- (vii) without limiting the generality of (vi) above, any party to whom FIL is under an obligation to make disclosure by Applicable Laws or voluntary arrangements binding on FIL;
- (viii) external service providers (including but not limited to printing houses, mailing houses, telecommunication companies, public relation companies, advertising agency, telemarketing companies, data processing and data storage companies, storage companies, call centres, market research firms, and information technology companies), that FIL engages for the purposes set out in paragraph (e).

Please note that personal data stored or processed in any jurisdiction outside of Hong Kong may also be accessible to law enforcement, national security and other government authorities of that jurisdiction and may not enjoy the same protection as in Hong Kong.

- (h) Under the Ordinance, any individual has the right:
  - (i) to check whether FIL holds data about him or her, and of access to such data;
  - (ii) to require FIL to correct any data relating to him or her which is inaccurate;
  - (iii) to ascertain FIL's policies and practices in relation to data and to be informed of the kind of personal data held by FIL;
  - (iv) to object to the use of his/her personal data for marketing purposes and FIL shall not use his/her personal data for marketing purposes after he/she communicates his/her objection to FIL.
- (i) In accordance with the terms of the Ordinance, FIL has the right to charge a reasonable fee for the processing of any data access request.
- (j) You may exercise your opt-out right by notifying FIL if you wish to object to the use of your personal data for direct marketing purposes. The person to whom such objections, requests for access to data, correction of data or for information regarding policies and practices and kinds of data held are to be addressed as follows:

The Data Protection Officer  
FIL Investment Management (Hong Kong) Limited  
Level 21, Two Pacific Place  
88 Queensway, Admiralty,  
Hong Kong
- (k) Nothing in this Statement shall limit the rights of the data subject under the Personal Data (Privacy) Ordinance.

# Fidelity Funds – Global Income Fund

## Investment Objective and Policy

**OBJECTIVE** The fund aims to achieve capital growth over time and provide a high level of income.

**INVESTMENT POLICY** The fund invests at least 70% of its assets, in debt securities from anywhere in the world, including emerging markets. Investments may include investment grade and below investment grade debt securities of varying maturities and high yield bonds and emerging market debt denominated in various currencies. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- investment grade debt securities: at least 50%
- below investment grade bonds: up to 50%
- Listed China onshore bonds (directly and/or indirectly): less than 30% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with CoCos less than 20%.

The fund may also invest in other subordinated financial debt and preference shares.

The fund’s exposure to distressed securities is limited to 10% of its assets.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers’ creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see “Sustainable Investing and ESG Integration” and the Sustainability Annex.

**SFDR product category** Article 8 (promotes environmental and/or social characteristics).

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see “How the Funds Use Instruments and Techniques”), the fund intends to use TRS.

**TRS (including CFD) usage** Expected 10%; maximum 50%.

**Securities lending** Expected 15%; maximum 30%.

**Repos/reverse repos** Expected 0%; maximum 30%.

**BENCHMARK(S)** None.

**BASE CURRENCY** USD.

## Planning Your Investment

**ORDER PROCESSING** Requests to buy, switch or sell fund shares that are received and accepted by the Management Company by 4:00 PM CET (3:00 PM UK time) on any Valuation Day are ordinarily processed at the NAV for that Valuation Day. Settlement normally occurs within 3 business days.

## Main Share Classes

Class	Minimum Investment (USD) <sup>1</sup>		Maximum Dealing Fees	Maximum Annual Fees	
	Initial and holding	Subsequent	Entry	Management	Distribution
A	2,500	1,000	3.50%	0.90%	—
E	2,500	1,000	—	0.90%	0.60%
I	10 million	100,000	—	0.55%	—
W, Y	2,500	1,000	—	0.55%	—

Where Class B shares are available the annual management fee of those Shares will be the same as that of the Class A Shares. For a current and complete list of available share classes, including currency hedged, please see section “Investing in Funds”. See section “Fund Fees and Costs” for detailed explanation of above fees.

<sup>1</sup> Or equivalent in any other freely convertible currency.

# Fidelity Funds – US Dollar Bond Fund

## Investment Objective and Policy

**OBJECTIVE** The fund aims to achieve capital growth over time and provide income.

**INVESTMENT POLICY** The fund invests at least 70% (and normally 75%) of its assets, in US dollar denominated debt securities.

The fund may also invest in money market instruments on an ancillary basis.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers’ creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see “Sustainable Investing and ESG Integration” and the Sustainability Annex.

**SFDR product category** Article 8 (promotes environmental and/or social characteristics).

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see “How the Funds Use Instruments and Techniques”), the fund intends to use TRS

**TRS (including CFD) usage** Expected 10%; maximum 50%.

**Securities lending** Expected 15%; maximum 30%.

**Repos/reverse repos** Expected 0%; maximum 30%.

**BENCHMARK(S)** ICE BofA Q4AR Custom Index (a custom USD Aggregate Bond index which excludes the Federal Reserve SOMA holdings), a broad market index that does not take into account ESG characteristics. **Used for:** risk monitoring, investment selection and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over an period may or may not deviate significantly from that of the benchmark.

**BASE CURRENCY** USD.

Fidelity Funds –

# European High Yield Fund

Investment Objective and Policy

**OBJECTIVE** The fund aims to achieve capital growth over time and provide a high level of income.

**INVESTMENT POLICY** The fund invests at least 70% of its assets, in high-yielding below investment grade debt securities of issuers that are headquartered, or do most of their business, in Western, Central and Eastern Europe (including Russia), including emerging markets. These securities will be subject to high risk, will not be required to meet a minimum rating standard, although, most, but not all, will be rated for creditworthiness by an internationally recognised rating agency. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- hybrids and contingent convertible (CoCo) bonds: less than 30%, with CoCos less than 20%

The fund may invest in other subordinated financial debt and preference shares.

The fund’s exposure to distressed securities is limited to 10% of its assets.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers’ creditworthiness, macroeconomic factors, and valuations.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its benchmark. Through the investment management process, the Investment Manager aims to ensure that investee issuers follow good governance practices.

For more information, see “Sustainable Investing and ESG Integration” and the Sustainability Annex.

**SFDR product category** Article 8 (promotes environmental and/or social characteristics).

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see “How the Funds Use Instruments and Techniques”), the fund intends to use TRS.

**TRS (including CFD) usage** Expected 40%; maximum 200%.

**Securities lending** Expected 15%; maximum 30%.

**Repos/reverse repos** Expected 0%; maximum 30%.

**BENCHMARK(S)** ICE BofA Global High Yield European Issuers Constrained (Level 4 20% Cap) Index, a broad market index that does not take into account ESG characteristics. **Used for:** investment selection, risk monitoring, and performance comparison.

The fund invests in securities of the benchmark, however, the management of the fund is discretionary, therefore the fund may invest in securities not included in the benchmark, and its performance over any period may or may not deviate significantly from that of the benchmark.

Fidelity Funds —

Asia Pacific Strategic Income Fund

Investment Objective and Policy

**OBJECTIVE** The fund aims to achieve capital growth over time and provide income.

**INVESTMENT POLICY** The fund invests at least 70% of its assets, in a broad range of debt securities of issuers that are headquartered, or do most of their business in Asia Pacific, including emerging markets. Some of these investments may be below investment grade or unrated. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- Asia Pacific local currency bonds: up to 80%
- below investment grade bonds: up to 90%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with CoCos less than 20%
- Listed China onshore bonds including urban investment bonds, asset-backed securities and below investment grade, or unrated bonds (directly and/or indirectly): up to 50% (in aggregate)
- China offshore bonds (including dim sum bonds): up to 50%
- emerging market bonds: up to 100%.

The fund may also invest in other subordinated financial debt and preference shares.

The fund’s exposure to distressed securities is limited to 10% of its assets.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of bond issuers’ creditworthiness, macroeconomic factors, and valuations. The fund will actively allocate among below investment grade and emerging market bonds. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see “Sustainable Investing and ESG Integration”.

Fidelity Funds —

# China High Yield Fund

Investment Objective and Policy

**OBJECTIVE** The fund aims to provide a high level of income over time.

**INVESTMENT POLICY** The fund invests at least 70% of its assets, in below investment grade or unrated debt securities of issuers that are headquartered or do most of their business in the Greater China region, including China, Hong Kong, Macau and Taiwan. These securities will be subject to high risk and will not be required to meet a minimum rating standard and may not be rated for creditworthiness by an internationally recognised rating agency. The fund may also invest in money market instruments on an ancillary basis.

The fund may invest in the following assets according to the percentages indicated:

- China offshore bonds (including dim sum bonds): up to 100%
- Listed China onshore corporate and government bonds including urban investment bonds, asset-backed securities and below investment grade, or unrated bonds (directly and/or indirectly): up to 60% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos.

The fund may also invest in other subordinated financial debt and preference shares.

The fund’s exposure to distressed securities is limited to 10% of its assets.

Investments of the fund are not currency constrained.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager uses in-house research and investment capabilities to identify suitable opportunities across bond issuers, sectors, geographies, and security types. This may include an assessment of a bond issuers’ creditworthiness, macroeconomic factors, and valuations. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see “Sustainable Investing and ESG Integration”.

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see “How the Funds Use Instruments and Techniques”), the fund intends to use TRS.

**TRS (including CFD) usage** Expected 10%; maximum 50%.

**Securities lending** Expected 15%; maximum 30%.

**Repos/reverse repos** Expected 0%; maximum 30%.

**BENCHMARK(S)** ICE BofA Asian Dollar High Yield Corporate China Issuers Index. Used for: performance comparison only. The Investment Manager is not constrained by the benchmark and there are no restrictions on the extent to which the fund’s performance may deviate from that of the benchmark.

**BASE CURRENCY** USD.

Fidelity Funds —

European Multi Asset Income Fund

Investment Objective and Policy

**OBJECTIVE** The fund aims to provide income over time.

**INVESTMENT POLICY** The fund invests at least 70% of its assets in equities and debt securities of issuers that are listed, headquartered, or do most of their business in Europe, and European governments.

The fund may invest in the following assets according to the percentages indicated:

- European investment grade bonds: up to 70%
- European below investment grade bonds: up to 50%
- European equities: up to 50%
- European government bonds: up to 50%
- China A and B shares and listed onshore bonds (directly and/or indirectly): less than 10% (in aggregate)
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- alternative investments, such as infrastructure securities and eligible REITs: up to 20%
- non-European investments (including equities, government bonds, investment or below Investment grade bonds, emerging market debt or eligible alternative investments): up to 20%
- money market instruments: up to 25%
- SPACs: less than 5%

The fund’s exposure to distressed securities is limited to 10% of its assets.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager combines macroeconomic, market and fundamental company analysis to flexibly allocate investments across asset classes and geographic areas based on their potential to generate income. It considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process, the Investment Manager aims to ensure that investee companies follow good governance practices.

The fund adheres to specific multi asset ESG criteria. For more information, see “Sustainable Investing and ESG Integration” and the Sustainability Annex.

**SFDR product category** Article 8 (promotes environmental and/or social characteristics).

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see “How the Funds Use Instruments and Techniques”), the fund intends to use TRS.

**TRS (including CFD) usage** Expected 80%; maximum 300%.

**Securities lending** Expected 15%; maximum 30%.

**Repos/reverse repos** Expected 0%; maximum 30%.

**BENCHMARK(S)** None.

Fidelity Funds —

# Global Multi Asset Dynamic Fund

Investment Objective and Policy

**OBJECTIVE** The fund aims to achieve capital growth over the long term.

**INVESTMENT POLICY** The fund invests in a range of asset classes including equities, corporate and government bonds, commodities, money market instruments and eligible REITs from anywhere in the world, including emerging markets.

The fund may invest in the following assets according to the percentages indicated:

- bonds of any type: up to 100%
- investment grade bonds: up to 50%
- below investment grade and unrated bonds: up to 75%
- emerging markets bonds: up to 75%
- emerging markets equities: up to 75%
- equities: up to 100%
- Russian securities: up to 15%
- eligible commodity exposure: up to 50%
- China A and B shares and listed onshore bonds (directly and/or indirectly): less than 30% (in aggregate)
- eligible REITs: up to 30%
- hybrids and contingent convertible (CoCo) bonds: less than 30%, with less than 20% in CoCos
- SPACs: less than 5%

The fund may also invest in other subordinated financial debt and preference shares.

The fund’s exposure to distressed securities is limited to 10% of its assets.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager will tactically allocate investments across asset classes and geographic areas (including emerging markets) based on their potential to generate capital growth or reduce overall risk. The Investment Manager takes into account Sustainability Risks in its investment process.

For more information, see “Sustainable Investing and ESG Integration”.

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see “How the Funds Use Instruments and Techniques”), the fund intends to use TRS.

**TRS (including CFD) usage** Expected 50%; maximum 150%.

**Securities lending** Expected 15%; maximum 30%.

Fidelity Funds –

# Fidelity Target™ 2025 Fund

## Investment Objective and Policy

**OBJECTIVE** The fund aims to achieve capital growth over the long term for investors planning to withdraw substantial portions of their investment in the year 2025.

**INVESTMENT POLICY** The fund invests in a range of asset classes such as bonds, equities, interest bearing and money market instruments as well as eligible exposure to commodities from anywhere in the world, including emerging markets. These investments may be denominated in any currency and some of them may be below investment grade or unrated. The proportion of assets allocated to each asset class varies over time and the fund will increasingly favour lower risk investments as it approaches its target date, shifting to an increasingly conservative asset allocation.

The fund may invest in the following assets according to the percentages indicated:

- collateralised and securitised debt instruments: up to 20%
- SPACs: less than 5%

The fund will not terminate at the target date but will continue to be managed in accordance with its investment objective and policy.

**INVESTMENT PROCESS** The fund is actively managed and references a blend of market indices (each a “Market Index”) in order to set internal guidelines around the weightings allocated to different asset classes. The fund is managed to offer an optimized asset allocation between asset classes with different risk and return characteristics. The asset allocation has been designed to de-risk portfolio by migrating from a growth to a defensive asset allocation up to the fund’s target date.

The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

The fund adheres to specific multi asset ESG criteria. For more information, see “Sustainable Investing and ESG Integration” and the Sustainability Annex.

**SFDR product category** Article 8 (promotes environmental and/or social characteristics).

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives for hedging, efficient portfolio management and investment purposes.

In addition to core derivatives (see “How the Funds Use Instruments and Techniques”), the fund intends to use TRS.

**TRS (including CFD) usage** Expected 50%; maximum 150%.

**Securities lending** Expected 15%; maximum 30%.

**Repos/reverse repos** Expected 0%; maximum 30%.

**BENCHMARK(S)** The fund references a blend of market indices (each a ‘Market Index’) to set internal guidelines around the weightings allocated to different asset classes. As the fund’s exposure to different asset classes evolves over time in line with the fund’s investment policy, the Market Indices referenced and their weightings will also change accordingly. While the fund may take direct or indirect exposure to the components of the Market Indices, there are no restrictions on the extent to which the fund’s portfolio and performance may deviate from the Market Indices. The Market Indices do not take into account ESG characteristics. The Market Indices are listed in the KID and are represented by a blended index for the purposes of performance comparison. Further information on the current list of Market Indices as well as past weightings is available on request.

**BASE CURRENCY** EUR.

Fidelity Funds —

# Euro Cash Fund

## Investment Objective and Policy

**OBJECTIVE** The fund aims to offer returns in line with money market rates over the recommended holding period.

**INVESTMENT POLICY** The fund invests at least 70% (and normally 75%) in euro denominated money market instruments such as reverse repurchase agreements and deposits.

The fund qualifies as a short-term VNAV money market fund and it is rated Aaa-mf by Moody’s Investor Services, Inc.

**INVESTMENT PROCESS** In actively managing the fund, the Investment Manager uses fundamental and relative analysis to select issuers and short term securities whilst constructing a high quality portfolio with a focus on liquidity and risk management. The Investment Manager considers ESG characteristics when assessing investment risks and opportunities. In determining ESG characteristics, the Investment Manager takes into account ESG ratings provided by Fidelity or external agencies.

The fund aims to achieve an ESG score of its portfolio greater than that of its investment universe. Through the investment management process the Investment Manager aims to ensure that investee companies follow good governance practices.

For more information, see “Sustainable Investing and ESG Integration” and the Sustainability Annex.

**SFDR product category** Article 8 (promotes environmental and/or social characteristics).

**DERIVATIVES AND TECHNIQUES** The fund may use derivatives only for the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the fund.

**TRS (including CFD) usage** None.

**Securities lending** Expected 0%; maximum 0%.

**Repos/reverse repos** Expected 0%; maximum 10/15%.

# Sustainable Investing and ESG Integration

## Sustainable Investing

The EU Sustainable Finance Disclosure Regulation (SFDR) are EU rules which came into effect in 2021 and aim to help investors understand the sustainability profile of financial products. SFDR focuses on the disclosure of environmental, social and governance considerations by firms and within the investment process. SFDR establishes requirements for pre-contractual and ongoing disclosures to investors including on the integration of Sustainability Risks, the consideration of adverse sustainability impacts, on sustainable investment objectives, or on the promotion of environmental or social characteristics, in investment decision - making. The EU Taxonomy regulation accompanies the SFDR and aims to create consistent standards through enhanced transparency and providing an objective point of comparison to end investors on the proportion of investments that fund environmentally sustainable economic activities.

These measures are in response to the signing of the Paris Agreement, and the United Nations 2030 Agenda for Sustainable Development of 2015 which created the Sustainable Development Goals. The SFDR and other regulations are also aligned with the European Green Deal, which targets the EU being carbon neutral by 2050.

The transition to a low-carbon, more sustainable, resource-efficient, and circular economy in line with the SDGs is key to ensuring long-term competitiveness of the economy of the EU. The Paris Agreement entered into force in 2016 and seeks to strengthen the response to climate change by making finance flows consistent with a pathway towards low greenhouse gas emissions and climate-resilient development.

## Fidelity International and Sustainable Investing

### General approach to sustainable investing

Fidelity's Sustainable Investing approach may be found on [Sustainable investing framework \(fidelityinternational.com\)](https://www.fidelityinternational.com/sustainable-investing-framework). The Sustainable Investing Principles document sets out details of Fidelity's approach to sustainable investing, including Fidelity's expectations of investee issuers, ESG integration and implementation, approach to engagement and voting, exclusion and divestment policy and focus on collaboration and policy governance.

All funds managed by the Investment Manager are subject to a firm-wide exclusions list, which includes, but is not limited to, controversial weapons (biological, chemical, incendiary weapons, non-detectable fragment, blinding lasers, cluster munitions, landmines and nuclear weapons for non-signatories of the Treaty on the Non-Proliferation of Nuclear Weapons).

### SUSTAINABILITY RISK

Fidelity considers Sustainability Risks across all asset classes and funds, unless otherwise stated. Sustainability Risks refer to an environmental (E), social (S) or governance (G) (collectively, "ESG") event, or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment.

Fidelity's approach to Sustainability Risk integration seeks to identify and assess the ESG risks at an individual issuer level. Sustainability Risks which may be considered by Fidelity's investment teams include, but are not limited to:

- environmental risks: the ability of companies to mitigate and adapt to climate change and the potential for higher carbon prices, exposure to increasing water scarcity and potential for higher water prices, waste management challenges, and impact on global and local ecosystems;
- social risks: product safety, supply chain management and labour standards, health and safety and human rights, employee welfare, data & privacy concerns and increasing technological regulation; and
- governance risks: board composition and effectiveness, management incentives, management quality and alignment of management with shareholders.

Fidelity's portfolio managers and analysts supplement the study of financial results of potential investments with additional qualitative and quantitative non-financial analysis including Sustainability Risks and will factor them into investment decision making and risk monitoring to the extent they represent potential or actual material risks and/or opportunities to maximise long-term risk-adjusted returns. This systematic integration of Sustainability Risks in investment analysis and decision-making relies on:

"qualitative assessments", which will be by reference, but not limited, to case studies, environmental, social and governance impacts associated with issuers, product safety documents, customer reviews, company visits or data from proprietary models and local intelligence; and "quantitative assessments", which will be by reference to ESG ratings which may be an internal rating assigned by the Investment Manager primarily using Fidelity ESG Rating(s) (described below) or from external providers, including but not limited to MSCI, relevant data in third-party certificates or labels, assessment reports on carbon footprints, or percentage of economic activities of issuers generated from ESG-relevant activities.

### Delegated Investment Management

Where the Investment Manager has sub-delegated investment management activities to Fidelity Management & Research Company LLC or FIAM LLC, such sub-delegate avails of the expertise of its own ESG team for the provision of fundamental analysis with sector relative ESG ratings information to identify and assess Sustainability Risks.

Where the Investment Manager has sub-delegated investment management activities to Geode Capital Management, LLC, such sub-delegate implements its own ESG programme through proxy voting and participation in collective company engagement initiatives and may seek to invest assets of the fund in holdings or instruments which provide passive exposure to an index incorporating ESG exclusionary criteria within its index methodology.

The general approach for Sustainability Risk integration in the investment process set out above applies to all funds within Fidelity Funds other than Fidelity Funds - Euro 50 Index Fund. As detailed in the investment objective for Fidelity Funds - Euro 50 Index Fund, this fund aims to track the composition and returns of the Index as closely as possible. Accordingly, the Investment Manager does not integrate Sustainability Risks into its security selection process as the securities held by the fund are determined by the constituents of the Index and the Investment Manager is constrained by this.

### FIDELITY ESG RATINGS

Fidelity ESG Ratings is a proprietary ESG rating system developed by Fidelity's research analysts to assess individual

# Credit Policies

The Investment Manager assesses credit quality according to the references and methods described below.

For bonds, credit ratings are considered at the security or issuer level and at the time of securities' purchases. The funds may hold securities that have been downgraded.

For bonds and money market instruments, the Management Company only uses ratings of credit agencies established and registered in the EU. The Management Company does its own credit analysis and does not solely rely on agency credit ratings.

## INVESTMENT GRADE BONDS (AAA/AAA TO BBB-/BAA3) AND BELOW INVESTMENT GRADE BONDS (BB+/BA1 OR LOWER)

These securities must be rated by Standard & Poor's or another internationally recognised rating agency. If ratings disagree, we use the second-highest rating.

## ASSETS HELD BY MONEY MARKET FUNDS

When assessing money market instruments, securitisations and asset-backed commercial papers for money market funds (as defined and regulated by Regulation (EU) 2017/1131) to determine whether their credit quality receives a favourable assessment, the Management Company reviews agency credit ratings and also applies its own internal credit quality assessment procedure using up-to-date quality information from other reliable sources.

This procedure is based on prudent, systematic and continuous assessment methodologies that take into account the characteristics of both issuer and instrument and has been validated by experience and empirical evidence, including back-testing.

The procedure includes criteria to analyse financial data, identify trends, and track key determinants of credit risk. The Management Company supervises the application of the procedure by a team of credit research analysts and regularly monitors the procedure for accuracy, adequacy and proper execution, making adjustments to the relative importance of the assessment criteria from time to time. The procedure complies with articles 19.4 and 20.2 of Regulation (EU) 2017/1131 and is approved by the management company's conducting officers and subsequently by the management company's directors.

The internal assessment procedure relies on numerous indicators. Examples of quantitative criteria include pricing of money market instruments and credit default swaps; monitoring of relevant financial indices covering geographical, sector, and asset class; and industry-specific financial and default information. Examples of qualitative criteria include the competitive position, governance risk, financial situation and liquidity sources of the issuer; the issuer's ability to react to future events; the strength of the issuer's sector within the economy and relative to economic trends; and the class, structure, short-term characteristics, underlying assets, liquidity profile, relevant markets, and potential operational and counterparty risks of the instrument. According to article 21 of Regulation (EU) 2017/1131, the Management Company documents its internal credit quality assessment procedure and credit quality assessments.

Non-money market funds	Money market funds	Usage by funds
<b>5. Shares of UCITS or other UCIs that are linked to the SICAV*</b>		
<p>Must meet all non-money market fund requirements in row 4.</p> <p>The SICAV's annual report must state the total annual management and advisory fees charged both to the fund and to the UCITS/other UCIs in which the fund has invested during the relevant period.</p> <p>The UCITS/other UCI cannot charge a fund any fees for subscribing for or redeeming shares.</p>	<p>Same as row 4. If the acquiring MMF and Target MMF are managed or controlled by the same Management Company or another affiliated management company, the Management Company or that other company is prohibited from charging subscription or redemption fees.</p>	<p>Non-MMF usage same as row 4, plus funds pay no annual management or advisory fees to any linked UCITS/other UCI.</p>
<b>6. Shares of other funds of the SICAV</b>		
<p>Must meet all non-money market fund requirements in rows 4 and 5.</p> <p>The target fund cannot invest, in turn, in the acquiring fund (reciprocal ownership).</p> <p>The acquiring fund surrenders all voting rights in shares of the target fund it acquires.</p> <p>When measuring whether a fund meets the minimum required asset level, the value of investment in target funds is not included.</p>	<p>Same as row 4.</p>	<p>Non-MMF usage same as row 4, plus funds pay no annual management or advisory fees to any other funds.</p>
<b>7. Real estate and commodities, including precious metals</b>		
<p>Direct ownership of commodities, or certificates representing them, is prohibited. Investment exposure is allowed only indirectly, through assets, techniques and transactions allowed under the 2010 Law.</p> <p>The financial indices used to obtain exposure to commodities through financial derivatives instruments comply with the requirements set out in the article 9 of the Grand-Ducal Regulation of 8 February 2008.</p> <p>Direct ownership of real estate and other tangible property is prohibited except for any used by the SICAV itself for its operations.</p>	<p>Exposure not permitted in any form.</p>	<p>Usage likely to create material risk is described in "Fund Descriptions". Direct purchases of real or tangible property are unlikely.</p>
<b>8. Deposits with credit institutions</b>		
<p>Must be repayable or withdrawable on demand, and any maturity date must be up to 12 months in the future.</p> <p>The credit institutions either must have a registered office in an EU member state or, if not, be subject to prudential supervision rules the CSSF considers to be at least as stringent as EU rules.</p>	<p>Same as for non-money market funds.</p>	<p>Any usage will be described in "Fund Descriptions".</p>
<b>9. Ancillary liquid assets</b>		
<p>Limited to 20% of the portfolio net assets under normal market circumstances.</p> <p>Only bank deposits at sight, such as cash held in current accounts with a bank accessible at any time.</p> <p>Must be held only for treasury purposes or a period of time necessary in case of unfavourable market conditions.</p> <p>On a temporary basis, if justified by exceptionally unfavourable market conditions and where in the best interests of the shareholders, ancillary liquid assets may represent more than 20% of the portfolio net assets.</p>	<p>Limited to 20% of the portfolio net assets.</p> <p>Only bank deposits at sight, such as cash held in current accounts with a bank accessible at any time.</p>	<p>Commonly used by all funds, and may be used extensively for temporary defensive purposes.</p>
<b>10. Derivatives and equivalent cash-settled instruments</b> See also "How the Funds Use Instruments and Techniques" on page 110.		
<p>Underlying assets must be those described in rows 1, 2, 4, 5, 6 and 8 or must be financial indices (compliant with article 9 of the Grand-Ducal Regulation of 8 February 2008), interest rates, foreign exchange rates or currencies consistent with fund investment objectives and policies.</p> <p>All usage must be adequately captured by the risk management process described in "Management and monitoring of global risk" below.</p> <p>OTC derivatives must meet all of the following criteria:</p> <ul style="list-style-type: none"> <li>be subject to reliable and verifiable independent daily valuations</li> <li>be able to be sold, liquidated or closed by an offsetting transaction at their fair value at any time at the SICAV's initiative</li> <li>be with counterparties that are institutions subject to prudential supervision and that belong to categories approved by the CSSF</li> </ul>	<p>Must be dealt in on a regulated market as referred to in row 1 or OTC and all of the following conditions are fulfilled:</p> <ul style="list-style-type: none"> <li>the underlying of the derivative instrument consists of interest rates, foreign exchange rates, currencies or indices representing one of those categories;</li> <li>the derivative instrument serves only the purpose of hedging the interest rate or exchange rate risks inherent in other investments of the Fund;</li> <li>the counterparties to OTC derivative transactions are institutions subject to prudential regulation and supervision and belonging to the categories approved by the competent authority of the Fund;</li> <li>the OTC derivatives are subject to reliable and verifiable valuation on a daily basis and can be sold, liquidated or closed by an offsetting transaction at any time at their fair value at the Fund's initiative</li> </ul>	<p>Material usage is described in "Fund Descriptions".</p>

\* May include ETFs. A UCITS or other UCI is considered to be linked to the SICAV if both are managed or controlled by the same Management Company or another affiliated management company.

Non-money market funds	Money market funds	Usage by funds
<b>11. Securities lending, repurchase/reverse repurchase agreements</b> See also “How the Funds Use Instruments and Techniques” on page 110.		
<p>Must be used for efficient portfolio management only. The volume of transactions must not interfere with a fund’s pursuit of its investment policy or its ability to meet redemptions. With loans of securities and with repurchase transactions, the fund must ensure that it has sufficient assets to settle the transaction. All counterparties must be subject to EU prudential supervision rules or to rules the CSSF considers to be at least as stringent.</p> <p>For each transaction, the fund must receive and hold collateral that is at least equivalent, at all times during the lifetime of the transactions, to the full current value of the securities lent.</p> <p>During the life of a repurchase contract, the fund cannot sell the securities that are the object of the contract, either before the right to repurchase these securities has been exercised by the counterparty, or the repurchase term has expired.</p> <p>A fund may lend securities:</p> <ul style="list-style-type: none"> <li>• directly to a counterparty</li> <li>• through a lending system organised by a financial institution that specialises in this type of transaction</li> <li>• through a standardised lending system organised by a recognised clearing institution</li> </ul> <p>The SICAV cannot grant or guarantee any other type of loan to a third party.</p> <p>The fund must have the right to terminate any securities lending, repurchase or reverse repurchase transaction and to recall the securities that have been lent or are subject to the repurchase agreement.</p>	<p><b>Securities lending</b> is not permitted.</p> <p>The MMF must have the right to terminate a repurchase or reverse repurchase agreement with up to two working days’ notice; for reverse repurchase agreements, the MMF must receive back the full amount of cash (on either an accrued or mark-to-market basis; if the latter, that value must be used in calculating NAV).</p> <p>Repurchase agreements must meet all of the following criteria:</p> <ul style="list-style-type: none"> <li>• be no longer than 7 working days</li> <li>• be used only to manage temporary liquidity</li> <li>• the counterparty cannot sell, invest, pledge or otherwise transfer assets provided as collateral without the fund’s prior consent</li> <li>• the cash received must not exceed 10% of MMF assets and must be placed in deposits or invested in assets that are issued or guaranteed by one or more EU-level issuers or a central authority or central bank of a third country and that have received, for both issuer and issue, favourable internal credit assessments</li> </ul> <p>Assets received through reverse repurchase agreements must meet all of the following:</p> <ul style="list-style-type: none"> <li>• market value must at all times at least equal cash paid out</li> <li>• they are money market instruments as described in row 2 above</li> <li>• they are issued by an entity that is independent from the counterparty and not expected display high correlation with it</li> <li>• the MMF cannot sell, invest, pledge or otherwise transfer assets provided as collateral without the counterparty’s prior consent</li> <li>• they do not create more than 15% exposure to any one issuer except an EU and international issuer</li> </ul> <p>Assets received through reverse repurchase agreements in accordance with the exceptions column of row A in the “Diversification requirements” table below.</p>	<p>Material usage is described in “Fund Descriptions”. For securities lending, the funds require higher collateral than regulations specify.</p>
<b>12. Borrowing</b>		
<p>The SICAV is not allowed to borrow in principle except if it on a temporary basis and represents up to 10% of fund assets. The SICAV may however acquire foreign currency via back-to-back loans.</p>	<p>Not permitted in any form.</p>	<p>No funds currently intend to borrow from banks.</p>
<b>13. Short exposure</b>		
<p>Direct short sales are prohibited. Short positions may be acquired only indirectly, through derivatives.</p>	<p>Exposure not permitted in any form.</p>	<p>Any usage likely to create material risk is described in “Fund Descriptions”.</p>

### Master - Feeder funds

The SICAV can create funds, that qualify as a master fund or a feeder fund. It can also convert existing funds into feeder funds, or switch any feeder fund to a different master fund. The rules below apply to any sub-fund that is a feeder fund.

Security	Investment requirements	Other terms and requirements
Units of the master fund	<ul style="list-style-type: none"> <li>• At least 85% of assets</li> </ul>	
Derivatives and ancillary liquid assets	<ul style="list-style-type: none"> <li>• Up to 15% of assets</li> </ul>	<p>Derivatives must only be used for hedging. Movable and immovable property must be essential for the direct pursuit of the feeder fund’s business. In measuring derivatives exposure, the fund must combine its own direct exposure with the exposure created by the master fund.</p>

### Additional voluntary requirements

Certain funds have voluntarily agreed to manage their portfolios to comply with certain requirements where doing so will allow them to distribute the funds in the countries indicated below, and in some cases to offer tax benefits to investors in those countries. This table lists only requirements that concern portfolio investment and that exceed those otherwise applicable to a fund (including the fund’s own limits as stated in this prospectus).

Jurisdiction	Requirements	Applies to
	<p>direct and indirect exposure to the abovementioned Mainland China securities shall not, at any time, exceed 20% (or such other percentage stipulated by the FSC from time to time) of the fund's Net Asset Value."</p> <ul style="list-style-type: none"> <li>The securities market of Taiwan may not constitute the primary investment region in the portfolio of each fund. The investment amount of each Fund in the securities market of Taiwan shall not exceed a certain percentage stipulated by the FSC from time to time.</li> </ul>	

Diversification requirements

To ensure diversification, a fund cannot invest more than a certain amount of its assets in one issuer, as defined below. These diversification rules do not apply during the first 6 months of a fund’s operation, but the fund must observe the principle of risk spreading.

For purposes of this table, companies that share consolidated accounts (whether in accordance with Directive 83/349/EEC or with recognised international rules) are considered to be a single issuer. The percentage limits indicated by the vertical brackets in the center of the table indicate the maximum aggregate investment in any single issuer for all bracketed rows.

Maximum investment/exposure, as a % of fund assets				
Category of securities	In any one issuer	In aggregate	Other	Exceptions
NON-MONEY MARKET FUNDS				
A. Transferable securities and money market instruments issued or guaranteed by a sovereign nation, any EU public local authority, or any public international body to which one or more EU member states belongs.	35%	35%		<p>A fund may invest up to 100% of its assets in a single issuer, if it is investing in accordance with the principle of risk spreading and meets all of the following criteria:</p> <ul style="list-style-type: none"><li>• it invests in at least 6 different issues</li><li>• it invests up to 30% in any one issue</li><li>• the securities are issued by an EU member state, its local authorities or agencies, a member state of the OECD or of the G20, Singapore or by a public international bodies of which one or more EU member state belongs</li></ul> <p>The exception described for row C applies to this row as well.</p>
B. Bonds issued by a credit institution whose registered office is in an EU member state and which is subject by law to special public supervision designed to protect bondholders*.	25%			
C. Any transferable securities and money market instruments other than those described in rows A and B above.	10%	20%	80% in any issuers in whose bonds a fund has invested more than 5% of assets.	<p>20% in transferable securities and money market instruments within the same group. 40% in all issuers in which a fund has invested more than 5% of assets (does not include deposits and counterparty exposure for OTC derivative contracts).</p> <p>For index-tracking funds, the 10% increases to 20% in the case of a published, sufficiently diversified index that is adequate as a benchmark for its market and is recognised by the CSSF. This 20% increases to 35% (but for one issuer only) when a security is highly dominant in the Regulated Market in which it trades.</p>
D. Deposits with credit institutions.	20%			
E. OTC derivatives with a counterparty that is a credit institution as defined in row 8 above (first table in section).	10% max risk exposure (OTC derivatives and efficient portfolio management techniques combined)			
F. OTC derivatives with any other counterparty.	5% max risk exposure			
G. Shares of UCITS or UCIs as defined in rows 4 and 5 above (first table in section).	With no specific statement in the fund's objective and policies, 10% in one or more UCITS or other UCIs With a specific statement: <ul style="list-style-type: none"><li>• 20% in any one UCITS or UCI</li><li>• 30% in aggregate in all UCIs other than UCITS</li><li>• 100% in aggregate in all UCITS</li></ul>		<p>Target funds of an umbrella structure whose assets and liabilities are segregated are considered as a separate UCITS or other UCI.</p> <p>Assets held by the UCITS or other UCIs do not count for purposes of complying with rows A - F of this table.</p>	

\* These bonds also must invest all sums deriving from their issuance in assets that, for the life of the bonds, are capable of covering all claims attaching to the bonds and in case of issuer bankruptcy would be used, on a priority basis, to reimburse principal and accrued interest.

Maximum investment/exposure, as a % of fund assets

Category of securities	In any one issuer	In aggregate	Other	Exceptions
<b>MONEY MARKET FUNDS</b>				
<b>H. Money market instruments</b>	5%	5%		<p>With regulator approval, and with disclosure in constitutional and marketing documents that includes a list of issuers in which 5% or more of assets may be invested, a fund may invest in as few as six issues that are issued by an EU member state, its local authorities or agencies, a member state of the OECD or of the G20, Singapore or by a public international bodies of which one or more EU member state belongs, up to 100% net exposure, if it is investing in accordance with the principle of risk spreading and invests up to 30% in any one issue.</p>
<b>I. Money market instruments, securitisations and ABCPs issued by the same body</b>	5%			
<b>J. Bonds issued by a credit institution whose registered office is in an European state and which is subject by law to special public supervision designed to protect bondholders.</b>	10%	15%	<p>40% in aggregate in all issuers in whose bonds a fund has invested more than 5% of assets.</p>	<p>Sums deriving from the issue of these bonds must be invested in assets which, during the whole period of validity of such bonds, are capable of covering claims attaching to the bonds and which, in the event of failure of the issuer, would be used on a priority basis for the reimbursement of the principal and payment of the accrued interest.</p>
<b>K. Bonds issues by a single credit institutional where the requirements set out in point (f) of Article 10(1) or point (c) of Article 11 (1) of the Delegated Regulation (EU) 2015/61 are met.</b>	20%			
<b>L. Deposits with credit institutions.</b>	10%			<p>Increases to 15% (and the aggregate limit of 15% on row H through L exposures increases to 20%) if there are not enough viable credit institutions in the MMF's jurisdiction to allow it to meet the diversification requirement and it is not economically feasible to make deposits in another member state. With local regulator approval, increases to 100% for instruments issued or guaranteed by EU and international issuers.</p>
<b>M. OTC derivatives.</b>	5% exposure to any one counterparty			
<b>N. Reverse repurchase agreements.</b>	15% in cash to any one counterparty			<p>Received assets: exposure to a given issuer up to 15%, except where those assets take the form of money market instruments that fulfil the requirements of the 100% derogation under row 1.</p>

Limits on concentration of ownership

These limits are intended to prevent the SICAV or a fund from the risks that could arise (for itself or an issuer) if it were to own a significant percentage of a given security or issuer. For purposes of this table and the diversification table below, companies that share consolidated accounts (whether in accordance with Directive 83/349/EEC or with recognised international rules) are considered to be a single issuer. A fund does not need to comply with the investment limits described below when exercising subscription rights attaching to portfolio assets, so long as any resulting violations of the investment restrictions are corrected as described in the introduction to “General Investment Powers and Restrictions”.

Category of securities		Maximum ownership, as a % of the total value of the securities issued	
NON-MONEY MARKET FUNDS			
Securities carrying voting rights		Less than would enable the SICAV to exercise significant influence over the management of an issuer	<div>These rules do not apply to:<ul style="list-style-type: none"><li>securities described in row 1 of the table above</li><li>shares of a non-EU company that invests mainly in its home country and represents the only way for a portfolio to invest in that country under the 2010 Law</li><li>purchases or repurchases of shares of subsidiaries that provide only management, advice or marketing in their country, when done as a way of effecting transactions for SICAV shareholders in accordance with the 2010 law</li></ul></div>
Non-voting securities of any one issuer	10%	<div>These limits can be disregarded at purchase if at that time the gross amount of bonds or money market instruments, or the net amount of the instruments in issue, cannot be calculated.</div>	
Debt securities of any one issuer	10%		
Money market securities of any one issuer	10%		
Shares of any sub-fund of an umbrella UCITS or UCI	25%		
MONEY MARKET FUNDS			
Money market instruments, securitisations and ABCPs of any one issuer	10%	Does not apply to money market instruments issued or guaranteed by EU and international issuers.	

Management and monitoring of global risk

The Management Company has implemented a risk management process, approved and supervised by its board, to monitor and measure at any time the overall risk profile of each fund from direct investment, derivatives, techniques, collateral and all other sources. Further information about the risk management process is available upon request from the Management Company.

Global exposure assessments are calculated every trading day (whether or not the fund calculates a NAV for that day), and encompass numerous factors, including coverage for contingent liabilities created by derivative positions, counterparty risk, foreseeable market movements and the time available to liquidate positions.

Any derivatives embedded in transferable securities or money market instruments count as derivatives held by the fund, and any exposure to transferable securities or money market instruments gained through derivatives (except certain index-based derivatives) counts as investment in those securities or instruments.

**RISK MONITORING APPROACHES** There are 3 main risk measurement approaches: the commitment approach and the 2 forms of value at risk (VaR), absolute VaR and relative VaR. These approaches are described below, and the approach each fund uses is identified in “Fund Descriptions”. The Management Company chooses the approach a fund will use based on its investment policy and strategy.

Approach	Description
Absolute Value-at-Risk (Absolute VaR)	The fund seeks to estimate the maximum potential loss due to market risk it could experience in a month (20 trading days) under normal market conditions. The estimate is based on the previous 12 months (250 business days) of the fund’s performance, and requires that 99% of the time, the fund’s worst outcome is no worse than a 20% decline in net asset value.
Relative Value-at-Risk (Relative VaR)	The relative VaR of the fund is expressed as a multiple of a benchmark or reference portfolio. The fund seeks to estimate the potential loss due to market risk it could experience within one month (20 trading days) under normal market conditions. The estimate is based on the previous 12 months (250 Business Days) of the fund’s performance, and requires that 99% of the time, the fund’s worst outcome cannot exceed 200% of the VaR of the relevant benchmark or reference portfolio.
Commitment	The fund calculates its global exposure by taking into account either the market value of an equivalent position in the underlying asset or the derivative’s notional value, as appropriate. This allows the fund to reduce its global exposure by taking into account the effects of any hedging or offsetting positions. Certain types of risk-free transactions, leverage-free transactions and non-leveraged swaps are therefore not included in the calculation. A fund using this approach must ensure that its overall market exposure does not exceed 210% of its assets (100% from direct investment, 100% from derivatives and 10% from borrowings).

Shares purchased when a NAV is less than its adjusted high water mark will not accrue any performance fee on any NAV increases up to the adjusted high water mark.

## PERFORMANCE FEE TERMS

**Accrual** The accrual of daily performance fee adjustments (positive or negative) throughout the financial year. Any fee accrual that exists on the last valuation day of the financial year is paid to the management company.

**Crystallisation** The point at which accrual ceases and any accrued performance fee becomes payable (and non-refundable). Crystallisation occurs:

- on the last valuation day of the financial year (provided that a Share Class has been in existence for the whole of the financial year or if a Share Class is launched during the financial year, the crystallisation will occur on the last valuation day of the Share's first full financial year)
- upon any liquidation or merger of an affected fund or Share Class (subject to the best interest of investors of both the merging and the receiving fund or Share Class)
- upon orders for switching out or redemption (applied to those shares only)

**High water mark** A mechanism designed to ensure that shareholders are not charged a performance fee until any previous losses are recovered. There is no mechanism to lower the high water mark. The adjustment of the high water mark may not be below the initial value. This model is used for funds with cash benchmarks identified as such in Fund Descriptions.

**Hurdle rate** A mechanism designed to ensure that a performance fee will only be paid when shares outperform their benchmark. If the share has been launched part way through the financial year, the hurdle rate will be calculated in proportion to the length of the period.

**Performance period** The period over which a performance fee accrues). This is normally the same as the SICAV's financial year, but in certain circumstances may begin at another time (such as when a new fund or share class is launched) or end at another time (such as when a fund or share class is liquidated).

## Notices, Publications and Other Information

The following table shows which material (in its most recent version) is made available through which channels items in the first 6 rows are typically available through financial advisors.

Information/document	Sent	Media	Online	Office
KIDs, prospectus, financial reports			•	•
Shareholder notices	•		•	•
The suspension of NAV calculation expected to last more than a week		•	•	•
The daily NAV of each non-money market fund			•	•
For each money market fund, the daily NAV, calculated to four decimal points, along with weekly data on the net yield, maturity breakdown, credit profile, weighted average maturity (WAM), weighted average life (WAL), 10 largest holdings, and its assets			•	•
Any swing price adjustment of above 2% of the NAV			•	
Dividend announcements			•	•
Statements/confirmations	•			
Core agreements (the articles; agreements with the management company, investment managers, depositary, administrator, local agents and representatives, and other major service providers)				•
Policies and procedures for complaint handling, voting of portfolio shares, research fees best execution, inducements (financial and non-financial) available to the management company, list of current distribution agents/nominees, and a description of the depositary's current duties and related conflicts of interest				•
Core policies (conflicts of interest, best execution, remuneration, voting, complaints handling, benchmarks, etc.) as well as a current list of sub-custodians			•	•

### KEY

**Sent** General materials: sent to all shareholders directly registered in the SICAV's shareholder list at the address of record (physically, electronically, or as an emailed link). Investor-specific materials, such as account statements, trade confirmations, and suspensions of requests to exchange or sell an investor's shares: sent to the relevant shareholder(s). Any communications to shareholders will be published on the respective local/country websites and/or may be notified via e-mail, (in the latter case only) where a shareholder has consented and provided an e-mail address to the Management Company for such purposes.

**Media** Published, as required by law or as determined by the Board, in newspapers or other media, or electronic platforms, such as Bloomberg, as well as the Recueil Electronique des Sociétés et Associations.

**Online** Posted online on [fidelityinternational.com](https://www.fidelityinternational.com).

**Office** Available free upon request from the registered offices of the management company, and available for inspection at those offices; the KIDs, prospectus, financial reports are available on the same basis from the depositary and local distributors. The core agreements are available on the same basis from the depositary.

Shareholder notices include annual shareholder meetings and notices of prospectus changes, the mergers or closings of funds or share classes (along with the rationale for the decision), and all other items for which notice is required.

Audited annual reports are issued within four months of the end of the financial year. Unaudited semi-annual reports are issued within two months of the end of the period they cover.

Information on past performance, by fund and share class, appears in the applicable KID and on [fidelityinternational.com](https://www.fidelityinternational.com).

Fidelity, Fidelity International, the Fidelity International logo and symbol are trademarks of FIL Limited.
