Rationale for and Impact of the Changes

We propose to change the Fund's investment strategy from its more traditional balanced asset allocation approach to an outcome based approach, with a wider investment universe and increased flexibility, aiming to generate income. The repurposed fund will be constructed from a wider universe of Pan-European asset classes, including investment grade bonds, high yield bonds, equities, as well as alternative investments, such as loans, infrastructure securities and REITS. The Fund will have flexibility to invest a maximum of 20% of its assets outside of Europe and will be managed with a focus on protecting capital.

The Fund may invest less than 30% in hybrid bonds including contingent convertible. Less than 20% of the net asset value will be invested in contingent convertible bonds, which are hybrid bonds with loss-absorption features and typically include terms and conditions specifying that the instrument is subject to being written off, written down, or converted to ordinary shares on the occurrence of a trigger event (i.e. when the issuer, or the resolution entity if the issuer is not a resolution entity, is near or at the point of non-viability; or when the issuer's capital ratio falls to a specified level).

The change to a more dynamic asset allocation strategy and broader universe of investments allows the Investment Manager to better respond to market changes to support the goal of providing an income yield.

Due to the way the Fund is managed and invests, the portfolio rebalancing will take place within a period of five Business Days after the Effective Date.

In addition to the above, the Investment Manager may allocate a portion of assets of the Fund to be managed by Geode from time to time and shall remain responsible for the investment of the remainder of the asset of the Fund. In any event, the portion of the assets of the Fund managed by Geode will never exceed 30% of its net asset value. The obligations of the Investment Manager to the Fund are unaffected by any such delegation.

Geode was founded in 2001 and as at 31 December 2017 had assets under management of approximately US\$359 billion. It is registered with the United States Securities and Exchange Commission as an Investment Adviser and has been so registered since 17th May 2002.

We believe this appointment will facilitate the ability to deliver strong risk-adjusted returns through reducing unwanted style biases, targeting specific risk factors more efficiently and enhancing returns. We believe that this flexibility will help improve portfolio outcomes and diversification, in line with our aim to continually seek the best outcomes for investors.

Your attention is drawn to the importance of reading the information set out in the investment policy of the Multi Asset Funds together with the investment objective of each Multi Asset Fund.

The Board believes that the Changes are in the best interests of Shareholders.

Fund risk factors:

In view of the Changes, the Fund may be subject to additional/increased investment risks including but not limited to risks relating to investments in real estate related assets, emerging markets risks, investments in loans, investing in hybrid bonds with loss-absorption features and risks relating to income-producing securities. This reflects the change in investment objective to allow investments into emerging market debt and real estate related assets.

For further information, you are recommended to read Part I, 1. Fund Information, 1.2. Risk Factors in the Prospectus.

There are no other impacts that may materially prejudice the existing Shareholders' rights or interests as a result of the Changes outlined above.
