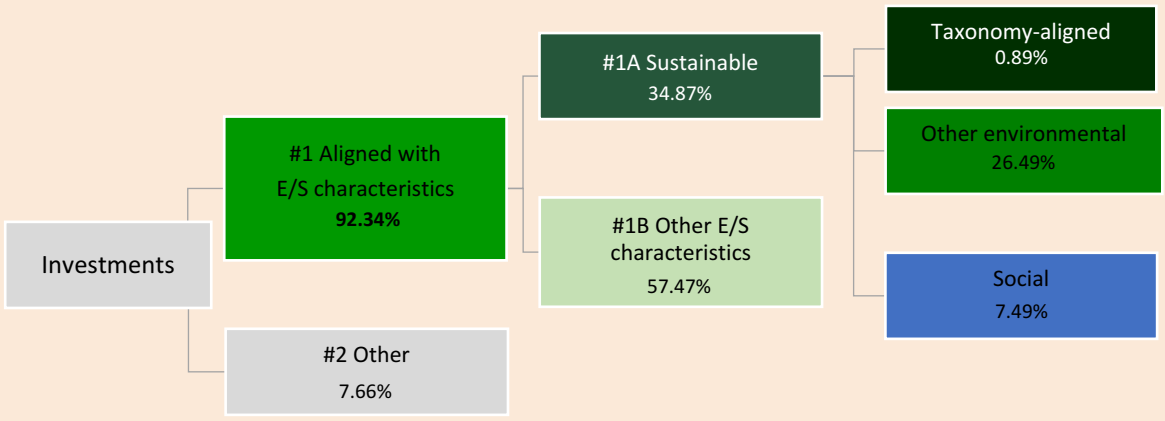
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
US TSY 2.875% 05/32	Treasuries	Treasuries	United States	2.70%
BTPS 3.15% 03/33 7Y	Treasuries	Treasuries	Italy	2.59%

BANK OF AMERICA CORP	Financials	Banks	United States	0.70%

What was the proportion of sustainability-related investments?

The fund invested 34.87% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.89% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

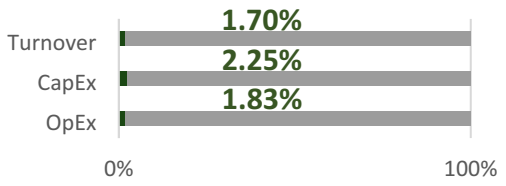
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

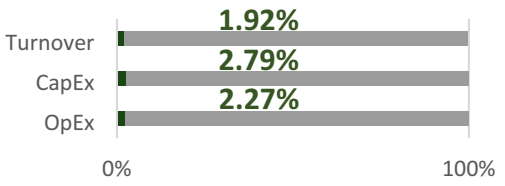
☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.17%	97.75%	98.30%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	1.83%	2.25%	1.70%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.73%	97.21%	98.08%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.27%	2.79%	1.92%

This graph represents 80.7% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.07% and the share of investment in enabling activities was 0.74%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.20%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.49%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.49%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 76.33% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL MULTI-ASSET CONSERVATIVE

Legal entity identifier: 549300B1R0N20X3Z5K83

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **32.94%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **10% JP MORGAN EMBI Global + 10% ICE BOFA Global High Yield Index + 5% ICE BOFA US High Yield Index + 25% MSCI AC WORLD Index + 50% BLOOMBERG Global Aggregate Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.495 (D).**
- The weighted average ESG rating of the investment universe is **0.241** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.481 (D) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

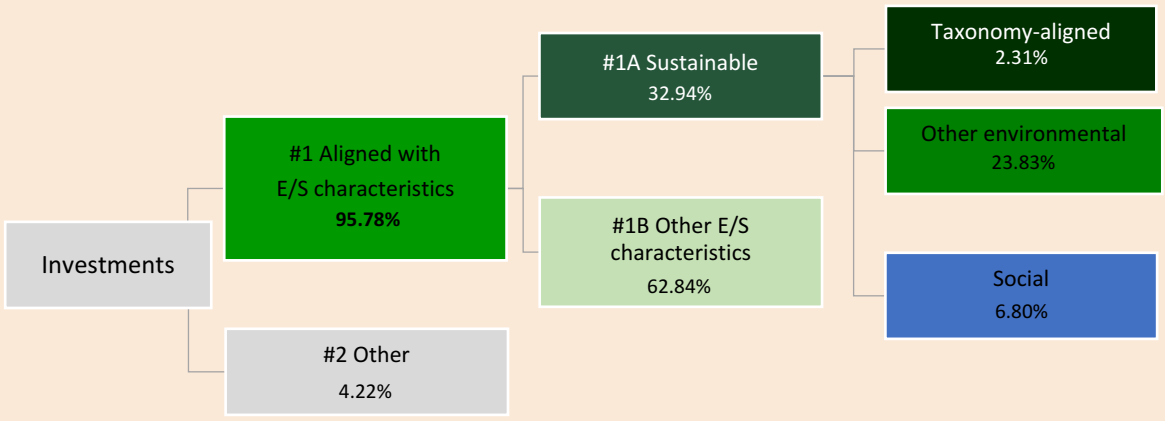
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 32.94% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.31% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy. The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

nuclear energy, the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

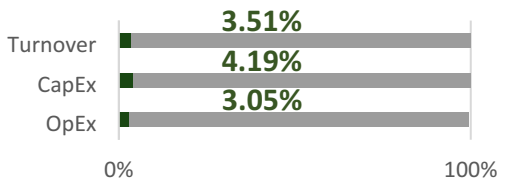
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

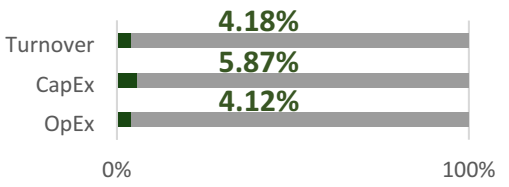
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.95%	95.81%	96.49%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.12%	0.10%	0.02%
Taxonomy-aligned [No gas and nuclear]	2.92%	4.09%	3.49%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.88%	94.13%	95.82%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	4.12%	5.86%	4.17%

This graph represents 62.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.11% and the share of investment in enabling activities was 0.97%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.37%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **23.83%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 6.80%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 67.10% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS GLOBAL MULTI-ASSET TARGET INCOME

Legal entity identifier: 549300MJSB1OV3IZ3T98

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **26.63%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **20% MSCI ACWI + 50% Bloomberg Global Aggregate + 15% ICE BOFA Global High + 15% JPM EMBI Global.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund.
No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.391 (D).**
- The weighted average ESG rating of the investment universe is **0.242** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.418 (D) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

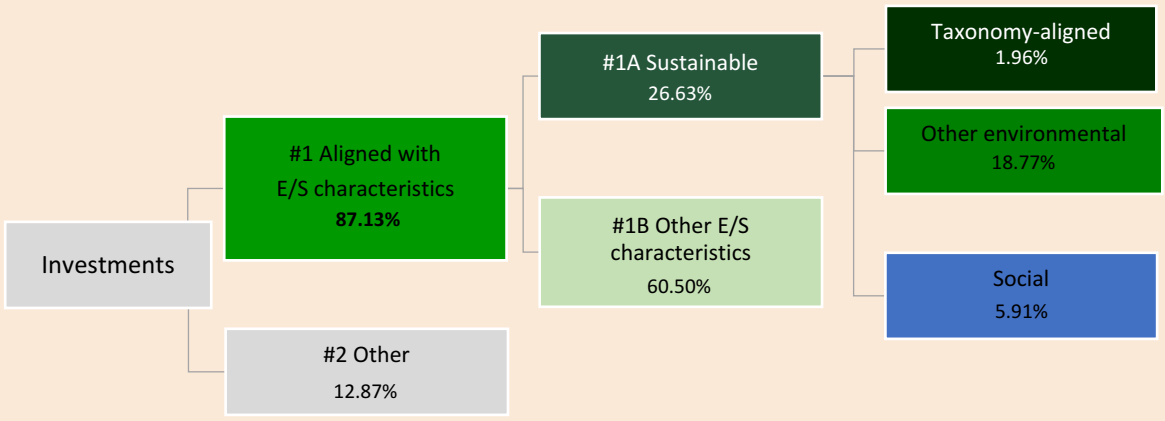
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

What was the proportion of sustainability-related investments?

The fund invested 26.63% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.96% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

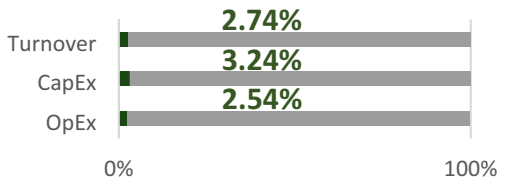
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

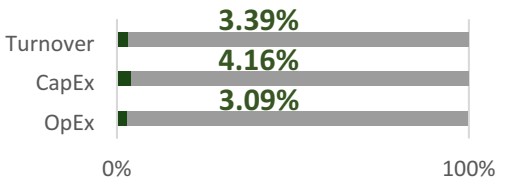
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.46%	96.76%	97.26%
Taxonomy-aligned: Fossil Gas	0.00%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.23%	0.19%	0.19%
Taxonomy-aligned [No gas and nuclear]	2.31%	3.05%	2.55%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.91%	95.84%	96.61%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	3.09%	4.15%	3.38%

This graph represents 64.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.28% and the share of investment in enabling activities was 0.57%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.43%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **18.77%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.91%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 50.31% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS INCOME OPPORTUNITIES

Legal entity identifier: 549300ILVTGROHRV6666

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **35.87%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **60% MSCI ACWI+ 15% BLOOMBERG GLOBAL AGGREGATE + 25% ICE BOFA GLOBAL HIGH YIELD Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.158 (D).**
- The weighted average ESG rating of the Investment universe is **-0.031** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.035 (D) and the weighted average ESG rating of the Investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

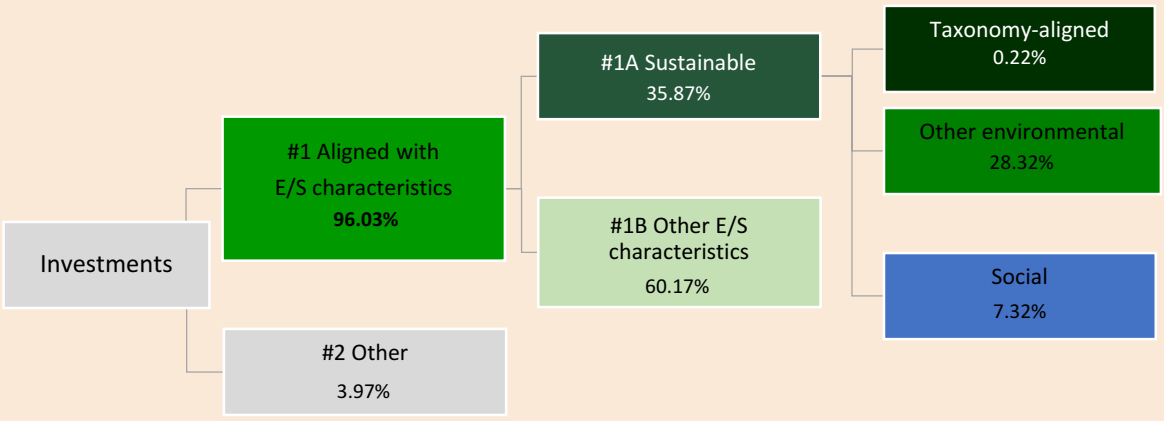
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
BANK OF AMERICA CORP	Financials	Banks	United States	5.13%
SHELL PLC EUR	Energy	Oil, Gas & Consumable Fuels	United Kingdom	2.35%

What was the proportion of sustainability-related investments?

The fund invested 35.87% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

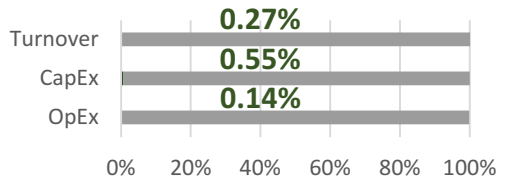
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.22% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

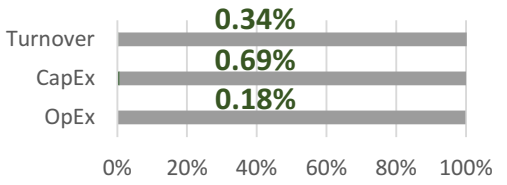
☒ No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover

Taxonomy-aligned [No gas and nuclear]	0.18%	0.68%	0.34%

This graph represents 80.6% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.09% and the share of investment in enabling activities was 0.02%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.52%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **28.32%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.32%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 87.49% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS MULTI-ASSET REAL RETURN

Legal entity identifier: 222100UNVFMGHI5DQJ57

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

** Due to the liquidation of the fund, the report was produced as at 19th June, 2026*

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **42.99%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **Euro HICP ex Tobacco Index.** In determining the ESG score of the Product and the benchmark ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.803 (C).**
- The weighted average ESG rating of the benchmark is **0.000** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.777 (C) and the weighted average ESG rating of the benchmark was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

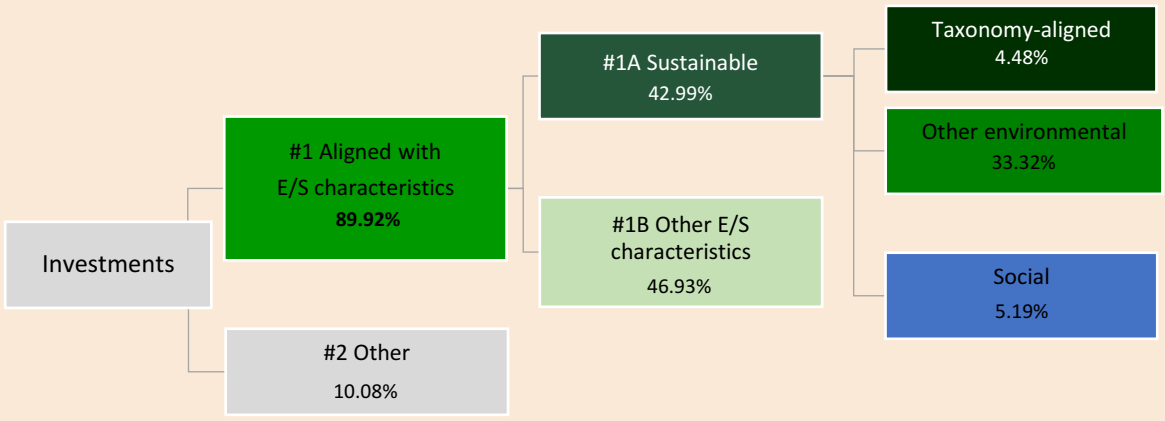
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/06/2025 to 19/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
BTPS 1.65% 03/32	Treasuries	Treasuries	Italy	3.56%

What was the proportion of sustainability-related investments?

The fund invested 42.99% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 4.48% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

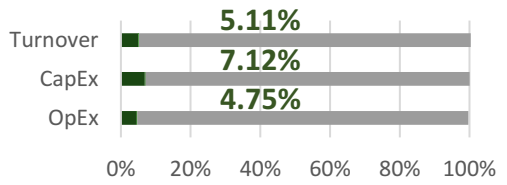
activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

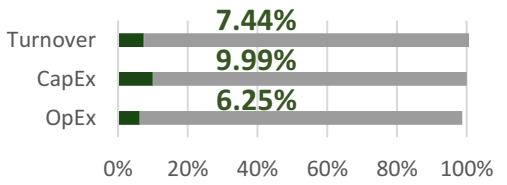
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.25%	92.88%	94.89%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.01%
Taxonomy-aligned: Nuclear	0.35%	0.29%	0.15%
Taxonomy-aligned [No gas and nuclear]	4.40%	6.83%	4.95%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.75%	90.01%	92.56%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.01%
Taxonomy-aligned: Nuclear	0.02%	0.04%	0.02%
Taxonomy-aligned [No gas and nuclear]	6.22%	9.95%	7.41%

This graph represents 64.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 19/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.22% and the share of investment in enabling activities was 0.73%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.50%.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **33.32%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.19%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 68.41% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS MULTI-ASSET CONSERVATIVE RESPONSIBLE

Legal entity identifier: 549300E1QOFTUCHMCV76

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **68.59%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **MSCI Daily Net Total Return World Euro Index (30%) Bloomberg EuroAgg Total Return Index Value Unhedged EUR Index (70%) Index.** In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

The product is labeled SRI (Social and Responsible Investment). It sought throughout the year to promote the 3 dimensions (environmental, social and governance) by taking into account the ESG rating of issuers in the construction of the portfolio.

The ESG rating of issuers aims to assess their ability to manage the potential negative impact of their activities on sustainability factors. This analysis thus aims to assess their Environmental and Societal behaviors in terms of Governance by assigning them an ESG rating ranging from A (best rating) to G (worse rating), so as to achieve a more global assessment of the risks.

1. The portfolio has consistently applied the following Amundi exclusion policy:
- Legal exclusions on controversial weapons
- Companies that seriously and repeatedly contravene one or more of the 10 principles of the Global Compact (UN Global Compac), without credible corrective measures;
- The sectoral exclusions of the Amundi group on Coal and Tobacco; (details of this policy are available in Amundi's Responsible Investment Policy available on the website www.amundi.fr)
2. No investment has been made in issuers rated F or G. For any issuer whose rating has been downgraded to F or G, the securities already present in the portfolio were sold within the timeframe committed to in the prospectus and taking into account financial interest of holders
3. The weighted average ESG score of the portfolio has consistently been higher than the weighted average ESG score of the fund's benchmark after eliminating the 20% of the worst issuers
4. The fund has favored issuers that are leaders in their sector of activity according to the ESG criteria identified by the team of extra-financial analysts of the management company ("best in class" approach). With the exception of the above exclusions, all economic sectors are represented in this approach and the UCI may therefore be exposed to certain controversial sectors.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- ***How did the sustainability indicators perform?***

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **1.090 (C).**
- The weighted average ESG rating of the benchmark is **0.709** (**C).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to

sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

- ***… and compared to previous periods?***

At the end of the previous period, the weighted average ESG rating of the portfolio was 1.128 (C) and the weighted average ESG rating of the benchmark was 0.711 (C).

- ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

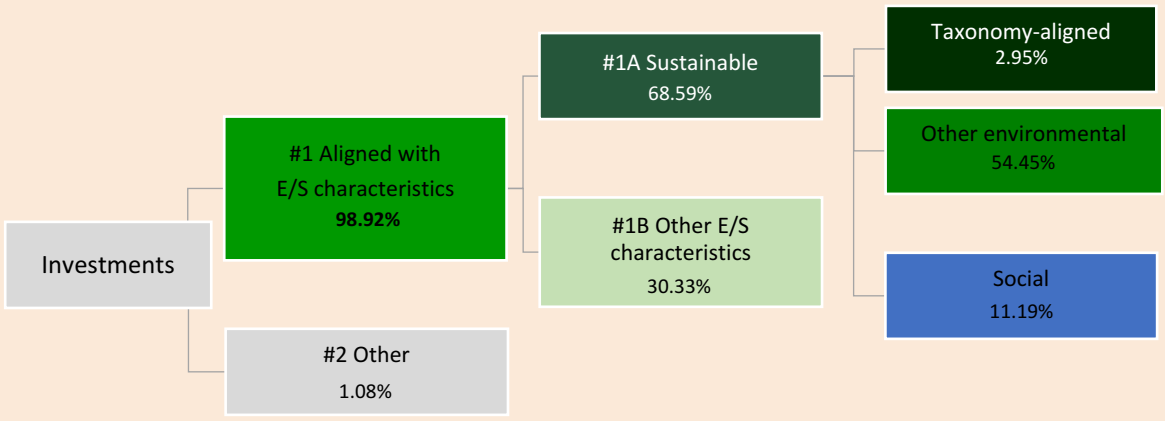
- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and

better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.

- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
BTPS 4% 04/35 13Y	Treasuries	Treasuries	Italy	3.61%
NEDERLD 0.5% 01/40	Treasuries	Treasuries	Netherlands	2.82%
SPAIN 1% 07/42	Treasuries	Treasuries	Spain	2.73%
BNG 0.125% 04/33 EMTN	Government-Related	Agencies	Netherlands	2.71%
SFILFR 0.25% 12/31 EMTN	Government-Related	Agencies	France	2.41%
SPAIN 4.20% 01/37	Treasuries	Treasuries	Spain	2.28%
AUSTRIA 2.4% 05/34	Treasuries	Treasuries	Austria	2.28%
AM LABEL ISR ACTIONS USA ETF (PAR)	Financials	Mutual Funds	France	2.07%
LIN 0.25% 05/27	Corporates	Basic Industry	Netherlands	2.01%
TCLAU 4.143% 04/35 EMTN	Corporates	Transportation	Australia	1.88%
IRELAND 3% 10/43	Treasuries	Treasuries	Ireland	1.76%
AM LABEL ISR ACT EUROPE UCITS ETF (PAR)	Financials	Mutual Funds	France	1.74%
AUSTRIA 3.2% 07/39	Treasuries	Treasuries	Austria	1.72%
DNBNO VAR 01/28 EMTN	Corporates	Banking	Norway	1.67%
PORTUGAL 2.875% 10/34 11Y	Treasuries	Treasuries	Portugal	1.65%

What was the proportion of sustainability-related investments?

The fund invested 68.59% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

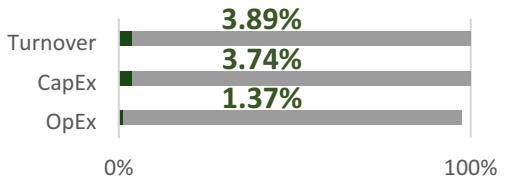
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.95% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

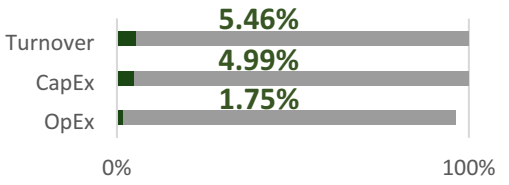
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.63%	96.26%	96.11%
Taxonomy-aligned: Fossil Gas	0.01%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	1.36%	3.73%	3.88%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.25%	95.01%	94.54%
Taxonomy-aligned: Fossil Gas	0.01%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	1.74%	4.98%	5.45%

This graph represents 63.2% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.02% and the share of investment in enabling activities was 0.93%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.08%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **54.45%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 11.19%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 61.20% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS MULTI-ASSET CLIMATE

Legal entity identifier: 549300UWEKCHQNE88693

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **63.79%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promotes environmental and/or social characteristics by aiming to have a higher ESG score than that of the investment universe. In determining the ESG score of the Sub-Fund and the Investment Universe, ESG performance is assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three ESG characteristics of environmental, social and governance. For the purpose of this measurement, the Investment Universe is defined as **5% MSCI USD HY CORPORATE BOND INDEX + 50% MSCI ACWI + 5% MSCI EUR HY CORPORATE BOND INDEX + 15% MSCI USD IG CORPORATE BOND + 25% MSCI EUR IG CORPORATE BOND INDEX**.

In addition the Sub-Fund aims to reducing the carbon intensity of its portfolio by aligning its carbon footpring intensity to the composite index **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index**. This composite index is a broad market index which assesses and includes constituents according to environmental characteristics, and therefore is aligned with the environmental characteristics promoted by the Sub-Fund, i.e. a reduced carbon footprint.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.496 (D).**
- The weighted average ESG rating of the investment universe is **0.015** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

The sustainability indicator used is the portfolio carbon footprint intensity, which is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Benchmark. As a result, securities with relatively low environmental footprints had a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints.

- The weighted average carbon footprint intensity of the portfolio is **97.96**
- The weighted average carbon footprint intensity of the Benchmark is **156.53**

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.521 (C) and the weighted average ESG rating of the investment universe was -0.003 (D).At the end of the previous period, the weighted average carbon intensity of the portfolio was 90.77 and the weight ed average carbon intensity reference index was 161.27

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

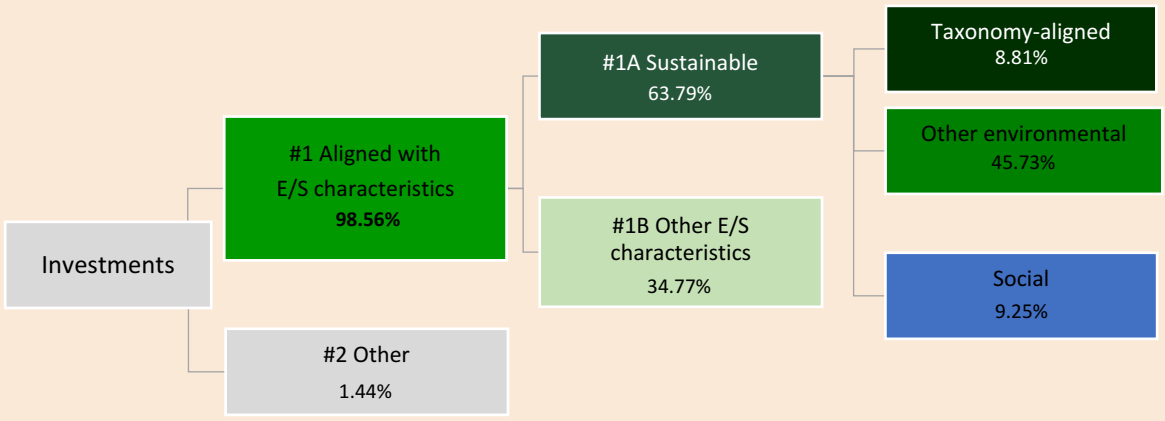
The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.

- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
A-F EUROPE EQUITY CLIMATE-Z EUR-C	Financials	Mutual Funds	Luxembourg	2.43%

ASML HOLDING NV	Information Technology	Semiconductors & Semiconductor Equipment	Netherlands	0.63%

What was the proportion of sustainability-related investments?

The fund invested 63.79% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

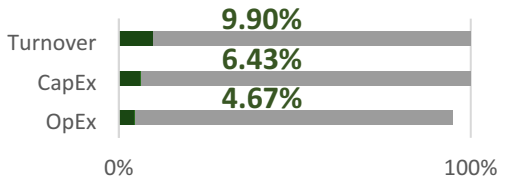
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 8.81% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[X] In fossil gas [X] In nuclear energy

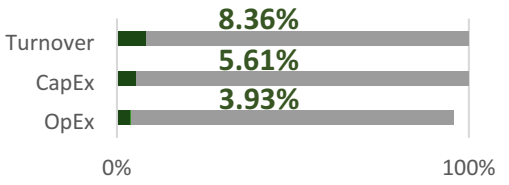
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.33%	93.57%	90.10%
Taxonomy-aligned: Fossil Gas	0.02%	0.04%	0.01%
Taxonomy-aligned: Nuclear	0.28%	0.21%	0.12%
Taxonomy-aligned [No gas and nuclear]	4.37%	6.18%	9.77%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.07%	94.39%	91.64%
Taxonomy-aligned: Fossil Gas	0.02%	0.02%	0.01%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.00%
Taxonomy-aligned [No gas and nuclear]	3.90%	5.59%	8.35%

This graph represents 89.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.26% and the share of investment in enabling activities was 1.14%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.87%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **45.73%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 9.25%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 81.19% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The sustainable investment objective is attained by aligning the carbon footprint reduction objectives of the fund with **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index**. The portfolio carbon footprint intensity is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Index.
As a result, securities with relatively low environmental footprints have a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints. In addition, the fund excludes companies on the basis of controversial behavior and (or) controversial products in accordance with the Responsible Investment Policy.
• The weighted average carbon footprint intensity of the portfolio is 97.96
• The weighted average carbon footprint intensity of the Benchmark is 156.53

How does the reference benchmark differ from a broad market index ?

A broad market index, does not assess or include its constituents according to environment characteristics and therefore is not aligned with environmental characteristics.
The indices used are "Climate Transition Benchmarks" which incorporates specific objectives related to emission reductions and the transition to a low-carbon economy through the selection and weighting of underlying constituents.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The weighted average ESG rating of the portfolio is 0.496 (D).

The weighted average ESG rating of the investment universe is 0.015 (D).

• The weighted average carbon footprint intensity of the portfolio is 97.96
• The weighted average carbon footprint intensity of the Benchmark is 156.53

How did this financial product perform compared with the reference benchmark ?

The sustainable investment objective is attained by aligning the carbon footprint reduction objectives of the fund with **50% MSCI ACWI Climate Change Index + 15% MSCI USD IG Climate Change Corporate Bond Index + 25% MSCI EUR IG Climate Change Corporate Bond Index + 5% MSCI USD HY Climate Change Corporate Bond Index + 5% MSCI EUR HY Climate Change Corporate Bond Index**. The portfolio carbon footprint intensity is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Index.

As a result, securities with relatively low environmental footprints have a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints. In addition, the fund excludes companies on the basis of controversial behavior and (or) controversial products in accordance with the Responsible Investment Policy.

- The weighted average carbon footprint intensity of the portfolio is 97.96
- The weighted average carbon footprint intensity of the Benchmark is 156.53

How did this financial product perform compared with the broad market index ?

A broad market index, does not assess or include its constituents according to environment characteristics and therefore is not aligned with environmental characteristics.

The indices used are "Climate Transition Benchmarks" which incorporates specific objectives related to emission reductions and the transition to a low-carbon economy through the selection and weighting of underlying constituents.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS PIONEER FLEXIBLE OPPORTUNITIES

Legal entity identifier: 5493000SYHI3US1RDZ90

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 29.89% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **U.S. CPI Index.** In determining the ESG score of the Product and the Benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.509 (D).**
- The weighted average ESG rating of the Benchmark is **0.000** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.601 (C) and the weighted average ESG rating of the Benchmark was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

  Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

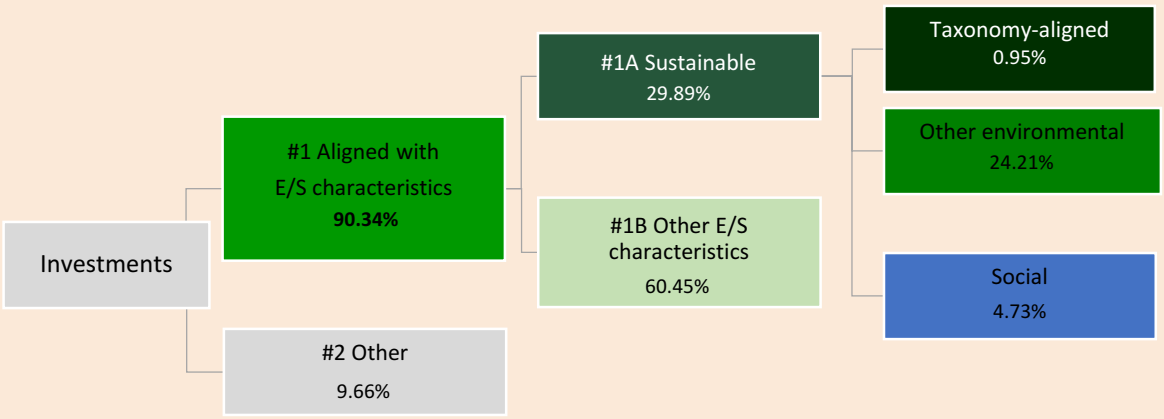
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 29.89% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

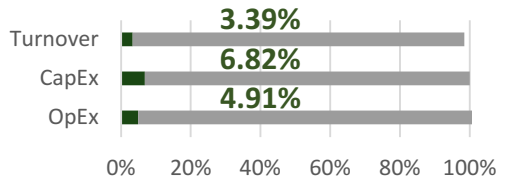
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.95% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

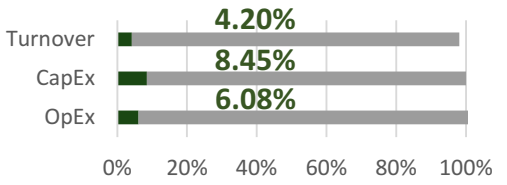
☒ No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.09%	93.18%	96.61%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	4.91%	6.82%	3.39%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	93.92%	91.55%	95.80%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	6.08%	8.45%	4.20%

This graph represents 80.8% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.23% and the share of investment in enabling activities was 1.70%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.03%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **24.21%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 4.73%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 60.31% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS REAL ASSETS TARGET INCOME

Legal entity identifier: 549300B49TP3UV3FOI07

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] **Yes**
- [X] **No**

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **25.91%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its benchmark **15% MSCI AC World REITS Index; 10% MSCI World, Food Beverage and Tobacco Index; 10% MSCI World Materials Index; 10% MSCI World Energy Index; 7.5% MSCI World Transport Infrastructure Index; 7.5% ICE BofA ML U.S. High Yield Index; 5% MSCI World Utility Index; 5% Alerian MLPs Index; 5% iBoxx € Non-Financial Corporate Europe Index; 5% ICE BofA ML Global Governments Inflation-Linked Index; 5% ICE BofA ML Non-Financial Corporate USA Index; 5% ICE BofA ML Euro High Yield Index; 5% Bloomberg Commodity Total Return Index; 5% Bloomberg Gold Total Return Index.**

In determining the ESG score of the Product and the benchmark, ESG /performance was continuously assessed by comparing the average performance of a security against the

security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The benchmark is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the benchmark of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.430 (D).**
- The weighted average ESG rating of the benchmark is **0.002** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.419 (D) and the weighted average ESG rating of the benchmark was 0.025 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

  The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
  The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:
  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

  Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

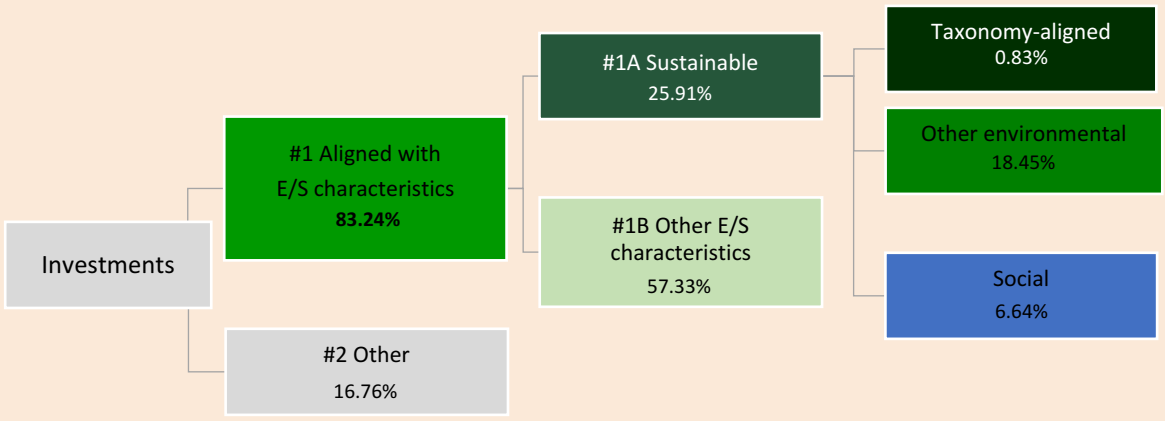
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
US TSY 6.375% 08/27	Treasuries	Treasuries	United States	5.32%

UNION PACIFIC CORP	Industrials	Transportation	United States	0.97%
DBR 1% 05/38	Treasuries	Treasuries	Germany	0.92%

What was the proportion of sustainability-related investments?

The fund invested 25.91% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.83% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

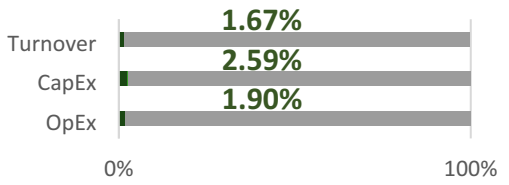
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

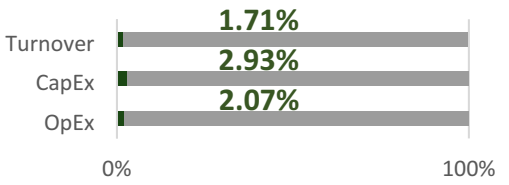
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.10%	97.41%	98.33%
Taxonomy-aligned: Fossil Gas	0.00%	0.01%	0.00%
Taxonomy-aligned: Nuclear	0.14%	0.12%	0.12%
Taxonomy-aligned [No gas and nuclear]	1.76%	2.46%	1.54%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.93%	97.07%	98.29%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.07%	2.93%	1.71%

This graph represents 75.4% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.16% and the share of investment in enabling activities was 0.65%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.50%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **18.45%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 6.64%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 54.96% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS ABSOLUTE RETURN MULTI-STRATEGY

Legal entity identifier: 549300G94XO1UF8XMQ66

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **27.41%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **25% JP Morgan EMBI Global + 20% MSCI AC World Index + 30% ICE BOFA Global High Yield Index + 15% BGB Global Agg Corporate + 10% BGB Global Agg treasuries.** In determining the ESG score of the Product and the investment universe, ESG / performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.
The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.571 (C).**
- The weighted average ESG rating of the investment universe is **-0.054** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.525 (C) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

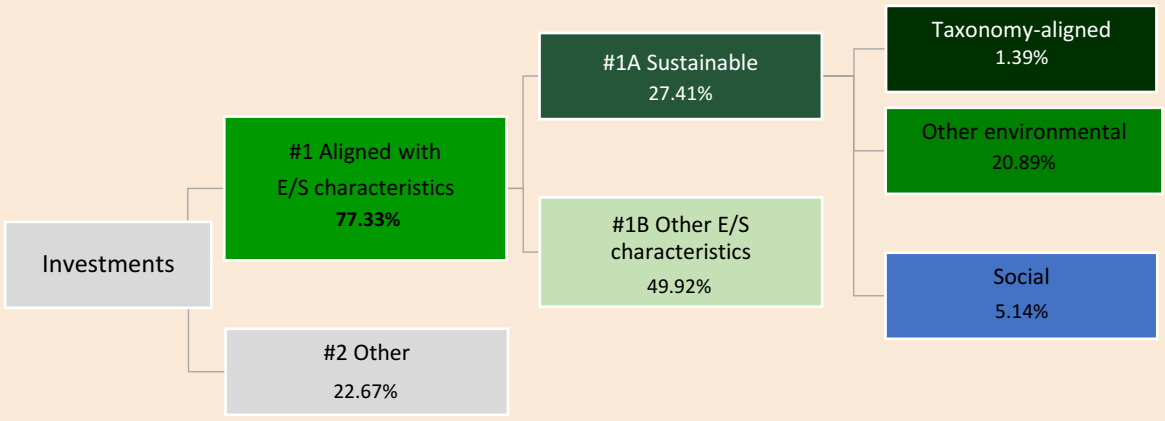
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
BOTS 30/09/26 183D	Treasuries	Treasuries	Italy	4.90%

What was the proportion of sustainability-related investments?

The fund invested 27.41% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

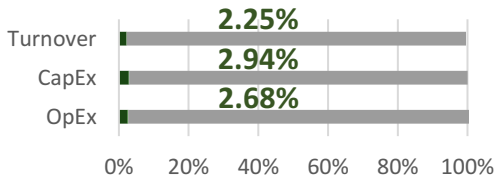
Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.39% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

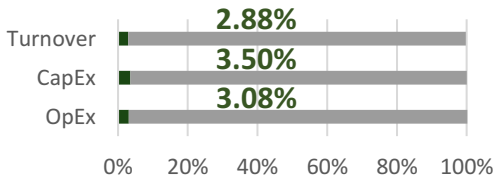
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.32%	97.06%	97.75%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.21%	0.17%	0.08%
Taxonomy-aligned [No gas and nuclear]	2.47%	2.77%	2.17%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	96.92%	96.50%	97.12%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	3.08%	3.49%	2.88%

This graph represents 72.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What was the share of investments in transitional and enabling activities ?***

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.17% and the share of investment in enabling activities was 0.59%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.64%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **20.89%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.14%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 60.64% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS ABSOLUTE RETURN GLOBAL OPPORTUNITIES BOND

Legal entity identifier: 549300BBK38MPT8QZI59

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 32.86% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **BLOOMBERG GLOBAL AGGREGATE (ESG)**. In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.804 (C).**
- The weighted average ESG rating of the investment universe is **0.663** (**C).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.795 (C) and the weighted average ESG rating of the investment universe was 0.619 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

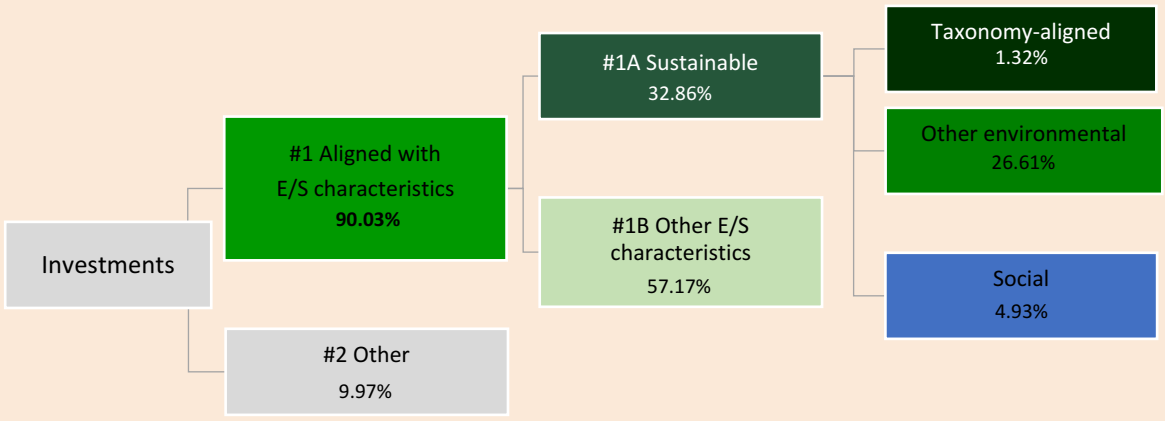
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
BOTS 14/04/27 365D	Treasuries	Treasuries	Italy	5.74%

What was the proportion of sustainability-related investments?

The fund invested 32.86% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Treasuries	*Treasuries*	*32.88%*
Corporates	*Banking*	*30.94%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.32% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

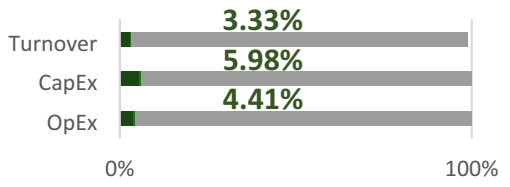
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

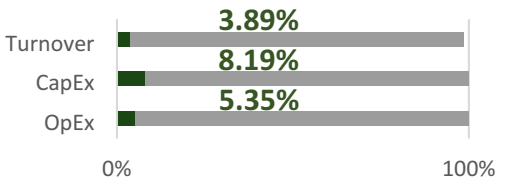
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	95.59%	94.02%	96.67%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.58%	0.47%	0.50%
Taxonomy-aligned [No gas and nuclear]	3.83%	5.51%	2.83%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	94.65%	91.81%	96.11%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	5.35%	8.18%	3.88%

This graph represents 59.8% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.60% and the share of investment in enabling activities was 1.00%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 3.79%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **26.61%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 4.93%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 75.53% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS MULTI-STRATEGY GROWTH

Legal entity identifier: 549300U03843Z1MQX452

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 27.39% of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **30% JP Morgan EMBI Global + 22,5% MSCI AC World Index + 30% ICE BOFA Global High Yield Index + 10% Bloomberg Global Aggregate Corporate + 7,5% Bloomberg Global Aggregate Treasuries.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.539 (C).**
- The weighted average ESG rating of the investment universe is **-0.093** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.437 (D) and the weighted average ESG rating of the investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for

example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

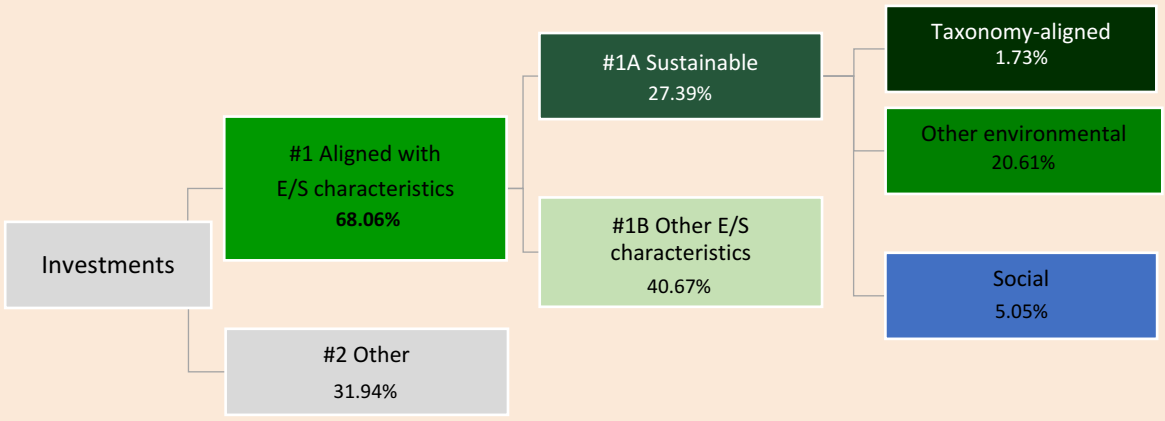
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Non Taxonomy-aligned	97.04%	96.67%	96.99%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Taxonomy-aligned [No gas and nuclear]	2.96%	3.32%	3.01%

This graph represents 81.9% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.09% and the share of investment in

enabling activities was 0.60%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

- ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?***

At the end of the previous period, the percentage of investments with Taxonomy alignment was 2.30%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **20.61%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.05%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 53.86% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS QUANTITATIVE GLOBAL ABSOLUTE RETURN BOND

Legal entity identifier: 213800ADK5DD5CTZQ486

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **40.88%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **90% Bloomberg Global Aggregate + 10% JPM EMBI Global Diversified Index.** In determining the ESG score of the Product and the investment universe, ESG / performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **1.123 (C).**
- The weighted average ESG rating of the investment universe is **0.586** (**C).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 1.107 (C) and the weighted average ESG rating of the investment universe was 0.545 (C).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

  - Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
  - Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
  - Be cleared of any controversy in relation to work conditions and human rights.
  - Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

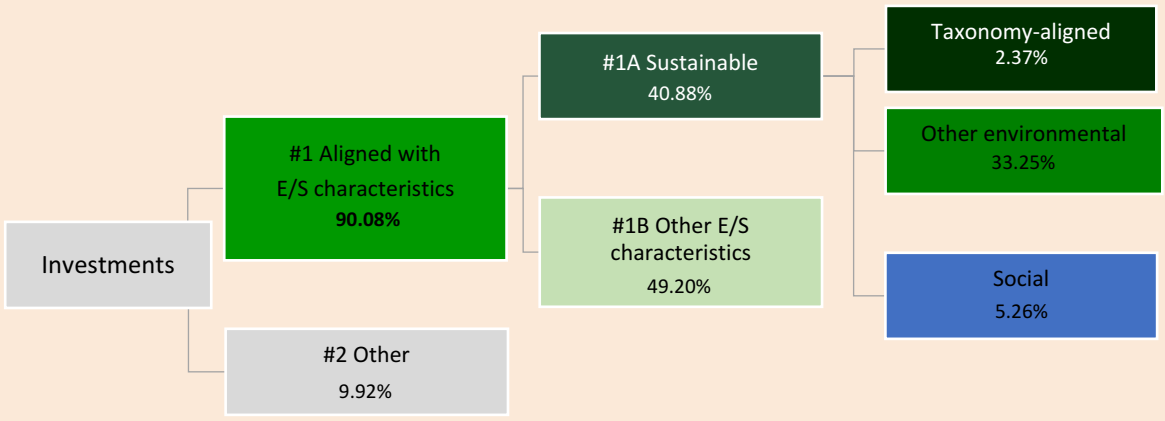
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
A-F GLOBAL SHORT TERM BOND Z USD	Financials	Mutual Funds	Luxembourg	5.47%
BRAZIL NTN-F 10% 01/27	Treasuries	Treasuries	Brazil	3.88%
TBIP USA 22/10/26	Treasuries	Treasuries	United States	3.16%
A-F EURO HIGH YIELD S-TERM BD-X EUR	Financials	Mutual Funds	Luxembourg	2.35%
RABOBK FRN 08/26	Corporates	Banking	Netherlands	2.06%
SEK FRN 05/27 GMTN	Government-Related	Agencies	Sweden	1.82%

CCDJ FRN 11/26	Corporates	Banking	Canada	1.20%

What was the proportion of sustainability-related investments?

The fund invested 40.88% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Corporates	*Banking*	*31.55%*
Treasuries	*Treasuries*	*15.50%*

Others	*Others*	*0.00%*
Cash	*Cash*	*9.28%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.37% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

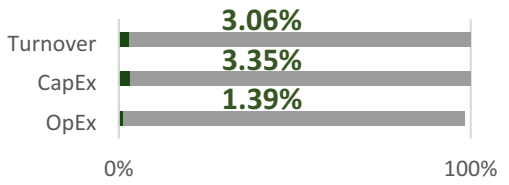
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

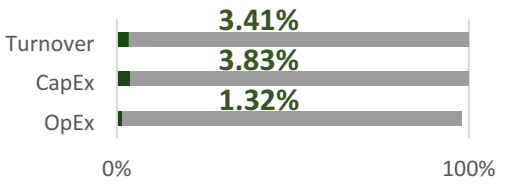
[X] Yes:



[ ] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.61%	96.65%	96.94%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.06%	0.04%	0.03%
Taxonomy-aligned [No gas and nuclear]	1.32%	3.31%	3.03%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.68%	96.17%	96.59%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	1.32%	3.81%	3.40%

This graph represents 59.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.23% and the share of investment in enabling activities was 0.43%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.82%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **33.25%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 5.26%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 55.90% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS PROTECT 90

Legal entity identifier: 22210055YWH87PNEL252

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **39.55%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It made a **sustainable investments with a social objective:** _____
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **50% MSCI ACWI IMI + 30% BLOOMBERG GLOBAL AGGREGATE + 20% ICE BOFA GLOBAL HIGH YIELD INDEX.** In determining the ESG score of the Product and the Investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the Investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.604 (C).**
- The weighted average ESG rating of the Investment universe is **0.096** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.589 (C) and the weighted average ESG rating of the Investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

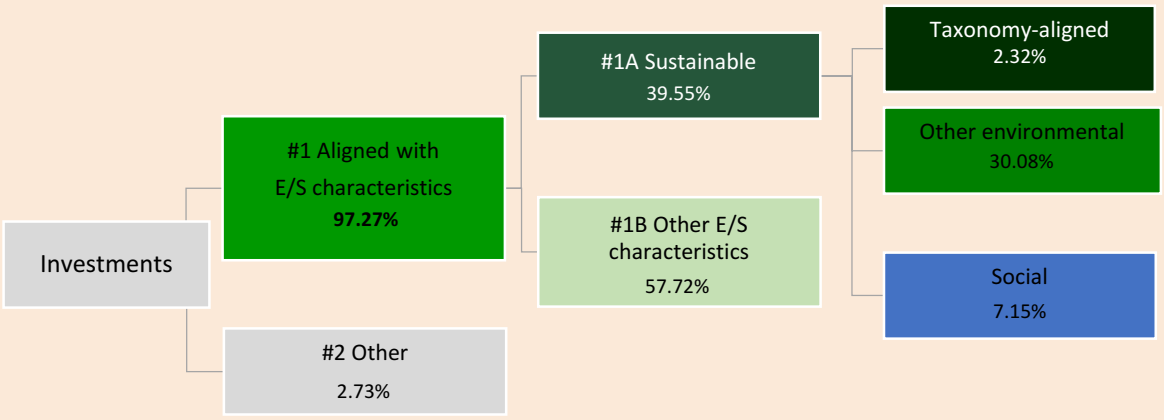
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 39.55% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Financials	*Mutual Funds*	*97.27%*
Others	*Others*	*0.16%*
Forex	*Forex*	*0.04%*
Treasuries	*Treasuries*	*0.00%*

Cash	*Cash*	*2.53%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

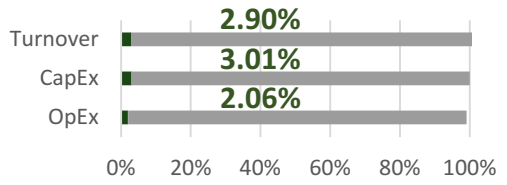
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.32% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

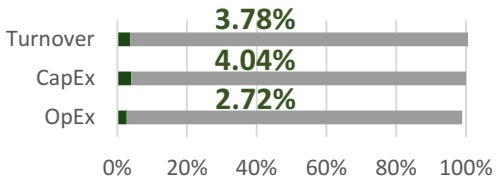
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.94%	96.99%	97.10%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.04%	0.03%	0.02%
Taxonomy-aligned [No gas and nuclear]	2.01%	2.97%	2.87%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	97.28%	95.96%	96.22%
Taxonomy-aligned: Fossil Gas	0.01%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.01%	0.02%	0.01%
Taxonomy-aligned [No gas and nuclear]	2.70%	4.02%	3.76%

This graph represents 72.0% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.10% and the share of investment in enabling activities was 0.83%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.85%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **30.08%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 7.15%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 0.13% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS CASH EUR

Legal entity identifier: 5299002SSK89DA5VPJ96

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **73.74%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **ICE BOFA 1-3 YEAR GLOBAL CORPORATE Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.997 (C).**
- The weighted average ESG rating of the investment universe is **0.142** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.993 (C) and the weighted average ESG rating of the investment universe was 0.098 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

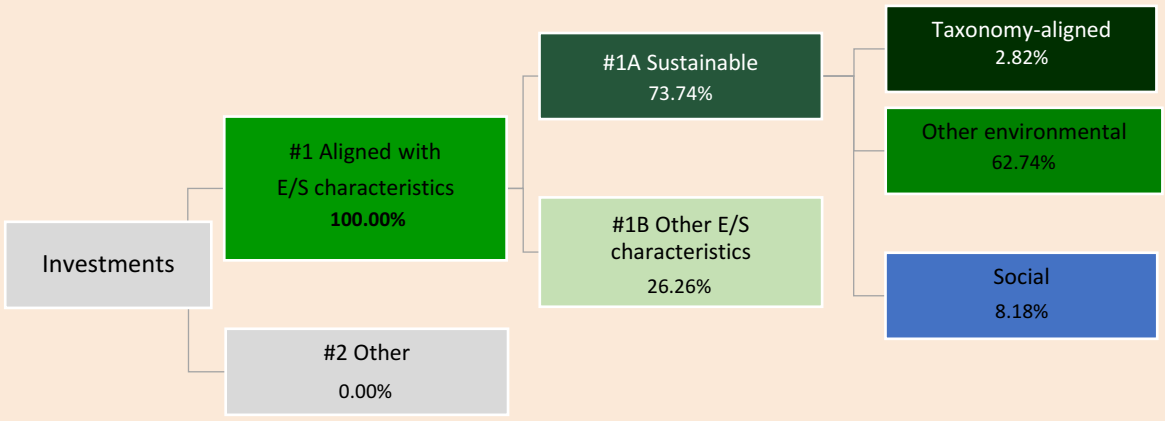
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets

What was the proportion of sustainability-related investments?

The fund invested 73.74% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.82% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

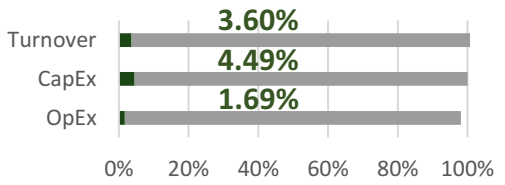
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

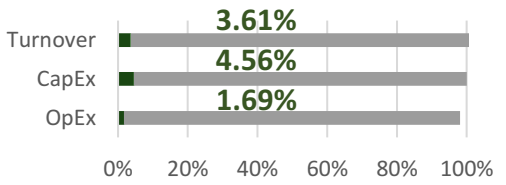
[X] Yes:



[X] In fossil gas [X] In nuclear energy

[ ] No

[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.31%	95.51%	96.40%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.03%	0.04%	0.02%
Taxonomy-aligned [No gas and nuclear]	1.66%	4.43%	3.56%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	98.31%	95.44%	96.39%
Taxonomy-aligned: Fossil Gas	0.01%	0.01%	0.01%
Taxonomy-aligned: Nuclear	0.01%	0.03%	0.02%
Taxonomy-aligned [No gas and nuclear]	1.68%	4.52%	3.58%

This graph represents 97.5% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.15% and the share of investment in enabling activities was 0.82%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 1.71%

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **62.74%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 8.18%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 96.63% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUNDS CASH USD

Legal entity identifier: 529900YRTK94MJYXUO62

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- [ ] Yes
- [X] No

- [ ] It made **sustainable investments with an environmental objective:** _____
  - [ ] in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [ ] in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- [ ] It made a **sustainable investments with a social objective:** _____
- [X] It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **53.68%** of sustainable investments
  - [X] with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - [X] with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - [X] with a social objective
- [ ] It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe **ICE BOFA 1-3 YEAR GLOBAL CORPORATE Index.** In determining the ESG score of the Product and the investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.773 (C).**
- The weighted average ESG rating of the investment universe is **0.142** (**D).**

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

… and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.585 (C) and the weighted average ESG rating of the investment universe was 0.098 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principal Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.
The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary

scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

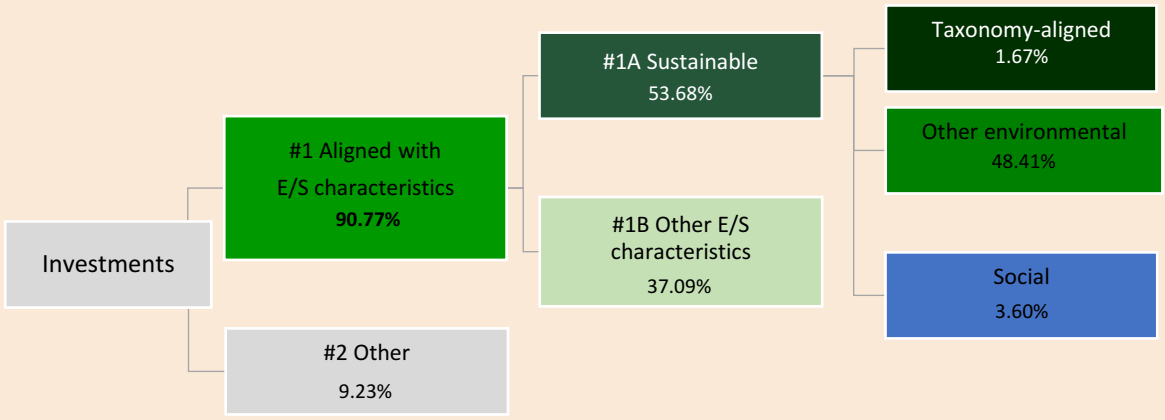
How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion : Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration : Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement : Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote : Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy .
- Controversies monitoring : Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?



The list includes the investments constituting **the greatest proportion of investments** of the financial product during the referenceperiod which is: **From 01/07/2025 to 30/06/2026**

Largest Investments	Sector	Sub-Sector	Country	% Assets
AMUNDI MMST (USD)-OV	Financials	Mutual Funds	Luxembourg	4.00%

What was the proportion of sustainability-related investments?

The fund invested 53.68% in sustainability-related investments.

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made ?

Sector	*Sub-Sector*	*% Assets*
Corporates	*Banking*	*69.21%*
Financials	*Mutual Funds*	*4.00%*
Government-Related	*Agencies*	*3.93%*
Corporates	*Communications*	*3.05%*

Others	*Others*	*2.40%*
Corporates	*Consumer Staples*	*1.95%*
Corporates	*Brokerage*	*1.23%*
Corporates	*Energy*	*1.22%*
Securitized	*Mortgage Assets*	*1.11%*
Corporates	*Capital Goods*	*1.01%*
Corporates	*Electric*	*0.89%*
Corporates	*Consumer Discretionary*	*0.82%*
Cash	*Cash*	*9.18%*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy,** the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

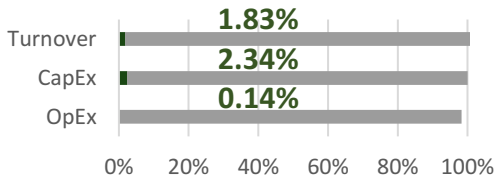
The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.67% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.
The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.
The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1] ?

[X] Yes:

[ ] In fossil gas [X] In nuclear energy

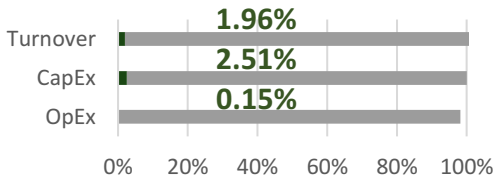
[ ] No



[1]Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-**turnover** reflecting the share of revenue from green activities of investee companies
-**capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.



The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financialproduct including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.86%	97.66%	98.17%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	0.14%	2.33%	1.82%

2. Taxonomy-alignment of investments **excluding sovereign bonds***

	OpEx	CapEx	Turnover
Non Taxonomy-aligned	99.85%	97.49%	98.04%
Taxonomy-aligned: Fossil Gas	0.00%	0.00%	0.00%
Taxonomy-aligned: Nuclear	0.00%	0.01%	0.01%
Taxonomy-aligned [No gas and nuclear]	0.15%	2.50%	1.95%

This graph represents 93.3% of the total investments.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

What was the share of investments in transitional and enabling activities ?

As of 30/06/2026, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.07% and the share of investment in enabling activities was 0.07%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods ?

At the end of the previous period, the percentage of investments with Taxonomy alignment was 0.84%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy ?

The share of sustainable investments with environmental objective not aligned to taxonomy was **48.41%** at the end of the period.
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments ?

The share of socially sustainable investments at the end of the period was 3.60%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards ?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period ?

To meet the sustainable characteristics during the reference period, several actions have been taken at product level:
- Exclusions: The product strategy is relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy.

- Monitoring of sustainable indicators: Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions. These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.
- Engagement: 82.61% of the product has been subject to an active engagement that promotes dialogue with investee companies.

How did this financial product perform compared to the reference benchmark ?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product does not have an ESG Benchmark.

- ***How does the reference benchmark differ from a broad market index ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the reference benchmark ?***

This product does not have an ESG Benchmark.

- ***How did this financial product perform compared with the broad market index ?***

This product does not have an ESG Benchmark.
